A C K N O W L E D G M E N T S

Modern Chess Openings, 15 ed., is a task too large for one person, even though I spent more than a year of long hours on this revision. The following people were essential to completing this book.

Grandmaster John Fedorowicz

Contributed the long chapter on the Slav and Semi-Slav Defenses. Included now is a new section on the trendy 4 . . . a6. John also advised on several Indian Defenses, particularly the Benko Gambit (his specialty).

International Master Justin Sarkar

Wrote the chapter on the King's Indian Defense. This complicated and fashionable opening has received excellent coverage here. The changing trends required considerable restructuring of the tables.

International Master Yuri Lapshun

Revised the Grunfeld Defense. Yuri duly immersed himself into the intricacies of this sharp defense.

John MacArthur

Contributed suggestions and helped with database issues.

Many thanks to Random House editor Helena Santini who saw this project through from start to finish. Special thanks to Scott Knoke for his care in copyediting this book.

—NICK DE FIRMIAN
December 2007

INTRODUCTION

Modern Chess Openings (MCO) is a one-volume reference book covering all the chess openings. It has been the standard English language work on openings for almost a century—the first edition came out in 1911, written by Griffith and White. Subsequent editions were written or edited by others as the tradition passed down. Notable were the sixth and tenth editions, fine works by Fine and Evans (respectively) which helped earn this book the nickname “The Chess Player’s Bible.” The first edition was a much smaller book, with shorter chess variations. Chess theory has developed immensely since then and continues to change every year as the world’s best players constantly find new strategies.

This book seeks to give the reader a clear and concise presentation of whichever chess openings he or she chooses. The book is divided into six sections of major openings groups, each section containing chapters of the specific openings (or major variations of the openings). The chapter introductions give an overview of the strategic concepts and some historical information. The major content of the book is the tables and notes of chess variations. The best play (as is currently known) is usually the main variation, and sidelines are either clever traps and tricks that are good to know, interesting but little tested plans, or enticing mistaken strategies along with their refutations. Some pages are dense material, reflecting the current focus on these openings, while others are less dense and more suitable for beginners.

The previous edition, MCO-14, was written in 1999. This first edition of the twenty-first century reflects the changes that have occurred in the openings along with the fundamental change brought on by the great progress of computer chess programs. The best programs are on a par with the world’s best players. Human players are better at strategic thinking, planning, and imagination in chess. Computers well surpass their human counterparts in raw calculation and have the advantage that they never overlook a tactical opportunity. The chess openings herein are often the result of collaborative work between the humans and computers. The human grandmasters provide the plan, while the computer checks the variations for tactical accuracy.

MCO-15 was compiled from many source materials. The most important though was the raw games of the top players from many, many tournaments around the world. These were analyzed (sometimes by the players themselves) and checked with a computer program. Other important sources were the many books on specific chess openings along with

magazines, especially *Chess Life* and *New in Chess*. Lastly, commentary on the Internet Chess Club was also a source of ideas.

EXPLANATORY NOTES

The symbols used to evaluate the variations are:

- ± White has slightly better chances.
- ⊖ Black has slightly better chances.
- ± White has a distinct superiority, although there is no immediate forced win.
- ⊖ Black has a distinct superiority, although there is no immediate win.

Positions in which one side or the other has a winning game are expressed in words.

- = The position offers equal chances.
- ∞ The position is unclear, with judgment reserved, or open to further experimentation. While this is used in murky positions, these positions are probably offering equal chances.
- † Check
- ! Good or excellent move
- ? Bad or weak move
- !? Acceptable move, but open to further research
- ?! Speculative attempt to complicate
- Chp. Championship
- corr. Correspondence
- Int. Interzonal
- Ol. Olympiad

TIPS FOR THE NOVICE

A chess player first starts to become serious about the game when he or she reads a book on chess. While his/her first book should be a primer on general strategy, soon after the player needs to learn a few chess openings. *Modern Chess Openings*, 15 ed., may look large and difficult, but it is easy to use even for the novice if he/she chooses simpler openings to begin with.

A player needs to have openings for playing both White and Black. As White, choose one first move, usually 1 e4, 1 d4, or 1 c4. If, for example, you choose 1 e4, you will need to learn replies to Black's common responses, 1 ... e5, 1 ... c5, 1 ... e6, etc., but there is no need to learn them all at once. If the people you play with reply only 1 ... e5 then just look up that. Choose one 1 e4 e5 opening, such as the Evans Gambit, and decide which lines to play among White's choices. This way you learn what is useful to you with a minimum of effort. Again, you may have to learn something of other openings such as the Two Knights' Defense or Philidor's Defense if Black plays different second or third moves, but learn this as necessary. As Black, choose a defense to both 1 e4 and 1 d4. The Center Counter Defense (1 e4 d5) and the Tarrasch Defense (1 d4 d5 2 c4 e6 3 Nc3 c5) are simple openings to play and learn, and the Tarrasch can also be played against 1 c4 (1 c4 e6 2 Nc3 d5 3 d4 c5 is the same).

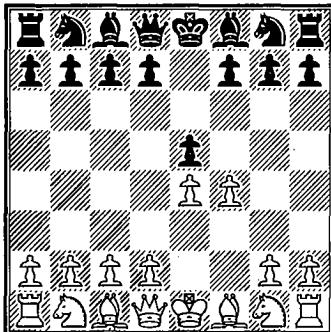

As you become more involved with chess openings you may want to choose more involved and complex variations to study. These are often the objectively best lines and also highly interesting.

I

DOUBLE KING PAWN OPENINGS

KING'S GAMBIT

1 e4 e5 2 f4

THE KING'S GAMBIT seeks to clear away Black's central pawn to build his (her) own dominating center. The possibilities on the open f-file and mating attacks against f7 have resulted in many brilliant victories for the White side. In the early 1600s Gioacchino Greco won many wonderful games, giving the opening a strong reputation. The view that the King's Gambit was a bold, courageous, and sound opening persisted for more than two more centuries.

The mid-nineteenth century brought a dawning awareness that some gambit lines were probably unsound, more likely to lead to a forced loss than a forced win. Players then began to seek positional rather than tactical benefits from an opening. By the time of the first official World Championship match between Steinitz and Zuckertort in 1886 the King's Gambit was already in eclipse; the six World Championship matches played between 1886 and 1896 featured only a single King's Gambit.

In the twentieth century chess saw a great leap in positional understanding, such as seen in the rigorously sound play of the great World Champion José Capablanca. Capablanca and others were disdainful of the speculative King's Gambit and regard for the opening sank further. Bobby Fischer's famous article from the 1960s "A Bust to the King's Gambit" should have put the opening to rest, yet the opening has refused to die. There are always adventurous tactical players who revel in the wild positions that occur. Many of the greatest players of the twentieth century found occasion to use it—Alekhine, Keres, Tal, Fischer (despite his article) and Spassky, who scored truly brilliant victories with it. In the early twenty-first century most grandmasters use the King's Gambit only as a surprise weapon, though Fedorov still makes regular use of it. Players cannot count on an opening advantage with the King's Gambit, but they can certainly count on a lively game where often both kings come under fire.

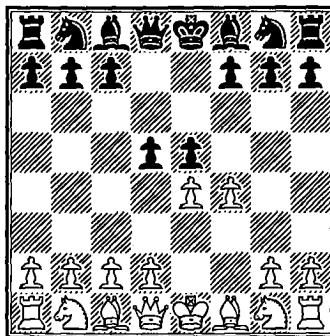

Black has four ways to react to 2 f4: (1) accept and hold the pawn; (2) accept and return the pawn; (3) decline the pawn; (4) offer a counter-gambit.

Columns 1–24 deal with 2 ... exf4. The first six columns cover 3 ... g5, supporting the f4 pawn and taking kingside territory. These columns include the Kieseritzky, Philidor, Hanstein, and Muzio lines, of which the Kieseritzky Gambit sees more use today.

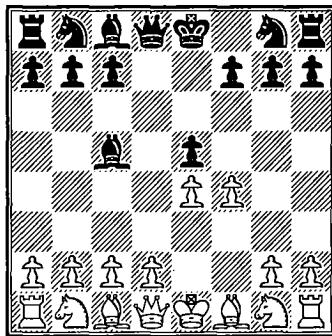

Black's less usual third moves are the subject of columns 7–12. They include 3 ... d6 (the Becker Defense), 3 ... Ne7, and 3 ... Nf6. The first two of these are particularly reasonable choices.

Black returns the pawn immediately with 3 ... d5 4 exd5 (columns 13–16). With 3 ... Be7 (columns 17–18) Black prepares to deliver check on h4.

Moves other than 3 Nf3 are covered in columns 19–24, including the King's Bishop Gambit, 3 Bc4 (columns 19–20). In these lines White allows ... Qh4†, but the check is double-edged since the black queen may lose time retreating.

Black refuses the pawn and gambits one himself with the vigorous 2 ... d5, the Falkbeer Counter Gambit (columns 25–30), see above diagram. The reasoning is to quickly develop and highlight the weakening of White's kingside from 2 f4. Both 3 ... e4 and Nimzovich's 3 ... c6 are investigated. The choice of this counter-gambit may be for psychological or stylistic reasons. Some players love to have the initiative, and it can be unsettling to have to defend a pawn up instead of attacking a pawn down.

The King's Gambit Declined is covered in columns 31–36. The usual move to decline the gambit is 2...Bc5, see above diagram (columns 31–35), as White would lose immediately after 3 dxe5? Qh4†. Declining the gambit avoids wild tactics and complications, but gives White more chances for the advantage than the gambit accepted lines.

KING'S GAMBIT

- (d) 9 Qe2 Nc6 10 c3 Bf5 11 Nd2 0-0-0 12 0-0-0 Re8 ≈, Hurt-Baca, corr. 1988.
- (e) After 12 Na3 Nd7 13 Nb5 chances are about even, Wortel-Jenni, Slovakia 1996.
- (f) 6 . . . d6 7 Nxg4 Bxg4 8 Qxg4 Bxd4 9 Nc3 ≈ (Euwe).
- (g) 8 . . . Ng3 9 Bxf4 Qe7† 10 Kd2 Nxh1 11 Nd5 Qxh4 12 Qe1† ≈ (Corde).
- (h) After 12 Qh5 Qf6 13 Bg5 Qg6 14 Qxg6 hxg6 15 Bc4, White has a big edge (Glazkov).

- (i) 7 Nf2 Rg8! 8 d4 Bh6 9 Nc3 Nc6 10 Nd5 Nxd5 11 exd5 Qe7† 12 Be2 Nb4 13 c4 Bf5! 14 Qa4† Kf8 15 Qxb4 Re8 16 Qd2 Rxg2 17 Kf1 Rg3 18 Qd1 Be4 \mp , Fedorov–Shirov, Poland 2000.
- (j) 8 ... c6 9 Qf3 Rg8 10 Qf2 Bg4 11 d3 Bh6 12 Ne2 is roughly equal, Nunn–Timman, Amsterdam 1995.
- (k) 12 Qf3 Bh6 13 Qf2 Rb8! 14 Ne2 Rxb2 15 Bxb2 Qxb2 16 0-0 Qxc2 =, Fedorov–M. Carslen, Dubai 2004.
- (l) It is too slow to halt Black's kingside advance with 4 h3. Murey–Kosashvili, Tel Aviv 1999, continued 4 ... Nc6 5 Nc3 Bg7 6 d4 d6 7 Bc4 h6 8 a3 Nf6 9 0-0 0-0 10 Re1 Nh5 \mp .
- (m) 7 hxg5 hxg5 8 Rxh8 Bxh8 9 Nc3 Nc6 probably favors Black.
- (n) There are other tries here: (A) 8 ... g4 9 Nh2 (9 Bxf4 is also interesting) 9 ... f3 10 gxf3 Qxh4 11 f4 is even. (B) 8 ... Bd7! 9 Qb3 Qe7 10 Qxb7 Rb8 11 Qa6 g4 12 Nh2 f3 \mp , Dimitrevic–Abramovic, Belgrade 2002. White should try 12 Nfd2.
- (o) 12 Qxa5 Bxf3 13 Rxf3 c5 is an equal position (Malich).
- (p) 7 g3?! Bh3 8 Rf2 Nc6 9 Bb5 fxg3 \mp (Levenfish).
- (q) 7 ... Nf6 is quite playable here. After 8 e5 dxe5 9 Nxe5 0-0 10 Qb3 Qe8 11 Ng6 b5 12 Bxb5 Qe4 there are chances for both sides, Blackburne–Mason, London 1892.
- (r) 8 g3?! Bh3 (8 ... g4 9 Nh4 f3 10 Na3 Bf6 11 Nf5 Bxf5 12 exf5 d5 \approx) 9 gxf4 Bxf1 10 Qxf1 gxf4 11 Bxf4 Qf6 12 Bg3 0-0-0 \mp , Di Paolo–Dervishi, Genoa 2000.
- (s) The game Halasz–Groszik, Poland 1986 proceeded 12 Bb2 Rad8 13 Rae1 Nd7 14 b5 Nb8 15 e5 Rfe8 16 Ba3 and White had compensation for the pawn in a sharp position.
- (t) Other moves are possible here. 5 Ne5 (The Salvio Gambit) is interesting. After 5 ... Qh4† 6 Kf1 Nc6 7 Bxf7† (7 Nxf7 is too dangerous) 7 ... Ke7 8 Nxc6† dxc6 9 Bb3 Nf6 10 d3 the position is approximately even. 5 Bxf7†, 5 Nc3, and 5 d4 have all been played in the past but are now relegated to the dustbin of history.
- (u) 8 Bxf7† Kxf7 9 d4 Qf5 10 g4 Qg6 11 Bxf4 Nf6 \mp .
- (v) After 12 Nd5 Kd8 13 Qe2 Qe6 14 Qf2 Qf5 it's a draw. Black can try to deviate on move 13 with either 13 ... b5 or 13 ... Ng6, but White's resources are adequate to hold the balance.

KING'S GAMBIT

1 e4 e5 2 f4 exf4 3 Nf3

	7	8	9	10	11	12

- (a) On 4 Bc4 h6 5 d4 (5 h4 Nf6 6 Nc3 Be7 7 d3 Nh5 \mp , Westerinen–Thinius, Gausdal 2003) 5 ... g5 6 g3 g4 7 Nh4 f3 8 Nc3 (Jonkman–Pegorari 2002); now 8 ... Be7 is complicated, probably favoring Black.
- (b) 6 ... Nf6 7 Bxf4 Nxe4 8 Bd3 Qe7 9 Ne2 Bf5 10 0-0 Qxh4 11 Nbc3 Nxc3 12 Nxc3 Be6 13 g3 Qh5 14 Bb5† Kd8 =, Eames–Thipsay, London 2001. White has play for the two pawns.
- (c) 9 Qd3 Na6 10 e5 dxe5 11 Ne4 Qd8 offers equal chances, Day–I. Ivanov, Canada 1986.
- (d) 9 ... f3 10 Nf4 Qe7 11 Bd3 Bg7 12 Be3 \pm , Gallagher–Sh. Jackson, Blackpool 1988.
- (e) 11 Rxc1 Ne7 12 Qd2 h5 13 Bg2 Qh6 is roughly equal, Henris–Revesz, Budapest 2006.
- (f) 9 d5 Bg7 10 Bc4 Nbd7 11 h5 0-0 \mp , Fedorov–Gyimesi, Pula 2001. The position is quite confusing though, which gives both sides chances.
- (g) 10 Be5?! c6 11 Nge2 Be6 12 Nf4 Bf7 led to a big edge for Black in Hector–Leko, Copenhagen 1995.
- (h) 11 Nc3 c6 12 Bxa6 bxa6 13 Nge2 (Leko) is a murky position with chances for both sides.
- (i) 3 ... f5 is sometimes played. After 4 e5 d6 (4 ... d5 5 h4 Be7 6 d4 Nh6 7 Bxf4

$\text{Ng4 8 Nc3 } \pm$, Gunsberg–Swiderski, Vienna 1903) 5 Qe2 Be7 6 d4 Nc6 7 Bxf4
White is clearly better, Bronstein–Drozov, Riga 1986.

- (j) 5 Qe2 Ng6 6 h4 h5 7 Nc3 dxe4 =, Gallagher–Gunnarsson, Istanbul 2000.
- (k) This is better than the older 6 ... Ng6 7 h4 h5 8 Bc4 Qe7 ∞, Nadyrkhanov–Nenashev, Tashkent 1988.
- (l) 7 Bd3 Be7 8 c4 Ne3 9 Qe2 Bg4 10 Bxe3 fxe3 11 0-0-0?!. (11 Qxe3 Bxf3 12 gxf3 Nc6 13 d5 Bh4† 14 Ng3† Qe7 is about equal) 11 ... Nc6 12 d5 Ne5 13 Qxe3 Nxd3† 14 Rxd3 0-0 15 Ne5 Bf5 ≠, Gallagher–Malaniuk, Elista Ol. 1998.
- (m) 11 Nd3 N7f6 12 Nxf6† Bxf6 13 c3 =, Zelic–Ciganovic, Croation Chp. 2006.
- (n) 4 ... Ne4 5 d3 Ng5 6 Bxf4 Nxf3† 7 Qxf3 d6 8 Be2 ±, Arnason–I. Zaitsev, Sochi 1980.
- (o) 5 ... g6 6 d4 Bg7 7 0-0 d6 8 Nc3 0-0 9 Nd5 dxe5 10 dxe5 Nc6 is equal according to Korchnoi.
- (p) 7 ... Qd4† 8 Kh1 Nf6 9 Nd3 Bd6 10 c3 ±.
- (q) 9 ... Nbd7 10 Nxd7 Bxd7 11 d4 Bd6 12 Bxf4 Bxf4 13 Rxf4 0-0 14 Bd3 ± (Zak).
- (r) (A) 5 ... g5 6 g4 when 6 ... fxe3 7 Qg2 and 6 ... Ng7 7 h4 led to murky positions in which White has compensation for the lost material. (B) 5 ... g6 6 d4 Be7 7 g4 fxe3 8 Nc3 0-0 9 Bh6 is similar. (C) 5 ... d5 6 exd6† Be6 7 Qb5† ±.
- (s) Another promising line is 6 Nc3 Bh4† 7 Kd1 0-0 8 Qe4.
- (t) 6 ... Bh4† 7 Kd1 0-0 8 g4 fxe3 9 Qg2 Be7 10 hxg3 with a huge White advantage, Randviir–Tepaks, Tallinn 1946.
- (u) Possible is 7 Nc3 d6 8 Bd2 dxe5 9 dxe5 Be6 10 0-0-0 Nc6, Malinin–Razvalyaev, corr. 1992, which is slightly in White's favor.
- (v) Risky is 8 hxg3 Nxg3 9 Qh2 Nxh1 10 Bd3 f5.
- (w) 10 Nh2 Nxg3 11 Rg1 Bf5 12 Nf3 Nh5 is unclear.
- (x) After 11 Nxe5 Qxd4 12 Bf4 the position is much better for White (Klaus Junge).
- (y) 6 c4 g6 7 cxd5 Qxd5 8 Nc3 Bb4 9 Bd2 Bxc3 10 bxc6 Nc6 =, Feleter–Sasikiran, Dos Hermanos (blitz) 2005.
- (z) 6 ... Bg4 7 0-0 Nc6 8 c3 g6 9 Ne1 Bxe2 10 Qxe2 ±, Bhend–Pachman, Kecskemet 1964.
- (aa) 11 Qd3 Rg6 12 e6 Nc6 13 Ne5 Nxe5 14 Qb5† c6 15 Qxe5 is wild though should favor Black, Iuldechev–Sasikiran, Penta 2000.

- (a) Neither 6 Bc4 Nxc3 7 bxc3 Bd6 nor 6 Bb5† c6 7 Qe2† Be6, nor 6 Qe2† Be7 7 Qe4 lead to anything for White.
- (b) Alternatives here tend to favor White, e.g. 7 ... Bg4 8 Bxf4 Nc6 9 Bxc7 Kd7 10 Bg3 Re8† 11 Kf2 ±, Barle–Mariotti, Portorož 1975, or 7 ... g5 8 c4 Bb4† 9 Kf2 Qd8 10 c5 ±, Provotorov–Svirin, Moscow 1980.
- (c) 8 c4 Qe4† 9 Kf2 Bf5 10 c5 Nc6 11 Bb5 (Bednarek–Godena, Warsaw 2005); now 11 ... Bg4! is a slight edge for Black.
- (d) 9 c4 Qe6† 10 Kf2 0-0 11 Re1 Qf6 ≈ (Sokolsky).
- (e) White has compensation for the pawn, but no more.
- (f) 5 ... Bd7 6 Bxd7† Qxd7 7 c4 Bd6 8 Qe2† ±, Matuka–Cleemann, corr. 1989.
- (g) 6 ... bxc6 may be playable, but 7 Bc4 Nd5 8 Nc3 Nb6 9 Bb3 Bd6 10 0-0 gives an edge for White (Glazkov).
- (h) 7 ... Qa5† 8 Nc3 Bb4 9 0-0 0-0 10 Bxc6 Bxc3 11 bxc3 bxc6 12 Bxf4 Qxc3 =, Moger–Godena, Calvia Ol. 2004.
- (i) 11 Bxc6 bxc6 12 0-0 (12 Qxe6†? Kh8 13 0-0 f3 14 Rxf3 Re8 ±, Holzvogt–Schreiber, corr. 1968) 12 ... Qc7 is equal.
- (j) (A) 6 dxc6 Nxc6 7 d4 Bg4 8 d5 Bxf3 9 Qxf3 Ne5 10 Qxf4 Bd6 =, Zlabari–Hammermeister, Leverkusen 2001. (B) 6 Nc3 cxd5 7 cxd5 Bd6 with an easy game for Black.

- (k) 6 . . . cxd5 7 c5 Nc6 8 Bxf4 Be7 9 Nc3 0-0 10 Bb5 Ne4 = (Keres).
- (l) 8 Bd3 Qe7† 9 Kf2 Bxc3 10 bxc3 Ne4† is advantageous for Black, Kristiansen–Pachman, Eckenfjerde 1974.
- (m) 9 c5 Ne4 10 Qc2 Re8 11 0-0-0 Qa5 gave Black a strong attack in Gabers–Truta, Yugoslavia 1978.
- (n) After 11 Bxd5 Qxd5 12 0-0 Bxc3 the game is level.
- (o) (A) 5 Bb5† c6 6 dxc6 Nxc6 7 d4 Nge7 =, Ree–Short, Wijk aan Zee 1986.
 (B) 5 Nc3 Ne7 6 d4 Nd7 7 Bd3 Nb6 8 0-0 Nbx5 9 Nxd5 Nxd5 10 c4 Nb4 11 Re1† Be6 12 Bf5 0-0 = (Shirov).
- (p) 5 . . . Nf6 6 c4 Bg4 7 Bd3 0-0 8 0-0 b6 9 Qc2 c5 10 b4! ±.
- (q) 7 Bd3 is an excellent alternative. After 7 . . . 0-0 8 0-0 c5 9 b4 b6 10 bxc5 bxc5 11 Nc3 Bg4 12 Ne4 White held an edge in Hebden–Johansen, London 1982.
- (r) The game Gallagher–Ballard, Paris 1990, continued 11 Nb5 Be7 12 d5 with White having a small advantage.
- (s) The other way is 4 . . . Bh4† 5 Kf1 (5 g3 is an adventurous alternative) 5 . . . d6 6 d4 Bg4 7 Bxf4 Qf6 8 Be3 Ne7 =, Taddel–I. Sokolov, France 2006.
- (t) (A) On 5 Nc3 Nxe4 is more than adequate for Black. (B) 5 d3 d5 6 exd5 Nxd5 =. (C) 5 Qe2 0-0 6 d4 d5 =.
- (u) 6 Nc3 d6 7 exd6 Bxd6 8 Qe2† Qe7 9 Qxe7† Kxe7 10 0-0 f6 and White has play for the pawn (Lepeshkin).
- (v) 11 Ng5 0-0 12 Bxf4 Nf5 =, Fedorov–Radulski, Linares Open 2002.
- (w) 4 . . . Nf6 is again the alternative. White then has (A) 5 e5 Ng4 6 d4 Ne3 7 Bxe3 fxe3 8 Bc4 ±, Spassky–Kholmov, Moscow 1964, or (B) 5 d4 d5 6 Bd3 dxe4 7 Nxe4 Nxe4 8 Bxe4 Bd6 9 0-0 Nd7 10 c4 c6 = (Lepeshkin).
- (x) 5 . . . c6 6 d4 d5 7 Bxf4 dxе4 8 Nxe4 Qe7 9 Qd3 Bf5 10 Be5 Bxe4 11 Qxe4 Bf6 12 Re1 is a slight pull for White.
- (y) 8 e5 Qa6† 9 d3 Bg4 10 Bxf4 Nc6 is about even (Euwe).
- (z) After 11 Kd1 0-0-0 12 Kc2 Rhe8 13 Bd3 Bxf3 14 gxf3 Nxd4† 15 cxd4 Rxd4 16 Qc3 the position was approximately even in Gallagher–Klovans, Oberwart 1993.

GIUOCO PIANO

1 e4 e5 2 Nf3 Nc6 3 Bc4 Bc5

CENTURIES AGO, the Italians dubbed these three classical moves as the GIUOCO PIANO, which translates to quiet (or soft) game. In some countries it is called instead the Italian Game. It is true that this logical development is initially calm compared to some of the wild gambits of the other chapters, yet the game can certainly become lively if the players choose the aggressive lines. White's play may look straightforward and simple to modern eyes—just develop the pieces and castle. There are certainly tactics though in the lines with 4 c3 and 5 d4, and the slower lines (delaying the confrontation in the center) have subtleties in the strategic buildup. The opening is not as complex as the Ruy Lopez; still many of the world's best players (Kramnik, Gelfand, Ivanchuk) use the opening occasionally, and several lesser grandmasters use it routinely.

Black's 3 . . . Bc5 in answer to 3 Bc4 is an attempt to retain parity in the center. If White is to achieve control and/or occupation of d4 he will have to fight for it. Black is trying to keep the balance rather than counterattack immediately, as in the Two Knights' Defense.

The first six columns cover the "action" variations where White plays 4 c3 and 5 d4. Column 1 is the old main line, which peters out to equality. The Möller Attack is 4 c3 Nf6 5 d4 exd4 6 cxd4 Bb4† 7 Nc3 (columns 3–5), in which White offers a pawn for open lines and development. Black has a variety of defenses in this wide-open position, but most reliable is 7 . . . Nxe4 8 0-0 Bxc3 (columns 3–4). Column 6 is a reasonable continuation to get a complex, open, though equal position.

White avoids immediate central action in columns 7–12. Here the game sees less tactics in the beginning and allows for a strategic buildup. This is the continuation favored by most grandmasters when they play the Giuoco Piano. There is scope for different plans from a queenside pawn advance to maneuvering for kingside play. Black will gain equality with

good play so the outcome of the game will be decided in the middlegame and endgame rather than a quick win from sharp opening theory. One can learn from the opening theory when/if to play . . . a6 as Black, when to break in the center with the d-pawn, and other positional subtleties.

Columns 13–18 are less usual lines. 4 c3 is still the subject of cols. 13–15, but these are less usual or straightforward strategies. Columns 16–17 see the simple 4 Nc3, a move which many beginners play. It is nonetheless a logical developing move and even grandmasters will employ it and win as shown by Nigel Short.

- (a) 7 . . . Nxе4 is also reasonable here. After 8 Bxb4 Nxb4 9 Bxf7† Kxf7 10 Qb3† Kf8 (10 . . . d5 can be played) 11 Qxb4† Qe7 12 Qxe7† Kxe7 the game is equal, Wedberg-Korman, Sweden 1978.
- (b) 8 . . . Nxе4 9 d5 Nxd2 10 Qxd2 Ne7 11 d6 cxd6 12 Qxd6 is a promising gambit suggested by Keres.
- (c) 10 0-0 0-0 11 Ne5 Nxd4 12 Nb3 Nxb3 13 Bxd5 Qf6 (13 . . . Nxa1 14 Bxf7† Kh8 15 Qh5 h6 16 Rd1 ±) 14 Bxf7† Rxf7 15 Qxb3 =, Khasin-Zagorovsky, USSR 1955.
- (d) 10 . . . Nce7 11 0-0 0-0 12 Rfe1 c6 =, van der Wiel-Karpov, Amsterdam 1980.
- (e) 14 0-0 (Zelcic-Mamedyarov, European Chp. 2001), now 14 . . . Nxе5 = is simplest.
- (f) 7 . . . Nxе4 8 d5 Ne7 9 Qd4 Nf6 10 Bg5 gave White a terrific attack in Marshall-Burn, Ostende 1905.
- (g) 10 Qb3 Na5 11 Qa4† Bd7 12 Bb5 Nxc3 ± (Levenfish).
- (h) 14 Rc1 Qd7 ±, Bartmansky-Butik, corr. 1910, since no good is 15 Bxd5 Qxd5 16 Rc5 Qxa2.
- (i) 8 . . . Nxc3 9 bxc3 d5 (9 . . . Bxc3 10 Ba3! ± Keres) 10 cxb4 dxc4 11 Re1† Ne7 12 Bg5 f6 13 Qe2 Bg4 (13 . . . fxg5 14 Qxc4 ± Keres) 14 Bf4 Kf7 15 Qxc4† ± (Sakharov).

- (j) 9 bxc3 d5 10 Ba3 dxc4 11 Re1 Be6 12 Rxe4 Qd5 13 Qe2 0-0-0 14 Ne5 Rhe8 is good for Black, Steinitz–Lasker, St. Petersburg 1896.
- (k) Alternatives are: (A) 9 ... Ne7 10 bxc3 0-0 11 Re1 Nd6 12 Bd3 h6 13 c4 \pm , Demuth–Loonnides, Szombathely 1991. (B) 9 ... Ba5 10 dxc6 bxc6 11 Ne5 Nd6 12 Qg4 \pm (Möller). (C) 9 ... Nd6 and (D) 9 ... Na5 also fail to equalize.
- (l) 11 ... 0-0 is reasonable here. After 12 d6 cxd6 13 Bg5 (13 Qxd6 Nf5 14 Qd5 Ne7 and now 15 Qd6 Nf5 repeats the position, otherwise White allows ... d5.) 13 ... Ng6 (13 ... Bxg5 14 Nxg5 d5 15 Bxd5 Nxd5 16 Qxd5 h6 17 Nxf7 Rxf7 18 Rae1 Qf6 19 Re7 Qxf2† 20 Kh1 g5 21 Rxf7 Qxf7 22 Re8† is drawn—Botterill) 14 Qd5 with roughly equal chances.
- (m) 12 g4 0-0 13 g5 Be5 14 Nxe5 Bf5 15 Re3 dxe5 16 Rxe5 Qd7, Rufenacht–Smit, corr. 1991. Black is better.
- (n) If instead 13 ... 0-0 14 Nxh7 Kxh7 15 Qh5† Kg8 16 Rh4 f5 17 Be2!? Ng6 = (17 ... Bd 18) Qh7† Kf7 19 Rh6! wins, Abdullah–Gokhale, Cainhill Open 2003). After 13 ... h6 there is: (A) 14 Qe2 hxg5 15 Re1 Be6 16 dxe6 f6 (16 ... f5 17 Re3 g4 18 h3 d5 19 Bd3 c6 20 hxg4 Qd6 \mp , L. Vega–de la Paz, Cuba 1996) 17 Re3 c6 18 Rh3 Rxh3 19 gxh3 g6 with perhaps a small edge to Black, Hardarsson–Livshits, Olomouc 2001. (B) 14 Bb5† Bd7 15 Qe2 Bxb5 16 Qxb5† Qd7 17 Qe2 Kf8 \mp , Zafirov–Masse, Quebec 2003.
- (o) (A) 11 ... Ncd6 12 Qxg7 Qf6 13 Qxf6 Nxf6 14 Re1† Kf8 15 Bh6† Kg8 16 Re5 Nfe4 17 Re1 \pm , Durao–Ferrara, Seville 1994. (B) 11 ... f5 12 Qxc4 d6 13 Nd4 0-0 14 f3 Nf6 =, Schlechter–Mertner, Vienna 1899.
- (p) 12 ... b5 13 a4 c6 14 axb5 axb5 =, Dzindzichashvili–Karpov, Mazatlan 1988.
- (q) Leygue–Flear, France 2003. Now 14 Qg3 with the idea of 15 Bg5 will gain White almost enough compensation for the pawn.
- (r) 7 ... 0-0 8 e5 Ne4 9 0-0 Bxc3 10 bxc3 d5 \pm .
- (s) Also reasonable is 9 ... Nxc3 10 bxc3 Be7 11 Re1 0-0 12 Ne5 Nxe5 13 Rxe5 Bf6 14 Rh5 g6 =.
- (t) Also 11 Bxe7 Ncxe7 when both 12 Ne4 and 12 Qb3 give White an edge (Keres).
- (u) 14 Re1 f6 15 Qe2 Qd7 16 Rac1, Steinitz–Von Bardeleben, Hastings 1895; now 16 ... Kf7 would have been unclear after 17 Ne5† or 17 Ng5†. Romanovsky suggested 16 d5, after which 16 ... Kf7 17 Rad1 Rad8 18 Qe6† Qxe6 19 dxe6† Kg6 allows chances for both sides.
- (v) 6 0-0 Nxe4 7 cxd4 d5 8 dxc5 dxc4 9 Qe2 (9 Qxd8† Kxd8 10 Rd1† Bd7 \mp) 9 ... Qd3 10 Re1 f5 =, Birolek–Keitlinghaus, Ostrava 1993.
- (w) (A) 8 ... Be7 9 Nc3 0-0 10 Bd3 f5 11 exf6 \pm , Steinitz–Lasker, New York 1894. (B) 8 ... Bb4† 9 Nbd2 0-0 10 Bxc6 bxc6 11 Qc2 c5 12 0-0 \pm , Rayo–Yanez, Madrid 1989.
- (x) 10 Bxc6 bxc6 11 Be3 f5 12 exf6 Qxf6 13 Qb3 Qg6 =, Rowson–I. Sokolov, Selfoss 2002. The column is Macieja–Aronian, Anatalya 2003.

EVANS GAMBIT

1 e4 e5 2 Nf3 Nc6 3 Bc4 Bc5 4 b4

THIS BOLD GAMBIT immediately livens the game by offering a wing pawn to gain time for development and attacking the center. It was popularized in the 1830s by Captain W.D. Evans and used extensively by Morphy to score many brilliant victories. Yet by the twentieth century the verdict had been that the Evans Gambit was simply a tricky plan that allowed a good defence with equal chances at least, and probably more. While the wins for Black in the endgames were not glamorous like White's brilliant attacking victories, they were wins nonetheless and a more likely result. This verdict changed in 1995 when Kasparov took up the opening for two games and there was quite a revival of interest in it. Enterprising attacking players took it up and the Evans' glory days returned for a while. The defenses now have been reviewed and Black is theoretically fine, but open and lively games result.

Columns 1–4 cover the acceptance of the gambit and the retreat of the bishop to a5. White can choose between 6 0-0, column 1, allowing the Lasker Defense, and 6 d4 (columns 2–4), which includes the Compromised Defense, 7 ... dxc3, the Half-Compromised Defense, 7 ... Nge7, and 6 ... d6. If Black plays 5 ... Be7, then he must reckon with the line revived by Kasparov—7 Be2 and 8 Qxd4. Column 6 is the gambit declined, a seemingly safer line that nonetheless has some pitfalls.

TWO KNIGHTS' DEFENSE

1 e4 e5 2 Nf3 Nc6 3 Bc4 Nf6

BLACK ISSUES A CHALLENGE with his/her third move when playing the Two Knights' Defense. Already White is confronted with the choice of winning a pawn and entering complex play or allowing Black to get away with provocative play. This bold choice of opening can be psychologically motivated to draw the opponent into battle, as a statement that peaceful simple play will be avoided.

The Two Knights' is one of the oldest of openings, dating to 1580 when it was subjected to analysis by Polerio. Its reputation through history has remained good with the leading masters. One hundred years ago the great Tarrasch called 4 Ng5 (the attempt to refute the opening) "ein stumper zug"—a beginner's move. White has developed two pieces and proceeds to crudely attack with them—obviously not correct strategy. Yet Steinitz believed otherwise and modern theory respects the gain of a pawn, though likewise acknowledging the gain of development Black obtains in return. Thus the critical line has mixed reviews, but Black will be happy then if he/she is seeking a fighting, unclear game. Grandmasters of aggressive temperament have never been afraid to use this defense, but calm, positional players of all strengths would probably prefer to play the Giuoco Piano.

The direct 4 Ng5 is the subject of columns 1–12. The most usual response is 4 ... d5 5 exd5 Na5 (columns 1–8). Columns 1–6 is the main line 6 Bb5† c6 7 dxc6 bxc6 8 Be2 h6, when White must decide on which square to retreat his knight to. 9 Nf3 (columns 1–4) allows ... e4 with the initiative, while Nh3 (columns 5 and 6) is on the side of the board and allows Black the opportunity to double White's pawns. Still, White is a pawn ahead and Black must show compensation for it. Columns 7 and 8 are lesser played lines after 5 ... Na5. Column 9 is the Fritz Variation, 4 ... d5 5 exd4 Nd4 (the Fried Liver Attack is covered in note (k)). The Ul-

vestad Variation (5 . . . b5) is column 10. The fantastic Wilkes-Barre Variation in which Black simply ignores the threat on f7 with 4 . . . Bc5 is seen in columns 11–12. These lines are for the adventurous.

White seeks development instead of material with 4 d4, the subject of columns 13–20. The Max Lange Attack, 4 . . . exd4 5 0-0 Bc5 is covered in columns 13–15, while 5 . . . Nxe4 is columns 16–18. The Max Lange leads to more complicated play, while 5 . . . Nxe4 tends to simplicity. White's attempt to avoid these lines with 5 e5 comprises columns 19–20. This line sees use from grandmasters, but Black's chances are reasonable. Columns 21–23 are an attempt by White to quiet the position with 4 d3. This is really quite a reasonable move, even if it looks as if it is played just to avoid complexities. Play can either transpose into a positional game of maneuver, or Black can try to liven the game up with an early . . . d5—though this is a little risky. Column 24 covers 4 Nc3, which allows Black to equalize pretty easily with 4 . . . Nxe4.

- (y) White's superior pawn structure is balanced by the bishop pair, Tartakower–Bogoljubow, Pistyan 1922.

RUY LOPEZ

1 e4 e5 2 Nf3 Nc6 3 Bb5

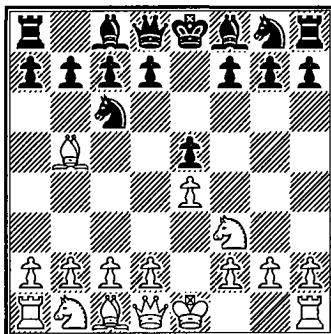

DESPITE BEING ONE OF THE MOST TOPICAL OPENINGS in the twenty-first century, the Ruy Lopez is one of the oldest openings. It dates to the fifteenth century, though it was named later after the Spanish priest Ruy Lopez, who was the first to treat the opening systematically in his *Libro del Ajedrez* of 1561. In Europe and South America it is called instead the “Spanish Game” in reference to its origins. Unlike the other early chess openings, the Ruy Lopez has become the mainstay for grandmasters in the double king pawn openings.

The strategy begun by White's third move, 3 Bb5, is logical and strong, so Black must play involved defenses to combat it. This causes the variations to be long and complex. The theory of the opening has evolved for five hundred years with analyses employing all the principles of chess strategy developed over the centuries. This makes for much to learn and long variations to remember if one is to play the opening successfully. For this reason many amateur players and even some professionals choose other openings (such as the Giuoco Piano) for their repertoire in order to save the effort of learning so much theory. One can minimize the study time by choosing one specific variation of the Ruy Lopez (lines without 3 . . . a6 are particularly easy to learn). The opening must be recommended though for players wishing to play the very best move, regardless if it is difficult. Learning some of the long variations also offers the reader examples of deep and original ideas discovered over the ages, and will present opponents with a difficult task to meet.

This chapter, like the Sicilian, is very large with many variations of different strategies. Therefore it is broken up into three subchapters to make the material more accessible to the reader. The subchapters are: (1) Systems without . . . a6; (2) Systems with . . . a6: Variants on Moves Four to Six (including the Exchange, Open, and Modern Steinitz Variations); and (3) Main Lines: Closed Systems and the Marshall Attack.

RUY LOPEZ—SYSTEMS WITHOUT . . . a6

1 e4 e5 2 Nf3 Nc6 3 Bb5

THE VARIATIONS WITHOUT . . . a6 are the oldest defenses to 3 Bb5. These are simpler to learn as Black because there are fewer variations and fewer options for White. They differ from being somewhat old fashioned (like the Old Steinitz) to sharp (like the Schliemann) to cutting edge (like the Berlin Defense). The White bishop can sometimes be more exposed on b5 than on a4, where it retreats after . . . a6, and this is the main point to avoiding that move along with avoiding the Exchange Variation. The novice is recommended to study one of these systems to defend the Ruy Lopez, though he/she may later learn the more involved variations later in the chapter.

A. The Classical (or Cordel) Defense (columns 1–6) is the straightforward developing move 3 . . . Bc5. Though probably the oldest defense to the Ruy Lopez, it still sees use today. White sets problems with 4 c3 (columns 1–5), but Black can often get counterchances as it is difficult for White to keep control.

B. The Berlin Defense, 3 . . . Nf6 (columns 7–12) became the height of theory when Kramnik used it as his main defense to defeat Kasparov in their 2000 World Championship match. Though Black may be a little worse in the endgame of the main line (col. 7), it is extremely difficult for White to convert the advantage. Many top grandmasters followed Kramnik's lead and took up the defense, which was nicknamed "The Berlin Wall" due to it being hard to breach.

C. The Cozio Defense, 3 . . . Nge7 (columns 13–15) and Bird's Defense, 3 . . . Nd4 (columns 16–18) are old-fashioned continuations that undoubtedly give White a theoretical edge. They continue to see use because the offbeat positions that arise may confuse many opponents.

D. In the Old Steinitz Defense, 3 . . . d6 (columns 19–21), Black de-

fends the center in the most straightforward manner. This is playable, but White obtains a freer position without much trouble, so the defense is rarely seen nowadays.

E. 3 ... g6 (columns 22–24) was popular in the 1980s when it was discovered that 4 c3 a6! (column 23) offered Black good possibilities. Currently 4 d4 exd4 5 Bg5 (column 24) offers White the upper hand, so 3 ... g6 sees limited use.

F. 3 ... f5!? (columns 25–30) is the sharp Schliemann Variation (sometimes called the Jaenisch Gambit). Black plans to open the f-file for the purpose of attack, in the course of which he frequently sacrifices a pawn or two. The opening has a dubious reputation, but keeping control of the game is difficult for White to do against aggressive play. Black is having better results with 4 Nc3 fxe4 5 Nxe4 Nf6 (columns 25–26) instead of the older 5 ... d5 (column 27).

- (a) 5 exf5 e4 6 d4 exf3 7 dxc5 Qe7† 8 Be3 fxg2 9 Rg1 Nf6 10 Rxg2 d5 11 cxd6 cxd6 12 Nd2 Bxf5 (Rodriguez–Beltramini, Buenos Aires 1995), now 13 Qf3 is a slight edge for White.
- (b) 6 Nxe5 Nxe5 7 Qh5† Ng6 8 dxc5 Nf6 9 Qg5 c6 10 Be2 d5 11 cxd6 Qxd6 12 Be3 Be6 13 Na3 Qc7 14 Nc2 0-0 15 Nd4 was agreed drawn in Tatai–Rantanen, Thessaloniki Ol. 1984, but White has a small edge in the final position.
- (c) 6 ... exf3?! 7 Bxf3 exd4 8 0-0! Be7 (8 ... Nf6 9 Re1† ±, or 8 ... Ne7 9 cxd4 ±) 9 Qxd4 Nf6 10 c4 0-0 11 Nc3 with control of the center, Brudnova–Soukup, Pilzen 1995.
- (d) A very tricky move is 7 ... Qg5?! 8 dxc5 Nf6 (8 ... Qxg2 9 Qh5†) when White must play carefully. On the natural 9 0-0 Bh3 10 g3 then 10 ... 0-0-0! generates a fierce attack. Best is 9 Qe2! Qxg2 10 Qf1 Qg4 11 Nc4 Qh5 12 Be3 Be6 13 Nbd2 0-0-0 14 Qg2 when Black does not have enough for the piece, de Firman–Rogers, Philadelphia 1987.
- (e) 9 exd6 exd2† 10 Nxd2 Qxd6 11 0-0 Be6 12 Qh5† also gives White an edge, Stern–Snyder, corr. 1978.
- (f) 11 Kh1 Qe7 12 Qf3 Bg5 13 b3 Nh6 14 Ba3 Qe6 15 Ne4 ±, Mikhailov–Sapundzhiev, corr. 1992.
- (g) 7 ... Bd6 8 Qh5† g6 9 Qe2 (9 Nxg6?! Nf6 =) 9 ... Qh4 10 Nd2 Bf5 11 g4! Be6 12 Nxe4 Bxe5 13 h3! Bxg4 14 Qxg4 ±, A. Rodriguez–Del Campo, Matanzas 1994.

- (h) 11 Bf4 0-0-0 12 Nd2 with an extra pawn, Kinsella–Blackmore, corr. 1988.
- (i) 5 d4 exd4 6 cxd4 Bb4† 7 Bd2 Bxd2† 8 Qxd2 a6! 9 Ba4 d5 10 exd5 Qxd5 11 Nc3 Qe6† 12 Kf1 Qc4† =, Alekhine–Bogoljubow, St. Petersburg 1913.
- (j) 9 Ne5 0-0 10 Nxc6 bxc6 11 Bxc6 Rb8 12 Nc3 Ne7 13 Be4 Ba6 14 Re1 Bxd4 =, Benjamin–Zuckerman, New York 1978.
- (k) 11 Nbd2 0-0 12 Nc4 Qb4 13 Bxc6 bxc6 14 Rc1 ±, Gruskovnjak–Crepant, Slovakian Chp. 2004.
- (l) 5 . . . exd4 6 e5 Ne4 7 0-0 a6! 8 Ba4 dxc3 9 Qd5 cxb2 10 Bxb2 Bxf2† 11 Kh1 Nc5 12 e6 Nxe6 13 Rxf2 0-0 is roughly equal, Wemmers–I. Sokolov, Dutch Chp. 2000. Black has four pawns for the bishop, but White has more development and attacking chances.
- (m) (A) 6 Nxe5 Nxe5 7 dxe5 Nxe4 8 Qg4 Bxf2† 9 Ke2 Qh4 10 Qxg7 Rf8 11 Nd2 Bc5 12 Nf3 Qf2† =, Gdanski–Clesia, Poland 2006. (B) 6 Bxc6!? bxc6 7 Bg5 ±, Wolff–Lane, Hastings 1990.
- (n) Black can get three pawns for the piece with 8 . . . Nxd4 9 Nxd4 Bxd4 10 exf6 Re8 11 Be3 Qxf6 12 Nd2 Bxb2 13 Rb1 c6 14 Bd3 d5 15 0-0 ±.
- (o) 11 0-0-0 Nxe3 12 fxe3 Bd7 13 Rhf1 dxe5 14 Bc4! exd4?! (14 . . . Rf8 may gain equality for Black) 15 Bxf7†! Kxf7 16 Ng5† Kg6 17 h4! with a tremendous attack, Salov–Perov, corr. 1994.
- (p) 5 . . . Nxe4?! 6 Qe2 f5 7 d3 is bad for Black.
- (q) White also gains an edge from (A) 7 Qd3 d6 8 Bg5 h6 9 Bh4 Bd7 10 Nbd2 a6 11 Bc4 ±, Svidler–Leko, Linares 1999, or (B) 7 Bg5 h6 8 Bh4 d6 9 Bxc6 bxc6 10 dxe5 dxe5 11 Nbd2 Re8 12 Qc2 g5 13 Bg3 Nh5 14 c4 ±, Z. Almasi–Gulko, Pamplona 1996. Not as good is (C) 7 Re1 exd4 8 cxd4 (8 e5?! Ng4 9 Bg5? Nxf2! 10 Qa4 dxc3 11 Bxd8 cxb2 wins, Schlosser–Anand, Prestwich 1990) 8 . . . d5 9 e5 Ne4 10 Nc3 Bg4 11 Bxc6 bxc6 12 Nxe4 dxe4 13 Rxe4 Bxf3 14 Qxf3 Bxd4 =, Unzicker–Fischer, Leipzig Ol. 1960.
- (r) 11 Bh4 d5 12 Nbd2 c6 13 Bd3 Bf5 14 Qc2 Nxd2 15 Bxf5 Nxf3† 16 gxf3 Kh8 17 f4 Qc7 18 Kh1 Nxf5 19 Qxf5 ±, Smirin–Weinstein, Israeli Chp. 1992.
- (s) (A) 4 . . . Nf6 transposes into the Berlin Defense (col. 7) on the next page. This is probably Black's best choice. (B) 4 . . . Qf6 5 c3 Nge7 6 Re1! 0-0?! (6 . . . Bb6 7 d4 ±) 7 d4 exd4 8 e5 Qg6 9 Bd3 ±. (C) 4 . . . d6 5 c3 Bd7 6 d4 Bb6 7 Bg5 ±.
- (t) On 5 b4 safest is 5 . . . Bb6 instead of 5 . . . Bxb4?! 6 Nxd4 exd4 7 Bb2 ±.
- (u) 11 a4 Nf6 12 a5 Be7 13 f3 Bc5† 14 Kh1 a6 15 Nd2 0-0 16 Nb3 ±, Yandemirov–Lukovnikov, Russia 2004.

- (s) 12 Bd5 Nf6 13 dxe5 Nxd5 14 Qxd5 Bxe3 15 Rxe3 Rb8 16 Nd2 b5 =, Romanishin–Malaniuk, Tbilisi 1986.

RUY LOPEZ

Old Steinitz Defense and 3 . . . g6

1 e4 e5 2 Nf3 Nc6 3 Bb5

	19	20	21	22	23	24
3 . . . d6 (Old Steinitz Defense)	g6(k)					
4 d4(a) Bd7(b)			c3	d4		
			d6(l)	a6!(p)	exd4(s)	
5 Nc3 Nf6	exd4	Nge7	d4 Bd7	Bc4(q) Bg7	Bg5! f6(t)	
6 0-0(c) Be7	Nxd4 g6	Bc4(i) exd4	0-0 Bg7	d4 d6	Bh4 Bg7	
7 Bxc6(d) Bxc6	Be3(f) Bg7	Nxd4 Nxd4	dxe5(m) dxe5(n)	Bg5 Nge7	Nxd4 Nge7	
8 Qd3 exd4	Qd2 Nf6	Qxd4 Nc6	Qe2 Nge7	dxe5 dxe5	Nc3 0-0	
9 Nxd4 Bd7	Bxc6(g) bxc6	Qe3 Ne5	Rd1 Qc8	Qe2 0-0	0-0 Kh8	
10 b3 0-0	Bh6! 0-0	Bb3 c6	Be3 0-0	a4 Qe8	f4 Nxd4	
11 Bb2 c6(e)	Bxg7 Kxg7(h)	Qg3 Ng6(j)	Bc5 Rd8(o)	Qe3 Kh8(r)	Qxd4 d6(u)	

- (a) The moves 4 c3, 4 0-0, and 4 Bxc6† bxc6 5 d4 are all sensible and give White chances for advantage, but 4 d4 is the best and most forceful move.
- (b) 4 . . . exd4 5 Qxd4 Bd7 6 Bxc6 Bxc6 7 Nc3 Nf6 8 Bg5 Be7 9 0-0-0 is a line from Philidor's Defense that is quite good for White.
- (c) Note that this position may arise from the move order 1 e4 e5 2 Nf3 Nc6 3 Bb5 Nf6 4 0-0 d6 5 d4 Bd7 6 Nc3.
- (d) 7 Re1 hopes that Black will fall into a famous trap with 7 . . . 0-0? 8 Bxc6 Bxc6 9 dxe5 dxe5 10 Qxd8 Raxd8 11 Nxe5 Bxe4 12 Nxe4 Nxe4 13 Nd3 f5 14 f3 Bc5† 15 Nxc5 Nxc5 16 Bg5 Rd5 17 Be7 threatening both 18 Bxf8 and 18 c4 winning a piece, Tarrasch-Marco, Dresden 1892. Black should play 7 . . . exd4 8 Nxd4 0-0 9 Bxc6 bxc6 10 Bg5 Re8 11 Qd3 h6 12 Bh4 Nh7 =, Lasker-Capablanca, World Chp. (G6) 1921.
- (e) 12 Rad1 Qc7 13 Rfe1, Pillsbury-Steinitz, Vienna 1896. Although Black's position is solid, White has more space and a harmonious position. Instead of 11 . . . c6, Anand-Vescovi, Sao Paolo (rapid) 2004 continued 11 . . . c5 12 Nde2 Bc6 13 Rad1 Re8 14 Nf4 Bf8 15 Rfe1 ±.
- (f) 7 0-0 Bg7 8 Bxc6 bxc6 9 Re1 Ne7 10 Bf4 f6 (Stripunsky-Onischuk, Nikolaev 1995) 11 Qd2 is a small edge.

- (g) 9 f3 0-0 10 0-0-0? Nxd4 11 Bxd4 Nx e4! 12 fxe4 Bxd4 13 Qxd4 Bxb5 14 Nxb5 Qg5† and 15 . . . Qxb5 wins a pawn.
- (h) 12 0-0-0 Re8 13 f3 Qb8 14 g4 Qb4 15 a3 Qb7 16 Rde1 Rab8 17 Nd1 leaves White the more viable attacking prospects, Psakhis–Haik, Sochi 1985.
- (i) Moving the bishop again is justified here because f7 is weak. Also reasonable is 6 0-0 Ng6 7 b3 Be7 8 Bb2 0-0 9 Nd5 ±, Rogulj–Orlov, Yugoslavia 1980.
- (j) Lasker–Steinitz, World Chp. (G1) 1894. Now 12 Be3 keeps White on top.
- (k) The rarely played 3 . . . Bb4 is dubious. One reason is that 4 c3 Ba5 5 0-0 Nge7 6 Bxc6 Nxc6 7 b4 Bb6 8 b5 Na5 9 Nxe5 wins a pawn for insufficient compensation.
- (l) Not 4 . . . Bg7?! 5 d4 and Black must give up the center.
- (m) (A) 7 Re1 Nge7 8 Bg5 h6 (8 . . . f6 may be better) 9 Bh4 g5 10 Bg3 0-0 11 d5 Nb8 12 Bxd7 ±, Matthews–Dominguez, Calvia Ol. 2004. (B) 7 Qb3 is a worthy alternative. Both 7 . . . Na5 8 Qa4 c6 9 Be2 b5 10 Qc2 Ne7 11 Be3 0-0 12 dxe5 dx e5 13 a4!, Kupreichik–Smyslov, Moscow 1976, and 7 . . . Nge7 8 d5 Na5 9 Bxd7† Qxd7 10 Qc2, Rasin–Mays, Boylston 1993; leave White somewhat better.
- (n) 7 . . . Nxe5?! 8 Nxe5 dxe5 (8 . . . Bxb5 9 Qd5) 9 Qb3 ±.
- (o) 12 Nbd2 a6 13 Bc4 Be6 14 Ng5 Bxc4 15 Qxc4 Rf8 16 Nf1 ±, R. Byrne–Saloman, Philadelphia 1989.

RUY LOPEZ WITH 3 . . . a6, VARIANTS ON MOVES 4–6

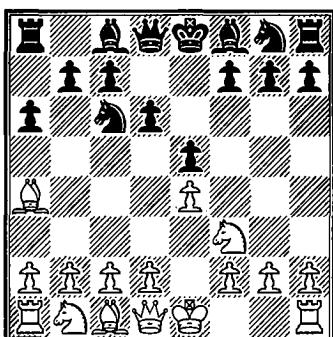

1 e4 e5 2 Nf3 Nc6 3 Bb5 a6

WHITE's 3 Bb5 seems to be a once-removed threat to win the black e-pawn with 4 Bxc6, but in fact this is not an immediate threat as Black would easily win the pawn back. Thus 3 . . . a6 came into fashion when this idea became well known in the nineteenth century. Today it is the usual move as it commonly gives Black more options. If White plays 4 Ba4 (as in all lines except the Exchange Variation) Black can always break the pin with . . . b5.

The variations included in this subchapter are:

- 1 The EXCHANGE VARIATION**
- 2 The MODERN STEINITZ VARIATION**
- 3 Lines with . . . a6 and . . . Bc5**
- 4 ARKANGEL VARIATION (and Counterthrust Variation)**
- 5 Fifth-Move Variants**
- 6 Sixth-Move Variants**
- 7 The OPEN VARIATION**

1. The EXCHANGE VARIATION, 4 Bxc6 (columns 1–6), has the strategic idea of obtaining a kingside pawn majority after playing d4 and exchanging for the Black e-pawn. White would have an endgame edge because Black's queenside would be difficult to mobilize. Kasimdzhanov has recently been quite successful with this variation and we note that Bobby Fischer also made much use of it in the 1960s. Many amateur players use the Exchange Variation to escape learning the massive amount of theory required to play the Closed Variations and other lines. Black obtains the pair of bishops and easy development in compensation for the doubled pawns, so usually there is a clear path to equalizing the game.

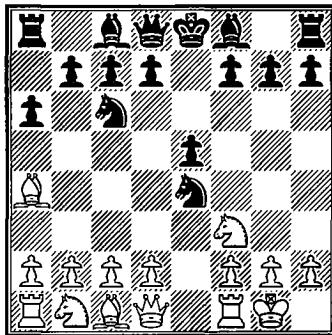

2. The MODERN STEINITZ VARIATION, 4 Ba4 d6 (columns 7–18), see above diagram, allows Black to break the pin with . . . b5 when desired. Yet the play is less like the Closed Defense and more like several of the variations without . . . a6, with the added flexibility for Black of playing . . . b5 at some moment. 5 c3 Bd7 6 d4 (columns 7–10) is a strategic maneuvering game that can be similar to the King's Indian Defense if White closes the center with d5. The Siesta Variation, 5 c3 f5 (columns 11–12), is a sharp line, like the Schliemann Variation. Currently White is doing well against the Siesta. White's fifth move alternatives are equally interesting. 5 0-0 (columns 13–14) leads to an attack for someone—Black attacks in column 13 with 5 . . . Bg4 6 h3 h5 and White attacks in column 14 with a pawn sacrifice. Yandemirov has been finding ideas for Black in this line. 5 Bxc6† bxc6 6 d4 (columns 15–16) is also a sharp continuation. The older lines 5 c4 (column 17) and 5 d4 (column 18) allow Black to equalize without much trouble.

3. The recent fashion in the Ruy Lopez has been to defend with 3 . . . a6 and . . . Bc5 (columns 19–24). This has become a trusted line of many grandmasters as it is as sound as the Closed Defense. For a century it had been thought that placing the bishop on c5 was a loss of tempo compared to . . . Be7 (since it must move when the White pawn comes to d4). The extra activity of the more aggressive placement seems to compensate for this.

4. The ARKANGEL VARIATION is 4 . . . Nf6 5 0-0 b5 6 Bb3 Bb7 (columns 25–28). This is a sharp counterattacking system where Black plays to win. 7 Re1 (columns 25–26) is the most usual continuation, although Black has reasonable chances. 7 c3 (column 27) is a wild line in which Black sacrifices a piece for good play, though White may gain a small endgame edge after a long and complicated line. 7 d3 (column 28) is safe, with chances for a small edge to White. The Counterthrust Variation, 4 . . . b5 5 Bb3 Na5 (columns 29–30), is an older system in which Black hunts down the "Spanish bishop," but this allows White to gain the initiative in the center.

5. In the Fifth-Move Variants (columns 31–36) we have included 5 0-0 Be7 6 Re1 d6 (column 31) as it has similarities with the next columns. Here Black refrains from an early b5, since this move gains space but also weakens the queenside. In columns 32–33 Black plays 5 . . . d6, but doesn't develop the bishop to e7. Columns 34–36 cover 5 Qe2, 5 Nc3, and 5 d3. These take play into less-known territory that should not be dangerous for Black.

6: Sixth-Move Variants (columns 37–42) include the Worrall Attack, 6 Qe2 (columns 37–38), in which White frees the d1 square for his rook to play on the d-file. Black has no serious problems. 6 d4, the Center Variation (columns 39–40), is also theoretically fine for Black, but the play is sharp and it is easy to go astray. 6 Bxc6, the Exchange Variation Deferred (columns 41–42), loses a tempo over the Exchange Variation, but leaves the Black knight on f6 and the Black bishop on e7—not their best squares.

7. The OPEN VARIATION, 4 Ba4 Nf6 5 0-0 Nxе4 (columns 43–60), see above diagram, is a major, well-respected defense to the Ruy Lopez. Black takes the unprotected e-pawn with the idea that while White is recapturing his pawn, Black will take a stake in the center. The Open Variation allows more fluid play than the Closed Variations, with less maneuvering and more active possibilities. The chief disadvantage is that Black's position becomes a trifle loose, leaving targets to attack.

After 6 d4 b5 7 Bb3 d5 8 dxе5 Be6 the most fashionable move is 9 Nbd2 (columns 43–45), immediately contesting the strong Black knight on e4. Play is often very tactical, with long sharp variations.

The classic continuation is 9 c3 (columns 46–54). Black responds with either the active 9 ... Bc5 (columns 46–48), or the steady 9 ... Be7 (columns 49–54). In the former, the Dilworth Attack (column 48) is still promising for Black. 9 ... Be7 10 Nbd2 (columns 49–50) is currently leaving White with pleasant positions. 9 ... Be7 10 Be3 (columns 51–52) is a position that can arise by the order of moves 9 Be3 Be7 10 c3 so that the Dilworth Attack is avoided. Black has reasonable chances against this and also against 10 Bc2 (column 53) and 10 Re1 (column 54).

Columns 55–60 investigate less-played alternatives which theory considers to offer fewer chances. Notable is the Howell Attack, 9 Qe2 (columns 56–57), an aggressive line where White looks for play on the d-file. In column 60 Black plays greedily with 6 ... exd4.

umn is Fischer–Addison, U.S. Chp. 1966.
- (q) White may prefer the simpler line 8 Bg5 Be7 9 Bxe7 Qxe7 10 Nxd4 0-0
11 Bxc6 bxc6 12 f3 c5 13 Nc6 Qd6 14 Qxd5! Nf6 15 Qxd6 with a good
endgame, Karastoichev–Paskalev, Silven 1961.
- (r) 16 Nc3 Ke7 17 g4! with an endgame edge, Capablanca–Ed. Lasker, New York
1915.

RUY LOPEZ MAIN LINES— CLOSED VARIATIONS AND THE MARSHALL ATTACK

1

e4 e5 2 Nf3 Nc6 3 Bb5 a6 4 Ba4 Nf6 5 0-0 Be7 6 Re1 b5 7 Bb3 is one of the most theoretically investigated positions in all of chess. The positions are strategically involved and both sides are able to develop and build their positions toward a tense and dynamic middlegame. The end of this subchapter comprises the Marshall Attack and the Anti-Marshall Systems, which begin with 7...0-0. Everything else begins with 7...d6 8 c3 0-0 (see diagram below), which constitutes the Closed Defense.

Columns 1–6 cover lines in the Closed Defense that are not major systems. The minor variations 9 h3 Nd7 (columns 1–2) and 9 h3 Be6 (column 3) can be difficult to meet, although accurate play should leave White with an edge. The straightforward 9 d4 without the preparatory h3 is covered in columns 4–5. This has gained more favor with players of the White side in recent years, though Black should be all right. 9 d3 (column 6) is slow and unambitious.

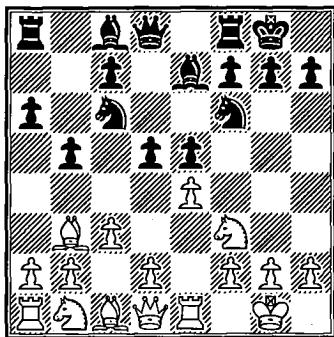

The most common defense after the usual 9 h3 is still the CHIGORIN VARIATION, 9...Na5 10 Bc2 c5 11 d4 (columns 7–18). Black has the first threats on the c-file in the main continuation 11...Qc7 12 Nbd2 cxd4 13 cxd4 (columns 7–12), which slows White's development. Black is quickly ready for action, as White would hold the advantage if he is able to deploy his pieces without trouble. The other continuations after 12 Nbd2 are 12...Nc6 (column 13) and 12...Bd7 (column 14). These do not pressure White as much as the main continuation. Other 11th moves for Black are 11...Nc6 (column 15), 11...Nd7 (columns 16–17), and 11...Bb7 (column 18). White may be able to gain an edge in these

lines, but the rich and complex positions offer opportunities to the better player.

In the BREYER VARIATION, 9 h3 Nb8 (columns 19–24), Black redevelops his/her queen's knight to d7, centralizing his pieces and maintaining control of the center. This allows White time to choose a plan of play on the kingside, queenside, or both. The Breyer is still sound, but has been employed less in recent years as White has freedom to choose his/her plan.

The SMYSLOV VARIATION, 9 h3 h6 (columns 25–30), is not used too much today, though it is not so bad. Kasparov's loss with it to Deep Blue in 1997 did little to bolster the variation's image.

The ZAITSEV VARIATION, 9 h3 Bb7 10 d4 Re8 (columns 31–36), is a highly complicated, sharp defense that was favored by Karpov. These days it has fewer regular grandmaster supporters, but it still leads to positions that are very difficult to handle.

The MARSHALL ATTACK, 7 . . . 0-0 8 c3 d5 (columns 37–40), see above diagram, is Frank Marshall's well respected pawn gambit introduced by its namesake against Capablanca in 1918. Black's compensation for the pawn is mostly positional—based on creating weaknesses in the White kingside and slowing White's development. There is no direct forcing line that either side must play, and for this reason the gambit is hard to refute. New ideas are constantly being tried as the opening remains topical. Here in the early twenty-first century the black side is doing quite well as there is no clear route to advantage. Leko, Adams, and other top grandmasters employ the opening on a regular basis.

The Anti-Marshall Systems, 7 . . . 0-0 8 h3 (column 41) and 7 . . . 0-0 8 a4 (column 42), avoid the long complex variations of the Marshall Attack and still present Black problems in equalizing.

- (a) Sweden's Jonny Hector has championed 7 ... Bb7, intending 8 c3 d5 9 exd5 Nxd5 10 Nxe5 Nxe5 11 Rxe5 Nf4 ∞. White's best response is probably 8 d4 Nxd4 9 Bxf7+! Kf8 10 Bd5 ±, Timman–Hector, Malmö 1997.
- (b) 9 d4 exd4 10 e5 Ne4 11 cxd4 Bf5 12 Nc3 Nxc3 13 bxc3 Qd7 14 Bg5 Ba3 =, Luther–Beliaovsky, Austria 2007.
- (c) 9 ... e4?! 10 dxc6 exf3 11 d4! fxg2 12 Qf3 Be6 13 Bf4 Nd5 14 Bg3 a5 15 Nd2 ± (Tal).
- (d) Other moves are simply inferior: (A) 11 ... Nf6 12 d4 Bd6 13 Re1 Ng4 14 h3 Qh4 15 Qf3 Nxg2 16 Re2! ±, Capablanca–Marshall, New York 1918. (B) 11 ... Bb7 12 d4 Bf6 (12 ... Qd7 13 Nd2 Nf4 14 Ne4 Nxg2 15 Kxg2 Bf6 16 Qf3! ±, Gindl–Wenger, corr. 1991) 13 Re1 Re8 14 Nd2 b4 15 c4 Nf4 16 d5 Nd3 17 Rxe8+ Qxe8 18 Bc2 ±, de Firmian–Kreiman, U.S. Chp. 1994, since 18 ... Nxb2 19 Bxb2 Bxb2 20 Bxh7! holds the pawn.
- (e) 15 Re4 g5 16 Qf1 Qh5 17 Nd2 Bf5 18 f3 Nf6 19 Qg2 Qg6 20 Re3 Rae8 21 Ne4 Nxe4 22 g4 Ng3 23 hxg3 Bb1 =, Anand–Aronian, Wijk aan Zee 2007.

(f) Instead, 16 ... f5 17 f4 Kh8 18 Bxd5 cxd5 19 Nd2 g5 20 Qf1 Qh5 21 a4! bxa4 22 fxg5 f4 23 Bxf4 Rxf4 24 gxf4 Rf8 25 Re5 Bxe5 26 dxe5 h6 27 Qxa6! ±, Sax–Ehlvest, Skellefteå 1989.

After 16 ... Rae8 17 Nd2 we have the main line of the Marshall Attack, an extremely complicated position that may slightly favor White, but offers winning chances for both sides. Two examples: (A) 17 ... Qh5 18 a4 Bf5 19 Qf1 Bh3 20 Bd1 Qf5 21 Qe2 c5 22 Nf3 ±, Morović–Adams, match 1997. (B) 17 ... Re6 18 a4 Qh5 19 axb5 axb5 20 Qf1 Rfe8 =, J. Polgar–Adams, FIDE World Chp. 2005.

(g) Also 13 ... Qh4 14 g3 Qh3 (14 ... Qh5 15 Nd2 Bg4 16 f3 Bxf3 17 Nxf3 ±) 15 Nd2 Bf5 16 a4 Rae8 17 Rxe8 Rxe8 18 Nf1 h5! gives Black sufficient counterplay, de Firmian–Adams, New York 1996.

(h) 17 cxb4 Bd3 18 Rf2 Re8 19 Nf1 Bxf1 20 Qxf1 Qb8! 21 g3 Qxb4 =, Kotronias–De Vreugt, Kavala 2002.

(i) 14 ... f5 15 Nd2 f4 16 Re1 Qg5 17 Nf3 Qh5 18 Ne5 f3 19 gxf3 Bh3 20 f4 ± (Tal).

(j) There are two sharp alternatives, the first being the most critical. (A) 15 ... g5 16 Qf3 Be6 17 Qf6 Rfe8 18 Nd2 (18 Na3 Qh5 19 Bd2 Be7 20 Qf3 Qg6 21 Rae1 g4–Hübner–Nunn, Haifa 1989–22 Qd1!?) 18 ... Qf4 19 Qxf4 Bxf4 20 Re1 Bxh3 21 Rxe8† Rxe8 22 Nf3 Bxc1 =, Brkic–Naiditsch, Turkey 2006. (B) 15 ... f5 16 Qf3 Bb7 17 Nd2 g5 18 Qe2 f4 19 Nf3 Qh5 20 Nxg5! ±, Hübner–Nunn, Skellefteå 1989.

(k) 17 Re1 Qg6 18 Qf3 Bf5 19 Be3 Be4 (other moves have been tried, but this seems best) 20 Qg4 h5 21 Qxg6 Bxg6 22 Nd2 ±, Tal–Spassky, match 1965. This ending is difficult to win, however.

(l) 12 g3 Bd6 13 Re1 Qd7! 14 d3 Qh3 transposes back into the column.

(m) Also good is 13 ... Bf5 14 Qf3 Qh4 15 g3 Qh3 16 Nd2 Rae8 17 Ne4 Bg4 18 Qg2 Qxg2† 19 Kxg2 f5 20 h3 Bh5 21 Bf4 Bxf4 22 gxf4 fxe4 23 dxe4 Bf3†! 24 Kxf3 Rxf4 =, Nakamura–Aronian, Gibraltar 2005.

(n) (A) 15 ... Nf6 16 Rh4 Qf5 17 Nd2! g5 18 Rh6 Ng4 19 Ne4 Nxh6 20 Nxd6 ±, Svidler–Adams, Elista Ol. 1998. (B) 15 ... Qd7 16 Nd2 Bb7 17 Re1 c5 18 Ne4 Be7 19 a4 b4 20 Bg5 Bxg5 21 Nxg5 ±, Leko–Slobodjan, Groningen 1997.

(o) 17 Re1 f5 18 Nf3 (18 f4 Bxf4 19 Qf3 Bb8 20 Bxd5† cxd5 21 Nb3–21 Qxd5† Kh8 22 Qxa8 Qb6† and 23 ... Bb7–21 ... Bb7 22 Bf4 ±, Kotrniás–Hebden, Ireland 2005) 18 ... f4 19 Ne5 Bxe5 20 Rxe5 fxe3 21 hxg3 Bg4 22 Qe1 Bf3 =, Leko–Svidler, Dortmund 1998.

(p) Of the Anti-Marshall systems, only 8 h3 and 8 a4 are serious attempts for advantage. On 8 d4 Nxd4 (or 8 ... d6! 9 c3 Bg4) 9 Nxd4 exd4 10 e5 Ne8 11 c3 dxc3 12 Nxc3 d6 13 Qf3 Be6 14 Nd5 Rc8 15 Bf4 Bg5 chances are even, I Gurevich–Nunn, Hastings 1992/93.

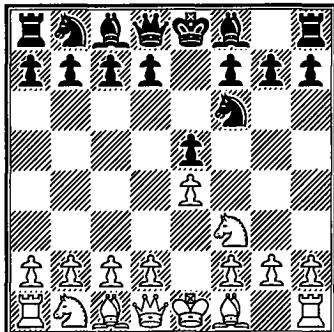

(q) 8 ... d6 9 c3 is back in normal closed channels, but White has avoided the Marshall Attack.

(r) 10 c3 Na5 11 Bc2 c5 12 Nbd2 Qc7 13 Nf1 Rfe8 14 Ng3 Rad8 =, Tal–Geller, Kislovodsk 1966.

- (s) 10 . . . Nb8 11 Nbd2 Nbd7 12 Nf1 c5 13 Ng3 Rc8 is only a tad better for White, Shirov–I. Sokolov, Groningen 1996.
- (t) 12 Nc3 Nc6 13 Nd5 Nxd5 14 Bxd5 Qc7 15 c3 Nb8 16 Bxb7 Qxb7 =, Shirov–Aronian 2007.

- (y) 17 Bg5 Nb7 18 Be3 Qa5 19 Qc4 Ng4 draw agreed, Nunn–van der Wiel, Amsterdam 1990.

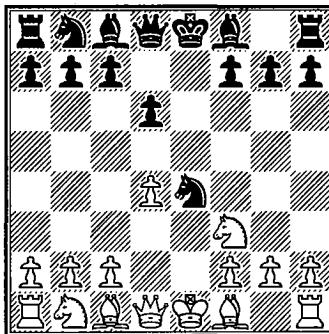

PETROV'S DEFENSE

1 e4 e5 2 Nf3 Nf6

THERE IS AN ALMOST ANNOYING LOGIC to Petrov's Defense which tells White that he/she should not expect anything special from the opening. You attack my e-pawn—then I'll attack yours! Indeed the Petrov is a very hard opening to beat or even gain an advantage against. Many variations are quite symmetrical and it may seem that Black shows no imagination by simply copying White's moves—but these are logical developing moves. The main disadvantage to the defense is that it offers few winning chances for Black, and White can almost virtually force a draw by trading down to a dull symmetrical endgame. Except for this reason Petrov's Defense would be extremely popular as it is unquestionably sound. It does get use from top-level grandmasters against their colleagues. The last few World Champions have made fair use of it against high-level opponents.

White does have ideas that press the advantage of the first move, and there are now various different systems to try. All require considerable effort to present Black with problems. The opening is named after the nineteenth-century Russian master who practiced it, but in that century the “threat” of making a draw in chess was not so great.

The main line is 3 Nxe5 d6 4 Nf3 Nxe4 5 d4 (columns 1–6), see above diagram. Black's 5 ... d5 (columns 1–5) supports the knight on e4 and equalizes the amount of territory. White's usual plan is to try to undermine the Ne4 with Bd3 and c4 or Re1. If White forces Black to retreat without too many exchanges he will have the initiative. A recent improvement for White in note (b) makes for promising play. White can also play a risky strategy seen in column 2—c3 and Qb3. He wins a pawn at the cost of allowing Black a strongpoint on e4, which may lead to a strong attack. Column 6, 5 ... Be7, is an old line that allows White a spatial advantage.

White's fifth-move alternatives in columns 7 and 8 have little promise of advantage. Column 7 is the drawing line where queens are exchanged early. Column 8 at least has the advantage of producing a full, complex game. The best winning alternative to the main line is the sharp 3 d4!? (columns 9–12), which has seen much use in the last decades from players looking to unbalance the game. Black's most reliable continuation is 3 ... Nxe4 4 Bd3 d5 (columns 9–10), although Murey's startling 4 ... Nc6!? (column 11) is not so bad. Column 12, 3 ... exd4 4 e5 Ne4, leads to a symmetrical pawn structure, but White can develop aggressively.

PETROV'S DEFENSE

- (a) 3 . . . Nxe4? 4 Qe2 Qe7 5 Qxe4 d6 6 d4 wins a pawn.
- (b) (A) Ineffective is 4 Nc4 Nxe4 5 d4 d5 6 Ne3 Be6 7 Bd3 f5 8 0-0 Bd6 with equal chances, Paulsen–Schallopp, Frankfurt 1887. (B) Speculative but entertaining is the sacrifice 4 Nxf7, e.g. 4 . . . Kxf7 5 Nc3 c5?! 6 Bc4† Be6 7 Bxe6† Kxe6 8 d4 Kf7 9 dxc5 Nc6 with chances for both sides, Topalov–Kramnik, Linares 1999.
- (c) 12 Bf1 Ne6 13 Bd2 Bd7 =, Spassky–Petrosian, World Chp. 1969. Against reasonable defense 5 Qe2 produces no advantage. White is two tempi ahead in development, but can make no real use of them.
- (d) 5 c4 Nc6! 6 Nc3 (6 d4?! d5 7 Nc3 Bb4 8 Qc2 Qe7 9 Be3 Bf5 with threats) 6 . . . Nxc3 7 dxc3 Be7 8 Bd3 Bg4 9 Be4 Qd7 10 Be3 Bf5 =, Timman–Yusupov, match 1986.
- (e) 7 Bf4 0-0 8 Qd2 Nd7 9 0-0-0 Nc5 10 Nd4 Re8 11 f3 Ne6 12 Be3 Bg5 =, Dolmatov–Yusupov, USSR Chp. 1981.
- (f) (A) 7 . . . d5?! 8 c4 dxc4 9 Qxd8† Bxd8 10 Bxc4 Bf6 11 0-0-0 ±, Nunn–Mascarinhas, Thessaloniki Ol. 1984. (B) Still good is the old plan 7 . . . Nc6

8 Qd2 Bg4! 9 Be2 Qd7 10 0-0-0 0-0 =, Nimzovich–Marshall, St. Petersburg 1914.

(g) 12 f4 Ng4 13 Bd3 d5 14 Rhe1 Bh4 15 g3 Nxe3 =, Svidler–Anand, San Luis 2005.

(h) White has no serious alternatives to 3 Nxe5 and 3 d4, but he can play for surprise value: (A) 3 Nc3 Bb4 (3 . . . Nc6 transposes to the Four Knights’ Defense) 4 Nxe5 0-0 5 Nd3 Bxc3 6 dxc3 Nxe4 7 Be2 d5 8 0-0 c6 9 Nf4 Bf5 10 c4 d4 11 Bd3 Re8 12 f3 Nd6 =, Adams–Rozentalis, Aarhus 1997. (B) 3 Bc4 Nxe4 4 Nc3 Nxc3 5 dxc3 f6! 6 Nh4?! (6 Nxe5? Qe7 wins, 6 0-0 d6 7 Nh4 g6 8 f4 Qe7 9 f5 Qg7 \mp) 6 . . . g6 7 f4 c6! 8 f5 d5 \mp , Estay–Araya, Santiago 1998.

(i) 4 dxe5 d5 5 Nbd2 Nxd2 6 Bxd2 Be7 7 Bf4 c5 8 c3 Nc6 9 Bd3 Be6 =, Short–Seirawan, Lugano 1986.

(j) (A) 6 Qe2 Nxe5 7 Bxe4 dxe4 8 Qxe4 Be6 9 Qxe5 Qd7 10 Be3 Bb4 \dagger 11 c3 Bd6 gives Black fair play for the pawn. (B) 6 Nxf7 Kxf7 (6 . . . Qe7 ∞) 7 Qh5 \dagger Ke7 8 Qe2 Kf7 =, Nunn–Balashov, Malta Ol. 1980.

(k) The most active move. Other choices are: (A) 7 . . . Bd6 8 c4 c6 9 cxd5 cxd5 10 Qh5 0-0 11 Qxd5 Bc6 12 Qh5 g6 13 Qh3 Ng5 (13 . . . Bb4!?) 14 Qg4 Ne6 15 Bh6 Re8 16 Nc3 Bf4 (16 . . . Nxd4 17 Rad1 leaves White a small initiative) 17 Bxf4 Qxd4 18 Be4 f5 19 Qd1 Qxd1 20 Rfxd1 fxe4 21 Be3 \pm , Kasparov–Piket, Wijk aan Zee 1999. (B) 7 . . . Be7 8 c4 Nf6 9 Nc3 Be6 10 c5 0-0 11 Bf4 c6 12 h3 Re8 13 Re1 \pm , Svidler–Yusupov, Kazan 1997.

(l) (A) 10 Be3 Re8 11 Nd2 Bg7 12 Nf3 Qh5 13 Nxg5! \pm , Kasparov–Ivanchuk, Debrecen 1992, but Black could try 11 . . . Nxd2 or 10 . . . Nf6 11 Nd2 Rg8 ∞ , I. Gurevich–Barua, Hastings 1993. (B) 10 f3 Nf6 11 Be3 Re8 12 Qd2 Rg8 =.

(m) 12 Nxe4 dxe4 13 Bxe4 Bb5 14 Bxg5 Rxd4 15 Bg2 Qf5 16 Qb3 c6 17 Be3 Bxf1 18 Rxf1, Hraček–Haba, Czech Republic 1998; now instead of 18 . . . Rd7 19 Qa4 a6 20 Bxc6!, Black should play Alex Ivanov’s 18 . . . Rhd8! with equality.

(n) 7 Nc3 Nxc3 8 bxc3 Nd7 9 Nxd7 Bxd7 10 Qh5 f5 11 Re1 c6 12 Bg5 Qc7 with a very small edge to White, Anand–Topalov, Dortmund 2005.

(o) 7 . . . c6?! allows White to build his initiative easily—8 Nc3 Nxc3 9 bxc3 Bxe5 (else 10 f4 with a strong attack) 10 dxe5 dxc4 11 Bxc4 Qxd1 12 Rxd1 Bf5 13 Ba3 with a clear advantage in the endgame, Maróczy–Marshall, Paris 1900.

(p) 9 Bf4 Nb4 10 Na3 Nc5 11 Bb1 dxc4 12 Nxc4 Be6 = (van der Wiel).

(q) 12 Bxd5 Bf5! 13 g4! Bxg4 14 Be4 Nxa1 15 Bf4 f5 16 Bd5 \dagger Kh8 17 Rc1 c6 18 Bg2 Rfd8 19 Nd2 Rxd2 (19 . . . h6?! 20 h4 Rd3?! 21 Bf1! Rd4 22 Be3 Rd5 23 Rxa1 \pm) 20 Bxd2 Rd8 21 Bc3 Rd1 \dagger 22 Rxd1 Bxd1 and though a draw is likely, White has some winning chances in the endgame because of the knight on a1, e.g. 23 f4 Nc2 24 Kf2 Kg8 25 a4 a5 26 Bf1?! Nb4?! 27 Bxb4 axb4 28 Bc4 \dagger Kf8 29 a5! \pm , Nielsen–Viksma, corr. 1995.

(r) (A) 5 Nxe5 Nxe5 6 dxe5 d5 7 exd6 Nxd6 8 Nc3 Be6 9 Qf3 g6 =, Sutovsky–Ponomariov, Calvia Ol. 2004. (B) 5 d5 Nc5 6 dxc6 e4 =.

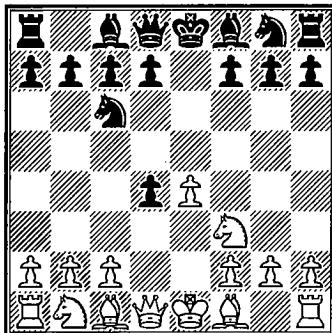

(s) (A) 6 . . . f6? 7 Nxe5 dxe4 8 Qh5 \dagger \pm . (B) 6 . . . Qd6 7 dxe5! Qb4 \dagger 8 Nc3 dxe4

9 a3 Qa5 10 Nd4 Nxe5 11 0-0 with attacking chances (albeit in a sharp position), Palac–Kos, Austria 1995.

- (t) 12 Qd2 Rf8 13 Nc3 Bb4 14 Re2 \pm , Milu–Ionescu, Romania 1995.
- (u) 3 . . . d5 4 exd5 exd4 5 Bb5† c6 6 Qe2† Be7 7 dxc6 bxc6 8 Bc4 0-0 9 0-0 Bg4 10 c3! leaves White the better pawn structure, Prues–Butler, corr. 1960.
- (v) 12 Bc5 Be6 13 Bb5 a6 14 Bxc6 bxc6 15 Bd4 \pm , Ivanchuk–Akopian, Lucerne 1997.

SCOTCH GAME

1 e4 e5 2 Nf3 Nc6 3 d4 exd4

THE SCOTCH GAME RECEIVED ITS NAME from a celebrated correspondence match between London and Edinburgh in 1824, though of course the three opening moves are certainly centuries older. The straightforward developmental logic behind the opening made it mainstream in the nineteenth century. The lack of strategical depth and simple responses by Black led to its decline in the twentieth century. The Scotch was revived when Garry Kasparov took a close look at it and decided to play it in three successive World Championship matches (1990, 1993, 1995). This caused a reevaluation, and theory changed to regard the Scotch as one of the best alternatives to the Ruy Lopez. Today the opening sees regular use from club players and fair use from grandmasters.

The move 3 d4 more or less forces Black to give up the center with 3... exd4. Black must then decide whether to attack the e-pawn (with either 4... Nf6 or 4... Qh4), or to develop (with 4... Bc5 or another move). Columns 1–6 deal with the old main line in which Black plays 4... Nf6 and after 5 Nc3, pins with 5... Bb4. Columns 1–4 have similar contours—Black has a center pawn on d5 while White points his pieces at the kingside. The exchange at f6 in column 2 is a typical Scotch ending—White has the better pawn structure, Black the two bishops. Columns 5–6 feature early divergences by White and Black.

Columns 7–9 feature the modern variation, 5 Nxc6 followed by 6 e5. This is the most aggressive line which has caused renewed interest in the Scotch. Though it is sharp, Black currently seems to be holding his/her own. Columns 10–12 show 4... Bc5 met by 5 Nxc6. This line has also new ideas.

Columns 13–16 feature the old 5 Be3 while columns 17–18 are the relatively new 5 Nb3. Positional rather than tactical motifs dominate this page. Columns 19–20 show early deviations by both White and Black.

Columns 21–22 analyze the Steinitz line 4 . . . Qh4. This attempt at pawn grabbing has been around for more than a century, and even though Black's position often looks dubious, no really clear refutation is known. Finally, columns 23–24 are the Scotch Gambit. Black can accept it or dodge it with reasonable prospects.

- (y) If instead 11 . . . Ne5 12 Nxe5 dxe5 13 bxa6 bxa6 14 Qa4 Bd7 15 Qd1 leaves White a small edge, Sveshnikov–A. Petrosian, USSR 1974. After 11 . . . axb5 12 a6 Nge7 (12 . . . bxa6?! 13 Bd5 Nge7 14 Bg5 ±, I. Zaitsev–Aronin, Moscow 1964) 13 Bd5 Bb6 14 Bg5 Qg6 15 Bxe7 Kxe7 the game is roughly even. (I. Zaitsev).

VIENNA GAME

1 e4 e5 2 Nc3

THE VIENNA IS NAMED AFTER THE AUSTRIAN CAPITAL that for centuries headed the Holy Roman Empire. This important intellectual and musical center naturally embraced chess in its culture. Steinitz, Tartakower, and Spielmann hailed from Vienna and used the opening which bears its name. After World War I, the opening, like the empire, suffered decline. Except for a revival by the American Weaver Adams (who boldly claimed it led to a forced win for White) in the 1940s and 50s, the Vienna has moved backstage. Though not forcing, there is nothing wrong with the Vienna and so grandmasters like Shabalov and Anand use it on occasion and club or tournament players use it regularly.

The idea behind 2 Nc3 is to develop while leaving open the options of f2–f4 and Qh5 (or Qf3). Black's most natural reply is 2...Nf6, which is considered in columns 1–12. Against 3 Bc4 Black can play 3...Nxe4 (columns 1–2), the so-called Frankenstein-Dracula Variation, with great complications. More-positional play arises from 3...Nc6, 3...Bc5, or 3...Bb4 (columns 3–6).

Instead of 3 Bc4 White has the slow-building 3 g3 (columns 7–8) or the old thematic 3 f4 (columns 9–12) with fairly balanced play.

Black's major second-move alternative is 2...Nc6 (columns 13–17). White now has 3 f4 which can lead to either the Pierce, Hamppe-Allgaier, or Steinitz Gambits, with interesting chances for both sides. 2...Bc5 (column 18) was played by Capablanca and is a way to avoid the usual lines.

VIENNA GAME

1 e4 e5 2 Nc3 Nf6 3 Bc4

	1	2	3	4	5	6
	Nxe4		Nc6		Bb4	Bc5(aa)
4	Qh5(a) Nd6		d3(j) Na5.....Bb4		f4(t) Nxe4	d3(bb) d6(cc)

10	Nxe2 ± Bb5† Be2 Kd3 gxf3 0-0					
	c6(j) Bxc3†(l) Qh5 = Re8†(r) Be6(z)					

- (a) Another try is 4 d3 d6 5 Be3 Nf6 6 Bxc5 dxc5 7 Nge2 Na5 8 Bb3 ±, Tartakower–Rubinstein, Moscow 1925.
- (b) Perhaps better is 4 ... Kf8 when 5 Qf3?! Nf6 6 Nge2 d6 7 d3 Nb4 (7 ... h6 8 h3 ±, Hennings–Korchnoi, Sarajevo 1981) 8 Bb3 Bg4 9 Qg3 Be6 slightly favors Black, Rosselli–Yates, Semmering 1926. (B) 4 ... Qf6 5 Nd5! Qxf2† 6 Kd1 Kf8 7 Nh3 Qd4 8 d3 Bb6 9 Qf3 ±, Alekhine–Jugovsky, 1931.
- (c) 5 Qg3 d6 6 d3 Nd4 7 Bb3 Be6 =, Spielmann–Tarrasch, Vienna 1922.
- (d) 8 ... Bxe2 9 Nxe2 ±, Estrin–Ravinsky, Moscow 1964.
- (e) 9 ... Qe7 10 Nd5 Nxd5 11 Qxg4 ±, Larsen–Portisch, Santa Monica 1966.
- (f) (A) 3 ... Nf6 4 fxe5 Nxe5 5 d4 Ng6 6 e5 ±, Steinitz–Bird, London 1866.
 (B) After 3 ... Bc5 the simplest is 4 Nf3 d6 5 Bb5 getting a favorable variation of the King's Gambit Declined.
- (g) Attempts to sidestep this by moves like 4 ... Nf6, 4 ... h6, or 4 ... Be7 lead to White getting good lines in the King's Gambit; Black's knight sometimes becomes a target for White's d-pawn, and White's knight on c3 controls d5.
- (h) (A) 5 ... Bg7 6 d5 Ne5 7 d6 Nxf3† 8 Qxf3 cxd6 9 h4 h6 10 Bc4 Ne7 11 g3 ±, Arnason–A. Ivanov, St. Martin 1992. (B) 5 ... d6 6 d5 Ne5 7 Bb5† Bd7 8 Bxd7† Nxd7 9 Qd4 f6 10 h4 g4 11 Ng5 ±, Arnason–Adams, Manila 1992.

- (i) (A) 7 . . . Qg5 8 Rxf3 Nxd4 9 Bxf7† Kxf7 (9 . . . Kd8 10 Rf2 ±, Motwani–Kula, Berlin 1991) 10 Rxf4† Nf6 11 Nd5 ±, Motwani–Antunes, Manila 1992.
 (B) 7 . . . Bg7 8 Bxf4 Bxd4† 9 Kh1 Bxc3 10 Bxf7† Kxf7 11 Qd5† Ke8 12 Qh5† Ke7 13 e5 ± (Keres).
- (j) 11 Qxf4 Nf6 (S. Ivanov–E. Ovod, Russia 2001), now 12 Re1† would keep this messy position at roughly even chances.
- (k) Safer is 6 . . . d6 7 d4 f6 8 Nh3 gkh3 9 Qh5† Kd7 10 Qf5† Ke8 11 Qh5† Kd7 with perpetual check, van der Welde–Londyn, Czech Republic 2005.
- (l) After 11 bxc3 Nf6 12 0-0 Kg7 13 c4 Nxe4 14 cxd5 Nc3? (14 . . . Qxd5! is unclear) 15 dxc6! Nxd1 16 Be5† Kg6 17 Bd3† Kh5 18 cxb7 with a huge advantage, Sermier–Ravot, France 2002.
- (m) 5 . . . b6 6 Nb5 Ba6 7 a4 0-0-0 8 Nf3 Qe7 9 Kf2 ±, Martin–Adams, London 1992.
- (n) 7 . . . 0-0-0 8 Ke3 Qh5 9 Be2 g5 10 Nxg5 Nf6 11 Rf1 Bxe2 12 Qxe2 ±.
- (o) 6 Nxd5 Bg4† 7 Nf3 0-0-0 8 c3 f5 ≠, Keres–Kumerth, corr. 1935.
- (p) 8 . . . Bc5 was analyzed extensively in the 19th century. After 9 cxb7† Kb8 10 Nb5 Nf6 11 c3 Rhe8† 12 Kd3 Bf5† 13 Kc4 Be6† 14 Kxc5 (14 Kd3 =) a fantastic—some might say ridiculous—position arises, which is unclear. White has a better try with 9 Qe1 (L’Hermet); after 9 . . . Qh5 10 cxb7† Kb8 11 Kd2 Bxf3 12 gxf3 Bxd4 13 Bd3 Qxf3 14 Qf1 is complicated but seems to favor White (Tseitlin).
- (q) 9 . . . Re8† 10 Kd2 Qh5 11 Qf2 Bb4 12 Bd3 Re3 13 cxb7† Kb8 14 Ne5 ±, Chigorin–Mortimer, Paris 1900.
- (r) 11 Ne4 Qh5 12 Kf2 Qh4† 13 Ke2 = (Bilguier).
- (s) (A) 3 f4 d6 leads to a King’s Gambit Declined. (B) 3 Qg4 Nf6 4 Qxg7 Rg8 5 Qh6 Bxf2† ≠, Tsikhelashvili–Karpov, USSR 1968.
- (t) 4 Na4 Bb6 (4 . . . Nd7 5 d3 Ngf6 6 Be2 0-0 7 0-0 c6 8 Nxc5 Nxc5 9 Ne1 Ne6 10 c3 d5 is about even—Tseitlin) 5 Nxb6 axb6 6 d3 Nf6 7 Be2 Nc6 8 0-0 Ne7 9 Re1 ±, Tseitlin–Yanvarev, Budapest 1989.
- (u) (A) 5 . . . Ne7 6 Be2 0-0 7 0-0 Bxd4 8 Qxd4 Nbc6 9 Qe3 f5 =, Rosselli–Alekhine. (B) 5 . . . Nc6 6 Nxc6 bxc6 7 Bd3 Qh4 8 Qf3 Ne7 9 Qg3 ±, Tseitlin–Gusev, Moscow 1978.
- (v) 6 Be2 d5 7 e5 Ne4 8 0-0 Nxc3 =, Voitkevich–Tolush, USSR 1962.
- (w) 6 . . . Nc6 7 Nxc6 bxc6 8 Bd3 0-0 9 Na4 Bb6 10 0-0 Qe7 11 Qe2 ±, Oll–Kakhiani, Helsinki 1992.
- (x) 8 Be2 Re8 9 f3 c6 10 Nb3 Bb6 =, Kuif–I. Sokolov, Netherlands 1996.
- (y) 8 . . . Bb4 9 Bd3 Re8 10 0-0 Bxc3 11 bxc3 (Tauber–Marek, Slovenia 2000), now Black should be brave with 11 . . . g5 12 Bg3 Nxe4 and his chances are at least equal.
- (z) 11 Kh1 Nbd7 12 f4 ± (Konstantinopolsky).

FOUR KNIGHTS' GAME

1 e4 e5 2 Nf3 Nc6 3 Nc3 Nf6

BEGINNERS LEARNING the start of a chess game hear the rule “knights before bishops” which emphasizes the importance of developing knights. Thus the Four Knights’ Game makes a lot of sense logically, and before World War I it was very popular with the best players of the time. Tarrasch, Schlechter, Maróczy, and Janowski played it with regularity, and Capablanca and Alekhine had several examples in their game collections. The simple logic had lost its appeal by the 1930s as masters considered it to be too simple and dull. White develops, but without many threats, and allows Black to maintain a symmetrical structure. This led to the view that Black has few problems to achieve equality. Little changed in this assessment for 60 years until English players in the 1990s revived the opening to some degree. Nunn wrote a book on the Four Knights while other grandmasters started to employ it on occasion, and so the opening came to life again. Today it is still regarded as rather unambitious, but logical and respectable. White risks very little, so grandmasters will use it for surprise value and club players for its dependable nature.

If Black is satisfied with an equal, drawish game, then copying White’s moves is a good strategy, as in 4 Bb5 Bb4 5 0-0 0-0 6 d3 d6 (columns 1–6). After 7 Bg5 (columns 1–5) Black should not continue with 7 ... Bg4?! (see note (b)) but should eliminate the queen’s knight with 7 ... Bxc3, when he should have few problems. White can play 7 Ne2 (column 6), but it usually leads to little.

Earlier deviations from the symmetry are seen in columns 7–12. Black can play 6 ... Bxc3 and 7 ... d5 (column 7), the Svenonius Variation, or 6 ... Nd4 (column 8), to liven up the play, but both are risky. With 6 Bxc6 (column 9) White can reach a position resembling the Exchange Ruy Lopez. Columns 10–13 cover the Rubinstein Defense, 4 ... Nd4,

which avoids symmetry with a pawn sacrifice. This is popular today as it is Black's best winning attempt and seems to be sound.

Columns 14 and 15 are little-played fourth-move alternatives for Black. Both a little risky, but not bad. The Belgrade Gambit, 4 d4 (columns 16–18), is a speculative attempt to complicate the game. Black can either play into complications (column 16), dodge them with 5 . . . Be7 (column 17), or attempt to avoid the whole question with 4 . . . Bb4 (column 18).

THREE KNIGHTS' GAME

1 e4 e5 2 Nf3 Nc6 3 Nc3

BLACK CHOOSES THE THREE KNIGHTS' GAME to avoid the symmetry of the Four Knights' Game. The choice is risky as there is no third move quite so sound as developing his second knight. Still, there is less worry about dull drawish play in the Three Knights', so enterprising players such as Alekhine, Keres, Larsen, and Romanishin have favored it. It can certainly be a good choice against a cautious, safe opponent who will not aggressively press for the advantage.

The most frequent Black third move is 3 . . . g6, columns 1–4. After 4 d4 exd4 White has a choice between 5 Nxd4 and 5 Nd5 with both moves possibly leading to a small edge. Column 5, 3 . . . Bb4, is rarely played but White usually doesn't get more than a small advantage. Column 6, 3 . . . Bc5, is riskier as it runs into the classic pawn fork after 4 Nxe5 Nxe5 5 d4. Despite attempts to improve the line, White holds the edge.

PHILIDOR'S DEFENSE

1 e4 e5 2 Nf3 d6

PHILIDOR WAS A COMPOSER OF MUSIC and by far the best chess player in the eighteenth century. He proposed this defense in his *L'analyse* of 1749 and it was respected and frequently played until even the early twentieth century. Great players of a hundred years ago—Nimzovich, Tartakower, Alekhine, and Marco—would use it occasionally, but since that time the opening has been out of fashion. The prevailing opinion since then is that it is too passive and that White will obtain a more aggressive position in the center. This may be true, but there is no large advantage that White can force and the defense is respectable.

White's usual response is 3 d4 (columns 1–5) when Black has two main options: maintaining the e5 strongpoint (columns 1–3), or giving up the center with 3 . . . exd4. Nimzovich's 3 . . . Nf6 (columns 1–2) avoids some of the sharper lines White has against 3 . . . Nd7. White can try to exploit this move order with 4 dxе5 (note b) but the usual continuation, 4 Nc3, leads to a slight spatial advantage. The Hanham Variation, 3 . . . Nd7 (column 3), has been revived since some of the sting of the aggressive 7 Ng5 has been removed. After 3 . . . exd4 (columns 4–5) White can recapture with either the queen (column 4) or the knight (column 5). Both moves lead to sharp positions where castling on opposite wings is common. White can play slowly and safely with 3 Bc4 (column 6), though this gives him few chances for the advantage.

- (a) Against 3 . . . f5 the simplest line is 4 exf5 e4 5 Ng5 followed by a subsequent f3—Larsen.
- (b) 4 dxe5 is an attempt to exploit this move order. After 4 . . . Nxe4 5 Qd5 (5 Nbd2 Nxd2 6 Bxd2 Be7 7 Bf4 d5 =, Geller—Campora, Moscow 1989) 5 . . . Nc5 6 Bg5 Qd7 7 exd6 Bxd6 8 Nc3 Qe6† 9 Qxe6† (9 Be3 is a tad better) Nxe6 10 Be3 Bb4 =, Garrido Dominguez—Campora, Seville 2005.
- (c) A slow but solid strategy is 5 g3 Be7 6 Bg2 0-0 7 0-0 c6 8 a4 Re8 9 h3 Bf8 10 Re1 Qc7 11 a5 ±, L. Milov—Kunin, Germany 2004.
- (d) 6 dxe5 dxe5 7 Bxf7† Kxf7 8 Ng5† Kg8 9 Ne6 Qe8 10 Nxc7 Qg6 11 Nxa8 Qxg2 12 Rf1 Nc5 leads to even chances.
- (e) 7 dxe5 dxe5 8 Qe2 c6 9 a4 Qc7 10 h3 Nc5 11 Rd1 Ne6 12 Be3 a5 =, Rozentalis—Yanvarev, Uzhgorod 1987.
- (f) 9 d5 cxd5 10 Nxd5 Nxd5 11 Bxd5 Rb8 12 Qd3 Nf6 13 Bb3 h6 14 Bd2 Bb7 =, O. Korneev—Panchenko, Russia 1995.
- (g) 11 Nxe5 (11 Be2 h6 12 Bf4 Ng6 13 Be3 Ng4 =, Luciano—Kosten, Imperia 1993) 11 . . . dxe5 12 Qf3 Nd7 13 Be3 Bc5 14 Rad1 Qe7 =, Leskuri—Stikovic, Serbia 2006.
- (h) (A) 8 . . . a5 9 Rd1 exd4 10 Nxd4 Re8 11 Bf4 Ne5 12 Bb3 Nfd7 is roughly equal, Petrushin—Savon, Podolsk 1992. (B) 8 . . . Qc7 9 h3 b6 10 Rd1 Bb7 11 dxe5

$Nxe5$ 12 $Bb3$ $a5 \pm$. 8 . . . $b6$ 9 $Rd1$ $Qc7$ 10 $d5$ $c5$ 11 $Nh4$ $a6$ 12 $Nf5 \pm$, J. Polgar–Izeta; Dos Hermanas 1993.

- (i) After 11 $Qf3$ $Ne5$ 12 $Qd1$ $Ng6$ 13 $Re1$ $a6 =$, Skripchenko–Dorfman, France 2003.
- (j) 4 . . . $Be7?$ 5 $dxe5$ $Nxe5$ 6 $Nxe5$ $dxe5$ 7 $Qh5$ wins a pawn.
- (k) 5 0-0 $Be7$ 6 $dxe5$ $dxe5$ 7 $Ng5$ is similar to the text. 5 $Ng5$ $Nh6$ 6 0-0 $Be7$ 7 $Qh5$ 0-0 8 $c3$ $Nf6$ is about even.
- (l) 9 $Bxg5$ $Ngf6$ is equal.
- (m) Brenjo–Djosic, Belgrade 2005. Now 11 $b3$ (instead of 11 0-0 $Qb4$) leaves White with a slight edge.
- (n) Many moves have been played here. (A) 4 . . . $a6$ 5 $Bg5$ $Nc6$ 6 $Qd2$ $Be7$ 7 $Bxe7$ $Nge7$ 8 $Nc3$ 0-0 9 $h3$ is a very small edge, Sutovsky–Bacrot, Internet 2003. (B) 4 . . . $Nc6$ 5 $Bb5$ $Bd7$ 6 $Bxc6$ was played in many 19th-century games. (C) 4 . . . $Bd7$ 5 $Bf4$ $Nc6$ 6 $Qd2$ $Nge7$ 7 $Nc3$ $Ng6$ 8 $Bg5$ $Be7$ 9 $Bxe7$ $Qxe7$ 10 0-0-0 \pm , Kurajica–Westerinen, Solingen 1974.
- (o) 5 $e5$ is considered to lead to equality after 5 . . . $dxe5$ 6 $Qxd8\#$ $Kxd8$ 7 $Nxe5$ $Be6$ 8 $Bc4$ $Bxc4$.
- (p) 8 . . . $Be6$ 9 $h4$ $Re8$ 10 $Bb5$ $a6$ 11 $Bxc6$ $bxc6$ 12 $Nd4$ $Bd7$ 13 $f3$ $h6$ 14 $Be3$ d5 15 $exd5$ $Nxd5$ 16 $Nxc6 \pm$, Rozentalis–Glek, Budapest 1996.
- (q) 11 $Nxe5$ $dxe5$ 12 $f3$ $c6 =$, Sax–Tseshkovsky, Banja Luka 1981.
- (r) 4 . . . $g6$ is another line here. A typical example is 5 $Nc3$ $Bg7$ 6 $Be3$ $Bg7$ 7 $Qd2$ 0-0 8 0-0-0 $Re8$ 9 $f3$ $Nc6$ 10 $h4$ $Nxd4$ 11 $Bxd4$ $Be6 \pm$, V. Chernov–Negulescu, Romania 1995.
- (s) White has a wide choice of reasonable moves here—6 $Bc4$, 6 $Be2$, 6 $g3$, and even 6 $Qf3$ (van der Wiel–Bosboom, Leeuwarden 1994) have been tried.
- (t) 7 . . . $d5$ 8 $Ndb5$ $Bb4$ 9 0-0-0 $c6$ 10 $Nc7$ $Nxe4$ 11 $Qe3$ $Bc5$ (11 . . . $Nxc3$ 12 $bxc3$ $Ba3\#$ 13 $Kb1$ $Na6$ 14 $Nxa8 \pm$, Kargin–Rybchenko, Russia 1992) 12 $Qxe4$ $Qxc7$ 13 $Bxc7 \pm$.
- (u) 8 . . . $d5$ 9 $exd5$ $Nxd5$ 10 $Nxd5$ $Qxd5$ 11 $Kb1 \pm$, Leko–Barbero, Hungary 1994.
- (v) Am. Rodríguez recommends 10 $Nb1!$ instead, which is at least equal for White.
- (w) 11 $Nf5$ $Bxf5$ 12 $exf5$, Am. Rodríguez–Conquest, Cienfuegos 1996; now 12 . . . $d5$ 13 $g4$ $d4$ would slightly favor Black.
- (x) Other choices are 3 . . . $Nd7$, 3 . . . $Qf6$, 3 . . . $Be6$, 3 . . . $Bg4$, 3 . . . $Be6$, and 3 . . . $Nc6$.
- (y) 4 $d4$ $exd4$ 5 $Nxd4$ transposes into column 5.
- (z) 7 . . . $Be6$ and 7 . . . $Nbd7$ could also be played.
- (aa) 10 . . . $d5?!$ 11 $cxd5$ $cxd5$ 12 $g4$ $Bg6$ 13 $Nxe5$ $Nxe5$ 14 $Rxe5$ is good for White—Black has not enough for the pawn. After 10 . . . $Nc5$ 11 $Bc2$ $Ne6$ 12 $Nf1$ $Nd7$ 13 $Ng3$ $Bxf3$ 14 $Qxf3$ $g6$ 15 $Be3$ $Bg5$, the game is completely equal, Gelfand–Yusupov, Munich 1994. This line resembles some quiet lines in the Bishop’s Opening.

PONZIANI'S OPENING

1 e4 e5 2 Nf3 Nc6 3 c3

PONZIANI'S OPENING is a simple attempt to build a strong pawn center of e4 and d4. The plan is somewhat crude, however, and Black can equalize with little trouble. The opening was popular in the nineteenth century, but nowadays it is used only for surprise value or by players like Hector and Velimirović who wish to avoid the beaten paths.

Black can counter White's threatened pawn center in several ways. He can counterattack and remove White's e-pawn with 3...Nf6 4 d4 Nxe4 (columns 1–2), which is the simplest route to equality. He can play 4...d5 (column 3) forcing central exchanges. He can try to seize the initiative with 3...d5 (columns 4–6), which leads to sharp play. After 4 Qa4 Black can either sacrifice material with 4...Nf6 (column 4) or solidify the center with f6 (column 5). Both methods lead to approximate equality. 4 Bb5 (column 6) leads to a sharp position with mutual chances.

GÖRING GAMBIT

1 e4 e5 2 Nf3 Nc6 3 d4 exd4 4 c3

THE GÖRING GAMBIT offers a pawn sacrifice to develop quickly and clear the black e-pawn from the center. White posts his bishop on c4 to pressure f7, and hopes his initiative will lead to an attack. The gambit gives White fair compensation for a pawn, but no advantage. Thus the opening sees only occasional use by serious tournament players, while attacking amateurs will use it for stylistic reasons. Alekhine played the Göring on occasion as did Marshall and Mieses. Sometimes modern grandmasters will employ it, but more often in blitz games where sacrifices need less justification.

Accepting the gambit leaves Black with equal chances. Column 1 is 4 . . . dxc3 5 Nxc3 Bb4, while column 2 is 5 . . . d6. In column 3 White plays the Danish-like 5 Bc4, gambiting two pawns, and Black plays to hold the material.

Declining the gambit is safer (columns 4–6). Column 4, 4 . . . d3, may allow White a slight positional plus. 4 . . . Nf6 (column 5) leads to complicated and obscure play. Column 6 is Capablanca's drawing line. It has held up over the years and is a big reason the Göring Gambit is little played.

DANISH GAMBIT

1 e4 e5 2 d4 exd4 3 c3

THE DANISH GAMBIT is the romantic player's dream opening. White sacrifices two pawns to seize the initiative, determined to win with a blazing attack or go down in flames him/herself. This opening was first analyzed by a Danish jurist named Blankensteiner in 1830. In 1856 a Swedish player, Dr. H.A.W. Lindehn, proposed 4 Bc4, sacrificing the second pawn. This was used by the Dane Martin From (who usually is credited with the opening) in Paris in 1867.

In the early years of the twentieth century Marshall, Blackburne, Alekhine, and Mieses used the gambit in serious games, but with the 1920s it sank into desuetude as Black's defenses became known. There are no grandmasters who use this gambit in serious competition today, although it could be due for a revival as has happened to other romantic-era openings.

Columns 1–4 comprise the acceptance of both pawns, when White has raking bishops targeting the Black kingside. 5 ... d5, returning one of the pawns, is the Schlechter Defense (column 1), thought to lead to an even but unbalanced endgame. Column 2 is a more ambitious attempt at refutation. Columns 3–4 show Black holding on to the pawns at least temporarily and trying to defend, resulting in unclear play. Column 5 is an interesting old line tried by Spielmann and Nezmetdinov and never refuted. Finally, declining the gambit with 3 ... d5 is likely good enough for equality, with 4 ... Qxd5 usually transposing into the Göring Gambit lines, and 4 ... Nf6 5 Bb5+ giving White a tiny edge.

- (s) 5 Be2 Qxg2 6 Bf3 Qg6 7 Nc3 Bb4 8 Nge2 Ne7 9 Nf4 Qf5 10 Be3 d5 11 Rg1 gives White fair attacking chances. But 5 . . . d5 6 Nf3 Bb4† 7 Nc3 0-0 8 0-0 Bxc3 9 bxc3 d6 leaves White too little for the pawn, Karesik–Mikhalevski, Israel 2004.
- (t) 5 . . . d5 is quite playable here. After 6 Nc3 Qe6 7 Nf3 c6 8 Bd3 Be7 9 0-0 Nf6 White probably does not have enough for the pawn.
- (u) 10 . . . d6 11 0-0 Bxc3 12 bxc3 Nc6 13 e4 0-0 14 Rae1, Romashkevich–Saburov, Russia 1889; now 14 . . . f6 is about even.
- (v) After 12 a3 Bxc3 13 bxc3 0-0 White has not quite enough compensation for the pawn.
- (w) 4 . . . Qxd5 5 cxd4 Nf6 6 Nf3 Bb4† 7 Nc3 0-0 (7 . . . Nc6 see the Göring Gambit) 8 Be2 Ne4 9 Bd2 Bxc3 10 bxc3 Nxd2 11 Qxd2 Bg4 =, Ghitescu–Puribzab, Varna 1958.
- (x) (A) 5 cxd4 Bb4† 6 Nc3 Nxd5 7 Bd2 0-0 8 Bd3 =, Andoy–T. R. Hansen, Copenhagen 2004. (B) 5 Bc4 Nxd5 6 Qb3 Qe7† ±. (C) 5 Nf3 Nxd5 6 Qxd4 Nc6 7 Bb5 Be7 =, Alekhine–Molina, Buenos Aires 1926.
- (y) 5 . . . Bd7 6 Bc4 dxc3 7 Nxc3 gave White a space advantage in Klovans–Zhuravlev, Riga 1962, even though the game ended as a draw after 7 . . . Bd6 8 Qb3 Na6 9 Be3 0-0 10 Qxb7 Nc5 11 Bxc5 Bxc5 12 Qb3.
- (z) Not 11 . . . c5? 12 Nxd4 cxd4 13 b3 with a big edge for White, Gusev–Khachaturov, Moscow 1959. After 11 . . . Rd8 12 0-0 Ba6 13 Bxa6 Nxa6 14 Nxd4 Rxd4 15 Be3 White has a small advantage.

LATVIAN GAMBIT

1 e4 e5 2 Nf3 f5

THE OPENING WAS FIRST MENTIONED by Damiano in 1512 and was also known as the Greco Counter-Gambit due to the wonderful games played by Greco in the early 1600s. It was adopted by Latvian players, notably Behting and Nimzovich in the 1920s and 30s, and from here it gets its modern name. The crazy tactical style of the opening is in line with the style of Latvian players such as Shirov and Tal. It is played a lot in correspondence chess because of the fantastic complications that can arise.

Columns 1–2 cover White's immediate attempt to exploit the a2–g8 diagonal with 3 Bc4. After 3 ... fxe4 4 Nxe5 Qg5 (column 1), a blood-curdling position arises that has been analyzed and played by the great Paul Keres. 4 ... d5 (column 2), the Svedenborg Variation, is equally double-edged and exciting. Column 3, 3 exf5, and column 4, 3 d4, are less-played alternatives that also result in messy positions. The sane 3 Nxe5 (columns 5–6) is most popular these days. Black can reply with the speculative 3 ... Nc6 (note p) or the usual 3 ... Qf6 (columns 5–6). White's two main sixth-move options, 6 Nc3 and 6 Be2, seem to ensure a small edge.

- (a) 3 . . . b5 merits consideration, providing the Black king with a shelter later in a particularly critical line. 4 Bxb5 fxe4 5 Nxe5 Qg4 6 d4 Qxg2 7 Rf1 Nf6 was at least equal for Black in Strelis–Eglitis, corr. 1977. On 4 Bb3 fxe4 and now 5 d4 exd4 6 Nxd4 Nf6 7 Nxh5 \pm (Kosten). The piece sacrifice 5 Nc3 is risky but possible. On the other hand, 4 Bxg8 calms the waters considerably, leading to about even chances.
- (b) Blackburne's 4 . . . Nf6 is interesting. After 5 Nf7 Qe7 6 Nxh8 d5 7 Be2 (7 Bxd5 Bg4 8 f3 exf3† 9 Kf2 Qc5† \mp , Woll–Amilibir, corr. 1994) 7 . . . Nc6 with some compensation for the material. 5 Bf7† Ke7 6 Bb3 d5 is probably a little better for White.
- (c) 7 . . . Ke7 8 Bg5† Nf6 9 Qh4 Qxh1† 10 Kd2 e3† 11 Ke2 Bg7 12 Nc3 Qg2 13 Ne4 Kf8 14 Bxf6 g5 15 Qh5 Qxe4 16 Bxg7† Kxg7 17 Qxg5† and White wins, Kozlov–Svendsen, corr. 1991.
- (d) 9 . . . Qxc1 10 Nf7† Ke7 and now both 11 Nxh8 and 11 Nd2 are promising for White but not entirely clear (Kosten).
- (e) 11 Bg5?! (11 Nf7† Kc7 12 Qa5† b6 13 Nb5† cxb5 14 Bf4† d6 15 Qc3† Nc6 16 Rxh1 Rg8 is about even) 11 . . . Qxa1 12 Bxf6† Kc7 13 Nf7 Bb4 and though the game was eventually drawn, Black has the edge here, Durant–Godfrey, New Jersey 2003.

- (f) 6 ... Nf6 7 Qe5† Be7 8 Bb5† (8 Nxh8 dxc4 9 b3 Nc6 10 Qb5 Be6 leaves Black compensation for the material; 8 Qxe7† Qxe7 9 Nxe7 Kxe7 10 Be2 Rg8 gave Black good play in Nymann–Kozlov, corr. 1991) 8 ... c6 9 Nxe7 Qxe7 10 Qxe7† Kxe7 11 Be2 Rg8 12 g3 \pm . Black cannot use c6 for his knight.
- (g) 7 Qxh8 Kf7 8 Qd4 Be6 9 Be2 Nc6 allows Black play for the material, Zaqqcco–Donato, Italy 2004.
- (h) (A) 10 0-0 Nc6 11 Bxe4 Ne5 12 Qg3 Rg8 \mp , Drucke–Kranze, corr. 1991.
 (B) 10 b3 c6 11 Bxe4 Rg8 12 Qf5† Kd8 13 Qf3 Bg4 14 Qe3 Nbd7 15 d3 Qg7 with at least equality for Black, Heap–Kranze, corr. 1993.
- (i) 11 Be3 c6 12 Bb3 Bh6 13 0-0-0 Bxe3† 14 fxe3 b6 15 Rxd3 Kc7 \mp , Melchor–Elburg, corr. 1989.
- (j) Others possibilities are: (A) 4 Qe2 Qe7 5. Nd4 Nc6 6 Qh5† Kd8 7 Nxc6† dxc6 =, Psomiddis–Hector, Katerini 1992. (B) 4 Ng1 Nf6 5 g4 (5 d3 Qe7 is okay) 5 ... h5 6 g5 Ng4 (looks like an Allgaier reversed now) 7 d4 e3 8 Bxe3 Nxe3 9 Qe2 Qg5 =, Magee–Budovskis, corr. 1991. (C) 4 Nd4 Qf6 5 c3 Nc6 6 Nb5 Qe5 7 Qe2 Kd8 =, Downey–Kranz, corr. 1992.
- (k) 8 Nc3 g6 9 fxg6 hxg6 10 Nxh8 gxh5 =, Stummer–Schlenker, corr. 1991. Perhaps 9 Nxh8 right away is better.
- (l) 11 Nc3 (11 Rg1 Nc6 12 Rg3 Nd4 13 Kd1 g6 is fine for Black, Elburg–Itcap, corr. 1991) 11 ... Nxg4 12 Nd5† or 11 ... c6 12 Rg1 is rated as a little better for White (Kosten).
- (m) 5 Bc4 d5 6 Bb3 Be6 7 Bg5 Be7 =, Stockholm vs. Riga, corr. 1934.
- (n) 6 Nc4 Be7 7 Ne3 c6 8 Qd2 d5 9 c4 0-0 10 Be2 Be6 =, Kantinti–Mensina, Istanbul Ol. 2000.
- (o) Better than 10 ... Kf7 11 Nxc7 \pm . After 10 ... Kd7! 11 Nb6† Kc6 12 Nxa8 fxe5 13 Bc4 Bd6 Black is slightly better, Pietrusiak–Hector, Sweden 1984.
- (p) Speculative but interesting is 3 ... Nc6 4 Nxc6 (4 Qh5† g6 5 Nxg6 Nf6 6 Qh3 hxg6 7 Qxh8 Qe7 with compensation, Jensen–Magee, corr. 1991) 4 ... dxc6 5 Nc3 Bc5 6 d3 Nf6 with some play for Black, Doncević–Hermann, Bundesliga 1988.
- (q) 4 Nc4 fxe4 5 Nc3 Qf7 6 Ne3 c6 7 d3 (7 Nxe4 d5 is okay for Black) 7 ... exd3 8 Bxd3 d5 =, Diravieks–Downey, corr. 1992.
- (r) 7 Bf4 Nf6 8 Qd2 Be7 9 0-0-0 0-0 10 h3 Nbd7 11 Kb1 Nb6 =, Shabalov–Karklins, Denver 2003.
- (s) 11 0-0 Nf6 (11 ... Qxd4 12 Nb5 Qxe3† 13 Nxe3 Kd8 14 Nd5 \pm) 12 d5 Nb4 13 Rf4 \pm , Rublevsky–Maliutin, Russia 1992.
- (t) 6 ... Qd8 7 d5 Nf6 8 Nc3 Be7 9 Be3 0-0 10 Nd2 c5 11 Ndxe4 Qb6 12 Rb1 \pm , Kosten–Hector, Torcy 1988.
- (u) 11 Bf4 h5?! 12 f3 Bf5 13 Nc3 exf3 14 Qxf3 Bxc2 15 Bg5† Nf6 16 Rae1 c6 (16 ... Qxg5 17 Qxf6†) 17 Bxf6† Qxf6 18 Qe2 Qd4† 19 Kh1 Bg6 20 Rxf8† winning, Bronstein–Mikenas, Kostov 1941. Better is 11 ... Nf6, though White stands better after 12 Nc3.

BISHOP'S OPENING

1 e4 e5 2 Bc4

THE BISHOP'S OPENING is an attempt to delay developing the king's knight and to retain the option of moving the f-pawn forward. Studied by the old masters Lucena and Ruy Lopez, it was also favored by Philidor. Nowadays it looks more like a beginner's opening (someone trying for Scholar's Mate), but this is somewhat unfair. Even Kasparov has tried it (once) in a serious game, and it has the advantage that Black cannot play the drawish Petrov's Defense. The Bishop's Opening may also transpose into the Vienna, the King's Gambit, or the Guoco Piano.

Black's most natural response is 2 ... Nf6 (columns 1–5). Now White is at a crossroads on how to defend e4. The most common method is 3 d3 (columns 1–3), and after 3 ... c6 4 Nf3 Black can either go through with 4 ... d5 (column 1) or play the quiet ... d6 (column 2). Both ways seem to be sufficient for equality. Black can proceed aggressively with 3 ... d5 (column 3), usually sacrificing the e-pawn for active play. This is perhaps a tad too dynamic. Columns 4–5 feature the old 3 d4 in which White sacrifices a pawn for quick development. Black can defend with either 7 ... Nc6 or 7 ... c6. Column 6 shows Black imitating White with 2 ... Bc5. White's attempt to blast through the center leads to approximate equality.

- (t) 11 Qh4 Nc5 (11 ... c5 12 Ne5 Nxe5 13 Rxe5 d4 14 f4 Nd7 15 Bb5 Bxg5 16 fxg5 Qc7 White has compensation, Timoshenko–Karpov, USSR 1967) 12 Nd4 Ng8 13 Bxe7 Qxe7 14 Qg3 g6. Now 15 Nce2, 15 f4, and 15 b4 give White play in an obscure position.
- (u) (A) 2 ... Nc6 3 Qh5 g6 4 Qf3 looks like a beginner's game but was played in Nakamura–Harakrishna, Copenhagen 2004. Now 4 ... f5! 5 exf5?! Nd4 6 Qd5 Qe7 would make White regret his early queen sortie. (B) 2 ... f5 3 d3 Nf6 4 f4 d6 5 Nf3 fxe4 (5 ... Nc6 Keres) 6 dxе4 Bg4 7 fxe5 \pm , Pereira–Roose, corr. 1982.
- (v) (A) 3 f4 Bxg1 4 Qh5 Qe7 5 Rxg1 Nc6 \mp . (B) 3 b4 Bxb4 4 f4 d5 5 exd5 e4 \mp . (C) 3 Qg4 Qf6 4 Nc3 Ne7 (4 ... Qxf2† is risky) 5 Qg3 Nbc6 =, Chekov–Perez, Caracas 1976. (D) 3 Nf3 usually transposes into other openings such as the Giuoco Piano. (E) 3 Qh5 Qe7 = (avoiding 3 ... Nc6?? 4 Qxf7 mate).
- (w) Some alternatives are 3 ... Qf6, 3 ... Qe7, 3 ... Nc6, and 3 ... d5.

- (x) 6 Bb5† Bd7 7 Bxd7† Nfxd7 8 cxd4 Bb4† = (Larsen).
- (y) 9 Kf1? dxc3 10 Nxc3 Qd3† 11 Nge2 Rxe2 12 Qd5 Rc2† ±.
- (z) 11 Nd2 Na6 12 Qxc4 Qxf6 13 Qxe2 leads to a balanced position with drawish tendencies.

CENTER GAME

1 e4 e5 2 d4 cxd4 3 Qxd4

LIKE THE KING'S GAMBIT, the Center Game is an attempt to knock out Black's central strongpoint at e5. It succeeds in this, but the resulting exposure of the queen allows Black to develop with tempo so his forces enter the game quickly. This is another opening that was thought to have been buried in the nineteenth century (even though Mieses got a winning position against Capablanca with it). In the early twenty-first century some adventurous grandmasters use it for surprise value and to ensure an unbalanced, fighting game. Theoretically Black gets no disadvantage, but players of the White side may simply like the kind of position that arises.

3 ... Nc6 4 Qe3 Nf6 5 Nc3 Bb4 6 Bd2 0-0 7 0-0-0 Re8 is the main line, covered in columns 1–2. After 8 Qg3 Black can play the supposed refutation 8 ... Rxe4 or the more conservative 8 ... d6 favored by Karpov. 5 ... Be7 (column 3) is a quieter way to balance the game. The White deviation 5 e5 (column 4) is not so bad. 4 ... g6 (column 5) is a reasonable way to sidestep the main lines. In column 6 White plays 4 Qa4, a Center Counter with an extra tempo.

CENTER GAME

- (a) Black could try 3 . . . Qf6 4 Qe3 Bb4† 5 c3 Ba5 6 Bc4 d6 7 f4 Ne7 8 Nf3 Nbc6 9 Qe2 Bb6 =, Thorsteinsson–Gunnarsson, Reykjavík 1990.
- (b) Some other choices here are 4 Qc4 Nf6 5 Nc3 d5 =, Mieses–Leonhardt, Berlin 1920, and the unusual 4 Qd2 or 4 Qd1.
- (c) An interesting alternative is 4 . . . Bb4† 5 c3 (5 Nc3 Nge7 6 Bd2 0-0 7 0-0-0 d6 8 Qg3 Kh8 9 f4 f5 =, Tolush–Botvinnik, USSR 1944) 5 . . . Ba5 6 Qg3 Nf6 7 b4 (7 Qxg7 Rg8 8 Qh6 Rg6 and 9 . . . Nxe4) 7 . . . Bb6 8 b5 0-0! =, Vavra–Londyn, Czech Republic 2005.
- (d) 8 Bc4 d6 9 Nh3 Ne5 10 Bb3 Be6 =, Ekdýshman–Studnicka, Czech Open 2006.
- (e) 8 . . . Nxe4 9 Nxe4 Rxe4 10 c3 Bf8 11 Bd3 Re8 12 Nf3 and White has compensation for the pawn.
- (f) (A) 9 f4 d5 10 Bd3 Re8 ≠, Wallyn–Sharif, Lyon 1990. (B) 9 Bd3 Rg4 10 Qh3 (Zinn–Sax, Bajal 1972) 10 . . . d6 ≠.
- (g) Bold, but probably good is 9 . . . Rg4 10 Qe3 Ba5 11 f3 Rd4 12 Bd3 Bxc3 13 Bxc3 Nd5 ≠, Campora–De la Paz, Spain 2003.
- (h) 12 Bd3 d6 13 Rde1 Rxe1† 14 Rxe1 Ne7 ≠, Restuccia–Stefanova, Mar del Plata 2003. White has some play for the pawn.
- (i) (A) 10 . . . c6?! 11 h5 turned out badly for Black in Morozevich–Hebden, Lon-

don 1994. If (B) 10 . . . h6 not 11 Bxh6 Nh5 12 Qg5 Qxg5 13 Bxg5 Bxc3 with compensation, but 11 Qh2 intending g4 (Karpov).

- (j) 12 Qh2 c6 13 a3 Ba5, Shirov–Karpov, Dos Hermanas 1995; now either 14 Nf4 or 14 Ng5 would have kept the chances balanced.
- (k) (A) 6 Qg3 is an alternative. After 6 . . . 0-0 7 Bh6 Ne8 8 Bf4 d6 9 0-0-0 Be6 White was a little better in Winawer–Janowski, Nuremberg 1896. (B) After 6 Bc4 Nb4 7 Qd2 0-0 8 a3 Nc6, White had no advantage in Soloviev–Yudovic, USSR 1955.
- (l) This is better than 8 Nxd5 Qxd5 9 Ne2 Bg4 10 Nf4 Qd7 11 f3 0-0-0 12 0-0-0 Bf5 13 Bd3 Bd6 \mp (Griffiths).
- (m) Anand recommends 8 . . . 0-0 9 Bh6 Bf6 10 0-0-0 Be6 11 Ne4 Kh8 =.
- (n) After 12 Nf3 White holds a small plus, Adams–Anand, Linares 1994.
- (o) After 6 Qe2 d6 (6 . . . d5 7 h3 Nh6 8 Bxh6 gxh6 9 Nf3 is better for White) 7 f3 Nh6, both 8 Bxh6 Qh4† 9 Qf2 Qxh6 and 8 exd6† Be6 favor Black. Also no help is 7 exd6† Be6 8 dxc7 Qxc7 9 Nf3 Bc5 \mp , Makovets–Maróczy, Budapest 1895, or 7 h3 Ngxe5 8 f4 Qh4† 9 Kd1 Ne4 \mp .
- (p) (A) 8 dxc7 Qd1† 9 Kxd1 Nx2† 10 Ke1 Nxe4 \mp . (B) 8 Ba6 Qxd6 9 Bxb7 Qb4† 10 Qxb4 Nxb4 11 Na3 Rb8 12 Bf3 Ne5 \mp , Mieses–Burn, Breslau 1912. 8 Bc4 and 8 Bb5 are also possibilities.
- (q) 12 Nf3 Ng4 13 0-0 Qb6 14 Ng5 Nxf2 15 Qc2 Nh3† 16 Kh1 Nxg5 17 Bxg5 Be3 =, Ghinda–Lukacs, Baile Herculaine 1982.
- (r) 5 Bc4 Bg7 6 Ne2 Nge7 7 Nbc3 0-0 =, Skripchenko–E. Atalik, Accentus Ladies 2006.
- (s) 6 Nf3 Nge7 7 Bc4 d6 8 Bd2 0-0 9 0-0-0 a6 is probably about even, Smederevac–Kicović, Yugoslavia 1954.
- (t) 6 . . . Nge7 7 0-0-0 0-0 8 Bc4 d6 9 h4 \pm , Mieses–Spielmann, Breslau 1912.
- (u) After 12 Rxh5 gxh5 13 f3, White has fair play for his sacrificed material, Chigorin–Otto, St. Petersburg 1883.
- (v) 4 . . . Bc5 must be reasonable here, as well as 4 . . . Be7 and 4 . . . g6.
- (w) 5 Nf3 d5 6 Nc3 dxe4 immediately equalizes.
- (x) 5 . . . h6 6 Bh4 Qe7 7 Nc3 Qb4 8 Qxb4 Bxb4 9 Bxf6 gxf6 10 Nge2 is somewhat better for White (Keres).
- (y) 8 . . . Ng4 is also possible here. After 9 Bxe7 Qxe7 10 Rd2 White is hard-pressed to prove an advantage.
- (z) An attempt to liven up the position. After 11 Bxe7 Qxe7 White's slightly greater command of space means little. The column is Milev–Chipev, Bulgaria 1961.

UNUSUAL DOUBLE KING PAWN OPENINGS

1 e4 e5

THE HUNGARIAN DEFENSE, 2 Nf3 Nc6 3 Bc4 Be7!? is an attempt to avoid the intricacies of the Giuoco Piano and the Two Knights' Defense. Played by old-style positional defenders like Reshevsky, Hort, and Smyslov, it has a reputation for solidity and stodginess. After 4 d4 d6 White now determines the future course of the game; he/she can try for a small edge in the endgame (column 1, note b) or play for a space advantage on the queenside with 5 d5 followed by a subsequent c4, with King's Indian-like play (column 1). If he prefers more fluid piece play he opts for 5 Nc3 (column 2). Either method usually leads to a slight edge.

Column 3, 3 . . . d6, is another attempt to defuse White's setup, leading to sharp play slightly favoring White. At least the territory is mostly unmapped in this line.

The brazen QUEEN'S PAWN COUNTER GAMBIT, 2 . . . d5 (columns 4–5), is an impatient attempt to seize the initiative. Black gives up a pawn, sometimes two, to get ahead in development and misplace White's queen. Almost never played at a high level, the opening needs some new analysis to rehabilitate it.

2 Ne2 (column 6) is ALAPIN'S OPENING, a curiosity from a century ago.

- (z) If 7 ... Be7 8 Nc3 c6 9 Be3 0-0, Bakony–Kostić, Spindlerovy-Mlín 1948; now 10 Bd3 g6 11 Qd2 with the idea 0-0-0 is slightly better for White.
- (aa) Now instead of 10 Bd2?! Nxf4 11 Nxf4 Nxe5 12 Bb5+ Bd7 13 Qe2 Bd6 \mp , Alapin–Rubinstein, Vienna 1908, White should play 10 Bb5 Nxf4 11 Bxc6+ bxc6 12 Nxf4 Bb4+ with even chances (Fine).

II

SEMI-OPEN GAMES

ALEKHINE'S DEFENSE

1 e4 Nf6

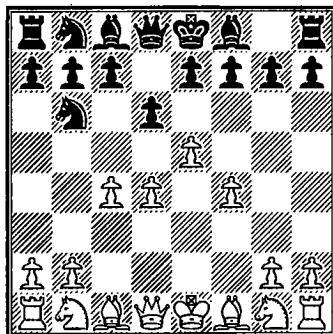

BLACK'S BRAZEN FIRST MOVE provokes White into gaining space by crossing over to Black's side of the board. The game immediately loses any sense of symmetry or balance, which makes the opening a good choice for aggressive fighting players. Currently Grandmasters Shabalov and Minasian use the opening with regularity while Aronian, Adams, and Nakamura will use it on occasion. In the past, great players such as Fischer and Korchnoi included the defense in their repertoire, leading to its respectable reputation.

The negative view of Alekhine's Defense must be given full consideration. It is that Black simply gives away space for no significant return. Sometimes White routinely obtains control of the board, leaving Black cramped with little room to maneuver. There is enough danger of this happening to make most grandmasters avoid Alekhine's as a frontline defense, using it instead as a surprise weapon to unsettle an opponent, as Alekhine did when launching the opening into respectability against A. Steiner at Budapest in 1921. The fashion could quickly change if some champion of the opening takes up the cause, as the results Black has obtained in practice are good.

The Modern Variation, 2 e5 Nd5 3 d4 d6 4 Nf3 (columns 1–12), is White's most respected response. White keeps a modest space advantage and seeks no more until all his/her pieces are deployed. 4...Bg4 (columns 1–6) is Black's most tested reply, although White maintains a pull. Columns 4 and 5 are offbeat lines that may confuse an unprepared opponent. 4...g6 (columns 7–9) produces sharp positions that require accurate play.

The Exchange Variation, 2 e5 Nd5 3 d4 d6 4 c4 Nb6 5 exd6 (columns 13–18), is a relatively safe response. White gives up his central point at e5 to avoid problems and just develops logically. Black can recapture

5 . . . cxd6 (columns 13–16), which preserves the chance for a dynamic central advance. White's best chance of advantage seems to be column 15 (6 Nc3), trying to take play into an advantageous endgame. Safest for Black is 5 . . . exd6 which seeks to equalize with a symmetrical pawn structure.

The Four Pawns' Attack, 2 e5 Nd5 3 d4 d6 4 c4 Nb6 5 f4 (columns 19–24), attempts to dominate the center with pawns (see diagram above). White's aggressive reaction must be met by careful defense; otherwise White will obtain the initiative and a great advantage in space. Theory has given Black several reasonable plans to counter the aggression, so a prepared player will have little reason to fear this variation. The main line has not been improved for years (column 19)—White sacrifices the exchange to press his initiative, requiring active defense from Black.

Of the minor variations, the Two Pawns' Attack (columns 25–26) is an aggressive attempt to gain an attack, often at the cost of a pawn. Black gains full equality against this and the other minor variations with accurate play.

ALEKHINE'S DEFENSE

- (a) A major alternative is 5 c4 Nb6 6 exd6 cxd6 transposing into the Exchange Variation, column 13.
- (b) 5 . . . c6 6 0-0 Bg7 7 exd6! Qxd6 8 Nbd2 0-0 9 Bb3 Nd7 10 Nc4 Qc7 11 Re1 ±, S. Petersen–de Firmian, Politiken Cup 2006.
- (c) 7 0-0 0-0 8 h3 Nc6 9 Qe2 Na5 10 Bg5 d5 11 c3 f6 =, Khachiyan–Nakamura, North American Open 2002.
- (d) On 7 . . . a5 White has a strong and simple plan to take squares—8 Qe2 0-0 9 h3! Nc6 10 0-0 dxe5 11 dxe5 Nd4 12 Nxd4 Qxd4 13 Re1 Bf5 14 Nd2 and Black gets pushed back. Note that Nc6-a5 has been eliminated.
- (e) 8 . . . Nd5 9 Nxe5 0-0 10 0-0 c5? 11 Nxf7! Kxf7 12 Qf3+ wins, Nunn–Schroll, Vienna 1991.
- (f) 13 Nxa8 exd4 14 c3 Nc5 15 cxd4 Bxd4 16 Be3 e5 17 Bxd4 exd4 18 0-0 ±, Oral–de Firmian, Reykjavik 2000.
- (g) Not 7 . . . 0-0? 8 e6 ±. 7 . . . d5 8 f4 f6 9 Nf3 Nc6 10 c3 0-0 11 0-0 Bf5 12 Nh4 ±, Balashov–Baturin, Alborg 1993.
- (h) 8 f4 dxe5 9 fxe5 c5 10 0-0 0-0 11 c3 cxd4 12 cxd4 Nc6 13 Nf3 f6 =, Shamkovich–Alburt, Reykjavik 1984.

- (i) 13 Qxf6 0-0 14 Qxe5 Qxe5 15 dxe5 Bd7 16 Nbd2 Bc6 17 0-0-0 a5 with a minimal endgame edge for White, Paavilainen–Halmeenaki, Finnish Chp. 2002.
- (j) 5 ... f6 6 c4 Nb6 7 e6! fxg5 8 d5 gives White a bind on critical squares for the sacrificed knight, O’Kelly–Golombek, Amsterdam 1951.
- (k) 13 Nc3 Bf8 14 Qd2 dxc4 15 Bxc4† Be6 =, Ljubojević–Tal, Brussels 1988.
- (l) The knight sacrifice is interesting, but safer is 6 Nf3 e6 7 c4 N5f6 8 Nc3 c5 9 Be2 cxd4 10 Nxd4 with a very small edge, Najar–Fridman, ACP Blitz 2004.
- (m) 8 g3 b5 9 a4 c6 10 Bh3† Kd6 11 Nc3 b4 12 Nxd5 cxd5 13 c4 Nf6 14 Qe5† Kc6 15 Bg2 Qd6 16 Bf4 Kd7 and the attack roughly balances the extra piece, Yemelin–V. Popov, Russia 1998.
- (n) 13 b4! (not 13 0-0-0? g6! 14 Re1 Bh6 winning) 13 ... Qb6! (13 ... cxb4 14 c5† Kxc5 15 Na4† Kd6 16 Nb2 ± [Keres], or 13 ... b6 14 Rb1 g6 15 bxc5† bxc5 16 Rb7!), now 14 Rc1 Qxb4 15 Bd3 looks good for White, although the position is undeniably unclear. Bold players might try both sides of this variation.
- (o) The more standard 6 Bc4 also leaves White freer after 6 ... c6 7 0-0 Bg7 8 Re1 0-0 9 Bb3 Be6 10 Nd2.
- (p) 8 ... c5?! 9 dxc5 Nb4 10 Qe2 Qc7 11 c3! Qxc5 (Plaskett–Valvo, New York 1979) 12 Nxf7 Rxf7 13 cxb4 ±.
- (q) 13 Nc4 Qc7 14 Nce5 Ng4 15 Nh4 ±, Anand–Adams, match 1994.
- (r) Rarely played are: (A) 4 ... Nb6 5 a4 a5 6 exd6 cxd6 7 Bb5† Bd7 8 d5 g6 9 Qd4 ±, Hjartarson–Wolff, Germany 1990; (B) 4 ... c6 5 h3 Bf5 6 Bd3 Bxd3 7 Qxd3 dxe5 8 dxe5 e6 9 0-0 Nd7 10 Qe4 h6 11 Nbd2 ±, Landa–Agdestein, Capelle la Grande 1999.
- (s) White also achieves a promising position with 7 Ng5 e5 8 d5 Nd4 9 Bd3, Haba–Pajeken, Neckar 2002.
- (t) 7 ... e5 8 d5 Nd4 9 Nxd4 exd4 10 Qxd4 ±.
- (u) 9 ... 0-0!? 10 h5 gxh5 11 Rxh5 Qe8 (Smirnov–Aronian, Tripoli 2004), now 12 Rh4 keeps good compensation for the pawn.
- (v) 13 hxg6 hxg6 14 Rxh8† Bxh8 15 Ng5 Qc8 16 Be2 c6 17 g4 Bd7 18 Qd3 ±, Korneev–Dyachkov, Russian Chp. 1996.

6	Nf3	Nc3! g6(a)	g6(g)		Nc3 Be7(m)	
7	Be2 Bg7	h3 Bg7	Be3 Bg7	Bd3(k) Bg7	Be3 Nc6	Qf3 Nc6(p)
8	0-0	Nc3	Rc1(h)	Nge2	Nf3(n)	Be3
	0-0	0-0	0-0	0-0	Bg4	0-0
9	h3(b)	Be3	b3!	0-0	b3	0-0-0
	Nc6	Nc6	e5(i)	Nc6	0-0	f5
10	Nc3	Rc1	dxe5	Be3	Be2	g3
	Bf5	d5(e)	dxe5	Bg4!	f5	f4
11	Be3(c)	c5	Qxd8	f3	0-0	gxf4
	d5	Nc4	Rxd8	Bf5!	f4	Bf5
12	c5	Bxc4	c5	b3(l)	Bc1	c5
	Nc4	dxc4	N6d7	Bxd3	Bf6	Nd7
13	Bxc4	0-0	Bc4	Qxd3	Bb2	Bh3
	dxc4(d)	Bf5(f)	Nc6(j)	e6 =	Kh8(o)	Kh8(q)

- (a) 6 ... Bg4 7 Be3 e6 8 Nbd2 Be7 9 h3 Bf5, Leimkühler–Bagirov, Eupen 1993, seems reasonable for Black. Yet to be tested is 10 g4 Bg6 11 Bg2 giving White more space.
- (b) 9 Nc3 Nc6 10 Be3 Bg4! 11 b3 d5 12 c5 Nc8 13 b4 a6 14 Rb1 e6 15 a4 N8e7 16 b5 axb5 17 axb5 (Oll–Wallach, Manila Ol. 1992) 17 ... Bxf3! 18 Bxf3 Na5=.
- (c) 11 Bf4 h6! 12 Rc1?! (12 Be3 =) 12 ... e5 13 Be3 e4 14 Nd2 d5 15 cxd5 Nxd5 \mp , Geller–Vaganian, Moscow 1985.
- (d) 14 Qa4 e5! (14 ... Bd3 15 Rfd1 f5 16 d5 Ne5 17 Ne1 \pm) 15 Rfd1 exd4 16 Nxd4 Nxd4 17 Bxd4 Bxd4 18 Qxc4 Bxf2+ =, Sigurjonsson–Alburt, Reykjavik 1982.
- (e) White is prepared to meet 10 ... Bf5 with 11 d5 Ne5 12 Nxe5 \pm . Also less satisfactory is 10 ... e5 11 d5! Ne7 12 Be2 Nf5 13 Bg5 Bf6 14 Bxf6 Qxf6 15 Ne4 \pm , Serper–Yermolinsky, Tilburg 1994.
- (f) After 14 Qa4, not 14 ... Bd3?! 15 Rfd1 e5 16 d5 Nd4 17 Nxd4 exd4 18 Rxd3! \pm , but 14 ... e5! =, Pytel–Gipslis, Lublin 1982. The White rook already on c1 doesn't make much difference compared with the previous column.

- (g) 6 . . . Bf5 7 Qf3 Qc8 8 c5 dxc5 9 dxc5 Qxc5 10 Qxb7 Bd7 11 Be3 Qc6 12 Qxc6 Nxc6 13 Nf3 ±, Dvoretsky–Platonov, USSR 1973.
- (h) 8 Qd2 0-0 9 Be2 Nc6 10 Nf3 Bg4 11 b3 d5 12 c5 Nc8 =, Granda Zuniga–Dekker, Curacao 2003.
- (i) 9 . . . Nc6 10 d5 Ne5 11 Be2 Re8 12 Nf3 Ng4 13 Bd4 Bh6 14 Nd2 ±, S. Petrosian–Degraeve, Capelle la Grande 2007.
- (j) 14 Nf3 Nd4 15 Ng5 Rf8 16 Nce4 Nf5 17 0-0 Nf6 18 Rfd1 ±, Ivanchuk–Palatnik, Chess Cruise 2006.
- (k) (A) 7 h4 h5 8 Be3 Bg7 9 Qb3 Nc6 10 Rd1 0-0 11 Be2 e5 =, Kurajica–Hecht, Wijk aan Zee 1973. (B) 7 h3 will likely transpose into column 14.
- (l) 12 Bxf5? Nxc4! puts Black on top. The column is Minić–Gipslis, Yerevan 1971.
- (m) 6 . . . g6 7 Nf3 Bg4 8 h3 Bxf3 9 Qxf3 Bg7?! 10 c5 ±, Kaminski–Oliwa, Polish Chp. 1996.
- (n) 8 Bd3 Bf6 9 Nge2 0-0 10 0-0 Bg4 11 f3 Bh5 12 b3 Re8 =, Ilyin-Zhenevsky–Rabinovich, USSR Chp. 1937.
- (o) Shurkurova–Mamedyarov, President’s Cup 2006. Here instead of 14 Ne4?! d5 =, White could gain an edge with 14 d5.
- (p) More solid is 7 . . . 0-0 8 Bd3 c6 9 Nge2 d5 10 c5 N6d7, Berg–de Firmian, Malmö 2001. Here White has only a little more space.
- (q) 14 d5 Ncb8 15 cxd6 cxd6 16 Bxf5 Rxh5 17 Nge2 ±, Korchnoi–Miles, Biel 1992.

CARO-KANN DEFENSE

1 e4 c6

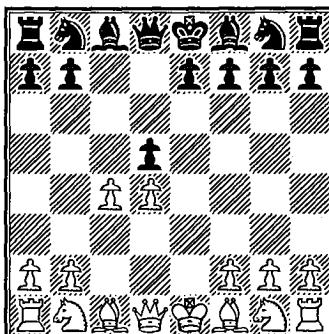

THIS MODEST DEFENSE has gained great respectability in recent years. Black stakes a claim in the center with 1...c6 and 2...d5, which contests the e4 pawn but allows White to achieve d4 with no struggle. The strategic plan will seem strange to a beginner as Black seems to lag in development and makes no aggressive movements. It is no wonder that the defense, known since the sixteenth century, was little understood until the 1890s, when H. Caro of Berlin and M. Kann of Vienna first analyzed it seriously. Now it is used by many famous players, but its greatest exponents have been three World Champions of the twentieth century: Capablanca, at the beginning of the century, Botvinnik in the middle years, and Karpov at the end.

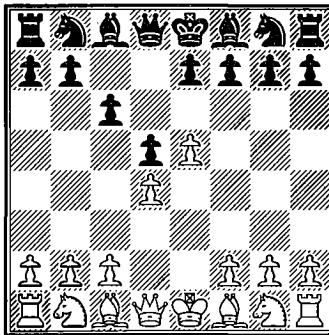

The positive attributes of the Caro-Kann are that Black succeeds in developing all of his/her pieces without creating weaknesses or making other positional concessions (such as the locked-in queen's bishop the French Defense accepts). White is granted more freedom of movement, yet the solid structure and harmonious piece coordination make Black's position tough to assail. If Black achieves development and a pawn break, there will be no problems at all. White's challenge is to make use of his extra mobility before Black completely frees his position.

The MAIN LINE is 2 d4 d5 3 Nc3 dxe4 4 Nxe4 (columns 1–30). See the diagram above. The classical 4 . . . Bf5 (columns 1–12) is Black's oldest and most solid response. White can obtain a small kingside bind by advancing his/her pawn to h5, but to exploit this is a difficult task. A problem with 4 . . . Bf5 is the lack of winning chances against reasonable play by White. The other main variation is the more modern 4 . . . Nd7 (columns 13–24). In order to play for the advantage, White has developed sharp continuations, sometimes involving piece sacrifices or castling on opposite wings. The popularity of 4 . . . Nd7 is explained by the interesting, double-edged positions that arise. Black accepts doubled pawns in columns 25–30 with 4 . . . Nf6. Columns 25–27 deal with 5 Nxf6† gxf6, which opens the g-file for Black and produces sharp attacking positions. With proper play, White obtains the upper hand. Safer play is 5 Nxf6† exf6 (columns 28–30), when Black's doubled f-pawns provide him/her extra protection on the king's wing, but the queenside majority allows White a small edge.

The PANOV-BOTVINNIK ATTACK, 2 d4 d5 3 exd5 cxd5 4 c4 (columns 31–42) is a time-honored plan to turn the defense into an open game (see above diagram). Play is often similar to the Queen's Gambit Accepted or the Semi-Tarrasch Defense of the Queen's Gambit. Black has various defenses that offer reasonable chances.

New strategies have been invented in the ADVANCE VARIATION, 2 d4 d5 3 e5 (columns 43–48). White used to play for a direct attacking scheme that led to tactical fights—this is still seen in columns 45–46. White can also play positionally with 3 . . . Bf5 4 Nf3 and 5 Be2, or moves such as 5 a3. There is a great variety of plans available, and this appeals to many players instead of the sometimes plain main line.

The TWO KNIGHTS' VARIATION, 2 Nc3 d5 3 Nf3 (columns 49–54), takes play into different territory, often similar to a reversed King's Indian. White delays (or avoids) d4 in favor of flexible piece play. Black has a freer hand here than in the main line, allowing several equalizing choices.

Columns 55–60 cover three minor variations. Black plays 3 . . . g6 in columns 55–56, a type of hybrid Caro-Pirc defense. This is offbeat, but fairly respectable. The EXCHANGE VARIATION, 2 d4 d5 3 exd5 cxd5 4 Bd3 (columns 57–58), is a simple plan to develop pieces and play for a king-side initiative, but it holds few prospects for an advantage against good defense. The FANTASY VARIATION, 2 d4 d5 3 f3 (columns 59–60), is not theoretically critical, but it can be used to surprise an opponent.

Lines without 2 d4 (other than the Two Knights' Variation) are the subject of columns 61–66. 2 c4 (columns 61–63) requires some careful defense from Black to equalize. Columns 64–65 is the King's Indian Reversed strategy, which is not dangerous if Black chooses a good plan.

- (a) Also good is 7 . . . Bb4 8 a3 Ba5 9 g4 d4 10 Nb1 c5 11 g5 Nfd7 12 Qg3 Nc6 =, Vallejo Pons–Bologan, Pamplona 2002.
- (b) (A) 8 . . . g6 9 Qg2! Bd6 10 f4 d4 11 Ne2 e5 12 fxe5 Bxe5 13 g5 Nh5 14 0-0-0 ±, van der Wiel–van Mil, Dutch Chp. 1991. (B) 8 . . . h6 9 h4! Ne5 10 Qg3 Nfxg4 11 e5 Bc5 12 Nd1 Qc7 13 f4 ±, Timman–Miles, Amsterdam 1985.
- (c) 9 a3 Ba5 10 g5 (10 0-0-0 0-0 =) 10 . . . Ng8 11 h4 d4 12 Nb1 h6 =.
- (d) 12 b3 Qa5?! 13 a3 Bxd2† 14 Nxd2 Qc3 15 Ra2! ±, Suetin–Shamkovich, USSR 1972. Instead 12 . . . Ne7 13 a3 Bxd2† 14 Nxd2 Qc5 gives equal chances.
- (e) 7 a3 Bc5 8 Be2 0-0 9 0-0 Nbd7 10 Qg3 Bd4 11 Bh6 Ne8 12 Bg5 Ndf6 =, Fischer–Larsen, Zurich 1959.
- (f) Also 7 . . . Nbd7 8 Bg2 Bc5 9 0-0 0-0 10 Qe2 Bd4 11 Kh2 Bxc3 12 bxc3 dxe4 13 dxe4 Qa5 is equal, Smyslov–Flohr, USSR Chp. 1950.
- (g) 10 Bg2 0-0 11 0-0 Nbd7 12 Bc1 a5 =, Paragua–Bologan, Tripoli 2004. Some players will be happy with White's setup.
- (h) 12 Nbx2 Nbd7 13 Bg2 Qc5 14 Qd1 h5 =, Fischer–Benko, Bled Candidates 1959.

- (i) White can play more slowly with 6 d3, which transposes into the previous columns after 6 . . . Nf6, or take an independent course after 6 . . . Qf6 7 Qe2 Bb4 8 Bd2 Nd7 9 a3 Ba5 =, Unzicker–Pomar, Varna Ol. 1962.
- (j) 6 . . . Nf6 7 Bd3 Qb6 (7 . . . dxe4 8 Nxe4 Qxd4 is the column) 8 0-0 Qxd4 9 exd5 Nxd5 10 Rd1 Qf6 11 Qg3 with good play for the pawn, Balashov–Smagin, Russian Chp. 1995.
- (k) 8 . . . Nxe4 9 Qxe4 Nd7 10 c3 Nf6 11 Qe2 Bd6 12 0-0 ±, Short–Karpov, Monaco 1993.
- (l) 12 Bxe4 Qb6 13 Qg3 Nf6 14 Bf3 with an initiative worth the pawn, Nevednichy–Iordachescu, Ciocaltea Mem. 2001.
- (m) 5 d4 e6 (5 . . . dxe4 6 Nxe4 Bxf3 7 Qxf3 Qxd4 8 Be3 Qxb2 9 Bc4!) 6 Bd3 Nf6 7 e5 Nfd7 8 g4 Bg6 9 Bxg6 hxg6 10 Ne2 c5 11 c3 Nc6 12 Kf1 Be7 =, Short–Khalifman, Merida 2001.
- (n) It doesn't pay to rush matters: after 10 h4 f6 11 Nxg6 hxg6 12 Qd3 (12 Bd3 f5!) 12 . . . Kf7 13 a3 (Ljubojević–Salov, Linares 1991), the simple 13 . . . a6 14 Bxc6 Rxc6 gives Black an edge.
- (o) 12 h5 Be4 13 f3 0-0! 14 Nxc6 Nxc6 15 Be3 Qf6! 16 fxe4 Nxd4 17 Bxd4 Qxd4 18 Rd1 Bxc3† 19 bxc3 Qxc3† 20 Kf1 dxe4 21 Qxe4 Qxc2 22 Qxc2 Rxc2 23 Rd7 Rxa2 24 Rxb7 Rb2 =, Lutz–Khenkin, Bundesliga 2000.
- (p) 5 . . . Qb6 6 d4 c5 7 dxc5 Qxc5 (7 . . . Nxc5 8 Nf4 e6 9 Be2 Be7 10 0-0 ±) 8 Ned4 Nc6 9 Bb5 a6 10 Bxc6† bxc6 11 0-0 Qb6 12 e6! fxe6 13 Bf4 g6 14 Be5 Nf6 15 Ng5 ±, Fischer–F. Olafsson, Bled Candidates 1959.
- (q) Estrin–Kopylov, Moscow 1951. Black has a solid position, yet White earns a small edge with 12 d4.
- (r) (A) 4 . . . Bg4 5 h3 Bxf3 6 Qxf3 e6 7 c3! Nf6 8 d4 ±. (B) 4 . . . Nf6 5 Nxf6† gxf6 6 g3 Bg4 7 Bg2 Qd7 8 h3 Bf5 9 Nh4?! Be6 10 d3 Na6 11 Be3 h5 12 Qd2 Bd5 =, van der Wiel–Miles, Brussels 1986. Somewhat better is 9 d3 with thoughts of 0-0-0.
- (s) 5 d4 transposes into the main line 4 . . . Nd7 variations.
- (t) 7 . . . Nb6 8 Ne5! Nxc4 9 Qxc4 Qd5 10 Qxd5 exd5 11 Ngxf7 ±.
- (u) Tseshkovsky–Dzindzichashvili, USSR 1972. White has a slight edge if he plays for the attack while deterring Black's pawn breaks—a plan such as c3, Re1, and Bd3.

CARO-KANN DEFENSE

3 . . . g6, Exchange, and Fantasy Variations

1 e4 c6 2 d4 d5

	55	56	57	58	59	60
3	Nc3..... g6(a)	Nd2 g6(f)	exd5 (Exchange cxd5 Variation)		f3 (Fantasy Variation) dxe4.....e6(r)	
4	e5(b) Bg7(c)	Ngf3 Bg7	Bd3 Nc6		fxe4 e5	Nc3 Bb4
5	f4 h5	h3 dxe4(g)	c3 Nf6Qc7		Nf3 Be6(o)	Bf4 Nf6
6	Be3 Nh6	Nxe4 Nd7	Bf4(i) Bg4(j)	Ne2 Bg4(m)	Bg5(p) Be7	Qd3 b6
7	Nf3 Bg4	Bd3 Ngf6	Qb3 Qd7(k)	f3 Bd7	Bxe7 Qxe7	Nge2 Ba6
8	h3(d) Bxf3	0-0 Nxe4	Nd2 e6	Na3 a6	Nc3 Bg4	Qe3 0-0
9	Qxf3 Nf5	Bxe4 0-0	Ngf3 Bxf3	Nc2 e6	Bc4 Nd7	0-0-0 Be7
10	Bf2 h4(e)	Bg5! h6(h)	Nxf3 Bd6(l)	Bf4 Bd6(n)	d5 Ngf6(q)	g4 c5(s)

- (a) 3 . . . b5?! 4 a3! simply leaves Black with a queenside weakness.
- (b) 4 h3 dxe4 5 Nxe4 Bg7 6 Nf3 transposes into the next column. Black has also played 4 . . . Nh6?! 5 Bf4 f6 6 exd5 cxd5 7 Nb5 Na6 8 c4! 0-0 9 cxd5 Qxd5 10 Nc3 ±.
- (c) 4 . . . h5 5 Bd3 Nh6 6 Nce2 c5 7 c3 ±.
- (d) 8 Be2 Nf5 9 Bf2 e6 10 0-0 Nd7 11 Qd2 Bf8 =, Horvath–Mohr, Bundesliga 2006.
- (e) 11 Bd3 e6 12 0-0 Nd7 13 b3 Bf8 14 Ne2 ±, Hector–Hoi, Copenhagen 2002.
- (f) Of course 3 . . . dxe4 4 Nxe4 is back in the main line. This column and the previous one show the difference between 3 Nc3 and 3 Nd2 if Black doesn't capture on e4.
- (g) Black can keep the position closed with the odd-looking 5 . . . Nh6 6 Bd3 0-0 7 0-0 f6! 8 Re1 Nf7, yet after 9 c4 Na6 10 exd5 cxd5 11 Qb3 Nc7 12 cxd5 b6 13 Ne4 but White has the more harmonious position, Svidler–Georgadze, Gausdal 1992.
- (h) 11 Be3 c5 (Chandler–Christiansen, Thessaloniki Ol. 1984) 12 Qd2! cxd4 13 Bxh6 ±.
- (i) 6 Nf3 appears more natural, but 6 . . . Bg4 7 0-0 e6 allows Black quick equality.

FRENCH DEFENSE

1 e4 e6

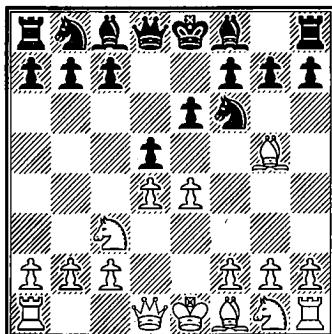

THE FRENCH DEFENSE was named for the Parisian players who adopted the move 1 . . . e6 in an 1834 correspondence game against London, though it dates to the fifteenth century. Black is ready to accept a game slightly cramped in space where maneuvering and pawn breaks are the important themes. The style is quite different from the wide open attacking positions one sees in the Sicilian and other defenses. With the French Defense one must first defend, then counterattack. This takes patience and many players do not have the temperament to play the French. Its great exponents have been Botvinnik, Korchnoi, and more recently Bareev and Mikhail Gurevich.

With 1 . . . e6 and 2 . . . d5 Black makes his/her claim in the center. The conflict between the White pawn on e4 and the Black pawn on d5 begins the central struggle. The pawn structure for the middlegame is usually determined in fewer than ten moves. White will look to the kingside if the e-pawn advances to e5, as the pawn structure points to this. Black usually finds counterchances on the queenside. One frequent positional theme is the liberation of Black's light-squared bishop, locked inside the pawn chain by Black's first move. The problem bishop may cause difficulties even in the endgame.

After 2 d4 d5 the most direct solution to Black's attack on e4 is the ADVANCE VARIATION, 3 e5 (columns 1–6). See above diagram. Clearly visible here are the White pawn chain on the dark squares, which urges for kingside play, and the Black pawn chain on the light squares, which supports queenside play after the usual 3 . . . c5. Used by Benjamin and Shabalov, the Advance Variation most likely leads to a positional struggle.

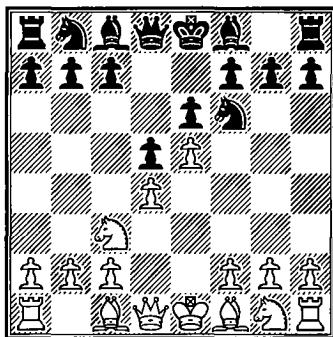

After 2 d4 d5 3 Nc3 Nf6 4 Bg5 (see diagram) 4 . . . Be7 5 e5 Nfd7 6 Bxe7 Qxe7 is the CLASSICAL VARIATION, which was orthodox play in the early twentieth century. The White plan combining f4, Qd2, and 0-0-0 (column 7) leaves White with a solid center and some initiative, though Black gets his/her play on the queenside. Column 8, where White castles queenside, is also testing. The Alekhine-Chatard Attack, 6 h4 (columns 11–12), is a pawn sacrifice Black does best to accept, when the extra pawn compensates for White's initiative. White has found new ideas in recent years to enhance this attack.

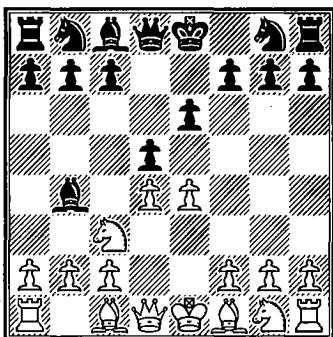

The MACCUTCHEON VARIATION, 4 . . . Bb4 (columns 13–15), is a sharp alternative to the prosaic 4 . . . Be7. Play is more original than in the Orthodox Variation as neither king may find a safe haven. The MacCutcheon has gained popularity in the last decade, V. Akopian being one of the dedicated practitioners.

The BURN'S VARIATION, 4 . . . dxe4 (columns 16–18), is a respectable alternative to allowing the advance 5 e5. White obtains a slight advantage in space, which is acceptable to some players when they have Black. It is similar to the Rubinstein Variation (3 . . . dxe4) and there are some transpositions between these variations.

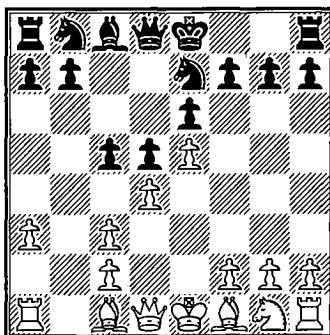

Black immediately gives up the center with 3 . . . dxe4 in the RUBINSTEIN VARIATION (columns 19–24). Recent fashion has produced a renaissance for the Rubinstein, as French Defense players have decided that seeking exchanges and looking to simply neutralize White's initiative is acceptable practice. White obtains a slightly more active game, but Black's solid position is difficult to break down. Note that the Rubinstein Variation also arises from the move order 1 e4 e6 2 d4 d5 3 Nd2 dxe4 4 Nxe4.

The STEINITZ VARIATION 3 Nc3 Nf6 4 e5 (columns 25–30), see above diagram, is White's alternative to the Classical Variation, with similar chances for the advantage. The difference (in the usual line with 5 f4) is that White's dark-squared bishop develops inside the pawn chain to e3 instead of outside the pawn chain at g5. Black should avoid the old line of column 25 in which he sacrifices a piece for three pawns. The pawn grab of column 27 is sharp, but risky for Black against a good attacking player.

If Black seeks direct counterplay and postional imbalances, his choice should be the the WINAWER VARIATION, 3 Nc3 Bb4 (columns 31–60), see diagram on page 199. The battles of space vs. structure, bishops vs. knights, and initiative vs. material ensure a lively complex struggle. After 4 e5 c5 5 a3 Bxc3† 6 bxc3 Ne7 (see diagram below) White has the choice of immediate tactical play or positional play.

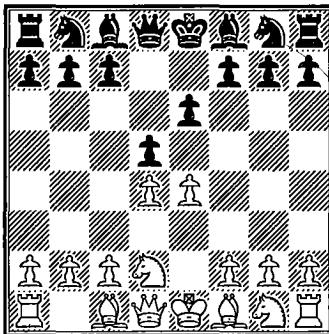

White can play 7 Qg4—the aggressive, complicated Poisoned Pawn Variation (columns 31–36). Black obtains some positional compensation for the pawn in the lines following 7 . . . Qc7 8 Qxg7, but theory and practice is beginning to favor White's extra pawn over the Black initiative. Also popular is 7 . . . 0-0 (columns 35–36) which may be satisfactory.

In the main line Winawer (columns 37–42) White plays positionally with 7 Nf3 (columns 37–40) or 7 a4 (columns 41–42), intending to use the advantage of his bishop pair and kingside pawn wedge. Play can be very difficult. White has chances for the advantage though it often takes patient play.

Columns 43–45 cover the older 6 . . . Qc7, which is similar but a bit less flexible than 6 . . . Ne7. The tactical 5 . . . Ba5 (columns 46–48) was a favorite of Armenian players in the 1980s and 90s. In the twenty-first century White is gaining the advantage in this variation.

Alternatives to 5 a3 are seen in columns 49 and 50. These produce no special problems for Black. Columns 51–54 cover the alternatives to 4 . . . c5, plans involving . . . b6 and the exchange of light-squared bishops. This is positionally well motivated, but it slows Black's queenside counterplay.

White has a choice of second-rate continuations if he wishes to avoid the positional complexities of 4 e5 (see columns 55–60). Some of these fourth-move alternatives are entertaining, but none of them are dangerous to a well-prepared player.

The TARRASCH VARIATION, 2 d4 d5 3 Nd2 (columns 61–90), see diagram above, allows White to avoid the pin ... Bb4 and maintains the mobility of the c-pawn for the drawback of temporarily blocking the queen's bishop. Favored by Adams and Benjamin, it is safer and positionally clearer than 3 Nc3, but also less aggressive. Black's usual responses are 3 ... Nf6, 3 ... c5, and less frequently 3 ... Nc6.

The main line after 3 ... Nf6 is 4 e5 Nfd7 5 Bd3 c5 6 c3 is given in columns 61–66. White seeks to simply develop his pieces and maintain his central pawn wedge. Black can obtain reasonable chances by a timely ... f6, attacking the head of the pawn chain instead of the base.

Alternative lines are covered in columns 67–72. With 5 f4 (columns 67–69) White seeks to fortify his/her pawn wedge, but Black has counterplay from the insecure White king. Black's third-move alternatives in columns 70–72 have not been proven reliable, but could be underrated.

The point to 3 ... c5 (columns 73–84) is that White's 3 Nd2 puts no pressure on d5, so Black has more freedom in the center. 4 exd5 exd5 (columns 73–78) is a classical continuation that usually leaves Black with an isolated d-pawn, but mobilized and active pieces. White obtains a slightly more comfortable position, but for many players this is insignificant—Korchnoi has played the Black side for decades. Black can avoid the isolated d-pawn with 4 ... Qxd5 (columns 79–82), an equally favored continuation in which Black has no structural weaknesses, but White may gain an attack. The active 4 Nf3 (columns 83–84) leaves tension in the center, which seems to benefit Black as much as White.

Guimard's 3 ... Nc6 (columns 85–90) is surprisingly good considering that the move blocks the important Black c-pawn. The idea is to play directly for the d4 and e5 squares. White can have trouble reacting to this, but good sharp play (such as column 86) gives Black problems.

The EXCHANGE VARIATION, 2 d4 d5 3 exd5 exd5 (columns 91–93), is a simple continuation that gains no advantage. The view that it is a drawing

line is only partially correct, as many decisive games occur when one of the players is in a fighting mood.

Unusual lines include Chigorin's 2 Qe2 (column 94), 2 d3 (column 95), which is like the King's Indian Attack, and 3 Nf3 d5 4 Nc3 (column 96). These present no special problems, but allow White to avoid typical French positions.

- (c) 7 . . . a6 8 Nf3 c5 9 dxc5 (9 Qd2 Nc6 10 0-0-0 c4!? is double-edged) 9 . . . Nc6 10 Bd3 Qxc5 (10 . . . Nxc5 11 0-0 f5 12 exf6 Qxf6 13 Qe2 0-0 14 Ne5 ±, Liberzon–Benzion, Israel 1974) 11 Qd2 b5 (11 . . . Nb6 12 a3 Nc4 13 Bxc4 Qxc4 14 0-0-0 ±) 12 0-0-0 b4 13 Na4 Qa5 14 b3 Nc5 15 Nxc5 Qxc5 16 g4 a5 17 f5 a4 18 Kb1 ±, Sutovsky–Thorhallsson, Reykjavik 2004.
- (d) Other choices make White's task easier: (A) 10 . . . f6 11 exf6 Qxf6 12 g3 cxd4 13 Nxd4 Nc5 14 Bg2 Bd7 15 Rhe1 ±, Stahlberg–Keres, Kemerri 1937; (B) 10 . . . a6 11 dxc5! Nxc5 (11 . . . Qxc5 12 Bd3 b5?! 13 Bxh7†! Kxh7 14 Ng5† Kg8 15 Qd3 Re8 16 Qh7† Kf8 17 Qh5 Nd8 18 Nh7† Kg8 19 Rd3†, Chandler–Agnos, London 1989) 12 Qe3 b5 13 Bd3 Nxd3 14 cxd3! f6 15 Rhf1 Bd7 16 Ne2 fxe5 17 Nxe5 ±, Arnason–Dolmatov, Sochi 1988. (C) 10 . . . c4!? 11 Nb5 Nb6 12 h4 Bd7 13 Nd6 Rab8, Bologan–Gleizerov, Calcutta 1999; now 14 h5 (instead of 14 f5?! f6! =) would leave White slightly better chances.

- (e) 12 ... Bd7 13 Kb1 Qc5 14 h4 Rac8 15 Rh3 Na5 16 Nb3! Qxe3 17 Rxe3 Nac4 18 Rf3 with a superior endgame for White, Larsen–Báreev, Hastings 1990. This is an example of a common theme from the Classical Variation—White gains play on the dark squares.
- (f) (A) 12 h4 Bd7 13 h5 Rfc8 (13 ... h6!) 14 h6 g6 (Bjornsson–Halldarsson, Reykjavík 2002), now 15 Nh2! and 16 Ng4 gains the advantage. (B) 12 Kb1 Bd7 13 Nb5 Na4 (13 ... Nxe5? 14 Nxe5 Bxb5 15 b4 wins) 14 Nd6?! f6! \mp , Hjartarson–Brynell, Stockholm 1996.
- (g) White can also sacrifice immediately—13 Bxh7† Kxh7 14 Ng5† Kg8 15 Qd3 Rfe8 16 Qh7† Kf8 17 Rhe1 Qb4 18 Qh8† Ke7 19 Qh4 Kd8! with a complex, probably balanced position, van der Wiel–Korchnoi, Amsterdam 1991.
- (h) 15 Ng5† Kg8 16 Qd3 Rfe8 17 Qh7† Kf8 18 Qh5 Ke7! 19 Nxh7 Na5! 20 Nd6, Sax–Timman, Rotterdam 1989. Here the players agreed to a draw. Chances are balanced, but a wild and difficult game should ensue. With 13 ... Na5 (instead of 13 ... Rac8), Glek–Morozevich, Russian Chp. 1998, continued the same until move 18 when 18 Nce4 dxe4 19 Nxe4 Qc6 20 Rd6 Qb5 21 Qh8† Ke7 22 Qh4† Kf8 was agreed drawn.
- (i) Tricky is 9 Bd3, hoping for 9 ... cxd4? 10 Bxh7† Kxh7 11 Ng5†. The game Szilagyi–Harding, corr. 1989, continued 11 ... Qxg5 12 fxg5 dxc3 13 Qh5† Kg8 14 0-0 Nxe5 15 Rae1 Ng6 16 Re3 e5 17 g4 Rd8 18 Rh3 Rd6 19 Qh7† Kf8 20 Rh6! Rf6 21 Rxf6 Resigns. After 9 Bd3 Black should play 9 ... f6 10 exf6 Qxf6! 11 Ng5?! Qxf4 12 Bxh7† Kh8 13 Qh5 Nf6 14 Nf7† Rxf7 15 Qxf7 Kxh7 16 Rf1 Qxd4 17 Rf3 Qg1† with excellent winning chances.
- (j) (A) 9 ... Qxc5 10 Qd2 Nc6 11 0-0-0 Nb6 transposes into the previous column. (B) 9 ... Nxc5 10 Bd3 will usually transpose back into the column, but White could also play 10 Qd2 Nc6 11 0-0-0 a6 12 Qe3 b5 13 Bd3 with a small edge.
- (k) 14 Qe2 Nd4 15 Nxd4 Qxd4† 16 Qf2 Qb4 17 a3 Qb6 =.
- (l) 15 cxd3 e5 16 Rae1 exf4 17 Nxd5 Qd6 18 Nxf4 Bg4 19 Qe3 Rad8 20 h3 h6 21 h4 \pm , Ganguly–Ulibin, Abu Dhabi 2005.
- (m) (A) 7 Qd2 0-0 8 f4 c5 9 Nf3 transposes into column 7. (B) 7 Qg4?! 0-0 8 Nf3 c5 9 Bd3 cxd4 (also 9 ... f5) 10 Bxh7† Kxh7 11 Qh5† Kg8 12 Ng5 Qxg5 13 Qxg5 dxc3 with advantage to Black (Alekhine).
- (n) This attempts to maintain the central pawn wedge. More circumspect is 8 Nf3 c5 9 dxc5 Nc6 10 Qe2 f6 11 exf6 Qxf6 12 0-0 Nxc5 =, Savon–Rozentalis, Odessa 1989.
- (o) 15 Qxe5 Nc6 16 Nxc6 bxc6 \mp (Keres).
- (p) (A) The older line is 8 Nh3 Qe7 9 Nf4 g6 10 Qg4 Nc6 11 0-0-0 h5 12 Qf3 Nb6 13 g4 h4 =. (B) 8 Nb5?! Qd8 9 Qg4 g6 10 c4 a6 11 Nc3 is active play for the pawn, Nataf–Thorhallsson, Reykjavík 2004.
- (q) 8 ... Nc6 9 Nf3 Qg6 10 Qxg6 fxg6 11 Nb5 Ke7 12 Nxc7 \pm , Kasparov–Korchnoi, Zurich 2001.
- (r) 10 ... a6 11 Qe3 c5 12 dxc5 Qxc5 13 Qf4 Nc6 14 Bd3 Qb4 15 Be4! dxe4 16 Nxe4 with a strong attack, Grischuk–Brynell, Bundesliga 2002.
- (s) 15 Qf4 Nac4 16 Bxc4 dxc4 17 Nh2 \pm , Aabling–Grassle, Politiken Cup 2006.

- (t) Other moves allow White the advantage: (A) 6 . . . a6 7 Qg4 Bxg5 8 hxg5 c5 9 dxc5 Nxe5 10 Qg3 Nbc6 11 0-0-0 ±, Thiel–Jenssen, Hungary 1994; (B) 6 . . . f6 7 Qh5† Kf8 (7 . . . g6 8 exf6! ±) 8 exf6 Nxg6 9Qe2 c5 10 dxc5 Na6 11 Nf3 Nxc5 12 0-0-0 ±, Spassky–Guimard, Gothenburg 1955; (C) 6 . . . h6 7 Be3 c5 8 Qg4 Kf8 9 Nf3 Nc6 10 0-0-0 ±, Dubinin–Rabinovich, USSR Chp. 1934.
- (u) 7 Nb5 f6 8 Bd3 a6! 9 Qh5† Kf8 10 Rh3 axb5 11 Bh6 Qa5† 12 Bd2 Qc7 13 Rg3 cxd4 14 Nf3 Nxe5 15 Rxg7! h6 16 Bh7 Kxg7 17 Qxh6† Draw (17 . . . Kf7 18 Qh5†), Rossetto–Stahlberg, Viña del Mar 1947.
- (v) 7 . . . Qxe7 8 Nb5 0-0 9 Nc7 cxd4 10 Nxa8 f6 11 Qxd4 fxe5 12 Qc3 Nc6 13 Nf3 Nf6 14 0-0-0 Ng4 15 Bb5 ±, Fressinet–Larino Neto, Spanish League 2004.
- (w) White also has a dangerous double pawn sacrifice with 9 Nf3 Qxb2 10 Nb5 a6 11 Rb1 Qxa2 12 Nd6 Qa5† 13 Kf2, Matulović–Zaradić, Zagreb 1955. The column is analysis from the *Russian Chess Openings Encyclopedia*.

- (a) We note here two rare tries by Black on move 3: (A) 3 . . . Nc6 4 Nf3 Nf6 5 Bg5 Be7 6 e5 Ne4 7 Bxe7 Qxe7 8 Bd3 Qb4 9 Bxe4! dxe4 10 a3 Qxb2 11 Nxe4 ± (*Russian Encyclopedia*). (B) 3 . . . Be7 4 Nf3 Nf6 5 Bd3 c5 6 exd5 cxd4 7 Bb5+ Bd7 8 Bxd7+ Qxd7 9 dxe6! Qxe6+ 10 Ne2 ±.
- (b) (A) 5 exd5 Qxd5! (5 . . . exd5?! 6 Qf3 c6 7 Bxf6 ±) 6 Bxf6 Bxc3+ 7 bxc3 gxf6 8 Qd2 Qa5 9 Bd3 Bd7 10 Ne2 Bc6 11 f3 Nd7 12 0-0 0-0-0 =, Magem Badals–Glek, 1996. (B) 5 Nge2 dxe4 6 a3 Be7 7 Bxf6 gxf6 8 Nxe4 f5 9 N4c3 b6 =, Kuijf–Ree, Amsterdam 1983.
- (c) The best square for the bishop. Alternatives are: (A) 6 Bh4 g5 7 Bg3 Ne4 =. (B) 6 Bc1 Ne4 7 Qg4 Kf8 8 a3 Bxc3+ 9 bxc3 c5 10 Bd3 Nxc3 11 dxc5 Nc6 12 Bd2 f5! 13 exf6 Qxf6 14 Qf3 Ne4 =, Malich–Fuchs, East Germany 1963. (C) 6 exf6 hxg5 7 fxg7 Rg8 =. (D) 6 Be3?! Ne4 7 Qg4 Kf8 8 a3 Bxc3+ 9 bxc3 c5 10 Bd3 Nxc3 11 dxc5 Nc6 12 Nf3 f5! 13 exf6 Qxf6 =, Klovans–Shereshevsky, USSR 1977.
- (d) 8 Bd3 Nxd2 9 Qxd2 c5 10 dxc5 Qc7 11 Qe3 0-0 12 Nf3 Nd7 13 0-0 Nxc5 14 Nd4 Bd7 =, Fink–Stoppel, Vienna 1966.

- (e) White obtains active play for a pawn after 9 Bc1 c5 10 Bd3 Nxc3 11 dxc5 Qa5 12 Bd2 Qa4 13 h3 Ne4 14 Ne2 Nxc5 15 Qf3 Qh4 16 0-0 Nc6 17 g3 Qe7 18 Qe3, Tal–Vooremaa, Tallinn 1981.
- (f) Too ambitious here is 11 h4 Qa5 12 h5 g5 13 f4? cxd4 14 Nf3 dxc3† 15 Ke2 Qa4! pinning the f-pawn, Seirawan–Makarychev, Reykjavik 1990.
- (g) (A) 11 . . . c4 12 Be2 Nd7 13 h4 Qe7 14 a3 b6 15 Kc1 Bb7 16 Nd2 0-0-0 17 f4 ±, de Firmian–Nakamura, U.S. Chp. 2006. (B) 11 . . . Bd7 12 h4 Qe7 13 Qf4 Bc6 14 Nh2! Nd7 15 Ng4 ±, Milos–Cubas, Sao Paulo 2005.
- (h) 14 Nd4 Nxd4 15 Qxd4 (also 15 cxd4 ±) Qxd4 16 cxd4 Bd7 17 a4 Bc6 18 a5 with a distinctly better endgame for White, Tischbierek–Stock, Munich 1992.
- (i) Speculative is Maroczy's sharp 9 h4 c5 10 Rh3 Qa5 11 Bd3 Nxd2 12 Rg3!? g6 13 Kxd2 cxd4 14 Qxd4 Nc6 15 Qf4 d4 16 Nf3 Qxc3† 17 Kd2 Qxa1 18 Qf6 Rg8 19 h5.
- (j) 11 h4 c4 12 Be2 Nc6 13 Rh3 Rg8 14 Rf3 Ke7 =, Jenni–Korchnoi, Zurich 2001.
- (k) 11 . . . c4 12 Be2 Nc6 13 Rhb1 Rb8 14 a4 b6 =, Lutz–Ivanchuk, Gothenburg 2005. White should try Short's plan of 13 Qf4 and g4.
- (l) 14 Nd4 Bd7 15 Rhb1 b6 16 a4 Na5 17 Ba6 ±, Kramer–von Heman, Bundesliga 2006.
- (m) (A) 8 Bd2 Nxd2 9 Qxd2 c5 10 dxc5 Nd7 11 Bb5 0-0 12 Bxd7 Bxd7 = (Psakhis).
(B) 8 Ba5?! 0-0 9 Bd3 Nc6 10 Bc3 Nxc3 11 bxc3 f6 ±, Fischer–Petrosian, Curaçao Candidates 1962.
- (n) A blunder is 9 dxc5? Nxf2 10 Kxf2 Qh4† and 11 . . . Qxb4. The column is Spielmann–Nimzovich, Gothenburg 1920.
- (o) 7 . . . Bd7 8 Qd2 Bc6 9 Nxf6† Qxf6 10 Ne5 0-0 11 0-0-0 Nd7 12 Nxc6 bxc6 13 h4! Rab8 14 Rh3 c5 15 Qg5 ±, Spassky–Petrosian, World Chp. 1966.
- (p) 8 c3 Nd7 9 Qc2 e5 10 0-0-0 exd4 11 Nxd4 Qe7 12 h4 Nc5 13 Nxc5 Qxc5 14 Bd3 h6 =, Glek–Lputian, Antwerp, 1993.
- (q) 8 . . . Nd7 9 0-0-0 b6 10 Bc4 Bb7 (10 . . . c6 11 Qe3 ±) 11 d5! b5 12 Bb3 c5 13 Nd6 Bxd5 14 Bxd5 exd5 15 Qxd5 Nb6 16 Qf5 g6 17 Qf4 ±, Z. Almasi–Tukmakov, Pula 2001.
- (r) Dangerous complications arise from 11 . . . g6 12 0-0-0 Nc6 13 h4! Nxd4 14 h5 Bxg2 15 Nxh7! Kxh7 16 hxg6† Kg8 17 Rh6 Nf3 18 gxf7† Rxg7 19 Rxf6 Nxd2 20 20 Rg6† Rg7 (20 . . . Kf8 21 Rxe2 Nf3 22 Bg6 Rf6 23 Bh7 ±) 21 Rxe7† Kxg7 22 Rg1 Nf3 23 Rxe7† Kh8 24 Rg6 ±, Sax–M. Gurevich, Manila Int. 1990.
- (s) 14 c3! Qh4 (14 . . . Qe5† 15 Be2 threatens 16 Qd8 mate) 15 g3 Qf6 16 Rf1 (16 0-0? Qf3?? 17 Be4†) 16 . . . Nd7 17 f4 Nc5 18 0-0-0 leaves Black with insufficient compensation for the exchange, Kindermann–Bareev, Pardubice 1994. Black could try the strange continuation 13 . . . Qxb2?! 14 Bh7† Kh8 15 0-0 Na6 16 Nxe6 Kxh7, but 17 Nd8 Be4 18 Nxf7 is still better for White.
- (t) 7 . . . f5 is active but loosens squares. After 8 Nc3 Bf6 9 Qd2 c5 10 d5! 0-0 (10 . . . exd5 11 Qe3† Be6 12 Qxc5) 11 0-0-0 e5 12 h4 Nd7 13 d6 Nb6 14 Qe3 e4 15 Ng5 Bd7 16 g4! Bd4 17 Rxd4 cxd4 18 Qxd4 f6 19 Bc4† Nxc4 20 Qxc4† Kg7 21 Ne6† White was clearly better in Lau–Sakaev, Dortmund 1991.

- (u) White should consider 8 Qd2 Nd7?! (8 . . . Bb7) 9 Qh6! Bf6 10 Qf4 Bb7 11 0-0-0 \pm , Botvinnik–Guimard, Groningen 1946.
- (v) 14 Qxa6† Kb8 15 Qe2 Rhe8 16 c3 Nf8 17 g3 \pm , Leko–U. Andersson, Úbeda 1997. This variation gives Black a solid yet cramped position.
- (w) 6 Nxf6† Nxf6 7 Nf3 transposes into the Rubinstein Variation (column 19). The reader should note the similarity of the column to the Rubinstein Variation.
- (x) Passive is 7 . . . Nxf6 8 Bd3 c5 9 dxc5 Qa5† 10 c3 Qxc5 11 Qe2 Bd7 12 Ne5 Bc6 13 h4! Rd8 14 0-0-0 \pm , Spassky–Petrosian, World Chp. 1966.
- (y) 8 . . . c5 9 dxc5 Nxc5 10 Qxd8† Bxd8 11 0-0-0 f6 12 Bb5† Bd7 13 Bxd7† Nxd7 14 Be3 \pm , Nataf–Rustemov, Bundesliga 2005.
- (z) 14 Rd2 a6 15 Re1 Re8 16 Qe4 Nc5 17 Qe3 and Black is under pressure, Shabalov–Schwartzman, U.S. Chp. 1997.

10	h3 Bf5 =	Be2 Be7(h)	Nce2 Qd7(l)	Nbd2 h6(o)	Qe2 b6(q)	Ne1(u)

- (a) As Black is not under pressure he could play many reasonable moves—4 . . . c5, 4 . . . Nc6, or 4 . . . Nf6. The text is the simplest, though.
- (b) Maintaining the symmetry has been a common route to a draw, e.g. 5 . . . c6 6 Ne2 Ne7 7 Bf4 0-0 8 0-0 Bf5 9 Bxd6 Qxd6 10 Ng3 Bxd3 11 Qxd3 Nd7 12 Nd2 Draw, Hort–Petrosian, Hastings 1977/78.
- (c) 6 Qf3 Nf6 7 h3 0-0 8 Ne2 Re8 9 Bg5 Be7 10 Be3 Ne4! 11 Bxe4 dxe4 12 Qxe4 Nb4! 13 Kd1 Nd5 14 Nf4 Nxe3† 15 fxe3 Bd6 16 Qf3 c5, and Black has active play for the pawn, Malaniuk–Psakhis, Moscow 1983.
- (d) Black could play 9 . . . 0-0-0 if he wants to make a sharper game. The column is Tal–Korchnoi, USSR 1955.
- (e) A simple route to equality is 4 . . . Nf6 5 Bg5 Be7 6 Bd3 Bg4 7 0-0 Nbd7 8 Nbd2 0-0 9 c3 c6 =, Fishbein–Wright, Chicago 2002.
- (f) 5 Bd3 Nf6 6 0-0 0-0 7 Bg5 Bg4 8 Nbd2 Nbd7 =, Capablanca–Maróczy, Lake Hopatcong 1926. There is more punch to 5 c4.

- (g) (A) 6 ... dxc4 7 Bxc4 0-0 8 0-0 Bg4?! 9 h3 Bh5 10 g4 Bg6 11 Ne5 ±, Ulibin–Lautier, Sochi 1989. (B) 6 ... c6 7 Bg5 0-0 8 cxd5 Qb6!? 9 Bxf6 Qxb2 was all right for Black in Teske–Knaak, Stralsund 1988.
- (h) 11 Bxf6 Bxf6 12 Qb3 Bg4 13 0-0 Bxf3 14 Bxf3 Bxd4 15 Rad1 ±, Ulibin–Monin, USSR 1986.
- (i) 4 c4 Nf6 5 Nc3 Be7 6 Nf3 0-0 7 cxd5 Nxd5 8 Bc4 Nb6 9 Bb3 Bf5 10 0-0 Nc6 11 a3 Bf6 =, Meijers–Nutisl, Prague 2007. Some players will be happy with White's open position.
- (j) 4 ... Nf6 5 Bg5 Be7 is a solid alternative. The column continuation often arises from the order of moves 1 e4 e6 2 d4 d5 3 Nc3 Bb4 4 exd5 exd5.
- (k) 6 a3 Bxc3† 7 bxc3 Nge7 8 Qf3 Be6 9 Nh3 Qd7 10 Nf4 Bf5 11 0-0 0-0-0 =, Short–Timman, Tilburg 1990.
- (l) 11 c3 Bd6 12 Bf4 a6 13 Rfe1 Rae8 14 Qf3 Nd8 =, Spielmann–Euwe, Zandvoort 1936.
- (m) Other reasonable choices are 2 ... Nc6, 2 ... Be7, and 2 ... b6, but Black should avoid 2 ... e5 3 f4! when White has a slightly improved King's Gambit.
- (n) White gains a small initiative after 4 ... Be7 5 Bg2 d5 6 d3 Nf6 7 0-0 0-0 8 e5 Ne8 9 c4, Psakhis–Stiković, Yerevan Ol. 1996.
- (o) 11 Rd1 e5 12 b4 Be6 13 Bb2 b5 =, Hort–Gheorghiu, Manila Int. 1976.
- (p) Also commonly played is 4 Ngf3 c5 5 g3 Nc6 6 Bg2 Be7 7 0-0 transposing into the King's Indian Attack. White should consider this, as the column allows Black easy play.
- (q) 11 Nc4 Ba6 12 Nfd2 Qd7 13 h3, Timpel–Schmidt, Germany 1994; now 13 ... Qe6 gives Black at least equal chances.
- (r) 2 c4 d5 3 exd5 exd5 4 cxd5 (4 d4 is note [i]) 4 ... Nf6 5 Bb5† Nbd7 6 Nc3 Be7 7 Qf3 0-0 8 Bxd7 Qxd7 9 Nge2 Rd8 10 Nf4 Bd6 = (Keres and Minev).
- (s) Black can force play into more usual lines with 3 ... Nf6 4 e5 Nd7 5 d4 c5 (Steinitz Variation) or 3 ... Bb4 4 e5 Ne7, probably transposing into the Winawer Variation.
- (t) 7 cxd4 cxd4 8 Qa4 Bd7 9 Nxd4 Bb4† 10 Kd1 Bc5 11 Qc4 Nxe4! 12 dxe4 Nxd4 13 Nxd4 Bxd4 ≠, Kiriakov–Kapengut, USSR 1965.
- (u) The position is roughly equal, but players who like King's Indian pawn structures will prefer White.

SICILIAN DEFENSE

1 e4 c5

THE SICILIAN DEFENSE is Black's most popular defense to 1 e4 for both serious amateur and professional players. The opening is active and unsymmetrical as well as positionally sound. Kasparov and Fischer were devotees of the opening, though all World Champions of the last hundred years have used it at least fairly extensively. Kramnik, Anand, Topalov, and Carlsen are some of the other adherents.

The opening dates back to Italy more than four hundred years ago. It was mentioned by Polerio in 1594 and given its name by Greco early in the next century. The match between MacDonnell and La Bourdonnais in 1834 greatly helped the chess world appreciate the virtues of the Sicilian, which requires some sophistication to think of playing as the strategy is not initially obvious.

With 1 . . . c5 Black stakes out territory in the center, denying White the pawn duo of e4 and d4. The Black d- and e-pawns will later advance to control key squares, but their early presence around the king allows Black to blunt any quick attack. White's most effective plan is to open the game with d4 (after Nf3), gaining space and opening lines. After . . . cxd4 Black has an open c-file for counterplay, along with two center pawns that play their initially defensive role. The positions arising are asymmetrical, which has the appealing aspect of local imbalances on the board. Frequently White will have pressure on one area of the board and Black on another area, such as the typical White kingside attack vs. Black's queenside counterplay. Thus the games tend to be lively, with fierce struggles and winning chances for both sides. The lively play, combined with the inherent soundness of the defense, is the reason for the Sicilian's popularity.

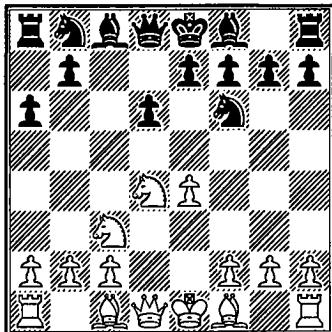

This chapter is large, as there are many variations of the Sicilian that differ significantly in strategy and positional structure. Therefore the

chapter is broken up into subchapters of major variations or similar variations. These subchapters are:

1. The NAJDORF VARIATION
2. The DRAGON VARIATION (and Accelerated Dragon)
3. The SCHEVENINGEN VARIATION
4. Systems with 2 . . . e6—TAIMANOV VARIATION, PAULSEN VARIATION, and FOUR KNIGHTS' VARIATION
5. Classical Sicilian—RICHTER-RAUZER ATTACK, BOLESLAKSKY VARIATION, and SOZIN-VELIMIROVIĆ ATTACK
6. Systems with . . . Nc6 and . . . e5—SVESHNIKOV (PELIKAN) VARIATION, KALASHNIKOV and LÖWENTHAL VARIATIONS (and 4 . . . Qb6).
7. Non-open systems (lines without 2 Nf3 and 3 d4)—CLOSED SICILIAN, 2 c3 Sicilian, 3 Bb5 variations, the f4 Attack, Unusual Second Moves.

NAJDORF VARIATION

1 e4 c5 2 Nf3 d6 3 d4 cxd4 4 Nxd4 Nf6 5 Nc3 a6

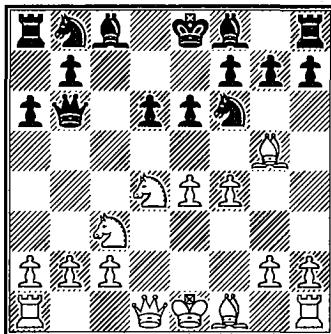

THE NAJDORF VARIATION was the favorite of Bobby Fischer, and could have been called the Fischer Variation instead of taking its name from the Polish–Argentine Grandmaster Miguel Najdorf. It is the most popular of all Sicilian lines and acquired Kasparov, Anand, Gelfand, and many others among its devotees. Some players love to analyze variations 30 or more moves deep into the amazing positions that can arise in this opening.

The point of 5 . . . a6 is to prepare for queenside play while keeping maximum flexibility. The Black e-pawn may go to e6 or e5, the queen's knight to d7 or c6, or Black may develop only his/her queen for many moves (the Poisoned Pawn Variation). Play is usually sharp and aggressive with many variations leading to almost unfathomable tactical complications. White's sixth move does much to determine the character of the game.

6 Be3 has become clearly the main line due to the popularity of the English Attack. The main line continues 6 . . . e5 7 Nb3 Be6 (columns 1–6) which leads to castling on opposite wings and attacks by both sides. There are many different plans for both sides and the many possibilities make the line attractive. Alternatives after 6 Be3 are the solid 6 . . . e5 7 Nf3 (columns 7–8) and the bishop-chasing 6 . . . Ng4 (columns 9–10) which is slightly out of favor now.

The positional but less testing 6 g3 is seen in columns 11–12. 6 Bg5 (columns 13–30) is the sharpest response, as White intends to castle queenside and launch a fierce attack with a pawn storm or pieces. Black can cross up White's plans with 6 . . . e6 7 f4 Qb6!?, the Poisoned Pawn Variation (columns 13–18), see diagram on the next page.

The retreat 8 Nb3 (columns 17–18) is a concession to Black, although some players like the sharp, equal positions that arise. The critical lines begin with 8 Qd2 Qxb2 (columns 13–16). White has a serious lead in development, but Black's flexible position is difficult to crack.

The old main line of 6 Bg5 is 6 . . . e6 7 f4 Be7 8 Qf3 Qc7 9 0-0-0 Nbd7 (columns 19–24). White's most promising continuation is the pawn storm initiated by 10 g4 (columns 19–21). Column 19 has been revived; it was under a cloud in the last edition. Black has a safer alternative in column 20 (13 . . . Bxg5†) though White gains a slight edge. Columns 21–24 investigate alternatives for White from the main continuation, but Black is able to hold the balance in these sharp lines.

Less used variations following 6 Bg5 are the subject of columns 25–30. Column 25 was a favorite of former U.S. Champion Walter Browne, but it is suspect. The Polugaevsky Variation, 6 . . . e6 7 f4 b5 (columns 26–27), looks suicidal but has defied attempts to refute it. Column 28 (7 . . . Nbd7) and column 29 (7 . . . Qc7) are respectable alternatives to the Poisoned Pawn Variation or the old main line. Column 30 is an out-of-date continuation that leaves White with the initiative.

6 Be2 (columns 31–36) is the most popular positional treatment. While still played, it has lost followers to the sharper though still positional English Attack. Strategic concerns and piece maneuvering play a much greater role here than in the sharp variations. After Black's usual response 6 . . . e5, the struggle revolves around the weakened d5 square. Currently Black has adequate resources to balance the struggle.

6 Bc4 (columns 37–42) is another sharp continuation. Black seems to be able to weather the storm of the attack, but new ideas from White require very accurate defence.

6 f4 (columns 43–46) can lead to either a positional or an attacking game. Play is not as forced as in the 6 Bg5 and 6 Bc4 variations, as White's strategy involves slowly building an attack. With the direct response 6 . . . e5 (columns 43–44) Black gains equal chances.

Columns 47–48 cover White's unusual sixth-move alternatives.

- (a) The interpolation of 7 ... h6 8 Bh4 Qb6 can be met by 9 a3 (as 9 ... Qxb2? 10 Na4 wins the queen), when the option of Bf2 gives White the initiative.
- (b) 10 ... b5 11 fxe6 fxe6 12 Rb3 Qa5 (12 ... Qc5? 13 Ncxb5!) 13 Bxf6 gxf6 14 Be2 h5 (14 ... b4 15 0-0! Bg7 16 Nd1 0-0 17 Bc4 ± [Hartston]) 15 0-0 Be7 16 Kh1 Bd7 17 Qd1 b4 (Bogdanov–Glushenko, corr. 1970) 18 Qb1 ±.
- (c) Not 11 ... Bxe6? 12 Nxe6 fxe6 13 Bc4 ±.
- (d) A major alternative is the calmer 13 Be2 Be7 14 0-0 0-0 (14 ... Rf8 avoids forced draws) 15 Rb3 Qc5† (15 ... Qa5 16 Nd5 Qxd2 17 Nxe7† Kf7 18 Bxd2 Kxe7 19 e5! ±) 16 Be3 Qe5 17 Bf4 Qc5† 18 Kh1 (18 Be3 repeats the position) 18 ... Ng4 19 h3 e5 20 Na4 Qa7 21 Bc4† Kh8 22 hxg4 exf4 23 Nb6 d5! 24 exd5 cxd5 25 Bxd5 Rb8 26 Nxc8 Rbxc8 27 Rh3 Qb6 =, Ivanchuk–Kasparov, Linares 1990.
- (e) White has good attacking chances after 13 ... Nd5 14 Nxd5 cxd5 15 Be2 dxe5 16 0-0 Bc5† 17 Kh1 Rf8 18 c4 Rxf1† 19 Rxf1 Bb7 20 Qc2! (Fischer).
- (f) The natural-looking 15 Be2?! Qd6! ∞ allows the Black queen to return to play.

- (g) Also playable is the greedy looking 15 . . . Qxa2 16 Rd1 (16 Nxf6† Kf7 17 Rd1 Qb2! 18 Ne4 Bb4 \mp) 16 . . . Be7 17 Be2 0-0 18 0-0 Ra7 19 Rf3 Kh8 20 Rg3 Rd7 21 Qh6 Rf7 22 Qh5 Rxd1† 23 Bxd1 Qa5 24 Kf1 Qd8! 25 Qxf7 Qxd1† 26 Kf2 Qxc2† 27 Ke3 Bc5† that led shortly to a draw in Azarov–Kasparov, Izmir 2004. This is in fact likely Black’s safest choice.
- (h) Here White has two choices: (A) 17 Rf1! Qxa2 (17 . . . f5 18 Rf3 Qxa2 19 Rfb3 fxe4 20 Qc3 Bd8 21 Qxc6† Bd7 looks okay for Black) 18 Rd1 Qd5 19 Qe3 Qa5† 20 c3 f5 21 Qg3! with a strong attack, Radjabov–Ye Jiangchuan, Calvia Ol. 2004. (B) the old 17 Rb3 Qa4 18 c4 f5 19 0-0 fxe4 and Black is roughly equal.
- (i) 11 . . . Bg7 12 0-0 f5 13 Rfd1 Nc6 14 Nxc6 bxc6 15 Rb3 Qc5† 16 Kh1 0-0 17 Qxd6 Qxd6 =, Matanović–Bronstein, Wijk aan Zee 1963.
- (j) White has attacking chances if Black plays the old line 15 . . . exf5?! 16 exf5 Bxf5 17 Bxa6! Qxa6 18 Rxf5 d5 19 Re1 Qb7 20 Qh6! (Nunn).
- (k) 17 Rb3 Ra7 18 Qf2 Rb7 \mp , Ziegler–Magnusson, Stockholm 1988. White doesn’t obtain enough compensation for the pawn in this line.
- (l) An important alternative, worked out to equality in the 1980s, is 10 Be2 Nbd7 (10 . . . Be7 11 0-0 Qa5 12 f5 Nc6 is also good) 11 0-0 Be7 12 e5 (12 f5 Ne5 \mp) 12 . . . dxe5 13 fxe5 Nxe5 14 Bxf6 gxf6! (14 . . . Bxf6 15 Rxf6! gxf6 16 Ne4 is dangerous) 15 Ne4 f5 16 Rb3 Qa4 17 Nxf5 (17 Qc3 Rg8 \mp) 17 . . . exf5 18 Nd6† Bxd6 19 Qxd6 Qe4 20 Re1 Nc6 21 Kf1 Be6 22 Bh5 Qc4† 23 Rd3 Nd8 24 Qd7† Kf8 25 Qd6† Ke8 26 Qd7† Draw, Pogrebnjak–Guk, USSR 1986.
- (m) 12 Bc4 Qa5 13 0-0 Nxe5 14 Rbe1 Nxe4 15 Qf4 Nd6 16 Ne4 Qc7 17 c4 (Hellers–Oll, Groningen 1984) 17 . . . Nb5! 18 cxb5 Qxf4 \mp .
- (n) 13 Bb5 hxg5 14 Rb3 Qxa2 15 Qc3 axb5 16 Qxc8† Ke7 17 0-0 Qa7 18 Rd3 Nxe5 19 Nc5 Nbd7 20 Nf5† exf5 21 Rxd7† Kf6 22 Rxf7† Kg6 23 Qxf5† Kh6 draw (perpetual check), Shabalov–Areschenko, Isle of Man 2006.
- (o) 13 . . . Qa4?! 14 Be2 Nc6? 15 Nxe6! g5 16 Nf6† mates in two moves, Radjabov–Anand, blitz game 2006.
- (p) 17 Bg3 Bxd4 18 Rxd4 Qa5† 19 Rd2 0-0 20 Bd6 Re8 with chances for both sides in this sharp position, Shirov–Ftacnik, Bundesliga 2007.
- (q) 9 . . . Nc6 allows White to reach a slightly favorable endgame almost by force: 10 Bxf6 gxf6 11 Na4! Qa3 12 Nb6 Rb8 13 Nc4 Qa4 14 a3 b5 15 Nxd6† Bxd6 16 Qxd6 Qxe4† 17 Be2 Qd5 (Black must trade queens—17 . . . Bb7? 18 0-0-0! Qe3† 19 Kb2 Rd8 20 Qc7 Qxe2 21 Rhe1 Qh5 22 g4 Qxg4 23 Qxb7 Rxd1 24 Qxc6† Ke7 25 Qc5† Ke8 26 h3 Qf3 27 Nd4 Rxd4 28 Qxd4 Rg8 29 Re3 \pm) 18 Qxd5 exd5 19 0-0-0 Be6 20 Bf3 Ne7 21 Nc5 \pm . Some grandmasters are willing to defend Black’s position to make a draw, but this is not recommended for most players.
- (r) 10 Bd3 Be7 11 0-0 h6 12 Bxf6 (12 Bh4 Nxe4! 13 Nxe4 Bxh4 \mp , Spassky–Fischer, World Chp. 1972) 12 . . . Bxf6 13 e5 dxe5 14 Ne4 Nd7 15 f5 Qe7 \mp , Mukhin–Sorokin, USSR 1973.
- (s) 11 . . . h5 12 0-0 Nd7 13 Kh1 (13 f5 Nc5 14 Qd4 Nxb3 15 axb3 Qc5 16 Qxc5 dxc5 17 fxe6 fxe6 18 Rxf6 Bg7 = [Nunn]) 13 . . . h4 14 h3 Be7 15 Rad1 b6

16 Qe3 Bb7 17 f5 Rc8 18 fxe6 fxe6 19 Bg4 (Short–Kasparov, Riga 1995) 19 . . . Nc5 \mp .

- (t) 16 Raf1 Na5 17 f5 Nc4 18 Qf4 Ne5 19 Rg3 Kh8 \mp , Kasimdzhanov–Sadvakasov, Samba Cup 2003.
- (u) 17 exf5 exf5 18 Nd5 (A. Rodríguez–Vera, Havana 1978), now 18 . . . Qxa2 19 Rg3 Qb2 is a complicated, roughly balanced position.
- (v) Minor alternatives are: (A) 8 a3 Nbd7! 9 Be2 (9 Qd2? Qxb2 10 Nb3 Nc5!) 9 . . . Be7 10 Nb3 h6 =, V. Georgiev–Ermenkov, Bulgarian Chp. 1995. (B) 8 Qd3 Qxb2 9 Rb1 Qa3 10 f5 Be7 11 Be2 Nc6 =, Nunn–Kasparov, Brussels 1986. (C) 8 Bxf6 gxf6 9 Be2?! Rg8! 10 Bf3 Qxb2 11 Na4 Qa3 12 c3 Nd7 \mp , Harman–Magerramov, corr. 1992.
- (w) 9 Qe2 h6 10 Bxf6 (10 Bh4? Nxe4!) 10 . . . Bxf6 11 0-0-0 Nd7 12 h4 Bxc3 13 bxc3 Nf6 14 Rh3 e5 15 f5 Bd7 16 c4 Qc6 17 Re3 a5 18 g4 a4 19 Nd2 0-0-0 \mp , Deppe–Novikov, Moscow 1990.
- (x) White has several alternatives: (A) 11 Qg3 b5 12 Bxf6 Nxf6 13 e5 dx5 14 fxe5 Nd7 15 Bxb5 axb5 16 Nxb5 Qb6 (16 . . . Qc4!) 17 Qxg7 Rf8 18 Nd6† Bxd6 19 exd6 Rxa2 20 Kb1 Ra7 =, Shabalov–de Firmian, U.S. Chp. 1996. (B) 11 g4 b5 12 Bxf6 Nxf6 13 g5 Nd7 14 a3 Rb8 15 h4 b4 16 axb4 Rxb4 =, Akopian–Collinson, Oakham 1992. - (w) More usual for Black is to transpose into the English Attack with 6... e5 or 6... e6 (Scheveningen Variation). On 6... b5 7 a4 b4 8 Nd5 ±.
- (x) 14 h4 Nb6 15 Qd4 0-0 =, Svidler–Grischuk, Tal Mem. 2006.

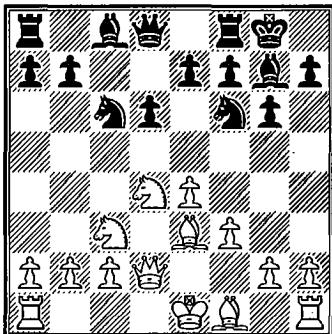

DRAGON VARIATION (INCLUDING THE ACCELERATED DRAGON)

1 e4 c5 2 Nf3 d6 3 d4 cxd4 4 Nxd4 Nf6 5 Nc3 g6

THE DRAGON VARIATION is Black's most direct attacking (or counterattacking) scheme in the Sicilian. The fianchettoed bishop on g7 exerts a powerful influence on the long diagonal, bearing down on the center and queenside. The opening is named for the serpentlike pawn formation of Black's kingside (see diagram above). The name is also appropriate for the aggressive, dangerous character of the defense. Black can generate crushing attacks when things go his/her way, or his/her position can go up in flames itself.

The Yugoslav Attack, 6 Be3 Bg7 7 f3 Ng6 8 Qd2 0-0 (columns 1–18), see diagram below, meets the aggressive Dragon with a response worthy of St. George.

White castles on the queenside and thrusts forward his/her kingside pawns, playing for mate. The most involved and complex positions arise

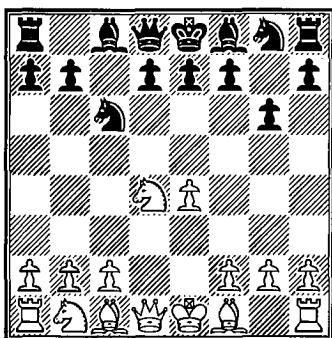

in the Soltis Line, 9 Bc4 Bd7 10 0-0-0 Rc8 11 Bb3 Ne5 12 h4 h5 (columns 1–6). White has chances for advantage with the subtle 13 Bg5 (columns 1–3), although play is involved and dangerous for both sides.

The older plan for Black is to play 12 . . . Nc4 (columns 7–8) instead of blocking h4–h5. This and the other Black alternatives after 9 Bc4 (covered in columns 9–12) allow White some initiative. As usual in the Yugoslav Attack, one slip by either side can be fatal.

Recent theory has favored 9 0-0-0 (columns 13–15), not losing time with 9 Bc4 and Bb3. The problem with this had always been that Black plays in the center with 9 . . . d5, but the positional approach of column 13 is pleasant for White. Black can gain equality against 9 g4 (columns 16–17). Black takes risks with the delayed castling system of column 18.

The Classical Variation is 6 Be2 Bg7 7 0-0 0-0 8 Be3 Nc6 (columns 19–24). White castles kingside, putting his/her monarch away from the dangerous Dragon diagonal (a1–h8). White seeks to keep a spatial advantage, a safer and more natural strategy than the Yugoslav Attack, but Black has adequate resources to gain equality. Columns 25 and 26 are alternative variations for White after the classical 6 Be2. Column 26, in which White castles queenside, is especially interesting.

6 f4 is the Levenfish Variation (columns 27–29), in which White plays for a quick attack in the center. Black has little trouble if he/she responds with 6 . . . Nc6 (column 27). 6 g3 (column 30) is a way to take play into unusual territory but is not theoretically troublesome for Black.

The ACCELERATED DRAGON is 2 Nf3 Nc6 3 d4 cxd4 4 Nxd4 g6, see diagram above. The idea behind this variation is to achieve the break . . . d7–d5 in one move. For example, both 5 Nc3 Bg7 6 Be3 Nf6 7 Be2 d5 and 5 Nc3 Bg7 6 Be3 Nf6 7 f3 0-0 8 Qd2 d5 leave Black a full tempo ahead of the normal Dragon.

White needs to control d5, and he can do this with pieces (Nc3 and Bc4) or pawns (e4 and c4). The former can transpose into the Dragon, but there are many independent lines that are covered in columns 1–6.

These are generally complicated, tactical lines that leave Black with good chances if he is familiar with the theory.

With 5 c4 White establishes the Maróczy Bind (columns 7–12). This leads to a quieter, positional type of game, yet Black will get strangled if he/she cannot find active play.

SCHEVENINGEN VARIATION

1 e4 c5 2 Nf3 e6 3 d4 cxd4 4 Nxd4 Nf6 5 Nc3 d6

NAMED AFTER THE DUTCH CITY, the Scheveningen Variation is a classically motivated defense. Black creates a backward pawn center with his duo at d6 and e6, leaving no weakness on the important central squares d5 and e5. Black intends to simply develop his/her pieces and then proceed with queenside counterplay. The Scheveningen had been a favorite of Kasparov's, although he often arrived at the position through transposition, playing 5 . . . a6 and 6 . . . e6. Other top players use the defense frequently and it is well respected, but it doesn't have the devoted following of the Najdorf or Dragon Variations, perhaps because it is too straightforward and logical. White has several ways to combat the Scheveningen Variation, almost all of them leading to dynamic positions.

The main line is 6 Be2 Be7 7 0-0 Nc6 8 f4 0-0 9 Be3 a6 (columns 1–6), in which both sides develop before embarking on an active plan. White can play to restrict Black on the queenside with 10 a4 (columns 1–3) as Anand has done. This can be either positionally motivated or designed to hold Black on the queenside so that White can proceed on the kingside. Plans where White plays g4, launching a kingside assault, can be very dangerous. 10 Qe1 (columns 4–6) is a more direct attacking attempt, which Black has less trouble handling.

Other variations of 6 Be2 are covered in columns 7–9. Black delays or omits . . . a6 in column 7, leaving White somewhat freer. An early . . . a6 and less played lines are the subject of columns 8–9. Black has reasonable chances in these, so often White should look to transpose into column 1. 6 f4 is seen in columns 10–11, where Black has equalizing play if followed accurately. The positional 6 g3 is column 12, which gets a playable position but is not theoretically critical.

The Keres Attack, 6 g4 (columns 13–18), is the sharpest response to the Scheveningen, favored by attacking players. White immediately be-

gins kingside operations, not waiting to complete development. The safest response is 6 . . . h6 (columns 13–15), holding kingside space. Black can maintain a solid pawn formation with 6 . . . a6 (column 16), 6 . . . Be7 (column 17), or 6 . . . Nc6 (column 18) at the cost of allowing White the initiative.

6 Be3 (columns 19–24) is the English Attack which has become extremely popular. After 6 . . . a6 White can play 7 f3 followed by kingside expansion with g4 and castling queenside. The aggressive attack is very dangerous, though Black is defending successfully now. Column 22 investigates 7 g4, another extremely sharp attacking continuation.

SICILIAN VARIATIONS WITH 1 e4 c5 2 Nf3 e6 3 d4 cxd4 4 Nxd4

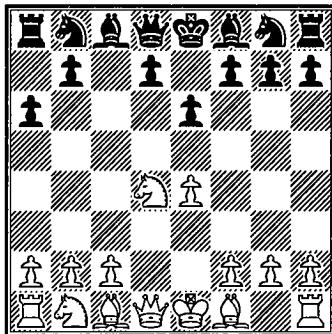

1 $e4\ c5\ 2\ Nf3\ e6\ 3\ d4\ cxd4\ 4\ Nxd4\ Nc6$ is the TAIMANOV VARIATION (see above diagram). Black plays to avoid an early confrontation, maintaining a flexible position at the cost of reducing his/her aggressive possibilities. Quick attacks against the king and long tactical lines are less common than in most Sicilian variations, so White must usually opt to play for positional pressure. Transpositions into the Paulsen or Scheveningen Variations can easily occur.

5 $Nc3\ a6\ 6\ g3$ (columns 1–6) is a safe plan, attempting to control the center and keep Black restricted. Black has several setups to choose from, most leaving the position slightly cramped although not in serious trouble. Column 2 is an active plan for Black.

6 $Be2$ (columns 7–12) is sharper than 6 $g3$. Play could transpose into the Scheveningen Variation if Black chooses 6 ... $d6$ and ... $Be7$. A particular feature of the Taimanov is ... $Bb4$ from column 7, which leads to White sacrificing a pawn to control central and queenside squares.

6 $Be3$ (columns 13–14) is similar to 6 $Be2$ and can transpose into it, yet there are some distinct sharp lines. 6 $Nxc6$ (column 15) opts for quick development in exchange for Black's strong center. 5 $Nb5\ d6\ 6\ c4$ (columns 16–17) reaches a Maróczy Bind-type position where Black is restricted, but White can make little use of this. 5 $Nb5$ and 6 $Bf4$ forces Black to play $e6-e5$, but the plan is too time consuming and Black has no problems.

The PAULSEN (or Kan) VARIATION, 4 . . . a6 (see above diagram), is a close cousin of the Taimanov. Black has an even more flexible position as the queen's knight need not develop to c6. White has somewhat more aggressive choices than in the Taimanov Variation since Black has made no move yet to control the center.

White can play sharply with 5 Bd3 (columns 1–4), which often leads to a kingside attack. White seems to gain some edge from this reply. Ambitious is 5 c4 (columns 5–6), trying to control the center. Black should react aggressively (column 5) when his chances are good.

5 Nc3 (columns 7–10) would transpose into the Taimanov Variation if Black chooses 5 . . . Nc6. The Paulsen variations of those columns have their own style, though White can maintain some initiative with proper play. The offbeat continuations 5 Nd2 (column 11) and 5 g3 (column 12) are not dangerous for Black.

The FOUR KNIGHTS' VARIATION, 4 . . . Nf6 5 Nc3 Nc6 (columns 1–4), is rarely played, though it is quite a reasonable choice considering its surprise value. If White is prepared he/she can gain an edge by following column 1, but this is the only advantageous continuation.

The SICILIAN COUNTER ATTACK, 5 . . . Bb4 (columns 5–6), is tactical and thus promising against an unprepared opponent, but it is simply bad if White knows what to do.

SICILIAN DEFENSE

SICILIAN DEFENSE, CLASSICAL VARIATION

1 e4 c5 2 Nf3 Nc6 3 d4 cxd4 4 Nxd4 Nf6 5 Nc3 d6

THIS ORDER OF MOVES has been dubbed the "Classical Variation" for Black's straightforward development and for want of a better name.

There are three serious responses for White.

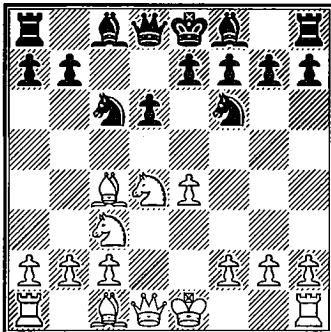

6 Bg5 is the Richter-Rauzer Attack (columns 1–21), see above diagram. White sets up an indirect pin on the f6 knight and prepares the aggressive plan Qd2 and 0-0-0. Black can continue with straightforward natural moves, 6 . . . e6 7 Qd2 Be7 8 0-0-0 0-0 (columns 1–6) when White has the choice of 9 f4 (columns 1–3) or 9 Nb3 (columns 4–6), which both present Black with some trouble.

Black can change tune and play less natural moves with 7 . . . a6 8 0-0-0 Bd7 (columns 7–12), which seems to allow more counterplay. The continuation 9 f4 b5 10 Bxf6 gxf6 is critical, but Black should be all right.

With 7 . . . a6 8 0-0-0 h6 Black puts the question to the bishop. Black is usually obtaining good chances, although White may gain some edge with 9 Be3 Be7 10 f4 (column 13).

Alternatives to the usual lines after 6 Bg5 are seen in columns 19–21. Of these, Larsen's old move 6 . . . Bd7 is the most significant.

6 Be2 e5! is the Boleslavsky Variation (columns 22–23). It is covered in only two columns because Black obtains almost immediate equality and there have been no improvements on White's side for decades. 6 f3 (column 24) is a more recent idea, though not particularly dangerous.

6 Bc4 (columns 25–36) is at least as aggressive as 6 Bg5. After 6 ... e6 7 Be3 (columns 25–30) White plays the Velimirović Attack with the plan of castling queenside and hunting the Black king. Sacrifices and combinations are routine in this ultra-sharp opening. Theoretically Black is all right, but many players are uncomfortable defending against the White onslaught.

The Sozin Variation is 6 Bc4 with the plan of castling kingside (columns 31–34). This was a Fischer favorite in the 1960s, but it is not considered fearsome today. Black can sidestep the main lines with 6 ... Qb6 (columns 35–36) and also obtain reasonable chances.

- (c) 14 Bxf6 gxf6 15 Bd5 f5! 16 Bxc6 bxc6 17 g4 Bg5† 18 Kb1 Rad8 =, J. Polgar-Kramnik, Linares 1994.
- (d) 14 . . . Bc5 15 Qh4 Nd7 16 Nd5 Qa4 17 Nf6† Nxsf6 18 gxf6 Rfd8 19 Qg5 Bf8 20 fxg6 ±, Bologan-Kotronias, Turin Ol. 2006.
- (e) 17 Rhe1 Rfd8 18 Qg4 Nf8 19 Bd3; now in many games Black has sacrificed the exchange 19 . . . Rxd3 20 cxd3 Qd7 21 Bb4 Qd5, but White can retain a small edge after 22 Bxf8 Rxf8 23 Kb1, Tiviakov-Atalik, Beijing 1997. Black can also try 19 . . . Rd5 20 Bb4 Qd8 21 h4 Ng6 22 Bxg6 hxg6, Yemelin-Kharlov, Russian Chp. 1996, intending to meet 23 h5 with 23 . . . g5 24 Bd2 Rd4.

- (f) White has tried several moves in this position. (A) 12 Rhe1 Bc6 13 f5 b5 14 Bb3 b4 15 e5 (A. Ivanov–Khan, Chicago 1997) 15 ... bxc3? \mp , since 16 exf6 Qxf5 defends. (B) 12 Rd3 Rad8 13 e5 (13 Rg3 Kh8) 13 ... dxe5 14 Qxe5 Qb4 15 Rg3 Kh8 16 Bd3 Bc6 17 Rh3 Rfe8! =, Anand–Kramnik, Las Palmas 1996, because 18 Bxf6?! Bxf6 19 Rxh7+ Kg8 hands the initiative over to Black. (C) 12 Kb1 Bc6 13 Rhf1 h6 14 Bh4 Qh5! =, Tal–Larsen 1969. Transferring the queen to the kingside is an important defensive resource.
- (g) Black is fine after 13 Qd3 b5! 14 Kb1 h6 15 Bxf6 Bxf6, J. Polgar–Salov, Dos Hermanas 1997, since 16 Qxd6 Qb6 and 17 ... Rfd8 generates active play.
- (h) 17 Qxd6 Qxd6 18 Rxd6 Rfc8 19 f5 \pm (but not 19 e5 Be7 20 Rd2 b4 21 Na4 Rd8 \mp). Instead of the column continuation, Topalov–Kramnik, Novgorod 1995, saw 16 a3?! a5 17 f5 b4 \mp .
- (i) The immediate 9 ... e5 10 Nf5 Bxf5 11 exf5 is not so good because ... exf4 can always be answered with Bxf4. Also suspect is 9 ... d5 10 e5 Nd7 11 Bxe7, trading off Black's good bishop.
- (j) Grabbing the d-pawn allows Black thematic play on the dark squares—10 Bxf6 Bxf6 11 Nxc6 bxc6 12 Qxd6 Qb6 13 Qd3 Rb8 14 b3 Rd8 15 Qf3 Rd4 16 Rxd4 (16 e5? Rxf4) 16 ... Bxd4 =, Relange–D. Gurevich, Capelle la Grande 1994.
- (k) 14 Qxf4 d4 15 Bxf6 Bxf6 16 Ne4 Be5 17 Qf3 Rc8 18 Bc4 b5! generates counterplay, Matulović–Ivanović, Belgrade 1985.
- (l) 17 Bb3 (17 Bxb5 Rb8 18 c4 Nd4 19 Rhe1 f6 =) 17 ... a5 18 a3 a4 19 Ba2 b4 20 Nxb4 Qf6 21 Nd5 Qxf5 22 Qd3 Qg5 23 Qe4 Rab8 24 c3 \pm , Sabel–Lensky, corr. 1992.
- (m) (A) As usual, going after the d-pawn allows Black good play—9 Ndb5 Qa5 10 Bxf6 (10 Nxd6? Rd8) 10 ... Bxf6 11 Nxd6 Rd8 12 f4 e5! =, Korchnoi–Boleslavsky, USSR Chp. 1952. (B) 9 f3 a6 10 g4 d5 11 exd5 Nxd5 12 Bxe7 Ncxe7 =, Rasik–Epishin, Czech Republic 1994.
- (n) 10 ... a6 11 h4 Rd8 12 h5 Qc7 13 h6! g6 14 Qf4 Ne8 15 Bxe7 leaves Black somewhat loose on the kingside, Korneev–Babula, Bundesliga 2007.
- (o) 11 Nb5 Rd7 12 Qe1 a6 13 Be3 Qd8 14 N5d4 Nxd4 15 Nxd4 Rc7 16 g4 b5 17 g5 Nd7 =, Shirov–Romero Holmes, Spanish League 2006.
- (p) 12 ... Nd7 13 Nb5 Qb8 14 g4 a6 15 N5d4 \pm was first played in Fischer–Benko, U.S. Chp. 1959/60.
- (q) 17 Bxa7 (17 Rd1 Nc4 =) 17 ... Nc4 18 Bc5 Rxa2 =, van der Wiel–Salov, Wijk aan Zee 1992.
- (r) 10 a3 a4 11 Nd4 d5 12 exd5 Nxd5 13 Bxe7 Ncxe7 14 Bc4 Nb6 15 Ba2 Bd7 =, van der Wiel–Sosonko, Wijk aan Zee 1982.
- (s) Capturing on e4 allows White a strong endgame initiative. Tal–Korchnoi, Montpellier Candidates Tournament 1985, went 11 ... dxe4 12 Qxd8 Bxd8 13 Rhe1 Na7 14 Bc4 h6 15 Bxf6 gxf6 16 Nxe4 f5 17 Nd6 Bc7 18 g3 b6 19 Nxf5! exf5 20 Bd5 Be6 21 Bxa8 Rxa8 22 Nd4 Bd5 23 Re7 Rc8 24 Nb5! Resigns (24 ... Nxb5 25 Rxd5).

- (t) 12 Rhe1 Bd7 13 e5 Ne8 14 h4! Nc7 15 Nd4 also is an edge for White, Z. Wang–Gurevich, Belgrade 1988. Play would be similar to this game if Black responds 12 ... Ne8 after 12 e5. The column is Fedorowicz–Winants, Wijk aan Zee 1988.
- (u) (A) 11 f4 Kh8 12 f5 b5 13 Kb1 Rg8 14 Ne2 exf5 15 exf5 Ne5 16 Nbd4 Bb7 =, Klovans–Smirin, Geneva 1992. (B) 11 h4 Kh8 12 g4 b5 13 g5 b4 14 Na4 Rg8 15 f4 puts Black under pressure, Short–Karpov, match 1992.
- (v) 17 Ne2 e5 18 f5 a5 19 Kb1 a4 20 Nd2 with a clear plus to White despite the strange placement of his queen, Adams–Frias, London 1990.

SICILIAN WITH 2 . . . Nc6 AND . . . e5

THE SVESHNIKOV VARIATION is 2 Nf3 Nc6 3 d4 cxd4 4 Nxd4 Nf6 5 Nc3 e5 (see above diagram). This looks anti-positional as Black immediately creates a backward d-pawn. Even worse looking are the doubled f-pawns Black is forced to accept in the main line. For this reason the variation saw little use until Sveshnikov showed the dynamic potential of Black's position in the 1970s and 80s. In the twenty-first century the Sveshnikov has become extremely popular among top grandmasters and amateur players alike. The dynamic potential of Black's position has become better appreciated and the old positional considerations seem less important. There are still some lines that give Black trouble, but the Sveshnikov is thoroughly established as a first-rate defense.

The main line is 6 Ndb5 d6 7 Bg5 a6 8 Na3 b5 9 Bxf6 gxf6 10 Nd5 (columns 1–6). The centralized White knight sits on top of the backward d-pawn, but the doubled f-pawns can be liquidated with . . . f5 and the White knight on a3 is out of play. Black also has the bishop pair. All this may be enough to gain equality for Black, but in any case the game is complex and imbalanced.

White declines to double Black's pawns with 9 Nd5 in columns 7–9, seeking to steer the game into more static channels where control of the d5 square is enough to gain the advantage. Column 10 (8 . . . Be6) is an older continuation that fails to equalize. 7 Nd5 (column 11) and 6 Nf3 (column 12) gain no advantage against proper defense.

Black has some uncommon continuations after 2 Nf3 Nc6 3 d4 cxd4 4 Nxd4. 4 . . . e5 5 Nb5 d6 is the Kalashnikov Variation (columns 1–3), which is similar in spirit to the Sveshnikov Variation. The Kalashnikov has been used fairly frequently in the 1990s, although now its surprise value has passed and White has been gaining the upper hand after the

year 2000. 5 . . . a6 is the Löwenthal Variation (columns 4–5), a tricky continuation playing for quick development. White has a few ways to reach a better position and so the variation has been out of favor for years. 4 . . . Qb6 (column 6) is a good way to take the game off the beaten tracks. White may hold some edge (as in note [s]), but for those short of study time this line is recommended.

- (a) White gains an edge against the older 12 . . . Bg7 13 0-0 f4 (13 . . . 0-0? 14 exf5 Bxd5 15 f6 wins) 14 c4 bxc4 15 Bxc4 0-0 16 Rac1 Kh8 17 Rfd1 Rb8 18 b3 ±, Ernst–Benjamin, Reykjavik 1990.
- (b) 13 . . . Rg4 14 f4 exf4 (14 . . . Bg7?! 15 c3 b4 16 Nc2 bxc3 17 Nxc3 exf4 18 exf5 Rg5 19 Qxh7 Bxc3† 20 bxc3 Bd5 21 gxf4 ±, Magem Badals–I. Sokolov, Barcelona 1992) 15 Nxf4 Rxf4 16 gxf4 Qa5† 17 Kd1 Qb4 18 exf5 Bd5 19 Re1† Kd7 20 f6! ±, Motylev–Tzermiadinos, Istanbul 2003.
- (c) 14 0-0-0 Rc8 is a sharp position with attacking chances for both sides. Barcenilla–Altan, World Junior Chp. 1991, continued 15 f4 Bxd5 16 exd5 Qf6 17 c3 e4 18 Rhei b4 19 Bxa6 Rc5 20 Rxd4 bxa3 21 Rb4 cxb2† 22 Kb1 Qxc3 23 Rb8† Ke7 24 Qh4†; now, instead of 24 . . . f6?! 25 Qxh7† Rg7 26 Rxe4†!, Black can draw with 24 . . . Rg5! 25 Qxg5† f6 26 Rb7† Kd8 =.
- (d) Here White has an important decision on where to place the king. (A) 18 Ke2 Ng5† 19 f3 Nxe4 20 fxg4 Qc8 21 Qe3 Qxg4† 22 Qf3 Qxf3† 23 Kxf3 f5 24 Nc2 Kf7 25 Nce3, Lie–Gabrielsen, Norwegian Chp. 2006; now Black equalizes with 25 . . . Nf6 instead of 25 . . . Ke6? 26 Nxf5! as played. (B) 18 Kf1 Rg5 19 Nf6† Ke7 20 Qh8 Nd2† 21 Kg2 Nxe4 22 Nxe4 Rg6 23 Qh4† Kd7 24 Qxd8† Rxd8= as Black's bishop pair compensates for White's extra pawn, Magem Badals–Zsu. Polgar, Madrid 1992.

- (e) 12 0-0 Bxd5! 13 exd5 Ne7 14 c3 Bg7 transposes back into the column. Note that 14 Nxb5 Bg7? 15 Nc3 e4 16 Bc4 Qa5 allows Black good play for the pawn.
- (f) 13 Qh5 0-0 with (A) 14 exf5 Bxd5 15 f6 e4 16 fxg7 Re8 17 Be2 Re5 18 Qh6 b4 19 Nc2 bxc3 20 bxc3 Qg5 21 Qxg5 Rxg5 22 0-0 (22 Rd1!?) 22 . . . Be6 23 Rfd1 Rc5 =, Anand–van Wely, Wijk aan Zee 2003. (B) 14 Ne3?! f4 15 Nf5 Qf6 16 g4 Bxf5 17 exf5?! e4! ≡, Ramer–Schandorff, Vlissingen 2004.
- (g) 15 Nc2 0-0 16 a4 e4 17 Be2 bxa4 18 Rxa4 Qb6 19 Rb4 Qc5 =, Sadvakasov–Khalifman, Russian League 2005.
- (h) 15 . . . Qd7 16 Rad1 0-0 17 Bb1 Rae8 18 Nc2 e4 (Minasian–van Wely, Khanty Mansiysk 2005); now 19 Nd4 is a little better for White.
- (i) 18 Bb3 a5 19 Nxb5 a4 20 Bd1 Qc5 21 Be2 Nxd5 20 Qg5 Rab8 =, Pelletier–McShane, Biel 2004.
- (j) The position on move 13 is often reached by the move order 11 exf5 Bxf5 12 c3 Bg7, which gives White the chance to go astray with (A) 12 Qf3? Nd4! 13 Nc7† Qxc7 14 Qxa8† Ke7 15 c3 b4! 16 cxb4 Bh6! ≡ 17 Qxh8?! Qb7 winning, or (B) 12 Bd3 e4 13 Qe2 Nd4 14 Qe3 Bg7 15 f3 (15 Bxe4 0-0 is good for Black) 15 . . . Qh4† 16 g3 Nxf3† 17 Qxf3 exf3 18 gxh4 Bxd3 19 cxd3 Bxb2 ≡.
- (k) 11 . . . fxe4? now runs into a winning sacrifice—12 Bxb5! axb5 13 Nxb5 Qg5 14 Nbc7† Kd8 15 Nxa8 Qxg2 16 Rf1 Ba6 17 Ne3 Qf3 18 Rg1 Bd3 19 Qxf3 exf3 20 Rd1 e4 21 Rxd3 exd3 22 Nb6 and White won the endgame against Black’s shattered pawns in Z. Almasi–Kuhn, Budapest 1992.
- (l) (A) 13 . . . Ne7?! 14 Bd3! Nxd5 (14 . . . Be6 15 Nxe7 Qxe7 16 Be4 6) 15 Bxf5 Ne7 16 Qg4 6, Ivanchuk–Kramnik, Novgorod 1994. (B) 13 . . . Be6 14 Nce3 Ne7 15 a4 Nxd5 16 Nxd5 0-0 17 Be2 bxa4 18 Rxa4 ±, de Firmian–Kiss, Kavala 2006.
- (m) 16 . . . e4 17 Nf4 Bf7 18 Bc2 Be5 19 Nh3 Kh8 20 f4 ±, de Firmian–Shabalov, Virginia Beach 2007.
- (n) 18 Nxe7† Rxe7 19 axb5 axb5 20 Bxb5 d5 21 Ra6 f4 (Anand–Leko, Wijk aan Zee 2005); now 22 Rxe6! Rxe6 23 Qxd5 leaves White slightly better as the two passed pawns have potential.
- (o) The other sacrifice on b5 has been worked out to an edge for Black—11 Bxb5 axb5 12 Nxb5 Ra4! 13 Nbc7† Kd7 14 0-0 Rxe4 15 Qh5 Nd4 16 c3 (16 Qxf7† Kc6 17 Nb4† Kb7 ≡) 16 . . . Ne2† 17 Kh1 Kc6 18 g3 Kb7 19 Rae1 Rc4 20 Na6 Ka8! ≡, Mastrovasilis–Illescas, Calvia Ol. 2004.
- (p) Less tested, but just as good a defense, is 12 . . . Bb7 13 exf5 Rc8?! 14 c3 Bg7 =, Sulkis–van Wely, Aeroflot Open 2004.
- (q) 16 0-0 Qb7! 17 c4 Rc8 18 f6 Bh6 19 Qd3 Qb6 ≡, Olthof–Tyagunov, corr. 1984.
- (r) 18 cxd4 Bxe3 19 fxe3 Qxg2 20 Rf1 Qxb2 Draw, Nunn–Adorjan, Skara 1980.
- (s) On 13 c4 Black must be willing to sacrifice a pawn, but then he has good chances—13 . . . f5 14 0-0 (14 cxb5 d5!) 14 . . . 0-0 15 Qh5 (15 Qf3 Re8!?) 16 Rfe1 f4 17 cxb5 Qg5 18 h3 d5! 19 exd5 f5—Ochoa; 15 Re1 fxe4 16 Bxe4 Rb8 17 cxb5 axb5 18 Qd3 f5 19 Bd5† Kh8 20 Nxb5 e4 21 Qb3 Be5 22 a4 Bd7 23 Rac1 Qe8 24 Bc4 Qh5 attacking, Kosten–Chandler, Hastings 1991) 15 . . . Rb8

16 exf5 e4 17 Rae1 Bb7 18 Nc2 bxc4 19 Bxc4 d5 20 Bxd5 Bxd5 21 f6 Qxf6
22 Qxd5 Rxb2 23 Ne3 Qe6 =, Short–Illescas, Linares 1992.

- (t) 13 . . . f5?! 14 exf5 Bb7 15 Re1 Qg5 16 g3 0-0 17 c4 Rea8 18 Be4 ±, Anand–Lobron, Dortmund 1996.
- (u) 15 . . . Bb7 16 exf5 d5 17 Re1 Qg5 (Borge–Schandorff, Denmark 1996)
18 Ne3 ± since 18 . . . d4 19 cxd4 exd4 20 Qg4 repulses the attack.
- (v) 18 Ne3 Bg6 19 Nd5 Qe5 20 Bc2 ±, Anand–Radjabov, rapid match 2006.
- (w) (A) 11 g3 f5 12 Bg2 f4 13 e3 0-0 14 Nc2 Kh8 15 Qd3 Bh6 16 a4 bxa4 17 Rxa4
a5 18 0-0 Bd7 19 Raa1 f5 =, Zapata–Conquest, Cuba 1996. (B) 11 Qh5 Ne7
12 Ne3 f5 13 exf5 e4! 14 0-0-0 0-0 =.
- (x) 11 . . . f5 transposes into column 3. This is recommended as this column is difficult for Black.
- (y) 18 h4! Qh6 19 Rh3 Kh8 20 Kf1 e4, Adams–Nunn, Brussels 1992; now 21 g4! leaves White a clear edge.

- (u) 7 Nd4 Nf6 8 Nc3 e5 9 Nf5 d5 10 exd5 Nb4 =, Czebe–Knezević, Budapest 1996. The column is Kaidanov–Yermolinsky, Asheville 1992.

NON-OPEN SICILIANS

THE NON-OPEN VARIATIONS are those in which White does not play 2 Nf3 and 3 d4, opening up the game. These offer him/her less chance for the advantage, but there is less theory to learn and there may be surprise value in the unusual lines.

The Closed Sicilian main line is 2 Nc3 Nc6 3 g3 g6 4 Bg2 Bg7 5 d3 d6 (columns 1–6), see diagram below. This was a useful weapon of Spassky's throughout his career. White expands on the kingside without opening a central front as in the open variations. Black has little theoretical difficulty in equalizing, yet White often gets attacking chances against an unwary opponent.

Minor Closed Variations are covered in columns 7–10. These are an assortment of plans White has tried in practice. As with the main line Closed Variation, Black has few theoretical difficulties.

In columns 11–12 we cover the Smith-Morra Gambit, 2 d4 cxd4 3 c3. This is entertaining, but Black can gain the advantage with proper play.

2 c3 has seen a surge of interest in recent years. This is a safe continuation that avoids all the theory of the open lines, yet still allows White to play an active game. The reader will notice the dense material of these columns, reflecting the many new plans that have been discovered. 2 ... Nf6 (columns 1–3) has recently been reliable for Black. 2 ... d5 (columns 4–5) and 2 ... e6 (column 6) are also reasonable.

3 Bb5 is White's best theoretical alternative to the open variations. This logical developing move allows White to castle and retains options for various plans. The move has more punch against 2 ... Nc6 (columns 1–4) when Black may be saddled with doubled pawns. 2 ... d6 3 Bb5+ (columns 5–6) is considered more of a drawing line.

The f4 Attack arises by 2 Nc3 and 3 f4 (columns 1–3) or 2 f4 (columns 4–6), although the latter can be met by the aggressive 2 ... d5

(column 4). The variation has been often used on the English Grand Prix circuit and offers scope for original play.

Unusual Second Moves include Nimzovich's offbeat line 2 Nf3 Nf6 (columns 1–2), O'Kelley's tricky line 2 . . . a6 (column 3), 2 g3 (column 4), the optimistic Wing Gambit, 2 b4 (column 5), and the rare 2 b3 (column 6).

PIRC DEFENSE

1 e4 2 d6 2 d4 Nf6 3 Nc3 g6

THE PIRC DEFENSE, named after the Yugoslav Vasja Pirc, is historically a recent addition to Black's defensive choices. The concept of holding the pawns back from the center is from the "hypermodern" school of thought which arose in the 1920s and 30s. The theory is that controlling the center is what counts rather than occupying it. White is allowed to create a pawn center that Black strives to undermine. The direct central confrontation is delayed, but the first moves anticipate this moment. Black must plan his/her counterplay against the center or the position can be overrun. White, on the other hand, can land in trouble by pushing too far too fast and be left with a shattered position.

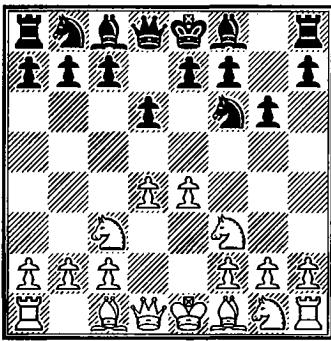

The usual counterplay for Black is to augment the fianchettoed king's bishop with ...e5 or ...c5, pressuring the central dark squares. Usually this waits until after ...Bg7 and ...0-0, but sometimes it is desirable to break more quickly. White plans to develop his/her pieces and advance in the center if Black does not prevent it. The timing of a White central advance or Black counterthrust is critical.

The Austrian Attack, 4 f4 (columns 1–12), is the most aggressive continuation (see above diagram). White seeks a strong grip on the center in preparation for a later advance. After the White pieces are developed, the thrust e5 will start the attack. The Austrian was Fischer's favorite choice, as well as your author's.

After 4 . . . Bg7 5 Nf3 Black has two serious defenses. The most usual continuation is 5 . . . 0-0 6 Bd3 (columns 1–5), when Black has the choice of the natural 6 . . . Nc6 (columns 1–3) or the more creative 6 . . . Na6 (columns 4–5). The alternatives to 6 Bd3 are somewhat easier for Black to deal with. 6 Be3 (column 6) and 6 e5 (columns 7–8) are very aggressive. 6 Be2 (column 9) is tame for the Austrian Attack.

5 . . . c5, immediately seeking counterplay, is Black's second defense. White can play the safe 6 dxc5 (column 10), but most interesting is 6 Bb5† Bd7 7 e5 (columns 11–12), which leads to a real slugfest.

The Classical System is 4 Nf3 (columns 13–18), which is usually followed by 4 . . . Bg7 5 Be2 0-0 6 0-0. With this unpretentious continuation White is content with a modest center and quickly develops his/her pieces. There is little chance of White overextending in the center here, and so Black has fewer winning chances than other lines. On the other hand, Black has less risk of losing with accurate defense.

White has many minor systems to choose from on the fourth move. 4 Bg5 (column 19—the Byrne Variation), 4 f3 (column 20), 4 Be3 (column 21), and 4 Bc4 (column 22) are aggressive lines that allow active play for both sides. The positional system 4 g3 (column 23) offers flexibility to both sides. 4 Be2 Bg7 5 h4!? (column 24) is an offbeat line.

ROBATSCH DEFENSE

1 e4 g6 2 d4 Bg7

NAMED AFTER THE AUSTRIAN MASTER KARL ROBATSCH, this defense is also called the "Modern Defense." White is allowed free scope in the center and choice of development. Black's advantage is a very flexible position with choices of many different plans. Black can play up one or two squares with the d-pawn, c-pawn, b-pawn, and sometimes the e-pawn or a-pawn. The queen's knight and queen's bishop can develop to different squares and the order of moves can vary. There is often transposition to the Pirc Defense when Black plays an early ... Nf6, but the theme of the Robatsch is to use this tempo for queenside play instead. The drawback to the Robatsch is that White occupies the center in the first few moves. Eventually Black must concern himself/herself with the center also, and there is danger that White has effectively staked out the territory. White usually emerges from the opening slightly better and Black must be content with his/her flexible position. This is acceptable to some players, such as the Swedish Grandmaster Tiger Hillarp-Persson who is satisfied with the fighting chances the opening offers.

3 Nc3 (columns 1–6) is the most natural reply by White. After 3 ... d6 (columns 1–4) White has the same choice of continuations he/she does in the Pirc Defense (Black could then transpose to the Pirc with 4 ... Nf6). 4 f4 (columns 1–2) gains a grip on the center, as in the Austrian Attack. 4 Be3 (column 3) planning f3 is also aggressive. The classical 4 Nf3 is safe and sound. Black reaches more obscure positions with 3 ... c6 (columns 5–6).

3 Nf3 (column 7) is simple and good. Other third moves cannot transpose into the Pirc Defense. Lines in which White plays c3 to block the long diagonal (columns 8 and 9) allow Black to counter in the center with ... e5. After 3 c4 d6 4 Nc3 Black can transpose into the King's Indian Defense with 4 ... Nf6, or choose the distinctly Robatsch play of columns 10–12.

ROBATSCH DEFENSE

1 e4 g6 2 d4 Bg7 3 Nc3

	1	2	3	4	5	6
3d6c6	
4	f4	Be3	Nf3(l)	Bc4	Nf3(r)	
	c6.....Nc6(e)	c6(i)	c6(m)	b5(p)	b5(s)

CENTER COUNTER DEFENSE

1 e4 d5 2 exd5

THE CENTER COUNTER DEFENSE (also known as the Scandinavian Defense) is a straightforward plan that is easy to learn and play. 1...d5 contests the center and removes the White king-pawn from play, ensuring that Black will not have great troubles ahead. The downside is that Black loses time when recapturing on d5. Taking with the queen allows White to develop Nc3 with tempo, while recapturing with Nf6 and Nxd5 allows White an extra move in setting up a pawn front with d4 and c4. Thus it is normal for White to gain a slight advantage, but only a slight advantage. Often Black will set up a solid position which is hard to breach, while being able to calmly complete development. The defense is often used by grandmasters on an occasional basis, as it is most effective when White is not prepared with a well considered plan. Australia's Ian Rogers is willing to use the defense regularly though.

2...Qxd5 3 Nc3 Qa5 (columns 1–3) safely puts the Black queen on the edge of the board. With normal development, 4 d4 and 5 Nf3 or 5 Bc4, White holds the initiative. To gain a large advantage is not easy as Black's position is solid, often similar to a Caro-Kann. Notable is 3...Qd6 which is seen in note (b).

On 2...Nf6 White should not try to hold on to the pawn with 3 Bb5+ (column 6), but play 3 d4 Nxd5 4 Nf3 (columns 4–5) and at some point c4, when he holds a spatial advantage. Black can try the entertaining gambit 3...Bg4!?, the Portuguese Variation (see note [o]).

CENTER COUNTER (SCANDINAVIAN) DEFENSE

- (v) 4 Bc4 b5 5 Bb3 a5 6 a3 Bg4 7 f3 Bc8 8 Nc3 Ba6 with compensation for the pawn, Zukertort–Kenny, Southampton 1884. Black should now play . . . g6 and develop before trying to recapture the pawn.
- (w) 7 0-0 Be7 8 c4 Nb4 9 Na3 0-0 10 Bf4 c6 ∞.
- (x) 11 h3 Nc6 12 g4 Bg6 13 h4 e5! 14 dxe5 Nxe5 15 Nxe5 Bxe5 leaving Black with at least equality, Balashov–Smagin, Novgorod 1995.

NIMZOVICH DEFENSE

1 e4 Nc6

THIS ODD DEFENSE is another addition to opening theory from the inventive Aron Nimzovich, but it is not held in nearly the same regard as the Nimzo-Indian Defense. Although not the first to advocate 1 . . . Nc6, Nimzovich was the first to subject the opening to deep study and conclude it was sound. Most modern masters disagree with him and the defense is seen only rarely. Yet players such as Benjamin, who specializes in unorthodox openings, make use of the Nimzovich sporadically, when the surprise value may catch their opponent unprepared.

2 d4 (columns 1–4) takes up the challenge, grabbing the center squares. Black's most reliable reply has been 2 . . . e5 (columns 1–2), yet recently this has come under a cloud with White's strong continuation of column 1. 2 . . . d5 has long been regarded as less principled, and White holds the advantage with proper play. 2 Nf3 (columns 5–6) allows Black a chance to transpose back into the double king-pawn openings with 2 . . . e5. The Nimzovich continuation of 2 . . . d6 keeps the game in little charted territory, but again allows White an edge with good play.

NIMZOVICH DEFENSE

UNUSUAL KING'S PAWN DEFENSES

1 e4

THE UNUSUAL DEFENSES covered here are 1...b6, Owen's Defense, 1...a6, and 1...g5, Basman's Defense. Other moves, such as 1...h5, are not considered as they are simply too bad and need no discussion. The three defenses considered here are also viewed by theory as unreliable. Some players use them anyway, counting on surprise value and the psychological impact of flouting known principles.

1...b6 is Owen's Defense (columns 1–2). Black sets up pressure on the long white diagonal and can follow up with ...e6 and ...c5. After 2 d4 Bb7 White does best to defend e4 with 3 Bd3 (column 1) so that later c3 can defend d4. 3 Nc3 (column 2) is also good for a small plus.

1...a6 (columns 3–4) is similar to Owen's Defense as Black will again place his bishop on the long white diagonal. Here Black will also expand on the queenside with 2...b5, adding an extra dimension to Black's play over Owen's Defense. White gains the advantage with accurate play, but less precision allows Black the unclear game he seeks. Miles once used this opening to defeat Karpov, who was clearly shocked to see Black's first move.

Basman's Defense, 1...g5 (columns 5–6), is a Grob's Attack in reverse. The reaction most players have with White is "this must be really bad." In fact, Black is only somewhat worse, and if White plays with too much disregard he can have troubles.

UNUSUAL KING'S PAWN DEFENSES

III

**DOUBLE QUEEN PAWN
OPENINGS**

QUEEN'S GAMBIT DECLINED

1 d4 d5 2 c4 e6

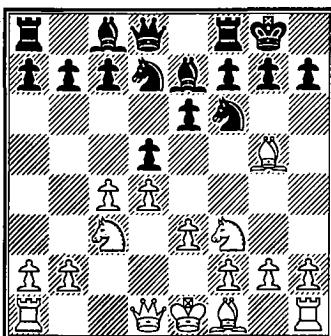

THE QUEEN'S GAMBIT (**1 d4 d5 2 c4**) is the keystone to White's offensive plan of starting on the left side of the center. The character of the game is much different than that of king-pawn openings, which often quickly result in open clashes. The Queen's Gambit takes the game to a strategic battle where the tactical clashes are delayed until the mid-dlegame. The offer of a pawn with **2 c4** is what gives the opening its edge, as the c-pawn attacks Black's center strongpoint. The "gambit" in the opening's name is rather a misnomer though, as Black cannot really hold on to the pawn. There is also a stark difference from the King's Gambit in that the White king's safety is not compromised by the pawn advances on the left side of the board.

The Queen's Gambit is one of the old openings, first mentioned in the Göttingen manuscript of 1490, then later the subject of analyses by Salvio and Greco in the early seventeenth century. Theorists in the nineteenth century discussed the best way to meet the gambit. The majority of chess writers, starting with Jaenisch (1843), seemed to be of the opinion that holding the center with **2 . . . e6** was the best defense. After this move there are many divergences, some depending on what White does and others on Black's choices. Some of the better-known variations that might arise are the Orthodox Variation, the Cambridge Springs Defense, the Exchange Variation, Lasker's Defense, the Tartakower System, the Ragozin System, the Vienna Variation, the Semi-Tarrasch Defense (the Tarrasch Defense proper will be treated separately), and others.

Strategically, White's plan when playing **2 c4** is to attack the center and remove Black's d-pawn from its place so that White is free to advance his/her e-pawn to **e4**. Black, by playing **2 . . . e6**, stops White from doing this but imprisons the light-squared bishop. Black will often try to imitate White by attacking White's d-pawn with a timely . . . **c5**. In the course of

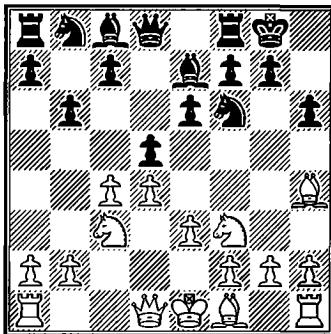

this struggle one side or the other often accepts structural weaknesses in return for dynamic strengths. Isolated and hanging pawns abound for both sides in this group of openings.

The Orthodox Defense is characterized by the moves 3 Nc3 Nf6 4 Bg5 Be7 5 e3 0-0 6 Nf3 Nbd7 (see above diagram). It was christened “orthodox” by Dr. Tarrasch, who was sarcastically making fun of the accepted dogma of the day. It is used today by few players because of its lack of active counterplay and the small likelihood of Black getting any winning chances. It reached a peak of popularity during the 1927 Capablanca–Alekhine match in Buenos Aires, but now many other variations have been invented so that Black has many defensive options.

Columns 1–6 illustrate the Capablanca freeing maneuver . . . dxc4 and . . . Nd5 followed by . . . e5. White tries for an edge either by trading pawns and attacking on the kingside (columns 1–3) or by keeping the tension in the center (columns 4–6). White can deviate on move 11 with Alekhine’s 11 Ne4 (columns 7–10) or Black can on move 8 with . . . h6 (columns 11–12). The move 7 Qc2 is more popular today than 7 Rc1; columns 16–18 show how this line develops. Black can try to improve matters with 6 . . . h6, and if White responds 7 Bxf6 Bxf6 we have the Petrosian Variation (columns 19–24). This was popular in the 1980s, with Kasparov as one of its most enthusiastic advocates. Black’s defenses have been strengthened since then so White now has trouble gaining an advantage with it. If Black plays 5 . . . h6 a different group of variations arise, covered in columns 25–28. Columns 29–30 deal with 5 Qc2, a favorite of Kramnik’s.

Lasker’s Defense is 6 . . . h6 7 Bh4 Ne4 (columns 31–36). Black tries to trade off several pieces in a bid for freedom. Another old variation, named after the Pennsylvania town, is the Cambridge Springs Defense (columns 37–42), characterized by . . . c6 and . . . Qa5, which tries to exploit the absence of White’s bishop from the queenside. This was first used in the Cambridge Springs International Tournament of 1904, a great triumph for Frank Marshall.

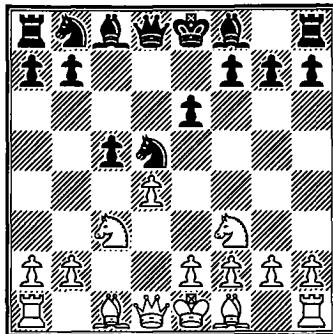

The well-respected and popular Tartakower Variation arises after 6 . . . h6 7 Bh4 b6 (columns 43–48), see above diagram. This has been a favorite of Karpov, Short, and Spassky. Black's . . . b6 allows the problem bishop to develop and prepares for . . . c5. White has four serious responses: 8 Be2 (columns 43–44), 8 Bd3 (columns 45–46), 8 Qb3 (columns 47), and 8 cxd5 (columns 48).

The Exchange Variation, 4 exd5 (columns 49–60), is a respected way for White to limit Black's options. White can play this line with several different plans. He/she can play a quiet positional game and attempt to get an edge on the queenside with the "minority attack," or push in the center with e4, opening the game. White can castle queenside and aggressively attack (this is popular these days).

Developing the bishop with 5 Bf4 (columns 61–72) instead of to the usual place at g5 continues to be a viable alternative. The main continuation is 5 . . . 0-0 6 e3 c5 7 dxc5 Bxc5 (columns 61–67). White often castles queenside and hurls the kingside pawns forward with lively play. Play with . . . c6 is seen in columns 68–71.

The Ragozin System (columns 73–78) is 4 . . . Bb4 à la Nimzo-Indian, to which it can sometimes transpose. The most crucial theoretical line is the Vienna Variation, 5 Bg5 dxc4 6 e4 (columns 73–75), which received a test in the 1993 Karpov vs. Timman match.

Black can try to avoid the pin of his king's knight by delaying . . . Nf6, as seen in columns 79–82. Columns 83–84 cover Black hitting back in the center with . . . c5 after his king's knight does get pinned.

The complex of variations known as the Semi-Tarrasch Defense arises after 3 Nc3 Nf6 4 Nf3 c5 (columns 85–102), with 5 cxd5 Nxd5 (columns 85–100, see above diagram) the usual follow-up. White has different ways to deal with this. In columns 85–92 White gets an isolated d-pawn or hanging pawns. Columns 93–96 are lines where White has a big center and Black the queenside majority. In columns 97–100 White fianchettos his king's bishop. Columns 101–102 are miscellaneous deviations.

14	Rhd1 N5f6	Bb3 Bg4	0-0 exd4	e4 Rd8(i)	0-0 Nbd5	Nd2 Bb4(s)
15	Nxf6† Nxf6(c)	Ng3 Bxf3(e)	Qxd4 Qxd4(g)	e5 Ng4(j)	Be5(o) ±	Nc3(t) c5(u)

- (a) (A) 10 Ne4 f6 11 Bf4 (Not 11 Bh4 g5 12 Bg3 f5 followed by . . . f4) 11 . . . Nxf4 12 exf4 Nb6 13 Bb3 Bb4† is at least equal for Black. (B) 10 h4 f6 11 Bf4 Nxf4 12 exf4 Nb6 was murky in Eingorn–Morović, Bor 1985.
- (b) 11 Qc2 Nxc3 12 Qxc3 b6 13 0-0 Bb7 was insipid in Capablanca–Vidmar, Hastings 1929.
- (c) Black has a difficult ending but Capablanca seemed to think it was tenable and succeeded in holding it more than once; for example, Alekhine–Capablanca, Buenos Aires 1927.
- (d) 12 dx5 Nxe5 13 Nxe5 (13 Bxd5 cxd5 14 Nc3 Bg4 15 Nxd5 Qd6 is better for Black, Mitchell–Thomas, Edinburgh 1926) 13 . . . Qxe5 14 Bxd5 cxd5 15 Nc3 Rd8 16 Qd4 Qxd4 17 exd4 is a somewhat difficult ending for Black, Kuloats–Kovaljov, Estonia 2001.
- (e) The column is Najdorf–Stahlberg, Zurich 1953. After 16 gxf3 Qf6 17 Qxf6 Nxf6 18 Nf5 Rad8 19 Rfd1 Nc8 (19 . . . Nfd5 was perhaps better) White had a small but enduring advantage in the endgame.
- (f) 13 0-0 e5 14 e4 cxd4 15 Qxd4 Qxd4 16 Nxd4 Ne5 17 Bb3 ±, Atalik–Zheliandinov, Podlehník 2001.
- (g) 16 Nxd4 Rd8 17 Rcd1 Ne5 18 f4 Ng6 19 h3 Bd7 is slightly better for White after the suggested 20 Rd2, Korchnoi–Hübner, Biel 1986.

- (h) (A) Emanuel Lasker played 12 ... e5 here against Alekhine, Zurich 1934. After 13 0-0 exd4 14 Nf5 Qd8 15 N3xd4 Ne5 16 Bb3 Bxf5 17 Nx5 Qb6 (17 ... g6 was necessary and would have avoided the subsequent debacle) 18 Qd6 N5d7 19 Rfd1 Rac8 20 Qg3 g6 21 Qg5 Kh8 22 Nd6 Kg7 23 e4 Ng8 24 Rd3 f6 25 Nf5† Kh8 26 Qxg6 Resigns (if 26 ... hxg6 27 Rh3 mate). This was the first time Alekhine beat Lasker. (B) 12 ... Qb4† 13 Qd2 Qxd2† 14 Kxd2, Dorfman–Bacrot, Val d’Isere 2002, is another ending where Black can likely hold the game.
- (i) A recent idea. Previously 14 ... cxd4 and 14 ... Bb7 were known.
- (j) After 16 h3 Nh6 (16 ... Nde5 17 Be2 Nxf2 18 Rxf2 White is winning—Yermolinsky) 17 d5 exd5 18 Qxd5 Rb8 19 e6 Bb7 20 Nf3 Qxe6 21 Qxe6 White had a small advantage in the ending, Yermolinsky–Orlov, USA 1995.
- (k) The immediate 9 ... b5 10 Bd3 a6 11 a4 bxa4 12 Nxa4 Qa5† 13 Nc3 c5 14 Ra1 Qb4 15 0-0 Bb7 is ±, Vidmar–Lasker, Nottingham 1936.
- (l) 10 Bxf6 Bxf6 11 0-0 dxc4 11 Bxc4 e5 12 Bb3 exd4 13 exd4 Re8 =, Zysk–Georgadze, Dortmund 1984.
- (m) 10 ... Nh5 11 Be5 Nxe5 12 dxe5 and now 12 ... g6 is not so bad, but not 12 ... dxc4 13 Bxc4 ±, Fine–Maróczy, Zandvoort 1936.
- (n) 10 ... Nd5 11 Bg3 is ±.
- (o) Tolush–Konstantinopolsky, USSR 1952. In this typical isolated queen pawn position, White's greater mobility and development outweigh his structural weakness.
- (p) 10 ... Nd5 11 Bg3 Nxc3 12 bxc3 b6 13 0-0 Bb7 14 Qe2 a6 15 Rfd1 Ba3 16 Rb1 ±, Kalka–Levin, Holland 2005.
- (q) There are several alternatives: (A) 12 0-0 c5 13 Qe2 Bb7 14 Rfd1 b4 15 Na4 cxd4 16 Nxd4 Qa5 17 b3 Rac8 =, Krush–Gallimova, Krasnoturinsk 2004. (B) 12 Bb1 Bb7 13 Qc2 c5 14 dxc5 b4 15 Rd1 g5 16 Nxe5 hxe5 is another speculative attempt hard to judge.
- (r) 12 ... b4 13 Bxf6 gxf6 (13 ... Nxf6 14 Ne4 ±) 14 Ne4 f5 15 Ng3 c5 16 e4 cxd4 17 exf5 e5 18 Rxc6 Nf6 19 Qc1 ±, Ribli–Hennings, Leipzig 1973.
- (s) 14 ... c5 15 Bxf6 Bxf6 16 Nxc5 e5 17 0-0 exd4 18 Nde4 Qb6 19 Qf3 Nxc5 20 Nxc5 Ra7 21 exd4 Qxb2 =, Schaekachev–Gereev, Calvia Ol. 2004.
- (t) 15 Bxf6 Nxf6 16 Nc5 e5 17 Nb3 Qb6 was disadvantageous for White in Pachmann–Rosetto, Mar del Plata 1960.
- (u) 16 Nc4 Qd8 17 Ne5 cxd4 18 exd4 Qb6 19 Nxd7 Nxd7 20 0-0 Bb7 21 Rb1 Rfc8 draw, Kaufman–Lengyel, Budapest 2006. Better may be the older Kamsky–Salov, Sanghi Nagar 1995, which went 16 Nb3 Qd8 17 0-0 cxd4 18 Nxd4 Bb7 19 Nc6 Bxc6 20 Bxc6 Ra7 22 Bg3 Ne5 23 Rd4 Bd6 24 Ne4 Nc6 25 Nxf6† gxf6 26 Rc6 Be5 27 Qg4† and White won in 35 moves.

15	Re1 Rxe1†(e)	Ne4 Be5(i)	exd4 Be6 =	Ba6 Rb8(r)	Na4(v) =	dxe5 Nxe5 (bb)

- (a) Other possibilities are: (A) 8 ... Be7 9 a3 c6 10 Bd3 Nd7 11 0-0 b6 12 Qe2 ±, A. Petrosian–Hübner, Seville 1997. (B) 8 ... a6 9 a3 c6 10 Bd3 Nd7 11 0-0 b5 =, Portisch–Short, Brussels 1986. (C) 8 ... Nc6 9 cxd5 exd5 10 Be2 Ne7 11 b4 a6 12 a4 with a substantial White edge in Korchnoi–Spassky, USSR 1963.
- (b) If 9 ... dxc4 10 Bxc4 Nd7, White plays 11 Ne4 e5 12 Nxf6† Qxf6 13 0-0 Qe7 14 e4 ± as in Gligorić–Portisch, Zagreb 1965.
- (c) 12 Bb3 exd4 13 exd4 Re8 14 h3 Nf8 15 d5 Bd7 was equal in Ribli–Karpov, London 1984, while 12 Ne4 exd4 13 Nxf6† Nxf6 14 Qxd4 Bg4 15 Qf4 Bxf3 16 Qxf3 Qd2 =, Dorfman–Lputian, USSR 1984.
- (d) 14 ... Bf5 is also adequate. After 15 Re1 a5 16 a3 Re8 17 Rxe8† Qxe8 18 Qd2 Qd7 it was even in H. Olafsson–van der Sterren, Wijk aan Zee 1987.
- (e) 16 Qxe1 Bf5 17 Ne4 Bxe4 18 Qxe4 Nd5 19 Bxd5 cxd5 20 Qf5 Qb6 21 Rc8† Rxc8 22 Qxc8† Kh7 23 Qf5† Kg8 24 Qxd5 Qxb2 =, Shabalov–Klovans, USSR 1987. Black could also play along the lines of the previous note with 15 ... Bf5 16 Rxe8† Qxe8 17 Qd2 Qd7 18 Re1 a5 but now he must sidestep a concealed tactic: 19 Qf4 a4? 20 Bxf7† Kxf7 21 g4, Rohde–Shapiro, Philadelphia 2004.
- (f) 12 dxc5 Nxc5 13 b4 Bxc3 14 Rxc3 Ne4 15 Rd3 Qe7 16 Rd4 ±, A. Petrosian–M. Gurevich, Baku 1986.

- (g) If 13 ... b5 14 dxc5 bxc4 15 c6 is advantageous for White (Kasparov).
- (h) 14 exd4 b5 15 Bb3 Qb6 16 d5 Nc5 leads to an unclear position according to Kasparov.
- (i) 16 Qh5 Rd8 17 Bf1 Bb8 18 Qa5 b6 and White had pressure \pm , Kasparov–H. Olafsson, Dubai 1986.
- (j) (A) 9 cxd5 Nb4 10 Qb3 Nxd5 11 Bc4 (11 Rc1 is ECO's recommendation) 11 ... Nxc3 12 bxc3 b6 was toothless in P. Nikolić–K. Georgiev, Heraklion 1985. (B) 9 a3 dxc4 10 Bxc4 c5 11 Rd1 cxd4 12 Nxd4 Bd7 13 Ba2 Qe7 14 h4 (Ribli–Beliaovsky, Reggio Emilia 1986), and now 14 ... Bxh4 15 g3 Bf6 16 Bb1 would have been unclear according to Ribli.
- (k) 10 cxd5 Nb4 11 Qb3 Nxd5 12 Nxd5 exd5 gives White nothing.
- (l) 12 a3 Na4 is slightly better for White (Sturua).
- (m) In the game Piket–Sturua, Debrecen 1992, White unwiseley tried to win material here with 14 Nb5? a6 15 b4 Qd8 16 Rxd5 Bd7 17 Qd2 axb5 18 Rxd7 and was rocked by 18 ... Qxd7! 19 Qxd7 Bxc3† 20 Ke2 Rfd8 21 Qxb7 Ng5 22 e4 Rxa3 23 Qxb5 Ra2† 24 Ke3 Bd2†. In view of 25 Ke2 Bf4† 26 Ke1 Ra1† 27 Ke2 Rd2 mate, Piket gave up.
- (n) 8 ... Nc6 led to interesting play in Piket–Vaganian, Debrecen 1992: 9 Rd1 (9 0-0-0 has been played) 9 ... b6 10 a3 Bb7 11 cxd5 exd5 12 Be2 Ne7 13 0-0 a6 and now, instead of 14 Ne5 as played, Piket recommends 14 Rd2 Qd6 15 Rfd1 with the idea Bf1, g3, Bg2 as in the game Piket–de Boer, Leeuwarden 1992.
- (o) (A) 9 ... dxc4 10 Bxc4 Qa5 11 0-0 Bxc3 12 Qxc3 Qxc3 13 bxc3 Nd7 14 c6 bxc6 15 Rab1 Nb6 =, Zvjaginsev–Beliaovsky, Essen 2000. (B) 9 ... Qa5 10 Rc1 Nc6 11 a3 d4 12 exd4 Nxd4 13 Nxd4 Bxd4. The position is approximately even; White's queenside majority is balanced by Black's play in the center, Piket–Korchnoi, Tilburg 1992.
- (p) After 11 Bb5 Black can either equalize with 11 ... Qa5 12 0-0 d4 as in Chernin–Geller, USSR 1985, or play for complications with 11 ... Bg4 12 Bxc6 bxc6 13 Nd4 Bxd4 14 exd4 Re8 as in Douven–Geller, Cska 1986, unclear.
- (q) 12 a3 was usual previously and could still be used.
- (r) The game van Wely–Piket, Leeuwarden 1992 continued 16 Ne4 Be5 17 f4 Qc7 and now 18 Nc3 Bxc3 19 Qxc3 Qc6 would have been unclear (van Wely).
- (s) Other plausible moves are (A) 8 ... c6 9 h4 h6 10 g4 Bg7 11 g5 h5 12 Ne5 \pm , Gelfand–Zumsande, Internet 2004, and (B) 8 ... Nc6 9 Rc1 a6 10 Be2 dxc4 11 Bxc4 e5 12 d5 Na7 13 Qc2 Bd7 which was even in Eingorn–A. Petrosian, USSR 1985.
- (t) 9 ... c5 10 dxc5 Nd7 11 Ne4 Be7 12 Rd1 Qc7 13 b4 a5 14 Nd6 Nf6 15 e4 axb4 16 e5 Bxd6 17 Qxd6 Ne8 18 Qb6 Ra5 and this sharp sequence has lead to equality, Bacrot–Marciano, French Chp. 2000.
- (u) If 10 ... c5 11 h4 cxd4 12 exd4 Nb6 13 Bb3 Bd7 14 g4 with attacking chances for White.
- (v) Better than 15 Ne2 c5 with a Black edge in the game Sadler–van der Sterren, Linares 1995.

- (w) 9 0-0-0 Nd7 10 e4 dxc4 11 Bxc4 e5 12 d5 Nc5 13 Qc2 Qb6 was even in Filip-Zita, Czechoslovakia 1963.
- (x) 9 ... a6 10 cxd5 cxd5 11 Bd3 Nc6 12 0-0 b5 13 Bb1 g6 14 e4 Bg7! 15 Rfe1 Na5 led to satisfactory play for Black in Nikolic-Onischuk, Wijk aan Zee 2005.
- (y) 10 ... b6 11 cxd5 cxd5 12 e4 dxe4 13 Bxe4 Rb8 14 0-0 b5 =, Kasparov-Karpov, Moscow 1985. The text tries to play ... b5 in one move.
- (z) (A) 13 e4 b4 14 Ne2 dxe4 15 Bxe4 Ba6 =, Gligoric-Klovans, Elista 2002.
(B) 13 a3 Be7 14 Qa2 a6 15 b4 Bb7 16 Rb1 Bd6 17 a4 Bc6 =, Dizdarevic-Short, Sarajevo 2004.
- (aa) Perhaps too active; 14 ... Bb7 has been played here with reasonable chances.
- (bb) In the game Yusupov-Bonsch, Baden-Baden 1992, the continuation 16 Nfd4 Rb6 17 Bb1 g6 18 Qc2 Qd6 gave White a very slight advantage.

- (b) 10 exd4 Nc6 11 0-0 Nh5 12 Bxe7 Nxe7 was equal in Korchnoi–Karpov, Meran 1981.
- (c) 11 0-0, Karpov–Kasparov, Moscow 1984, and 11 Be2 Nc6 12 Nb3 Nd5 =, Korchnoi–Karpov, Meran 1981, were played before.
- (d) Karpov recommends 11 ... Nc6 12 Ndb5 a6 13 Nd6 b5 with counterplay for Black.
- (e) White had a small edge in the game Karpov–Beliavsky, Dortmund 1995.
- (f) There are other moves here: 9 Rc1, 9 g3, 9 e3, 9 Nxd5, but not 9 e4?! Nxc3 10 bxc3 c5 11 Bd3 cxd4 12 cxd4 Nc6 13 0-0 Rd8 14 d5 Nb4 15 Re1 exd5 16 exd5! f6 and Black won the d-pawn in Pokorny–Neckar, Czech Chp. 2001
- (g) 9 ... Rd8 is an older move that is slightly better for White.
- (h) After 13 Be2 Nd7 14 0-0 c5 15 dxc5 Nxc5 16 b4 Black should have played not 16 ... Ne4 as in M. Gurevich–Hjartarson, Groningen 1993, but 16 ... Na6 17 a3 Rac8 18 Qb3 Nb8 19 Qa4 a6 20 Nd4 Rc7 = (M. Gurevich).

- (i) 7 Qb3 c5 8 dxc5 Nbd7 9 e3 Nxc5 10 Qc2 b6 led to nothing in Kurajica–Kir. Georgiev, Sarajevo 1985.
- (j) 7 ... Na6 8 e3 (8 Rd1 b6 9 Bxf6 Bxf6 10 e4 c6 was solid in Torre–Karpov, Brussels 1986) 8 ... c5 9 dxc5 Qa5 10 Bxc4 Qxc5 11 Bd3 Nc6 12 a3 Ne5 =, M. Gurevich–Vaganian, Moscow 2001.
- (k) 8 Rd1 Bb7 9 Bxf6 Bxf6 10 cxd5 exd5 11 g3 Qe7 was = in T. Petrosian–Klovans, Yurmala 1983.
- (l) 9 ... c5 10 e5 Be7 11 cxd5 exd5 12 dxc5 bxc5 13 0-0-0 was much better for White in Zaitsev–Krogius, Sochi 1976.
- (m) 10 ... dxc4 is met by 11 e5 Be7 12 Bxc4 Bb7 13 a3 with the idea d5 (Hjartarson).
- (n) The game Ree–Hjartarson, Reykjavík 1984, continued 13 h4 Rb8 14 Qg4 Bg7 15 Be2 Ne7 with chances for both sides.
- (o) 7 cxd5 exd5 8 g3 0-0 9 Bg2 c6 10 0-0 Be7 11 Qc2 Be6 =, Timman–Kavalek, Bu-gojno 1982.
- (p) 9 d5 Ne5 10 Nx6† (10 Be2 0-0 11 Qb3 exd5 12 cxd5 c6 was good for Black in Romanishin–Geller, USSR 1978) 10 ... Qxf6 11 Nxe5 Qxe5† 12 Qe2 Qf6 13 g3 0-0 was simple equality in P. Nikolić–Tal, Wijk aan Zee 1982.
- (q) The alternative 10 Qd3 0-0 (also 10 ... b6 11 Qe4 Bb7 12 Ne5 0-0-0 13 Nxc6 Rd6 =, Tatai–Geller, Las Palmas 1979) 11 Qe4 Bd7 12 Bd3 g6 13 0-0 is about even—Beliavsky–Georgadze, USSR 1978.
- (r) 10 ... 0-0 is well playable. After 11 0-0-0 e5 12 dxe5 (12 d5?! e4 13 dxc6 exf3 14 gxf3 Qxc6 ±, Ward Summercale, British Chp. 2000) 12 ... Nxe5 13 Qd4, it was equal in Tatai–Korchnoi, Rome 1981.
- (s) The game Vladimir–Kholmov, Leningrad 1967, concluded 13 0-0 Kb8 14 Ne5 Nxe5 15 dxe5 Qg5 Draw.
- (t) 5 ... c5 6 cxd5 (6 dxc5 d4 7 Nb5 e5 8 Nxe5 a6 led to wild game in Khalifman–Topalov, Dubai 2002) 6 ... cxd4 7 Nxd4 0-0 8 Bg5 Nxd5 9 Bxe7 Nxe7 10 Rd1 Qb6 11 Qb3 drawn, Radjabov–Ponamariov, Linares 2003.
- (u) 8 e4 dxe4 9 Qxe4 c5 10 0-0-0 (better than 10 Bd3 g6 11 dxc5 Nd7 12 Qe3 Qa5 ±, Barbero–Petursson, Thessaloniki 1984) 10 ... Qa5 11 Bd3 g6 (not 11 ... Rd8 12 Qh7† Kf8 13 Ne4 ±, Trifunović–Rosetto, Mar del Plata 1950) would probably favor White. 8 0-0-0 c5 9 dxc5 d4 10 Ne4 (10 e3 leads to the queen sacrifice 10 ... dxc3 11 Rxd8 cxb2† 12 Kb1 Rxd8 unclear, Ree–Boersma, Netherlands 1985) 10 ... e5 11 e3 Nc6 12 exd4 exd4 13 a3 Bg4 14 Be2 b6 15 cxb6 axb6—Black had good compensation in Chekov–Bönsch, Leipzig 1986.
- (v) (A) 8 ... c6 9 e4 b6 10 Bd3 dxe4 11 Bxe4 Bb7 12 0-0 Nd7 13 b4 ±, Romanishin–Tarjan, Hastings 1976. (B) 8 ... c5 favored White after 9 dxc5 Qa5 10 cxd5 exd5 11 Qd2 Bxc3 12 Qxc3 Qxc3† 13 bxc3 Be6 14 Nd4 Rc8 15 e4 ±, Romanishin–Beliavsky, Leningrad 1977.
- (w) 9 e4 dxe4 10 Nxe4 Bg7 11 Be2 Nc6 would be unclear according to Kramnik.
- (x) 12 0-0 Bg7 13 e4 (or possibly 13 b4) 13 ... Qe7 14 e5 c5 was another possibility (Kramnik).

- (y) The position is unclear. White's attacking chances can be met by counter-punching in the center. The game Kramnik–Short, Dortmund 1995, continued 13 a3 Qe7 14 Ba2 b6 15 Bb1 h5 16 0-0 Bb7 17 Ng5 Rfd8 18 Ba2 Nf6 19 e4 Ng4 20 e5 Rd7 (20 . . . c5) 21 Ne2 Rad8 22 Bxe6 fxe6 23 Qxg6 Nxе5 24 Qh7† Kf8 25 Nf4 Resigns. A brilliant finish.
- (z) 9 Be2 Nfd5 10 Bxe7 Nxe7 11 Ne5 Ng6 12 Nxc4 Nxc4 13 Bxc4 e5 14 dxe5 Qg5 15 0-0 Nxe5 16 f4 Qe7 17 Bb3 Qc5† 18 Qf2 Qxf2† 19 Rxf2 Ng4 20 Rf3 with an edge in the endgame, Eingorn–Kveinys, Bad Worishofen 2005.
 - (aa) Not 9 . . . h6?! 10 Bxf6 Bxf6 11 g4 with an attack.
 - (bb) 11 . . . Nf8 12 h5 h6 13 Ne5 is ± (Kramnik).
 - (cc) 13 Ne4 Bd7 14 0-0 6, Kramnik–Beliavsky, Dortmund 1995.

QUEEN'S GAMBIT DECLINED

Lasker's Variation

**1 d4 d5 2 c4 e6 3 Nc3 Nf6 4 Bg5 Be7 5 e3 0-0 6 Nf3 h6(a)
7 Bh4 Ne4 8 Bxe7 Qxe7**

	31	32	33	34	35	36
9	cxd5.....	Rc1	Qc2			
	Nxc3	c6(l)	Nxc3	c6(aa)		
10	bxc3	Bd3(m)	Qxc3	Nxe4(bb)		
	exd5	Nxc3	dxc4(u)	dxe4		
11	Qb3(b)	Rxc3	Bxc4	Qxe4		
	Rd8.....	Nd7.....dxc4	b6(v)	Qb4†		
12	c4	c4(h)	0-0(n)	0-0(w)	Nd2	
	dxc4(c)	dxc4	dxc4	Bb7	Qxb2	
13	Bxc4	Bxc4	Bxc4	Be2	Rb1(cc)	
	Nc6	Nd7(i)	b6	Rc8(x)	Qxa2(dd)	
14	Be2(d)	0-0	Qe2(o)	Bb3	Bd3	
	b6(e)	Nb6(j)	a5	exd4(s)	f5	
15	0-0	Rfc1	Rfc1	b4		
	Bb7(f)	Nxc4(k)	Bb7(p)	Nf6(t)	Rfc1	Qe5(ee)
				c5(z)		Qa3(ff)

- (a) Inserting 6 . . . h6 is the modern form. Black makes luft and removes the h-pawn from take. If immediately 6 . . . Ne4 then 7 Bxe7 Qxe7 8 cxd5 Nxc3 9 bxc3 exd5 10 Qb3 Rd8 11 c4 dxc4 12 Bxc4 Nc6 13 Be2 Rd6 11 0-0 ± (Beliavsky).
- (b) 11 Bd3 is possible here. The game Uhlmann–Averbakh, Polanica Zdroj 1975, continued 11 . . . c5 12 0-0 Nc6 (12 . . . Bg4) 13 h3 Be6 14 Re1 Rfd8 =.
- (c) 12 . . . Be6 13 cxd5 (13 Qxb7 Qa3 14 Nd2 dxc4 =) 13 . . . Bxd5 14 Bc4 Bxf3 15 gxf3, draw agreed, Sasikiran–Korneev, Corsica 2003.
- (d) 14 Qc3 Bg4 15 0-0 Bxf3 16 Qxf3 gxf3 17 Be2 Rd7 18 Rb1 Nd8 19 Rb3 b6 20 Rc1 Ne6 21 f4 =, Atalik–Lamoureux, Antalya 2006.
- (e) This is a recent idea. The older plan was 14 . . . Rd6 15 0-0 Be6 16 Qb2 Bd5 ±, Ivkov–Wexler, Buenos Aires 1960. Other moves such as 14 . . . Na5, 14 . . . Qb4, 14 . . . Nb4, and 14 . . . Bg4 fail to equalize.
- (f) 16 Rfc1 Rfc8 17 Qa4 Na5 18 Rc3 c5 19 Rac1 cxd4 = Deep Fritz–Kramnik, match 2002.
- (g) 11 . . . c6 is also playable. 12 Be2 (12 Bd3 and 12 c4 are possible) 12 . . . Nd7 13 0-0 Nf6 14 c4 dxc4 15 Bxc4 is ± (Neishtadt).
- (h) 12 Bd3 is too tame. 12 . . . Nd7 13 0-0 c5 14 Qa3 Qc7 15 Rfb1 b6 was completely equal in Bilek–Donner, Budapest 1961.

- (i) 13 ... Nc6 14 Qc3 b6 (14 ... Bg4 15 Be2 Ne7 16 0-0 \pm , Gilg–Keller, Germany 1940) 15 0-0 Bb7 16 Rac1 Na5 led to a small edge for White in Gligorić–O. Bernstein, Yugoslavia–France 1956.
- (j) 14 ... c5 15 Qa3 b6 16 e4 Bb7 17 e5 Qe7 18 Rfe1 b5 19 Bxb5 Bxf3 20 gxf3 \pm (Pachman).
- (k) After 16 Qxc4 c6 17 a4 Be6 18 Qc5 Qxc5 19 dxc5 White had an edge in the ending, Flohr–Denker, Groningen 1946.
- (l) 9 ... Nf6 10 Qc2 Rd8 11 a3 dxc4 12 Bxc4 c5 was about even in Farago–Andersson, Wijk aan Zee 1988. 9 ... Rd8 10 Qc2 Nc6 11 a3 Nxc3 12 Qxc3 \pm , Osnos–Shabanov, USSR 1973.
- (m) 10 Qc2 Nxc3 11 Qxc3 Nd7 12 a3 dxc4 13 Bxc4 b6 =, Petrosian–Spassky, Moscow 1969.
- (n) 12 cxd5 exd5 13 0-0 Re8 14 Qb1 with just a tiny edge, Ivanisevic–Korneev, Nova Gorica 2007.
- (o) 14 Bd3 c5 15 Be4 Rb8 16 Qa4 Bb7 17 Bxb7 Rxb7 =, Lysyj–Lputian, Sochi 2007.
- (p) Epishin–Vaganian, Reggio Emilia 1995, continued 16 h3 (a novelty according to Epishin; 16 Bd3 had been normal before) 16 ... c5 17 Bb5 e5 18 dxe5 \pm .
- (q) 12 Rxc4 with the idea of setting up a battery on h7 is a plausible alternative; 12 ... Nd7 13 Bb1 e5 14 Qc2 f5 15 dxe5 Nxe5 \pm , Polugaevsky–Augustin, Lugano 1968.
- (r) 13 ... b6 is well possible here; 14 Bd3 c5 15 Bb5 Rd8 16 Bc6 Rb8 =, Smyslov–Kasparov, Vilnius 1984.
- (s) Perhaps (A) 14 ... Re8 15 d5 cxd5 16 Qxd5 Nf6 (P. Nikolić–Yusupov) or (B) 14 ... e4 15 Nd2 Nf6 16 Qc2 Re8 (Polugaevsky–Mikhailchishin, USSR 1978) are safer alternatives.
- (t) The game Karpov–Yusupov, London 1989, continued 16 Re1 Qd6 17 Ne5 and now Yusupov could have kept the balance with 17 ... Be6 18 Bxe6 fxe6 19 Qb3 (Makarichev suggests 19 Rg3) 19 ... Qxd4 (Belavsky).
- (u) 10 ... c6 11 cxd5 exd5 12 Bd3 Nd7 13 0-0 Nf6 \pm , Teschner–Vidmar, Kottbus 1942.
- (v) The immediate 11 ... c5 was tried in Onischuk–Vaganian, Moscow 2002. After 12 0-0 Nc6 13 dxc5 Qxc5 14 Rac1 Rd8 15 a3 Bd7 16 b4 White gained a slight edge.
- (w) 12 d5 was played in Lobron–Yusupov, Munich 1993. After 12 ... cxd5 13 Bxd5 c6 14 Bc4 Bb7 15 Ne5 b5 16 Bb3 Qc7 17 a4 Nd7 18 Ng6 Rfe8 19 axb5 Rac8 20 0-0 c5 21 Nf4 c4 22 Bc2 White held a slight edge.
- (x) An immediate 13 ... c5 was played in Hübner–Yusupov, Munich 1993, when 14 dxc5 Rc8 15 b4 bxc5 16 b5 a6 17 Nd2 (Hübner says 17 a4 axb5 18 axb5 Nd7 19 Nd2 is \pm) 17 ... axb5 18 Bxb5 Bxg2 19 Kxg2 Qb7+ 20 Kh3 Qxb5 is unclear.
- (y) 14 ... c5 15 dxc5 bxc5 16 b5 Nd7 17 a4 a6 18 Rfc1 axb5 19 Bxb5 Bc6 (19 ... c4–Zsu. Polgar) 20 Bxc6 Rxc6 was \pm , Zsu. Polgar–Chiburdanidze, St. Petersburg 1995.

- (z) After 16 dxc5 bxc5 17 b5 a6 18 a4 c4, Psakhis–Yusupov, Baden-Baden 1992, White had an advantage. Psakhis suggests 18...axb5 19 Bxb5 Bxf3 20 gxf3 and calls it ±.
- (aa) (A) 9...Nf6 10 cxd5 exd5 11 Bd3 c6 12 0-0 Be6 13 Rab1 a5 was somewhat favorable for White in Lengyel–Kotov, Amsterdam 1968. (B) 9...Rd8 10 Bd3 Nxc3 11 Qxc3 c6 12 0-0 Nd7 13 Rfd1 ±, Geller–Moiseev, USSR 1952.
- (bb) (A) 10 Be2 Nd7 11 0-0 =, Kotov–Pilnik, Stockholm 1952. (B) 10 Bd3 Nxc3 11 Qxc3 dxc4 12 Bxc4 Nd7 13 0-0 b6 14 e4 Bb7 15 Rfe1 c5! = (not 15...Rfe8 16 Rad1 c5 17 Bb5 Red8 18 d5 ±, M. Gurevich–Chigladze, Cap d' Agde 2003).
- (cc) 13 Qb1 Qc3 14 Qc1 Qxc1† 15 Rxc1 Nd7 16 Be2 c5 =, Trifunović–Najdorf, Yugoslavia 1949. White must sacrifice the a-pawn if he wants to try for an advantage.
- (dd) 13...Qc3 14 Qd3 Qa5 15 Be2 e5 16 0-0 cxd4 17 ex4 Bf5 18 Ne4 Re8 19 Bf3 led to a slight advantage for White in Taimanov–Cvetkov, Moscow 1956.
- (ee) 15 Qh4 c5 and now 16 dxc5 Qa3 17 Ke2 Nd7 or 16 Ke2 cxd4 17 Ra1 Qb2 18 Rhb1 Qc3 and 16 d5 Nd7 17 dxe6 Ne5 18 e7 Nd3† are all bad for White.
- (ff) 16 Ke2 Qe7 17 c5 Nd7 18 Qc7 e5 19 Nf3 exd4 20 Nxd4 Qe5 21 Qxe5 Nxe5 22 f4 Nxd3 23 Kxd3. White has unclear compensation for the pawn.

QUEEN'S GAMBIT DECLINED

Cambridge Springs Variation

1 d4 d5 2 c4 e6 3 Nc3 Nf6 4 Bg5 Nbd7 5 Nf3 c6(a) 6 e3(b) Qa5

- (a) 5 . . . Bb4 is the Manhattan Variation, a type of Ragozin with the Black knight committed to d7, and is considered under that opening. 5 . . . h6 6 Bh4 dxc4 7 e4 Bb4 8 Qc2 c5 9 Bxc4 cxd4 10 Nxd4 was ± in Vaganian–Taimanov, USSR 1974.
- (b) 6 e4 dxe4 7 Nxe4 Be7 (7 . . . a6 8 Nxf6† Nxf6 9 Bc1 c5 10 a3 Be7 = [Neishtadt]) 8 Nc3 0-0 =, Alekhine–Lundin, Örebro 1935.
- (c) 7 . . . dxc4 8 Bxf6 Nxf6 9 Nxc4 Qc7 10 Rc1 Be7 11 g3 0-0 12 Bg2 Rd8 13 0-0 Nd5 14 a3 Bd7 15 b4 Be8 16 Qb3 ±, Ivanchuk–Aseev, Yerevan 2004.
- (d) 10 . . . Ne4 11 Bh4 exd4 12 Nxd4 Qa5 13 0-0 Bxc3 14 cxd5 cxd5 15 bxc3 Qxc3 16 Qd1 is good for White according to Kramnik.
- (e) In the game Kramnik–Kamsky, Linares 1993, 13 . . . Re8 14 Rad1 exd4 15 Nxd4 Be5 16 f4 Bxd4 17 Rxd4 Rxe3 18 Rfd1 was ±; Black played too actively. After 13 . . . a6 it's probably ±.
- (f) 9 . . . Bxc3† 10 Qxc3 Qxc3† 11 bxc3 Nxe5 12 Bxf6 gxf6 13 cxd5 cxd5 is equal (M. Gurevich).
- (g) 11 . . . Bxc3 12 Qxc3 Qxc3† 13 bxc3 0-0 14 Rd4 ±.
- (h) Not 12 . . . Bxc3? 13 bxc3 Qxg5 14 Qxe4† Qe5 15 f7† winning.
- (i) In the game Lutz–M. Gurevich, Munich 1993, the mistake 13 . . . Qe5? was made; and 14 f4 Qa5 15 a3 Bf8 16 fxg7 Bxg7 17 Nd6† was winning for White.

But after 13 ... Qa5, 14 a3 Bf8 15 fxg7 Bxg7 16 Nd6† Ke7 17 Qe4† Qe5 the position would be unclear.

- (j) Others: (A) 8 ... dxc4 9 Bxf6 Nxf6 10 Nxc4 Qc7 11 a3 Be7 12 g3 Bd7 13 b4 0-0 14 Bg2 Rfd8 15 0-0 Be8 16 Rfd1 b6 17 e4 ±, Plachetka–Lechtnsky, Czech Chp. 2002; or (B) 8 ... Ne4 9 Ndx4 dxe4 10 Bh4 0-0 11 a3 Bxc3† 12 Qxc3 ±, Hort–Janosević, Madonna di Campiglio 1974.
- (k) 11 ... Qb6 12 exd4 dxc4 13 Bxc4 a5 14 a4 Qc7 15 Rae1 h6 16 Bh4 Bd6 17 h3 Nb6 18 Bxf6 Nxc4 19 Ne4 Bh2† 20 Kh1 ±, Carlsen–Kasparov, Reykjavík Rapid 2004.
- (l) 12 ... dxc4 13 Bxc4 Qe5 14 Nf3 Qe7 ±, Beliavsky–Smagin, USSR 1986.
- (m) 14 Bxc4 Qe5 and now not 15 Bh4 Qe4 =, Ruban–Cvetković, Yugoslavia 1993, but 15 Bf4 Qc5 16 Bd3 Ne5 17 Bxe5 Qxe5 18 e4 ± (Ruban).
- (n) 12 Na4 Qc7 13 Nxd4 dxc4 14 Bxc4 Bd6 15 Rac1 Bxh2† 16 Kh1 Bd6 17 Nb5 Qb8 18 Be2 a6 19 Nxd6 Qxd6 20 Rfd1 Qb4 21 Rd4 with play for the pawn, Ivanchuk–Bacrot, Wijk aan Zee 2006.
- (o) The game has turned into a sort of Nimzo-Indian with White's knight on b3 instead of f3. After the game continuation 14 Qe2 Bxc3 15 bxc3 Ne4 16 Qxe4 Qxc4 the position was unclear, Azmaiparashvili–Ivanchuk, Tilburg 1994. Azmai mentions 14 Nb5 Qc6 15 a3 Be7 16 Na5 Qb6 17 b4 a6 18 Nc3 Qxd4 19 Rad1 Qg4 20 f4 as a speculative White alternative.
- (p) Neither 7 ... exd5 nor 7 ... cxd5 is in the spirit of the Cambridge Springs. But 7 ... Ne4 has been tried by Ljubojević; after 8 dxe6 fxe6 9 Qa4 (9 Bh4 is also played) 9 ... Qxa4 10 Nxa4 Bb4† 11 Ke2 b5 12 Nc5 Ndx5 13 dxc5 Bxc5 14 Rc1 White is better (Filip).
- (q) 8 ... N7b6 9 Bd3 f6 10 Bh4 Nxc3 11 bxc3 Ba3 12 Rb1 ±, Vaganian–Smyslov, Montpellier 1985.
- (r) 9 ... h6 10 Bh4 c5 11 a3 Bxc3 12 bxc3 Qxa3 13 e4 N5f6 14 Bd3 Qa5 15 d5 c4 16 Bxc4 exd5 17 Bxd5 ±, M. Gurevich–Cardon, Belgium 1994.
- (s) If 12 a3 Bxc3 13 bxc3 exd4 14 cxd4 Qxa3 15 0-0 Re8 as in Rogers–Smagin, Prague 1992, Ftacnik suggests 16 e4 N5b6 17 Rfe1. It is unclear whether White has enough for the pawn.
- (t) Following 14 Bb1 Nf8 15 Ne5 Be6, there are several White tries. 16 Qd3 Nf4 17 Qf3 N4g6 18 Bg3 Nxe5 =, Uhlmann–Smagin, Dortmund 1991, or 16 Rfe1 c5 and now 17 Nf3 was recommended by Smagin rather than the 17 Nc4 Qa6 18 Ne3 Nxe3 19 fxe3 Bxa2 ∓ of Oll–Smagin, Copenhagen 1993.
- (u) 11 a3 Bxc3 12 bxc3 h6 13 Bh4 Re8 14 c4 Qxd2† 15 Nxd2 Nd7 16 0-0 exd4 17 exd4 Nf8 18 Rfe1 Bf5 19 Bf1 Neg6 =, Bareev–L. Sokolov, Poikovsky 2006.
- (v) After 14 a3 (if 14 Qc2 Nf8 15 Nxd5 cxd5 16 Bg3 Bd6 and Black has equalized) Black has two unappetizing choices. If 14 ... Bd6 15 Nxd5 Qxd2 16 Nxf6† Nxf6 17 Nxd2 Bf4 18 Rcd1 Rxd4 19 Nf3 and Kasparov judges the endgame as very favorable to White. The game Kasparov–Smyslov, Vilnius 1984, continued instead 14 ... Bxc3 15 bxc3 Nf8 (If 15 ... Qxa3 16 c4 with a big edge)

16 Bg3 ± Be6 17 Rfe1 Bf7 18 c4 Qxd2 19 Nxd2 Nb6 20 Nb3 Na4 21 Bf1 Rd7
22 Na5 Ne6 23 d5 Nd4 24 dxc6 Nxc6 25 Nxc6 bxc6 26 c5 Re8 27 Rxе8† Bxe8
28 Bd6 Bf7 29 Rb1 Bd5 30 Rb8† Kf7 31 Rf8† Ke6 32 g3 g6 33 Ba6 Rxd6 34 cxd6
Kxd6 35 Rxf6† Ke5 36 Rf8 c5 37 Re8† Kd4 38 Rd8 Ke5 39 f4† Ke4 40 Bf1 Bb3
41 Kf2 Nb2 and White won. Filigree technique by Kasparov.

QUEEN'S GAMBIT DECLINED

Tartakower Variation

1 d4 d5 2 c4 e6 3 Nc3 Nf6 4 Bg5 Be7 5 e3 0-0 6 Nf3 h6(a) 7 Bh4 b6

	43	44	45	46	47	48
8	Be2(b).....	Bd3.....	Qb3	cxd5(x)		
	Bb7	Bb7dxcc4(o)	Bb7(t)	Nxd5		
9	Bxf6	0-0(i)	Bxc4	Bxf6(u)	Bxe7	
	Bxf6	Nbd7	Bb7(p)	Bxf6	Qxe7	
10	cxd5	Qe2(j)	0-0	cxd5	Nxd5	
	exd5	Ne4(k)	Nbd7(q)	exd5	exd5	
11	b4(c)	Bg3	Qe2	Rd1	Rc1(y)	
	c6.....c5	c5	Ne4(r)	Re8(v)	Be6	
12	0-0	bxcc5	cxd5	Bd3	Qa4(z)	
	Re8(d)	bxcc5	exd5	Bd6	c5	
13	Qb3	Rb1	Rad1(l)	Rfd1	dxc5	Qa3(aa)
	a5	Bc6(g)	Nxg3(m)	Bxg3	Nd7	Rc8
14	bxa5(e)	0-0	hxg3	hxg3	c6	Be2(bb)
	Rxa5(f)	Nd7(h)	Bf8(n)	Qe7(s)	Bxc6(w)	Kf8(cc)

- (a) 6 ... b6 leads to similar play without the useful luft. An example is 7 cxd5 Nxd5 8 Bxe7 Qxe7 9 Nxd5 exd5 10 Rc1 Be6 11 Qa4 c5 12 Qa3 Rc8 13 Bb5 ±, Petrosian–Trikaliotis, Siegen 1970.
- (b) White also can play the immediate 8 Bxf6 Bxf6 9 cxd5 exd5 10 Be2, when 10 ... Bb7 would transpose to the column, but Black could consider 10 ... Be6.
- (c) 11 0-0 is less ambitious. Black can choose between 11 ... Qe7, 11 ... c5, 11 ... c6, 11 ... Re8, and 11 ... Nd7.
- (d) (A) 12 ... Qd6 13 Qb3 Nd7 14 Rfe1 Be7 15 Rab1 a5 16 bxa5 Rxa5 17 a4 Re8 18 Bf1 Bf8 19 Qc2 g6 20 e4 ±, Karpov–Kir. Georgiev, Tilburg 1994. (B) More recently Black has tried 12 ... a5, e.g. 13 b5 c5 14 Ne5 cxd4 15 exd4 Bxe5 16 dxe5 d4 17 Na4 Qg5 with complex play, Onischuk–Vaganian, Poikovsky 2002.
- (e) 14 b5 c5 15 Rad1 (Not 15 dxc5 bxc5 16 Rac1 Bxc3 ≈, Timman–Short, San Lorenzo 1993) 15 ... c4 16 Qc2 ± (H. Olafsson).
- (f) 15 Rab1 Nd7 16 Rfe1 Be7 (16 ... Qa8 17 a4 Ba6 is unclear—H. Olafsson) 17 a4 Bd6 18 e4 (18 Bd3 led to nothing in H. Olafsson–Lputian, Tilburg 1994) 18 ... dxe4 19 Bc4 Rf8 20 Nxe4 would have been interesting according to Olafsson.
- (g) 13 ... Qa5 has proved too risky: 14 Qd2 cxd4 15 Nxd4 Bxd4 16 exd4 and now neither 16 ... Ba6 17 Nb5 Qd8 18 0-0 Nc6 19 a4 (Azmaiparashvili–Short,

Manila 1992) or 16 . . . Bc6 17 Nb5 Qd8 18 0-0 Nd7 (Vaganian–Gómez, Haifa 1989) was good enough to equalize.

- (h) After 15 Bb5 Qc7 16 Qc2 (16 Qd2 Rfd8 =, Kasparov–Karpov, Moscow 1984) 16 . . . Rfc8, White had little in Khalifman–Portisch, Biel 1993.
- (i) 9 cxd5 Nxd5 10 Bxe7 Qxe7 11 Nxd5 Bxd5 12 Rc1 Rc8 13 0-0 c5 was =, Beliavsky–Geller, Yerevan 1975.
- (j) (A) 10 Bg3 is best met by 10 . . . Bd6, when 11 Rc1 Bxg3 12 hxg3 c5 13 Qe2 a6 14 a4 Ne4 15 Rfd1 Qe7 16 Rb1 Rfd8 17 cxd5 Draw, Mikhalchishin–Díaz, Trnava 1988. (B) 10 cxd5 exd5 11 Bf5 g6 12 Bd3 Ne4 was about equal in Mirales–Barbero, Montpellier 1987, but also not bad is 10 . . . Nxd5 11 Bxe7 Qxe7 12 Re1 c5. Now 13 Nxd5 is equal, but 13 e4 Nf4 14 d5 exd5 15 exd5 Qd6 16 Bc4 Nf6 was \mp in Shirov–Beliavsky, Linares 1993.
- (k) 10 . . . c5 11 Bg3 cxd4 12 exd4 dxc4 13 Bxc4 Nh5 14 d5 Nxg3 15 hxg3 exd5 16 Bxd5 Rb8 17 Rad1 Bf6 18 Qe4 \pm , Romanishin–Neverov, Kharkov 2004.
- (l) 13 Rac1 is an alternative; if 13 . . . Rc8 14 Ba6 Nxg3 15 hxg3 Qc7 16 Bxb7 Qxb7 17 Rfd1 \pm , Timoschenko–Marić, London 1996.
- (m) 13 . . . Qc8 14 Rc1 Rd8 15 Rfd1 Ndf6 16 Ne5 Qe6 17 Bh4 Rac8 18 f3 Nxc3 =, Bacrot–Ivanchuk, Odessa 2007.
- (n) 15 Bb1 Re8 16 Rd2 a6 =, Vyzmanavin–Pigusov, Moscow 1988.
- (o) 8 . . . c5 9 dxc5 bxc5 10 cxd5 Nxd5 (if 10 . . . exd5? 11 Bxf6 Bxf6 12 Nxd5 Bxb2 13 Rb1 Bf6 14 Be4 wins) 11 Bg3 Nd7 12 0-0 Nxc3 13 bxc3 \pm , Smyslov–Szabo, Mar del Plata 1962.
- (p) Not 9 . . . Ba6? 10 Bxa6 Nxa6 11 Qa4 Nb4 12 Bxf6 \pm , Kholmov–Saigin, USSR 1953.
- (q) 10 . . . Ne4 11 Nxe4 Bxe4 12 Bg3 Nd7 13 Qe2 Bd6 14 Rfd1 Qe7 15 Bb5 Rad8 16 Rac1 Bxg3 17 hxg3 c5 18 Nd2 Bd5 19 e4 Ba8 20 Bxd7 Qxd7 21 dxc5 bxc5 22 Nb3 Qa4 23 Rxd8 \pm , Carlsen–Hracek, Bundesliga 2006.
- (r) 11 . . . c5 12 Rfd1 Ne4 13 Nxe4 Bxe4 14 Bg3 Qc8 15 Rac1 a5 16 Bb5 \pm , Ivanchuk–Beliavsky, Odessa 2006.
- (s) After 15 Nxe4 Bxe4 White is slightly better, Gheorghiu–Pfleger, Lucerne 1985.
- (t) 8 . . . bxc4 9 Bxc4 Bb7 10 Ne5 Nfd7 (10 . . . Nbd7 Shirov) 11 Nxf7. Now Beliavsky playing Shirov blundered with 11 . . . Rxf7? and after 12 Bxe6 Bxh4 13 Bxf7† Kh8 14 Bd5 was lost. 11 . . . Kxf7 12 Bxe6† Ke8 13 Qc2 Bxh4 14 Qg6† Ke7 15 Bd5 Rxf2 would have been unclear (Shirov).
- (u) 9 0-0-0 Nbd7 10 Rg1 c5 11 g4 Ne4 12 Bxe7 Qxe7 =, Spassky–Drimer, Reykjavík 1957.
- (v) 11 . . . c6 12 Bd3 Re8 13 0-0 Nd7 14 a3 Nf8 15 Rd2 g6 16 Rc1 Rb8 17 Qd1 Bg7 18 b4 \pm , I. Sokolov–Bologan, Edda Rapid 2003.
- (w) The game Lautier–Beliavsky, Dortmund 1995, continued 15 0-0 Nc5 16 Qc2 Bb7 17 Bb5 Re7 18 Nxd5 Bxd5 19 Qf5 \pm .
- (x) (A) 8 Qc2 Bb7 9 Bxf6 Bxf6 10 cxd5 exd5 11 0-0-0 c5 12 g4!? Nc6 13 h4 cxd4 14 cxd4 Qd6 15 Qd2 with sharp play, Piket–Unzicker, Zurich 2001. (B) 8 Rc1

Bb7 9 Be2 dxc4 10 Bxc4 Nbd7 11 0-0 c5 12 Qe2 a6 13 a4 cxd4 =, Yusupov–Karpov, Bugojno 1986.

- (y) 11 Be2 Be6 12 0-0 c5 13 b3 Rc8 14 Rc1 a5 =, Najdorf–Gheorghiu, Lugano 1968.
- (z) 12 Be2 c5 13 b3 Nd7 14 0-0 a5 15 Bb5 Nf6 16 Ne5 Rfc8 17 Qe2 cxd4 18 exd4 Qa3 =, Ullmann–Atalik, Dresen 2005.
- (aa) 13 dxc5 bxc5 14 Qa3 Rc8 15 Bb5 Qb7 16 Rxc5 Rxc5 17 Qxc5 Na6 18 Bxa6 Qxa6 19 Qa3 Qxa3 =, Aagaard–Pedersen, Aalborg 2006.
- (bb) 14 Bb5 Qb7 15 dxc5 bxc5 16 Rxc5 Rxc5 17 Qxc5 Na6 with ample play for the pawn, Timman–Geller, Hilversum 1973.
- (cc) 15 dxc5 bxc5 16 0-0 a5 17 Rc7 Nd7 18 Rb3 (Winants–Kasparov, Brussels 1987). Now 18 ... a4 is equal (Kasparov).

	Nb6(d)	a6(h)	Ng7(l)	Rc8(r) =	c5(u)	dxe4(y)

- (a) 7 . . . Bg4 is dubious. After 8 Bd3 Nbd7 9 h3 Be6 10 Nge2 it was \pm in Vaganian–Short, Skellefteå 1989.
- (b) 10 . . . 0-0 11 Qb1 Nhf6 (If 11 . . . g6 12 b4 a6 13 a4 Ng7 14 b5 with a big edge—Kramnik) 12 b4 Re8 13 Rc1 a6 14 a4 g6 15 Qb2 a5 16 bxa5 \pm , Kramnik–Timman, Belgrade 1995.
- (c) White was more direct in Onischuk–Pelletier, Poikovsky 2003—13 Rab1 Nb6 14 b4 Be6 15 a4 a6 16 a5 Nc8 17 Ne5 Nd6 18 f3 Rad8 19 Qf2 Nd7 20 Na4 Nxe5 21 dxe5 Ne8 22 e4 with the initiative.
- (d) After 14 b4 White is a little better, Piket–Timman, Wijk aan Zee 1996.
- (e) 10 0-0-0 Nf8 11 h3 Be6 12 Kb1 Rc8 13 g4 N6d7 14 Bxe7 Qxe7 15 Nd2 c5 16 f4 f6 17 Rhei cxd4 18 exd4 \pm , Bacrot–Bruzon, Havana 2005.
- (f) Some other moves here are: (A) 11 Rae1 Be6 12 Ne5 N6d7 13 Bxe7 Rxe7 14 f4 f6 15 Nf3 Rc8 \pm , Rogers–Speelman, Spain 1994. (B) 11 Bxf6 Bxf6 12 b4 Bg4 13 Nd2 Be7 =, Timman–Kasparov, World vs. USSR 1984. (C) 11 a3 a5 12 Ne5 Ng4 13 Bxe7 Qxe7 =, Bagirov–Avsalumov, USSR 1986.
- (g) (A) 11 . . . a5 12 a3 Bd6 13 Rfe1 Bg4 14 Nd2 Bh5 15 Bh4 Bg6 16 Nf3 Bxd3 17 Qxd3 N8d7 18 e4 dxe4 19 Nxe4 Be7 =, Ivanchuk–Bruzon, Havana 2005.

- (B) 11 ... Be6 12 b4 a6 13 Na4 N6d7 14 Bxe7 Qxe7 15 Nc5 \pm , Portisch–Yusupov, Bugojno 1986. Also, 11 ... Ng6, 11 ... Ne4, and 11 ... Bd6 are all \pm .
- (h) 14 a4 Ng7 15 b5 axb5 16 axb5 Bf5 17 bxc6 (17 h3 Bxd3 18 Qxd3 Nf5 is equal—Ftacnik) 17 ... bxc6 18 Ne5 Rc8 with chances for both sides, Ftacnik–Ivanchuk, Moscow 1994.
- (i) 11 ... Be6 is another main line here. After 12 Bxf6 Bxf6 13 b4 Rc8 14 Na4 (14 Rac1 is also played) 14 ... Rc7 15 Rac1 Be7 16 Qb1 Bd6 it was \pm in Karpov–Campora, San Nicholas 1994. Also 12 Rab1 N6d7 13 Bf4 Nb6 14 Na4 Nxa4 15 Qxa4 Ng6 16 Bh2 \pm , I Sokolov–Yusupov, Amsterdam 1994.
- (j) (A) 12 Bxf6 Bxf6 13 b4 Be7 14 b5 Bd6 15 bxc6 \pm P. Nikolić–L. Boltansen, Wijk aan Zee 1995. (B) 12 Bh6 Ne6 13 Rab1 c5 14 dxc5 Nxc5 15 Rbd1 Qa5?! 16 Nd4 Bd7 17 Bg5 \pm , Yermolinsky–Kaidanov, Asheville 1995.
- (k) 13 Bh4 Ng7 14 b4 a6 15 a4 \pm , Gelfand–Lobron, Munich 1994.
- (l) 13 ... a5 14 a3 Ng7 15 b4 axb4 16 axb4 Bf5 =, Yermolinsky–G. García, New York 1994. In the column 14 b4 a6 15 a4 Bf5 16 Bxg7 Bxd3 17 Qxd3 Kxg7 18 b5 is an edge for White, Ruban–Panchenko, Russia 1994.
- (m) White has several alternatives: (A) 10 0-0-0 Qa5 11 Kb1 b5 12 Ng3 h6 13 Bf4 g5 unclear, Miles–Morović, Tunis 1985. (B) 10 h3 Nf8 11 g4 a5 12 Ng3 h6 13 Bxf6 Bxf6 was unclear in Salov–van der Sterren, Hilversum 1993.
- (n) 10 ... g6 11 f3 Nh5 12 Bxe7 Rxe7 13 e4 Nb6 14 Rf2 (instead of 14 e5 c5, Timman–Short, San Lorenzo 1993) \pm (Timman).
- (o) Here also Black has many choices: (A) 11 ... c5 12 Bxf6 Bxf6 13 dxc5 Rxe3 14 Rad1 \pm , Mozetic–Abramović, Yugoslavia 1995. (B) 11 ... Ng6 12 Rad1 Nh5 13 Bxe7 Qxe7 \pm , Markov–P. Horvath, Harkany 1991. (C) 11 ... b5 12 Bh4 a6 13 Bf2 Bb7 14 Kh1 \pm , Gelfand–Beliavsky, Belgrade 1991. (D) 11 ... Nh5 12 Bxe7 Rxe7 13 e4 dxe4 14 fxe4 Ne6 15 d5 Nc5 16 Rab1 Qb6 =, I. Sokolov–van der Sterren, Netherlands 1995.
- (p) 12 Rae1 Rc8 13 Kh1 a6 (13 ... N6d7 14 Bxe7 \pm , Kasparov–Andersson, Belfort 1988) 14 a3 h6 15 Bh4 c5 was about equal in Yrjölä–Pigusov, Helsinki 1992.
- (q) 12 ... Rc8 13 Rad1 Qa5 14 Bf2 N6d7 15 a3 f6 16 Ng3 \pm , Malaniuk–Nenashev, Tashkent 1987.
- (r) Better than the inferior 13 ... Bh4 as played in Sadler–Murugan, London 1993.
- (s) 12 ... N6d7 13 Bxe7 Qxe7 14 Nf4 \pm in Ruzele–van der Sterren, Manila 1992, while 13 Bf4 Rc8 14 a3 a5 15 Kh1 b5 was also \pm , Kamsky–van der Sterren, Wijk aan Zee 1994.
- (t) 13 Kh1 Ng6 14 a3 Qc7 15 Nf4 Bd7 16 Qf2 Rcd8 17 Rc1 Qd6 18 Nxg6 fxg6 19 Bf4 Qe6 20 Bc7 Rc8 21 Be5 Qf7 22 e4 Be6 and Black was solid, Ivanchuk–Bruzon, Merida 2006.
- (u) After 14 dxc5 Rxc5 15 Nd4 White is slightly better (Hansen).
- (v) Others: (A) 11 ... Ng4 12 Bf4 (12 Bxe7 Qxe7 13 h3 Nf6 14 b4 Ne6 = according to Murugan) 12 ... Bd6 13 b4 Bxf4 14 Nxf4 and now instead of 14 ... g5?, which occurred in Hodgson–Murugan, England 1993, 14 ... Qd6 15 h3 g5

16 hxg4 gxf4 17 Qe2 Qh6 would have been unclear (Murugan). (B) 11 . . . Nh5 12 Bxe7 Qxe7 13 b4 a6 14 a4 Qg5 15 b5 Re6 16 bxa6 bxa6 17 Bf5 Rh6 18 Bxc8 Rxc8 led to a position where Black's attacking chances balanced his structural weaknesses in Hodgson–Crouch, Dublin 1993.

- (w) The usual move is 12 Bf4 when 12 . . . Nd6 13 b4 Ng6 14 b5 gave White a slight pull in Panno–Forestani, Mar Del Plata 2003.
- (x) After 13 b4 a6 14 a4 as recommended by Leko, White is probably a little bit better.
- (y) After 14 d5 Qc5 (not 14 . . . cxd5 15 Nxd5 Qg5 16 Nc7 Bh3 17 Nf4 ±) 15 b4 Qc4 16 Rfd1 cxd5 17 Rxd5 Bg4 18 Rd4 Qc6 it would have been murky (Leko). The game Leko–Z. Almasi, Hungary 1995, continued 14 Ng3 f5 15 Rfd1 Be6 16 b4 a6 17 Na4 (17 a4) 17 . . . Qf7 18 a3 Nd7 and Black had equalized.

- (a) 4 ... Nxd5 is possible. After 5 e4 Nxc3 6 bxc3 c5 7 a3 Be7 8 Nf3 0-0 9 Bd3 cxd4 (9 ... Nc6 is more usual) 10 cxd4 Nc6 White was perhaps slightly better in this Semi-Tarrasch-like position, Bareev–Hraček, Pardubice 1994.
- (b) 7 a3 is the alternative. After 7 ... Nc7 8 e3 Ne6 9 Bh4 Be7 10 Bd3 g6 White was slightly better, Vaganian–Westerinen, Moscow 1982.
- (c) 7 ... Nc7 8 Bd3 Be7 9 Nge2 Nh5 10 Bxe7 Qxe7 11 0-0-0 g6 12 Kb1 Ng7 13 Ng3 0-0 14 h4 h5 15 Qd2 ±; Dohosian–Vaganian, Tilburg 1994.
- (d) (A) 8 Qd1 Bf5 9 Rc1 Qa5 10 Bxf6 gxf6 (10 ... Nxa2 11 Bh4 Bb4 12 Qd2 Nxc1 13 Qxc1 is unclear—Ehlvest) 11 Qd2 Nxa2 12 Ra1 Nxc3 13 Rxa5 Ne4 14 Rxd5 was unclear in Ehlvest–Short, Manila 1992. (B) 8 Qb1 h6 (not 8 ... g6 9 Qd1 a5 10 a3 Na6 11 Bd3 ±, Dohosian–Vaganian, Tilburg 1994) 9 Bh4 g6 10 Qd1 Bf5 11 Rc1 g5 12 Bg3 Qa5 13 Qf3 ±.
- (e) 11 Bxa6 Rxa6 12 Nge2 Be7 =, Züger–King, Bern 1988.
- (f) The game Barsov–Se. Ivanov, Germany 1994, continued 13 Ng3 Bh7 14 Bxd6 Qxd6 with about even chances.
- (g) 6 ... Qb6 7 Qc2 Ne4 8 Bf4 Bf5 9 Bd3 Na6 10 a3 Qa5 11 Rc1 Nxc3 12 Qxc3 Qxc3† 13 Rxc3 Bxd3 14 Rxd3 0-0-0 =, Kelly–Baburin, Bunratty 2005.
- (h) 8 ... gxf6 9 Qd1 Qb6 10 Qd2 Na6 ±, Petrosian–Barcza, Budapest 1953.

- (i) White has recently done well with 10 Nf3. Carlsen–Azmaiparashvili, Khanty Mansiysk 2005, continued 10 . . . Nd7 11 Nh4 Bb4 12 Rc1 Nb6 13 a3 Bxc3† 14 Rxc3 Nc8 15 f3 Nd6 16 g3 a5 17 b3 a4 18 b4 with an edge for White.
- (j) 11 h4 Nb6 12 h5 Bf5 =, Vaiser–Ruban, Novosibirsk 1993.
- (k) 13 b3 Kd7 14 Ne1 Bb4 15 Nc2 Bxc3† 16 Kxc3 Nc8 was about even in Ivanchuk–Short, Linares 1992.
- (l) 8 e3 Nbd7 9 Bd3 Bxd3 10 Qxd3 Bd6 11 0-0 0-0 =, Itkis–Pelletier, Kusadus, 2006.
- (m) 9 Qxb7? gxh4 10 Qxa8 Qb6 is losing for White.
- (n) 10 Nd2 Nbd7 11 e3 Qxb3 12 Nxb3 Ne4 13 Nxe4 Bxe4 14 Nd2 Bg6 15 h4 Rg8 =, Vallejo Pons–Shirov, Melody Amber 2004.
- (o) The position is unbalanced but roughly equal, Beliavsky–Shirov, Biel 1992.
- (p) 7 . . . Bb4 8 e3 Nh5 9 Bg5 Be7 10 Bxe7 Qxe7 11 0-0-0 Nb6 12 h3 ±, Epishin–Ivanchuk, Tilburg 1992.
- (q) 8 h3 Bd6 9 Bxd6 Qxd6 10 e3 Qe7 11 Bd3, Epishin–Smagin, Russia 1995. Now instead of 11 . . . Nc4 that led after 12 Bxc4 dxc4 13 0-0 0-0 14 e4 b5 15 Rfe1 to a much superior position for White, 11 . . . Be6 with the idea of Nc8–d6 has been suggested by Smagin as enough to equalize.
- (r) 9 Bd3 Bxf3 10 gxf3 Bd6 11 Bg5 Be7 12 Bh4 g6 13 0-0-0 ±, Dreev–I. Sokolov, Neum 2000.
- (s) 10 . . . Bg6 11 Qb3 a5 12 a3 a4 13 Qd1 Ne4 14 Be2 Bd6 15 Nxg6 hxg6 16 Nxe4 dxe4 17 Qc2 f5 18 Bxd6 Qxd6, Kir. Georgiev–Piket, Moscow 1994; now 19 b4! would have been ±.
- (t) 13 Be2 Nfd7 14 Nd3 a5 15 Bxd6 Qxd6 was approximately even in Kir. Georgiev–Smagin, Yugoslavia 1995.
- (u) 8 Bg5 Be7 9 Bxe7 Qxe7 10 e3 Nb6 11 0-0-0 g6 12 Bd3 Bg4 13 h3 Bxf3 14 gxf3 0-0-0 =.
- (v) In the game Piket–Seirawan, Amsterdam 1995, 13 Kb1 Qe7 14 Ka1 0-0-0 15 Rc1 (Seirawan suggests 15 Rb1 with the idea 16 Rhc1 and 17 b4) 15 . . . Kb8 was about even.
- (w) 6 . . . 0-0 7 e3 c5 8 dxc5 Bxc5 9 Nf3 Nc6 10 Be2 (not 10 Bb5 d4 11 Bxc6 dxc3 12 Qxc3 Qe7 winning) 10 . . . d4 11 exd4 Nxd4 12 Nxd4 Qxd4 =, Karpov–Kasparov, Moscow 1985.
- (x) 8 Rd1 would leave the king vulnerable in the center, while 8 Qa4† Nc6 9 Nb5 0-0 10 Bc7 Qd7 11 Bd6 Ne4 with a Black initiative—Zd. Vuković.
- (y) 9 Rxd4 Nc6 leaves Black with a strong attack; White prefers to exchange queens, but Black's initiative persists.
- (z) 12 . . . h5 13 Nd2 Nxd2 14 Rxd2 Bg5 15 f4 Bf6 would have clearly been advantageous for Black. The text is Ilinić–Zd. Vuković, Yugoslavia 1995, which continued 13 Nxc5 Bxc5 14 Ne5 Nxe5 15 Bxe5 Bf5 16 g4 Bg6 17 Bg2? (17 Rd2 was better) 17 . . . Rc8 and Black had a decisive advantage.

QUEEN'S GAMBIT DECLINED

5 Bf4 Variation

- (e) After 16 Bd6 g6 17 Be2 Bxd6 18 Rxd6 Ne7 Black gradually equalized in Kasparov–Ehlvest, Novgorod 1995.
- (f) 12 ... a6 13 g5 Nh5 14 Bd3 g6 15 Be4 e5 16 Bxe5 Nxe5 17 Rd5 Qc7 18 Rxe5 Be6 19 Rd1 Bd6 20 Rxe6 fxe6 21 Qb3 Ng7 22 Qxb7 and the complications have produced a level game, Khalifman–Onischuk, Togliatti 2003.

- (g) 15 Rd5 Qc7 16 Rh5 g6 17 Nd5 Qd8 18 Rg1 Be6 19 Ng5 Bxg5 (19 . . . Bxd5 20 Bxd5 Qxd5 21 Nxh7 Qd8 22 Rxg6† fxg6 23 Qxg6† Bg7 24 Ng5 Rf6 25 Rh8† would have been a nice finish) was unclear in Libeau–Hoffman, Biel 1993.
- (h) 16 Nxf6† gxf6 17 Rhg1† Kh8, 18 e4 b5 19 Bd5 Nxd5 20 exd5 b4 21 axb4 Qa1† 22 Kd2 Qa6 23 Qc6 Rd8 24 Kc3 Bb7 was about even in Anand–Kramnik, Leon computer assisted event 2002.
- (i) 11 . . . Nxd5 12 Nxd5 exd5 13 Bd3 h6 14 Rc1 Be7 15 0-0 Be6 16 Nb3 Qb6 17 Nc5 Rac8 (17 . . . Bxc5 18 Qxc5 Qxb2 19 Rb1 Qd2 20 Rfd1 Qa5 21 Rb5 ±, Bareev–Dzandzgava, Debrecen 1992) 18 Nxe6 fxe6 19 Qe2 Bf6 20 Qh5 is good for White; Kramnik–Hübner, Germany 1993.
- (j) 12 . . . Nh5 13 Bg3 h6 14 0-0 Bxc3 15 Nb3 Qb6 16 Qxc3 ±, Gelfand–P.H. Nielsen, Turin Ol. 2006.
- (k) After 16 Bg3 (if 16 Bd6 Rd8 17 cxd4 b5 18 Ne5 Rxd6 19 Nxc6 Rh6 Black has too strong an attack) 16 . . . dxe3 17 Rae1 with chances for both sides, Korchnoi–Lutz, Zurich 1999.
- (l) 12 Rd1 Rac8 13 Be2 a6 14 0-0 b5 15 cxd5 exd5 16 Nf3 ±, Lautier–Vaisser, French Chp. 2005.
- (m) (A) 12 . . . Rfd8 13 0-0 a6 14 b4 Qb6 15 c5 Qa7 16 Na4 ±, L.B. Hansen–P. Andersen, Denmark 1993. (B) A better try is 12 . . . Rfc8 13 Rd1 Qd8 14 0-0 Na5 which is close to equal, Lautier–Beliaovsky, Bundesliga 2001.
- (n) 14 Rad1 would allow 14 . . . d4 15 Nb5 dxe3 16 fxe3 Qb6.
- (o) White had a small edge, L.B. Hansen–Cifuentes Parada, Wijk aan Zee 1994.
- (p) 9 Rc1 d4 (9 . . . dxc4 10 Bxc4 Qxd1 =, Kramnik–Vaganian, Lucerne 1993, is also good) 10 Nxd4 e5 11 Nb3 Bxa3 12 bxa3 exf4 led to equality; Kramnik–Beliaovsky, Belgrade 1993.
- (q) (A) 10 . . . a6 11 Qc2 Be7 12 Bd3 Bb7 13 Ne4 Qa5† 14 Ke2 Be7 15 Nxf6† Bxf6 16 Bxh7† Kh8 17 Rac1 ±, I. Sokolov–Cifuentes Parada, Oviedo 1992. (B) 10 . . . Nh5 11 Qxd8 Rxd8 12 Bc7 Rd7 13 Be5 b6 was about even in Lobron–Lutz, Nussloch 1996.
- (r) 11 . . . b6 12 e4 Bb7 13 e5 Ng4 14 Ne4 Rfd8 15 0-0 ± in the rapid game Kramnik–Yusupov, Moscow 1995.
- (s) 12 Bd3 Rd8 13 Bg5 h6 14 Bh4 e5 15 Bxf6 gxf6 is unclear—M. Gurevich.
- (t) After 16 Nd2 Nc6 17 Nde4 Nxe4 18 Nxe4 Be7 19 Nd6 Bxd6 20 Bxd6 White holds a small edge, M. Gurevich–Ekstrom, Neuchatel 1996.
- (u) 8 . . . exd5 is intriguing. The game Slutskin–Kibalnichenko, Russia 1992, continued 9 Rc1 Nc6 10 a3 d4 11 Na4 (11 exd4 Nxd4 12 Nxd4 was perhaps better) 11 . . . Qa5† 12 b4 Nxb4 13 Nd2 dxe3 14 fxe3 Na6 15 Bxa6 Bxa3 16 Ra1 Qxa6 17 Rxa3 b5 ±.
- (v) 10 Bd3 Bb4† 11 Ke2 Nc6 12 Qc2 h6 13 Rhd1 Qf6 14 Kf1 Ba5 15 Be2 Bb6 is harmless, Quinteros–Najdorf, Mar del Plata 1982.
- (w) 11 . . . Be7 12 0-0 Be6 13 Ne5 was good for White in the game Kaidman–Radashkovich, Netanya 1973.

- (x) 12 . . . Qf6 is quite possible here. After 13 b4 Bf5 14 Rc1 d4 15 Bg5 Qg6 16 Bxf5 Qxf5 17 exd4 Be3 with a drawish position, Leitao–Rybka (computer), Santiago 2006.
- (y) 14 . . . Re8 has often been played here. 15 Rc1 d4 16 g4 Bg6 17 Bxg6 hxg6 18 b5 (Dreev–Geller, Helsinki 1992) and now 18 . . . dxe3 19 bxc6 e2 20 Qxd8 exf1 (Q)† 21 Kxf1 = (Dreev); 15 g4 Bg6 16 Bxg6 hxg6 17 b5 Na5 =, Chiburdanidze–Geller, Aruba 1992.
- (z) After 16 g4 Bg6 17 e4 Re8 18 Nd2 Rc8 19 Bg3 (19 Qb3!?) 19 . . . f6, Beliavsky–Kir. Georgiev, Biel 1992; now 20 f4 would have been ±.

11	Nd2 Qe7(c)	Bxc4 Nd5	Bxc4 Nd5	Be5(p) Nh _f 6	Bxc4 Nb6(w)	Bxd6 Qxd6
12	Bg5 Rd8	0-0 Nx _f 4	Bg3 Nx _c 3	Bf4(q) Ne4(r)	Bd3 g6	Rc1(cc) c5(dd)
13	Qc2 h6(d)	exf4 Qc7(h)	Qxc3 Bd6(l)	h3 Ndf6(s)	a3 Nd5(x)	dx _c 5 bx _c 5(ee)

- (a) 4 ... Nbd7 5 Bf4 dx_c4 6 e3 Nb6 7 Bxc4 Nx_c4 8 Qa4† Bd7 9 Qxc4 Bd6 10 Bg5 h6 11 Bxf6 Qxf6 12 0-0 0-0 13 e4 led to a position where White's space advantage slightly overbalanced Black's bishops, Blagojević–Cvetković, Yugoslavia 1993.
- (b) Moving the bishop again is a recent idea. Alternatives are 8 ... dx_c4 or 8 ... Nc6.
- (c) 11 ... dx_c4 12 Bxc4 Nd5 13 Bxd5 Qxd5 14 c4 might be an easier method of equalization.
- (d) After 14 Bh4 Ne5 15 Rfd1 (15 cxd5 exd5 16 c4 d4 17 exd4 Rxd4 would be no improvement) 15 ... Ng6 16 Bg3 b6 17 Bd3 Nf8 is roughly equal, Hertneck–Beliaovsky, Munich 1994.
- (e) 7 ... a6 was tried in Meulders–Winkler, Brussels 1993, and after 8 Rd1 Nbd7 9 Bd3 dx_c4 10 Bxc4 b5 11 Be2 c5 12 dx_c5 Bxc5 the game was equal.
- (f) 8 Rd1 Nh5 9 Be5 f6 10 Bg3 f5 11 Bd3 Nxg3 12 hxg3 Nf6 leaves Black a solid position, S. Ivanov–Taimanov, Stockholm 2003.
- (g) 8 ... Qa5 9 Nd2 Re8 10 Bd3 Bf8 11 cxd5 exd5 12 0-0 Qd8 13 Rab1 a5 14 a3 ±, Sasikiran–Bartels, Dresen 2005.
- (h) Or 13 ... Re8 14 Ne5 Nf8 15 f5 with a good attack. The column is Kramnik–Lputian, Debrecen 1992, which continued 14 Ne5 Nf6 15 Ba2 Bd7 16 Bb1

Be8? (16 ... Rfd8 was necessary, when 17 Ne4 Kf8 18 Nxf6 Bxf6 19 Qh7 was still ±) 17 d5! Rd8 (18 Nxd5 after either pawn capture was immediately fatal) 18 Rfe1 Kh8 19 dxe6 Rxd1 20 Rxd1 fxe6 21 Ne4 g6 22 Nc5 Bxc5 23 Qxc5 Rg8 24 Ba2 Kg7 25 Bxe6 Rf8 26 Nd7 Resigns.

- (i) Other moves are possible here: (A) 9 cxd5 Nxd5 10 Nxd5 exd5 11 0-0-0 Nf8 12 Bd3 Bd7 13 Kb1 Rc8 14 g4 Qb6 15 Rc1 c5 is about even, Gelfand–Azmaiparashvili, Moscow 1990. (B) 9 0-0-0 Qa5 10 Kb1 dxc4 11 Bxc4 Nd5 12 Nxd5 exd5 13 Bd3 Nf8 14 Ng5 gave White the edge in Korchnoi–Baumgarten, Dresden 2006.
- (j) White obtained nothing from 10 c5 N6d7 11 Bd3 Bf6 12 0-0 e5 =, P.H. Nielsen–Bischoff, Bundesliga 2002.
- (k) 10 ... Ng6 11 Bh2 Bd6 12 Bxd6 Qxd6 13 0-0 dxc4 14 Bxc4 Nd5 was about equal, Mihalchishin–Brestian, Trnava 1988.
- (l) The column is Beliavsky–Speelman, Linares 1991. After 14 0-0 Bxg3 15 fxg3 Bd7 16 g4, White had a useful advantage in space.
- (m) After 9 Bd3 Nxf4 10 Bxh7+ Kh8 11 exf4, both 11 ... dxc4 and 11 ... g6 (suggested by M. Gurevich) give Black reasonable chances.
- (n) 9 ... Nxe5 10 dxe5 g6 11 0-0-0 Qa5 12 g4 with an attack.
- (o) The immediate 10 ... Nxg3 11 hxg3 f5 is met by 12 g4.
- (p) 11 Bd3 g6 12 Be5 Qe8 13 h3 Nh6 14 g4 fxg4 15 Ng5 Nxe5 16 dxe5 dxc4 17 Bxc4 Nd5 18 Nge4 Bh4 19 0-0-0 g3 with an unclear position, Saravanan–Ravi, Indian Chp. 2006.
- (q) The shuffling of the bishop is amusing, but also quite logical.
- (r) If now 12 ... Nh5 13 Bd3 Nxf4 14 exf4 and e6 is weak.
- (s) After 14 Bd3 Bd7 15 0-0 Be8 16 Bh2 Bh5 17 Ne5 Nd7 18 f3 Nxe5 19 Bxe5 White has a small advantage in M. Gurevich–A. Fernandez, Linares 1995.
- (t) 7 ... b6 8 0-0 Bb7 9 e4 dxe4 10 Nxe4 c5 11 Nxf6+ Bxf6 12 dxc5 bxc5 13 Re1 g6 14 Re3 Qe7 15 h4 ±, Lesiege–Hebert, Montreal 2002.
- (u) 8 Ne5 was tried in Tregubov–Pigusov, St. Petersburg 1993. After 8 ... Nxe5 9 Bxe5 dxc4 (9 ... b6 ±) 10 Bxc4 b6 11 0-0 Bb7 12 Qe2 White was more comfortable.
- (v) Dorfman suggests 10 ... g6 without the exchange on c4 would give Black more chances than the column continuation.
- (w) 11 ... c5 12 Rad1 cxd4 13 Nxd4 ± (Dorfman).
- (x) After 14 g3 Bd7 15 Ne4 Rc8 16 Rac1 b6 17 Qe2 White had a small but stable advantage. Dorfman–Ivkov, France 1993.
- (y) 6 ... dxc4 7 Bxc4 a6 8 Bd3 Nbd7 9 e4 c5 10 e5 Nh5 is unclear, Dreev–Nenashev, Manila 1992.
- (z) 7 Rc1 is the main alternative. After 7 ... c5 8 cxd5 cxd5 (8 ... Nxd5 9 Nxd5 exd5 10 Bd3 Nd7 11 0-0 ±, Agdestein–Spassky, Gvojik 1983) 9 Be2 Bb7 10 0-0 Nbd7 White had a tiny edge, Gheorghiu–Ree, Wijk aan Zee 1981.

(aa) 8 . . . Qxd5 is played here also. After 9 Bd3 the lines branch: 9 . . . Ba6 10 0-0 c5 11 e4 Qb7 is not clear; 9 . . . Bb4† 10 Ke2 is dubious for Black; 9 . . . c5 10 Qc2 Bb7 11 0-0 cxd4?! 12 Bxh7† Kh8 13 Bd3 dxe3 14 fxe3 and White was considerably better, Dreev–Doroshkевич, Rostov-on-Don 1993.

(bb) 9 . . . c5 10 Ne5 cxd4 11 exd4 Bb4† 12 Kf1 with chances for both sides.

(cc) 12 Qc2 Ba6, when 13 Bxa6 Nxa6 14 Qa4 is met by 14 . . . b5, but 13 Rad1 is slightly better for White—Psakhis.

(dd) Now 12 . . . Ba6 is met by 13 Bxa6 Nxa6 14 Qa4 b5 15 Qc2 ±.

(ee) The game Psakhis–Westerinenen, Gausdal 1994, continued 14 Qa4 Ba6 15 Rhd1 Bxd3† 16 Rxd3 Nc6 17 Rd2 Rab8 18 Kf1 and White had a medium-size edge in a messy position.

- (a) 5 . . . h6 6 Bxf6 Qxf6 7 e3 0-0 8 Qb3 Bxc3† 9 Qxc3 c6 10 Be2 gives an edge to White, Bacrot–Zhao Xue, Cap d'Agde 2006.
- (b) 6 Qa4† Nc6 7 e4 Bd7 8 Qc2 h6 9 Bd2 b5 10 Nxb5 Bxd2† is equal after 11 Nxd2 a6 12 Na3 Nxd4 (Lipnitski).
- (c) 6 . . . h6 7 Bxf6 Qxf6 8 Bxc4 0-0 9 0-0 Rd8 10 Qe2 Nc6 11 e5 ±, Chernin–Frias, Saint John 1988.
- (d) (A) 8 . . . Qa5 9 Bd2 Qc5 10 Bb5† Bd7 11 Nb3 ±, Dautov–Levin, USSR 1987.
 (B) 8 . . . Qc7 9 Qb3 Bxc3 10 Qxc3 Nxe4 11 Nb5 Qc5 12 Qxg7 was ±, Averbakh–Estrin, Moscow 1967.
- (e) (A) 10 Nb5 got a workout in the Karpov–Timman match of 1993. It seems that after 10 . . . Nxe4 neither 11 Qd4 0-0 12 Qxe4 a6 13 Be7 axb5 (8th game) nor 11 Bf4 0-0 12 0-0 Nd7 gives White an advantage. (B) 10 Bxf6 Qxc3† 11 Kf1 gxf6 12 Rc1 Qa5 13 h4 Ke7 14 Rh3 Nc6 is unclear, Akesson–Landa, Bad Wiessee 2005.
- (f) Popular of late is 12 Bxd7† Nxd7 13 0-0 a6 14 Rb1 Qc7 15 Qd2, but Black seems to be all right; e.g., 15 . . . Rc8 16 Rfd1 Nc5 17 Qh6 Qe5 18 f4 Qxe4 19 f5 Rg8 20 Rb2 Rd8 21 Qxf6 e5 22 Kf1 Qf4† 23 Kg1 Qe4 24 Kf1 and the players repeated moves in Akopian–Landa, Port Erin 2006.

- (g) 12 ... 0-0 13 0-0 Bxb5 14 Nxb5 Nc6 15 c4 with a small edge to White, Vallejo Pons–Topalov, Morelia/Linares 2006.
- (h) After 13 h4 a6 (13 ... Ke7 14 Rh3 Qa5 15 Rb1 Rd8 16 Qc1 ±, Dzhandzhava–Maliutin, USSR 1991) 14 Rh3 Qa5 15 Be2 Ne5 16 Qb3 b5 17 Rd1 Bd7 18 f4 Nc4 19 Bxc4 bxc4 20 Qb7 Rd8 21 Nc6 Bxc6 22 Qxc6† Draw, Ssan Segudo–Wells, Plovdiv 2003.
- (i) 8 Nxd4 Qa5 9 exf6 Bxc3† 10 bxc3 Qxg5 11 fxg7 Qxg7 12 Qd2 is a little better for White, Shulman–van Wely, Foxwoods 2006.
- (j) 9 ... h6 10 exf6 hxg5 11 fxg7 Rg8 12 Nxd4 Bxc3 13 bxc3 Qa5 14 Qxa5 ±, Timman–Karpov, Amsterdam 1987.
- (k) After 13 Kb1 Na5 14 Qc2 e5 15 Nxd4 exd4 16 Rxd4 Qb6 17 Rd5 Be6 18 Rh5Bg4 19 Qa4† Nc6 20 Rb5 Qa6 21 Qxa6 bxa6 is roughly equal, Babula–Ribli, Bundesliga 2006.
- (l) 5 Qb3 c5 6 dxc5 Nc6 7 e3 0-0 (7 ... Qa5—Skembris) 8 Be2 Qe7 led to a slight edge for White in Skembris–Barle, Debrecen 1992.
- (m) 6 ... h6 7 Bh4 g5 8 Bg3 Ne4 9 Nd2 Nxc3 10 bxc3 Bxc3 11 Rc1 Ba5 (11 ... Bb2 12 Bxc7 Qd7 13 Be5 unclear—Khalifman) 12 h4 g4 is double-edged, Khalifman–Serper, Saint Petersburg 1994.
- (n) 7 Rc1 h6 8 Bh4 (8 Bxf6 is usual) 8 ... c5 9 dxc5 Qa5 10 Qd4 0-0 11 a3 Bxc5 12 Qd2 is a small advantage for White, Epishin–Serper, Moscow 1992.
- (o) 7 ... c5 8 dxc5 h6 9 Bd2 Bxc5 10 e3 0-0 11 Bd3 ±, Dreev–Zvjaginsev, Poikovsky 2006.
- (p) 8 ... g5 is too violent. After 9 Bg3 Ne4 10 e3 Nb6 11 Bd3 Bf5 12 Nd2 ±, Sanchez Jimenez–Campos Moreno, Linares 1991.
- (q) An improvement on 11 0-0 Bxc3 12 bxc3 Ne4 13 Rfc1 Nb6 14 a4, which was slightly advantageous, Kramnik–Lautier, Cannes 1993.
- (r) White had a fair advantage after 13 bxc3 Qa3 14 0-0 b5 15 Rfb1, Kransenkov–Garcia Ilundain, Las Palmas 1993.
- (s) 8 Be2 Qa5 9 0-0 0-0 10 Nd2 Bxc3 11 bxc3 Qxc3 12 Rc1 Qa3 13 dxc5 Qxa2 worked out well for Black in Morozevich–Aronian, Morelia/Linares 2007.
- (t) 9 Bxf6 Qxf6 10 Bc2 Nb6 11 Ba4† Kf8 12 Ne5 Qg5 13 0-0 Bh3 14 Qf3 Qxg2† led to a roughly balanced ending in Naumkin–Landa, Capelle la Grande 2007.
- (u) 12 Bh4 g6 13 Bh3 Bxc3 (13 ... Ne4 14 Bxd7 Bxd7 15 Ne5 Bxc3 16 Nxd7 Qb5 17 bxc3 Qxd7 ±, F. Levin–G. Georgadze, Belgrade 1992) 14 bxc3 =, Ubilava–Serper, Manila 1992.
- (v) 13 Bxd7 Nxd7. Now 14 f3 Nb6 15 Bf4 Bf8 of Hebden–Winants, Ostend 1992, would be best met by 16 g4 Bd7 ∞, while 15 ... Bd7 16 e4 Rac8 was balanced in P. Cramling–Blatny, Manila 1992. 14 Rfe1 Nb6 15 f3 Na4 =, Kamsky–J. Polgar, Dos Hermanas 1995.
- (w) (A) 6 cxd5 exd5 7 Bg5 h6 8 Bxf6 Qxf6 9 e3 0-0 10 Be2 Be6 11 0-0 a6 12 Rfc1 Bd6 13 Qd1 Ne7 14 Na4 b6 (14 ... Rad8 15 Nc5 Bc8 16 Qb3 ± [Lautier]) 15 b4 (usual is 15 Nc3) 15 ... g5 16 Nb2 Ng6 unclear, Beliavsky–Lautier, Biel

1992, (B) 6 Bg5 h6 7 Bxf6 Qxf6 8 e3 0-0 9 Rc1 Qg6 10 Qc2 left White a bit better, Bacrot–Aronian, Wijk aan Zee 2006.

- (x) 8 a3 Bxc3† 9 bxc3 0-0 10 e3 a6 11 Qc2 Na5 12 cxd5 exd5 =, Porreca–Miňev, Zagreb 1955.
- (y) 8 . . . e5 9 dxe5 d4 10 a3 Bxc3† 11 bxc3 dxe3 12 Bxe3 Ng4 is reckoned to be good for Black, Spielmann–Fine, Zandvoort 1936.
- (z) Karpov mentions 9 . . . Bxc3† 10 bxc3 Na5 11 cxd5 exd5 12 Bd3 Nd6 with a hold on c4.
 - (aa) Other possibilities are 11 Rb1 or 11 c4—Karpov.
 - (bb) After 13 Qa4 a6 (13 . . . 0-0 14 Rb1 Rab8 15 c4 is \pm) 14 Rab1 Ra7 15 c4 b5 16 cxb5 axb5 17 Qxb5 0-0 there are chances for both sides, Karpov–Lautier, Baden-Baden 1992.

QUEEN'S GAMBIT DECLINED

1 d4 d5 2 c4 e6 3 Nc3(a)

	79	80	81	82	83	84
3Be7(b).....	Bb4.....Nf6			
4	cxd5 exd5	cxd5.....e3(p) exd5 Ne7	Bf4(l) Nf6	Bd2 0-0	Bg5 c5	
5	Bf4 c6.....Nf6				cxd5 cxd4.....Qb6	
6	e3 Bf5	e3 Bf5	e3 c5(m)	Nf3(q) Nd7	Qxd4(t) Be7	Bxf6(y) Qxb2(z)
7	g4 Be6(c)	Nge2(h) 0-0(i)	Bd3(n) Nc6	Bd3 b6(r)	e4(u) Nc6	Rc1(aa) gxf6
8	h4(d) c5(e)	Ng3 Be6(j)	Nge2 cxd4	cxd5 exd5	Qd2(v) exd5(w)	e3 cxd4

10	Nge2 Nc6(g)	dxc5 Bxc5(k)	f3 Be6(o)	Qc2 h6(s)	exd5 Qe7†(x)	Bxd7† Nxd7(bb)

- (a) 3 Nf3 Nf6 4 Bg5 h6 (other Black fourth moves usually transpose to some other line) 5 Bxf6 Qxf6 6 Nc3 Qd8 7 e3 Be7 8 Qb3 dxc4 Bxc4 \pm , Cifuentes–Flear, San Sebastian 2005.
- (b) Other moves are possible here. (A) 3 ... a6 is the so-called Janowski Defense. After 4 cxd5 exd5 5 Bf4 Nf6 6 e3 White is slightly better, Euwe–Alekhine, Zurich 1934. (B) 3 ... b6 4 Nf3 Bb7 5 cxd5 exd5 6 e4 dxe4 7 Ne5 Bd6 8 Qg4 Kf8 9 Bc4 gave White good attacking chances in Pillsbury–Swidenski, Hanover 1902.
- (c) 7 ... Bg6 is riskier. After 8 h4 h5 (8 ... Bxh4 9 Qb3 b6 10 Rxh4 Qxh4 11 Nxd5 \pm) 9 g5 Bd6 10 Nge2 is \pm , Karpov–Portisch, Linares 1989, and 8 ... h6 9 Nf3 Nd7 10 Bd3 was slightly better for White in Knaak–Raicević, Athens 1992.
- (d) 8 h3 Nd7 9 Bd3 g5 10 Bg3 h5 11 f3 Ngf6 12 Rh2 Nb6 =, Krush–Bruzon, Buenos Aires 2003.
- (e) There are some other moves here. The greedy (A) 8 ... Bxh4?! 9 Qb3 g5 10 Bh2 (with the idea 11 Nf3) was good for White in Vaiser–Díaz, Havana 1985. (B) 8 ... Nf6 9 f3 c5 10 Bd3 Nc6 11 Nge2 was \pm , Chernin–Pigusov, Copenhagen 1986. (C) 8 ... Nd7 9 h5 Nb6 10 Be2 \pm , Kasparov–Karpov, Moscow 1985.
- (f) 9 Be5?! Bf6 10 Bxb8 Rxb8 11 g5 Be7 12 Bg2 h6 13 Nge2 gained White an edge in Dautov–Lputian, Istanbul Ol. 2000.
- (g) 10 ... Ne7 11 Nd4 Nbc6 12 Nxe6 \pm , Flear–Beliaovsky, Szirak 1987. After the text, a suggestion of Beliaovsky, it is about even.

- (h) 7 Qb3 Nc6 8 Qxb7 Nb4 9 Rc1 0-0 10 a3 Nc2† 11 Rxc2 Bxc2 12 Bxc7 Qc8 13 Ba6 Qxb7 14 Bxb7 Rab8! with chances for both sides, Ehlvest–Yusupov, Linares 1991.
- (i) 7 ... Nd7 8 h3 Bg6 9 Ng3 Nf8 10 h4 Bxh4 11 Qb3 Bxg3 12 Bxg3 with chances for both sides (Hertneck).
- (j) If 8 ... Bg6 9 h4 h6 10 h5 Bh7 11 Bd3 White is better—Kasparov.
- (k) 11 0-0 Nc6 12 Rc1 d4 13 Nce4 Be7 14 Nxf6† Bxf6 15 b3 (15 e4 looks better) 15 ... dxe3 =, Baginskaite–Krush, Stillwater Open 2007.
- (l) 5 Nf3 c6 6 Bf4 Ne7 7 e3 Bf5 8 Qb3 Qb6 9 Nh4 ±, M. Gurevich–Barsov, Bastia 2005.
- (m) The game Safin–Nenashev, Siszek 1993, went 6 ... Ne4 7 Qc2 (7 Rc1!—Nenashev) 7 ... c5 8 Bd3 cxd4 9 exd4 Bf5 =.
- (n) 7 Bb5† Bd7 8 Bxd7† Qxd7 9 dxc5 Bxc3† 10 bxc3 0-0 11 Ne2 Rc8 and Black had enough for the pawn, Hertneck–Lautier, Tilburg 1992.
- (o) Hertneck–Lautier, Munich 1993. After 11 0-0 0-0 12 a3, now 12 ... Bd6 would have limited White to a tiny edge.
- (p) 4 a3 has been played here. After 4 ... Bxc3† 5 bxc3 c5 6 e3 Ne7 7 Bd3 Qc7 8 cxd5 exd5 9 Ne2 Bf5 chances are about even, Shirov–Lautier, Linares 1994. A little better is 7 Nf3 Qc7 8 Bb2 0-0 9 Rc1 ±, Korchnoi–Winants, Antwerp 1994.
- (q) 6 a3 Bxc3 7 Bxc3 b6 8 Nf3 Bg6 =, Yusupov–Lautier, Amsterdam 1994.
- (r) 7 ... dxc4 8 Bxc4 c5 9 a3 Bxc3 10 Bxc3 ± (Georgadze).
- (s) The game G. Georgadze–Conquest, Senden 1993, continued 11 Rac1 Ba6 12 Bxa6 Rxax6 13 a3 Bxc3 14 Bxc3 ±.
- (t) 6 Qa4† Qd7 7 Qxd4 Nc6 8 Qa4 Nxd5 9 0-0-0 Be7 was nothing for White, H. Steiner–Wade, Venice 1953.
- (u) 7 e3 exd5 8 Bb5† Nc6 9 Nf3 0-0 10 Qa4 Be6 11 0-0 (11 Bxc3 bxc6 12 Qxc6 would give Black good play with either 12 ... Rc8, 12 ... Qa5, or 12 ... Rb8—S. Ivanov) 11 ... Qb6 12 Rac1 h6 =, Eingorn–S. Ivanov, Berlin 1992.
- (v) 8 Qe3 Nb4 (8 ... exd5 9 Bxf6 Bxf6 10 exd5† Ne7 11 d6 Qxd6 12 Bb5† Bd7 13 Rd1 ±, Evans–Bisguier, USA 1964) 9 Bb5† Bd7 10 Qe2 exd5 11 Nf3 0-0 12 Bxd7 Qxd7 13 e5 =, Klimov–S. Ivanov, St. Petersburg Chp. 2003.
- (w) (A) 8 ... Nxd5 9 exd5 Bxg5 10 f4 Bh4† 11 g3 exd5 12 gxh4 Qxh4† 13 Qf2 Qe7† 14 Qe2 Be6 15 Nf3 was ±, Furman–Dzindzichashvili, USSR 1967.
(B) 8 ... Nxe4 9 Nxe4 exd5 10 Bxe7 Qxe7 11 Qxd5 f5 (11 ... 0-0 12 f3 Nb4 13 Qc4 Be6 14 Qc5 Qxc5 15 Nxc5 Nc2† 16 Kd2 ±) 12 Bb5 ±.
- (x) 10 ... Nb4 11 Bb5† Bd7 12 Bxd7† Qxd7 13 Nge2 ±; but after the text, 11 Nge2 Ne5 12 d6 is good—Burgess.
- (y) (A) 6 Nf3 Qxb2 7 Na4 Qb4† 8 Bd2 Qa3 9 dxe6 Bxe6 10 e3 Ne4 is equal—Neishadt. (B) 6 dxe6 cxd4 7 exf7† Kxf7 8 Na4 Bb4† 9 Bd2 Bxd2† 10 Qxd2 Qb5 unclear, Borisenko–Makarov, USSR 1956.

- (z) 6 . . . gxf6 7 e3 Qxb2 8 Bb5† Bd7 9 Bxd7† Nxd7 10 Nge2 cxd4 11 Rb1 ±, Taimanov–A. Geller, USSR 1956.
- (aa) 7 Qc1 Qxc1† 8 Rxc1 gxf6 9 Nf3 Kd8 10 e4 was a fair edge to White in Furman–Kavalek, Harrachow 1956.
- (bb) After 11 exd4 Bb4 12 Ne2 Rc8 (an attempt to improve on the 12 . . . Bxc3† 13 Rxc3 Qxa2 14 dxe6 fxe6 15 0-0 ± of Spassky–Uitumen, Sochi 1966) 13 0-0 (13 Rc2 Qa3 14 dxe6 fxe6 15 0-0 is also ±, Usov–Serebriansky, Kharkov 1961) 13 . . . Bxc3 14 Qd3 Nb6 15 Rxc3 0-0 16 dxe6 fxe6 17 Ra3, White was much better, C. Hansen–Zsu. Polgar, Debrecen 1990.

QUEEN'S GAMBIT DECLINED

Semi-Tarrasch Variation

**1 d4 d5 2 c4 e6 3 Nc3 Nf6 4 Nf3 c5 5 cxd5 Nxd5 6 e3 Nc6
7 Bd3 cxd4(a) 8 exd4 Be7 9 0-0 0-0**

	85	86	87	88	89	90
10	Re1 Bf6				Nf6(r)	
11	Be4	a3	a3.....	Bg5		
	Nce7(b)	Qb6(n)	b6	h6(w)		
12	Qd3(c)	Qb3	Be4	Bg5(s)	Be3	
	h6(d)	b6(j)	Nce7(o)	Bb7	Nb4	
13	Ne5.....	Bd2	Bxd5(k)	Ne5	Bc2	Bb1
	Nxc3	Bd7(g)	Nxd5(l)	g6	Nd5(t)	b6
14	Qxc3	Bxd5(h)	Nxd5	Bh6	Qd3	Qd2
	Nf5	exd5	Qxd5	Bg7(p)	g6	Re8(x)
15	Be3	Bf4	Qxd5	Bxg7	h4	a3
	a5(e)	Be6	exd5	Kxg7	Bxg5	Nc6(y)

	a4(f)	Nf5(i)	Bxg5(m)	Nf6(q)	Nce7(v)	Bb7(aa)

- (a) 7 . . . Be7 without the preliminary exchange in the center is also possible. After 8 0-0 0-0 9 Nxd5 Qxd5 10 e4 Qh5 11 dxc5 Bxc5 the position is about equal, Keres–Tal, Zurich 1959. Another try is 9 a3 Nxc3 10 bxc3 b6 11 Bb2 Bb7 12 Qe2 ±, Psakhis–Sveshnikov, Sochi 1985.
- (b) 11 . . . Qd6 12 Bg5 Bxg5 13 Nxg5 with a small edge for White, Kulhanek–Lechtnsky, Nachod Open 2006.
- (c) 12 Ne5 Bd7 13 Qh5 g6 14 Qh3 Bc6 15 Bh6 Bg7 was about =, Velimirović–Matulović, Yugoslavia 1995.
- (d) 12 . . . g6 13 Bh6 Bg7 14 Qd2 Nf6 15 Bc2 b6 16 Rad1 Bb7 17 Ne5 ±, Winslow–Nur, New York 1993.
- (e) The older move is 15 . . . Nxe3 16 Qxe3 Qb6 with a slight White plus.
- (f) The game Topalov–Karpov, Linares 1995 continued 17 Red1 Nxe3 (Karpov suggests 17 . . . Ra5 18 Nc4 Rb5 and calls it unclear) 18 Qxe3 Qb6 19 Ng4 ±.
- (g) 13 . . . b6 14 Ne5 Bb7 15 Qg3 ± (Leskij).
- (h) White could also try 14 Ne5 Nxc3 15 Qxc3 Bc6 16 Bxc6 Bxe5 17 dxe5 Nc6 =, Li Chao–Wang Hao, Yerevan 2006.
- (i) 16 . . . Nc6 would be slightly advantageous for White. After 16 . . . Nf5 the game Jagupov–Legkij, Javaroniki 1995, continued 17 Bxf6 Qxf6 18 Rac1 Nd6 19 Ne5 Rfd8 when 20 h3 would keep White's edge.

- (j) 12 ... Qb6 has been tried. The game Himmel–Podgaets, Dortmund 1993, continued 13 Bxd5 Nxd5 14 Nxd5 exd5 15 Qxb6 axb6 16 Bd2 Bg4, Draw.
- (k) 13 Bf4 Bb7 14 Be5 Bc6 15 Rac1 Nxc3 16 Bxc6 Bxc6 17 Rxc3 Bxe5 18 dxe5 Nd4 19 Nxd4 = and draw agreed in J. Polgar–Karpov, Vienna Millenium 1996.
- (l) 13 ... exd5 14 Bf4 Bg4 15 Ne5 ± (Epishin).
- (m) 17 Nxg5 f6 18 Nf3 ±, Sveshnikov–Epishin, Biel 1993.
- (n) In Gukko–Kaidanov, USA 1994, 11 ... Bd7 was tried. After 12 Bc2 Rc8 (12 ... Nxc3 13 bxc3 Rc8 was better—Gukko) 13 Ne4 Be7 14 Qd3 g6 15 Bd2 White held a plus. 10 years later at the 2004 U.S. Chp. Gukko–Becerra Rivero saw 11 ... Nxc3 12 bxc3 b6 13 h4 Bb7 14 Ng5 Bxg5 15 Bxg5 Qd6 16 Re3 ±.
- (o) 12 ... Nxd4 13 Bxd5 exd5 14 Nxd5 Nxf3† 15 Qxf3 Qc6 16 Bd2 is ± (Gukko).
- (p) 14 ... Rd8 15 Qf3 Qxd4 16 Rad1 ±.
- (q) The game Gukko–Beliaovsky, Groningen 1994 continued 17 Rad1 Rd8 18 Re3 Bd7 19 Rf3 Neg8 20 g4 Be8 21 g5 Nh5 22 Na4 Qc7 (22 ... Bxa4 23 Rxf7† Kh8 24 Rxb7) 23 Nc5 Rab8 24 Qc3 Qe7. Now instead of Gukko's 25 Nxf7, which led to a draw after further adventures, Gukko gives 25 d5!! Qxg5† 26 Kh1 Ngf6 27 Rg1 Qh4 28 dxe6 Nxe4 29 exf7 Bxf7 30 Rxf7† Kg8 31 Qb3 Kh8 32 Rxh7† Kxh7 33 Qf7† and mate next. This would have been a logical end to the game.
- (r) Another move here is 10 ... Ncb4. After 11 Bb1 b6 12 a3 Nxc3 13 bxc3 Nd5 14 Qd3 Nf6 15 Bg5 g6 16 Ne5 Bb7 17 Bh6 Re8 18 Qh3 White is definitely better, Adams–Seirawan, Wijk aan Zee 1991.
- (s) On 12 Bc2 Black should play 12 ... Ba6 13 Bg5 Rc8, generating play around the weak light squares on the queenside. Dobrov–Chebotarev, Sochi 2005, saw 12 Bc2 Ba6 13 b4?!, but the crude play was repulsed after 13 ... Bc4 14 b5 Na5 15 Ne5 Rc8 16 Re3 Bd6 17 Rh3 Bxe5 18 Bxh7† Nxh7 19 Qh5 Bd3.
- (t) Less reliable is 13 ... Ba6?! 14 Qd2 Rc8 15 Qf4 Nh5 16 Qg4 Bxg5 17 Qxh5 Bh6 18 d5! exd5 19 Bf5 Rb8 20 Nxd5 Bc8 21 Bxc8 Rxc8 22 Rad1 and White is winning as there is no defense against Ne7, Johannessen–Carlsen, Norwegian Chp. 2005.
- (u) Here 16 hxg5 would leave the pawn vulnerable after 16 ... Nxc3 17 bxc3 Na5 with the threat ... Bxf3.
- (v) After 17 Qf3 Nxc3 18 Qxb7 Ncd5 19 Qa6 Rc8 20 Be4 Rc7 it was roughly even in Salov–Beliaovsky, Madrid.
- (w) 11 ... b6 12 Qe2 Bb7 13 Rad1 Nb4 14 Bb1 ±, Bobotsov–Petrosian, Moscow 1967.
- (x) 14 ... Bb7 15 Bxh6 Bxf3 16 Bxg7 Kxg7 17 Qg5† Kh8 18 Qh6† Kg8 19 Re5 would end the game.
- (y) 15 ... Ncd5 16 Nxd5 exd5 (Both 16 ... Qxd5 and 16 ... Nxd5 lead to similar sacrifices on h6) 17 Bxh6 gxh6 18 Qxh6 Ne4 19 Rxe4 dxe4 20 Bxe4 f5 21 Qg6† Kh8 22 Ne5 Rf8 23 Bxa8 wins—Karpov.
- (z) Here Karpov gives as a possible continuation 16 d5 Na5 17 Qc2 exd5 18 Bd4 g6 19 Bxf6 Bxf6 20 Rxe8† Qxe8 21 Nxd5 with good attacking chances.
- (aa) Following 17 Ne4 Kf8 18 Bf4 Nd5 19 Bg3 Ba6 Black managed somehow to escape with a draw (after 50 more moves), Karpov–Beliaovsky, Linares 1995.

QUEEN'S GAMBIT DECLINED

Semi-Tarrasch Variation

1 d4 d5 2 c4 e6 3 Nc3 Nf6 4 Nf3 c5 5 cxd5 Nxd5(a)

	91	92	93	94	95	96
6	e3.....		e4			
	Nc6		Nxc3			
7	Bc4		bxc3			
	cxd4(b)	Nxc3	cxd4(i)			
8	exd4	bxc3	cxd4			
	Be7	Be7	Nc6(j)			
9	0-0	0-0	Bc4.....	a3		
	0-0	0-0	Bb4†b5	Be7		
10	Re1	Bd3(e)	Bd2	Be2.....Bd3	Bd3	
	Bf6(c)	cxd4(f)	Bxd2†	Bb4†(n)	Bb4†	0-0
11	Ne4	exd4	Qxd2	Bd2	Bd2	e5
	b6	b6	0-0	Qa5(n)	Qa5(q)	b5(t)
12	a3	Qc2	0-0	d5!(o)	a3(r)	Be4(u)
	Bb7	g6	b6(k)	exd5	Bxd2†	Bb7
13	Qd3	Bh6(g)	Rad1(l)	exd5	Qxd2	Qd3
	Nce7(d)	Re8(h)	Bb7(m)	Ne7(p)	Qxd2†(s)	h6(v)

- (a) 5 . . . exd5 is considered bad because of 6 Bg5 leading to unfavorable isolated queen pawn positions.
- (b) 7 . . . Be7 8 Bxd5 exd5 9 dxc5 Be6 10 0-0 Bxc5 11 b3 0-0 12 Bb2 a6 13 Na4 ±, Larsen–Tal, match 1969.
- (c) (A) 10 . . . b6 11 Nxd5 exd5 12 Bb5 Bd7 13 Qa4 was good for White in Botvinnik–Alekhnine, AVRO 1938. (B) 10 . . . Nxc3 11 bxc3 b6 12 Bd3 Bb7 13 Qe2 Na5 14 Ne5 Rc8 =, Larsen–Ribli, Las Palmas 1982. (C) 10 . . . Qd6 11 a3 Rd8 12 Nb5 Qb8 13 Qe2 a6 14 Nc3 Nf6 15 Be3 b5 16 Ba2 b4 =, Pinter–Rausis, Gonfriville 2006.
- (d) 13 . . . Re8 was played in Serper–Kaidanov, Groningen 1993, after which 14 Neg5 g6 15 h4 would have given attacking chances. The column is Korchnoi–Oll, Groningen 1993, which continued 14 Bd2 Ng6 15 Neg5 Nde7, and now Korchnoi played the dubious 16 Rxe6?!, whereas 16 Rad1 would have been approximately equal.
- (e) 10 e4 cxd4 11 cxd4 b6 12 Bb2 Bb7 13 Qe2 Rc8 14 Rac1 Qd6 15 d5 exd5 16 Bxd5 Qh6 =, F. Portisch–Grosپeter, Zalakaros Open 2006.
- (f) 10 . . . b6, refusing to exchange in the center, was played in Hjartarson–Polugaevsky, Groningen 1993. After 11 Bb2 Bb7 12 Qe2 Rc8 13 Rac1 cxd4 14 exd4 (if 14 cxd4 Nb4 15 Bc4 Rxc4 16 Qxc4 Ba6 would equalize—Polugaevsky)

14 . . . Bf6 15 Rfd1 Qd6 the position was balanced. Groningen 1993 was almost like a theme tournament for this variation.

- (g) Eingorn suggests 13 h4 without placing the bishop on h6 as a more effective attacking scheme.
- (h) After 14 h4 Bf8 (14 . . . Bf6 may be better) 15 Qd2 Bb7 16 Rfe1 Rc8 17 h5 Bxh6 18 Qxh6 Qf6 19 Ng5 Qg7 20 Qxg7† Kxg7 21 h6† Kg8 White had an edge in the ending, Eingorn–Altermann, Debrecen 1992.
- (i) Other moves here are: (A) 7 . . . Nd7 8 Rb1 Qc7 9 Bd3 \pm , Vaganian–Gavrikov, USSR 1972. (B) 7 . . . Be7 8 Bc4 Qa5 9 Bd2 0-0 10 0-0 b5 11 Bd3 Rd8 12 Qe2 with attacking chances for White in Burgess–B.G. Christensen, Aarhus 1992.
- (j) 8 . . . Bb4† 9 Bd2 will usually transpose back. If Black plays 9 . . . Qa5 10 Rb1 Bxd2† (10 . . . Nc6? 11 Rxb4) 11 Qxd2 Qxd2† 12 Kxd2 was \pm , Rubinstein–Schlechter, San Sebastian 1912. If Black attempts to avoid putting the knight on c6 it usually turns out poorly, e.g. 9 . . . Bxd2† 10 Qxd2 0-0 11 Bc4 b6 12 d5 Ba6 13 Bxa6 Nx a6 14 d6 e5 15 0-0 was \pm in Moskalenko–Djurić, Holguino 1989.
- (k) 12 . . . Qd6 13 Rfd1 Rd8 14 Rac1 Bd7 15 e5 Qe7 16 Qf4 \pm , Petrosian–Korchnoi, Il Ciocco 1977.
- (l) (A) 13 d5 is interesting. After 13 . . . Na5 14 Be2 exd5 15 exd5 Bg4 16 Qb4 (in the game Karpov–Seirawan, Monaco 1993, 16 d6 Qf6 17 Rfd1 Rad8 18 Qd4 Rfe8 led to nothing for White); now 16 . . . Bd7 17 Nd4 and 16 . . . Bh5 17 Rad1 are both good for White, according to van der Vliet. (B) 13 Rfe1 Bb7 14 de exd5 15 Bxd5 Na5 16 Rad1 Bxd5 17 Qb4 Re8 18 Rxd5 Qe7 =, Karpov–Zaw, Bali 2000.
- (m) 14 Rfe1 Rc8 15 Qf4 Na5 16 Bd3 Nc4 17 Rc1 b5 18 d5 exd5 19 e5 led to a strong kingside attack for White in Mecking–Guillen Ramirez, Ayamonte 2000.
- (n) 10 . . . a6 11 0-0 Be7 12 a4 b4 13 d5 is occasionally seen. van Wely–Ivanchuk, Melody Amber 1998, continued 13 . . . Na5 14 Bf4 exd5 15 exd5 0-0 16 d6 Bf6 17 Rb1 Bc3 with chances for both sides.
- (o) (A) 12 Bxb4 Qxb4† 13 Qd2 Bb7 14 a3 Qxd2† 15 Kxd2 a6 =, Portisch–Pinter, Hungary 1984. (B) 12 a4 Bxd2† 13 Qxd2 Qxd2† 14 Kxd2 bxa4 15 Rxa4 \pm , Pogorelov–Franco, Ibercaja 1994.
- (p) The game Adorjan–Farago, Hungary 1993, continued 14 0-0 Bxd2 15 Nxd2 0-0 16 Nb3 Qd8 (16 . . . Qb6 17 d6 Nc6 18 d7 \pm) 17 Bf3 Nf5 18 Qd3 \pm .
- (q) 11 . . . a6 12 Rc1 Bxd2† 13 Qxd2 Bb7 14 0-0 0-0 \pm , Browne–Pinter, Las Palmas 1982.
- (r) 12 d5! Ne7 13 Rb1 Bxd2† 14 Qxd2 Qxd2† 15 Kxd2 a6 16 dxe6 Bxe6 17 Nd4 Bxa2 18 Ra1 Rd8 19 Ke3 gave White the edge in Tratar–Grosar, Bled 2002.
- (s) If 13 . . . a6 then 14 a4 b4 15 0-0 0-0 16 d5 with a big advantage for White, Zaitov–Gutop, Moscow 1992. After 13 . . . Qxd2† 14 Kxd2 a6 15 a4 White has a small positional advantage typical of this variation.
- (t) A recent approach to the position. Before 11 . . . f5 to defend the kingside was considered necessary.

- (u) 12 Qc2 Bb7 13 Bxh7† Kh8 14 Be4 Nxd4 15 Nxd4 Qxd4 16 Bxb7 Qxe5† re-bounds in Black's favor (Magem Badals).
- (v) The game Bareev–Magem Badals, Madrid 1994, went 14 Bd2 Qd7 15 0-0 Rfd8 with an approximately balanced position.

QUEEN'S GAMBIT DECLINED

Semi-Tarrasch Variation

- (a) (A) 6 . . . cx_d4 7 Nx_d5 Qx_d5 8 Qx_d4 Qb5 9 e4 Qb4† 10 Qxb4 Bxb4†=, Atalik–Korchnoi, Plovdiv 2003.
- (b) 7 . . . Nx_c3 8 bx_c3 cx_d4 9 cx_d4 Bb4† 10 Bd2 Be7 11 Bc3 0-0 12 0-0 Bd7 13 Qd2, Gulko–Vaganian, Yerevan 1996; now 13 . . . b5 (instead of Vaganian's 13 . . . Rc8) would have been about even.
- (c) 10 Be3 c4 11 b3 cx_b3 12 Qxb3 Na5 13 Qd3 Nc4 14 Nd2 Nx_e3 15 Qxe3 Be6 was about even in the game Murdzia–A. Greenfeld, Pardubice 1995.
- (d) 11 . . . f6 12 Bd2 Bf5 13 Qb3 Bb6 14 Be3 Na5 15 Qc3 Bxe3 16 Qxe3 Re8 17 Qc5, Kramnik–Kenghis, Riga 1995; now 17 . . . Rc8 instead of Kenghis's 17 . . . b6 would have held White to a small plus.
- (e) (A) 12 Rc1 d4 and now 13 Bf4 Bf5 14 Bc7 Qb5 15 Nd2 Bb6 16 Bxb6 axb6 17 Nc4 draw was Kramnik–Anand, Linares 1994; or 13 Qc2 Bd6 14 Nd2 Be6 15 Ne4 Be7 16 Bxe7 ±, Illescas–Lautier, Dos Hermanas 1994; (B) 12 Qxd5 Be6 13 Qd2 h6 14 Bf4 Rfd8 15 Qc3 Rac8 is good play for the pawn (Parma).
- (f) 13 Bd2 Bf5 14 Nd3 Bxd3 15 exd3 Rad8 16 Rb1 Ne5 17 Bc3 d4 18 Be1 Bb4 19 f4 Bxe1 20 fxe5 is a small edge for White, Schandorff–Adamski, Copenhagen 2003.

- (g) 12 Qc2 Bb6 13 Rfd1 h6 14 Bd2 Qg4 15 Bf4 Re8 16 h3 Qe6 17 Re1 Qf6 =, Kindermann–Rustemov, Bundesliga 2001.
- (h) (A) 12 ... d4 13 Nd3 Bb6 14 Bd2 Qe7 15 Nf4 \pm , Kramnik–Anand, Monaco 1995. (B) 12 ... h6 13 Bd2 Bb6 14 Nd3 Qd6 15 Bf4 Qf6 was =, Wl. Schmidt–Greenfeld, Moscow 1994.
- (i) 9 ... Ndb4 is another line. After 10 d5 exd5 11 exd5 Na5 (11 ... Nd4 is also playable) 12 a3 Na6 13 Bf4 Bd6 is chances for both sides, Pira–Gouret, Tarcy 1991; 10 a3 cxd4 11 Nb5 Qb6 12 Nbx d4 e5 is also equal, Greenfeld–Gruenfeld, Tel Aviv 1991.
- (j) 10 d5 exd5 11 exd5 Nb4 12 Ne1 Bf6 13 Nd3 Bg4 14 Qxg4 Nx d3 =, Yermolinsky–Dlugy, Washington D.C. 1991.
- (k) 10 ... Bxc5 11 Qe2 is another possibility, but the exchange of queens is the safest way to play.
- (l) White might consider 12 e5, trying to keep Black cramped.
- (m) After 13 Rac1 e5 14 Nb5 exf4 15 Rxc5 fxg3 16 hxg3 Bg4 17 Rd2 Rad8 18 Nd6, Korchnoi–Brunner, Zurich 1996; now 18 ... Ne5 is equal instead of 18 ... Bxf3 as played, which led to a small White edge.
- (n) 8 ... Ndb4 9 Nxc6 Qxd1† 10 Kxd1 Nxc6 11 Be3 Bd7 12 Rc1 Be7 13 Kc2 0-0 14 Rhd1 Rfd8 15 Kb1 \pm , Gelfand–Delchev, Moscow 2001.
- (o) 11 ... Bd6 12 0-0 Rb8 13 e4 0-0 (13 ... Bd7 would restrict White to \pm [Kramnik]) 14 e5 Be7 15 Be3 Bd7 16 Rfc1 with a big advantage for White, Kramnik–Lautier, Horgen 1995.
- (p) 13 Kxd2 Ke7 14 Rhc1 Rd8 15 Rc7† Rd7 was a small edge for White, Bischoff–Ribli, Bundesliga 2001.
- (q) 7 Bg5 is interesting here: 7 ... f6 8 Nxd5 exd5 9 Bd2 Nc6 10 Qa4 Qb6 (10 ... d4—Ruban) 11 Bc3 Bd7 unclear, Goldin–Ruban, Novosibirsk 1993.
- (r) 9 ... Qb6 10 Bxc6† Qxc6 11 Qxc6† bxc6 12 0-0 Be7 13 Be3 0-0 14 Rfc1 \pm , Muresan–Savereide, Tiflis 1982.
- (s) 10 Bd2 Qb6 11 Be2 Bc5 12 0-0 0-0 =, Kachar–Pavlovichev, Podolsk 1991.
- (t) 11 Ba4 Qc5 (or 11 ... Qb4 12 Qxb4 Bxb4 13 Rd1 f6 =, Dukhov–Pavlovichev, Podolsk 1990) 12 Qd3 Qd6 =, Miles–Ribli, Baden-Baden 1981.
- (u) 12 Be3 Qxc3 13 bxc3 a6 14 Be2 Bd6 is even, Rohde–Ruban, Interpolis 1992.
- (v) 13 Qe2 Be7 (13 ... a6 may be better) 14 b3 Qc7 15 Bb2 0-0 16 Rac1 \pm , Piket–Brodschi, Wijk aan Zee 1995.
- (w) 5 Bg5 cxd4 6 Nxd4 (6 Qxd4 Be7 =) 6 ... e5 7 Nf3 d4 8 Nd5 Be7 (not 8 ... Nc6 9 e4 Be7 10 Bxf6 Bxf6 11 b4 \pm , Euwe–Alekhine, Holland 1937; 8 ... Qa5†!?) 9 Bxf6 Bxf6 =.
- (x) Alternatives are (A) 6 ... Ne4 7 Bd3 Nxc3 8 bxc3 Be7 =, or (B) 6 ... cxd4 7 exd4 Be7 8 c5 Ne4 9 Qc2 Nxc3 10 Qxc3 a5 =, Ivkov–Suba, Sochi 1983.
- (y) 9 Be2 0-0 10 0-0 Ne4 11 Qc2 Nxc3 12 Qxc3 Bf6 13 Rd1 Ne7 14 c5 \pm , P. Littlewood–Thipsay, British Chp. 2002.

- (z) 10 b4 bxc5 11 bxc5 (11 dxc5 e5 12 Na4 Bg4 is unclear—Gelfand) 11 . . . Ne4 12 Bd2 Bf6 with counterplay.
- (aa) The game Gelfand–Kramnik, Sanghi Nagar 1994, continued 13 Bf4 0-0 14 0-0 Na7 (better is 14 . . . Nf6 with a small disadvantage) 15 Nc7 Rb8 16 b4 Bb7 17 bxa5 Qxa5 18 Qe2 e5?, now 19 Nxe5 Qxc7 20 Rac1 would be winning.

TARRASCH DEFENSE

1 d4 d5 2 c4 e6 3 Nc3 c5

THE TARRASCH DEFENSE gives Black immediate activity at the cost of an isolated pawn. Black obtains freedom of development and active piece play. Aggressive players have thought this to be good value, so the defense has been used many times by the masters of attack—Keres, Spassky, Kasparov, and others. The problem with the opening is that play may proceed quietly with exchanges lessening active possibilities for Black, so that he/she is slightly worse the whole game. This was Kasparov's experience in his 1984 match with Karpov and resulted in Kasparov changing to another queen pawn defense. There has been no great champion of the opening since that time, but still it gets fairly regular use in grandmaster play. The defense rarely runs into any serious problems, so it could become very fashionable again if someone finds a few creative moves. What is very good for less experienced players is that Black takes a fair share of the center and develops all his/her pieces without trouble. There is less danger at the lower level that one's opponent will exploit the minor weakening of squares the way that Karpov did.

White's play has become almost standard against the Tarrasch, as easily the most popular continuation is the Rubinstein Variation, 4 cxd5 exd5 5 Nf3 Nc6 6 g3 Nf6 7 Bg2 Be7 8 0-0 0-0 (columns 1–12). White's king-side fianchetto limits Black's kingside attacking chances and the focus of the battle stays in the center.

The main continuation is 9 Bg5 (columns 1–6), when 9... cxd4 10 Nxd4 h6 (columns 1–4) is the play typical for the opening—Black having an isolated d-pawn in an otherwise balanced and involved middle-game. Ninth-move alternatives for Black are seen in columns 5–6. 9... c4 (column 5) reaches a less-known position with reasonable chances for Black.

White's other choices on move 9 constitute columns 7–12. 9 dxc5

(columns 7–8) is a positional approach in which White plays with two hopping knights. 9 b3 (columns 9–10) places the dark-squared bishop on a less aggressive post than 9 Bg5. 9 Be3 (columns 11–12) can surprise opponents, but Black is all right with proper play.

More variety is seen in columns 13–18, where all other variations except the Rubinstein are covered. These have less theoretical punch, but lines like the Swedish Variation (column 13) and the Schara-von Hennig Gambit (column 18) have surprise and entertainment value.

- (z) 12 0-0 Rfd8 13 a3 \pm , Horvath–Giacometti, Porto San Giorgio 2004.

QUEEN'S GAMBIT ACCEPTED

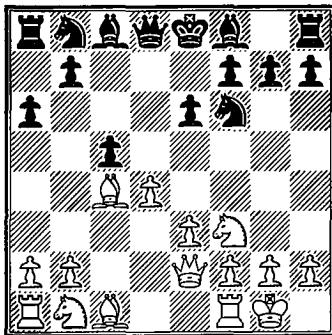

1 d4 d5 2 c4 dxc4

THE MOST STRAIGHTFORWARD DEFENSE to a gambit is usually to accept the pawn and make the opponent prove the worth of the sacrifice. This, however, is not the plan behind accepting the Queen's Gambit. Attempting to hold on to the pawn usually leads to trouble. Yet if Black uses the time White takes to recapture the pawn for development, then he/she can count on a safe journey through the opening stage. As opposed to the King's Gambit Accepted with its many sacrifices, the Queen's Gambit Accepted is a safe and solid choice, albeit somewhat stodgy.

The opening dates back to Damiano in 1512. In the early centuries Black would try to hold on to his/her booty, which left the opening a bad name. It took until the twentieth century for the modern concept behind 2 . . . dxc4 to come to the fore. Black plays for free development and to saddle White with an isolated d-pawn after . . . c5 and . . . cxd4. Black's "problem child" of the Queen's Gambit Declined—the light-squared bishop—always finds an active post on g4 or b7 in the Queen's Gambit Accepted.

The disadvantage of 2 . . . dxc4 is that Black gives up the center. With nothing on d5 blocking the lines, White obtains active pieces and freedom of action. When the isolated pawn arises on d4, White often has good attacking chances as this pawn may threaten to advance, opening lines of attack. Yet this advance can also lead to wholesale exchanges, producing sterile equality. For particularly this reason, the Queen's Gambit Accepted is considered a rather safe opening.

The main line is 3 Nf3 Nf6 4 e3 e6 5 Bxc4 c5 6 0-0 a6 7 Qe2 (columns 1–6), see above diagram. White plans Rd1, Nc3, and e4 with aggressive play in the center. Black's usual and best response is 7 ... b5 (columns 1–5), gaining queenside space and preparing ... Bb7. By developing his pieces to flexible defensive squares Black should be able to stem the White initiative. It is only against 8 Bd3 (column 5) that Black should play an early ... cxd4. White obtains an isolated d-pawn after recapturing exd4, but also freedom of movement for his pieces and open lines.

Alternatives to the Main Line should be considered by White since Black's defenses are holding up there. 7 a4 (column 7) prevents Black's queenside expansion, but leaves a hole on b4. 7 e4 (column 8) is an interesting pawn offer that Black probably should decline. 6 Qe2 (column 10) prepares to play dxc5 without allowing the exchange of queens. This is at least a sharp continuation with attacking chances.

The character of the game is different after 4 ... Bg4 (columns 11–12). Black simply develops his pieces and prepares to reply with ... e5 against a later e4. This may let White have extra space, though Black will soften up the central dark squares.

Columns 13–14 cover 4 Nc3, in which White makes a true gambit out of the opening. Black needs to play very accurately against this. Third-move alternatives for Black are seen in columns 15–18. These offbeat lines take play into different types of territory, but they are risky.

Third-move alternatives for White constitute columns 19–24. Of these, 3 e4 (columns 19–21), immediately advancing in the center, is the most dangerous. Column 24, 3 Nf3 Nf6 4 Qa4†, is similar to the Catalan.

QUEEN'S GAMBIT—SLAV AND SEMI-SLAV DEFENSE

1 d4 d5 2 c4 c6

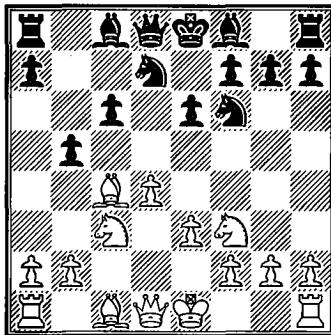

IN THE LAST DECADE THE SLAV AND SEMI-SLAV have probably become the most popular (and respected) defense to the queen pawn. The opening pervades the games of the top grandmasters, mostly due to the soundness of the Slav setup. The other appealing factor is the exciting positions that can arise from the gambit or sacrificial variations.

The strategic idea behind 2 . . . c6 is to support the center without hemming in Black's "problem child" of the Queen's Gambit Declined—the light-squared bishop. There is a second idea behind 2 . . . c6 that seems to conflict with the first. That is to be able to support the advance . . . b5 after a later . . . dxc4. This would either guard the pawn on c4 or attack the piece that has captured it, winning a tempo for queenside expansion. Though this entails giving up the d5 strongpoint, the counterplay on the queenside provides Black activity and space.

The Slav/Semi-Slav is a relatively recent addition to Black's queen pawn defenses. It was originated by Alapin a century ago and came into prominence during the 1935–37 World Championship matches between Alekhine and Euwe. It has remained popular since, and today it is used by many rising stars. Its leading exponent is Anand, though almost all the top players have tried the defense at least once.

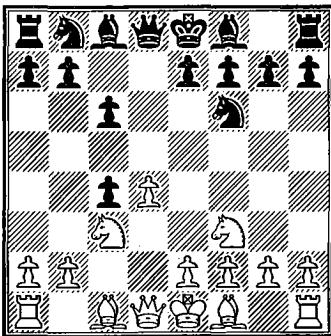

There are many systems in this opening, so for reference we have broken them into five groups: (1) Semi-Slav—Meran Variation, (2) Semi-Slav—Various, (3) Semi-Slav—Anti-Meran, (4) Slav (proper), (5) Sundry Lines and Slav Exchange Variation.

(1) The SEMI-SLAV—MERAN VARIATION (columns 1–30) is 3 Nf3 Nf6 4 Nc3 e6 5 e3 Nbd7 6 Bd3 dxc4 7 Bxc4 b5 (see above diagram). Black shuts in his queen's bishop with 4 ... e6, but it quickly finds an outlet on b7. As c6-c5 is part of Black's queenside plans, the bishop will be happy on b7. Sharp and critical variations arise after 8 Bd3 a6 9 e4 c5 10 e5 cxd4 11 Nxb5 (columns 1–12). Columns 1–4 show the natural responses 11 ... axb5 (columns 1–2) and 11 ... Ng4 (columns 3–4), which seem from recent play to lead to equality. Columns 5–12 investigate the continuation 11 ... Nxe5 12 Nxe5 axb5, when White has the choice of 13 Qf3 (columns 5–6), 13 0-0 (columns 7–10), or recapturing on b5 (columns 11–12). Black seems to hold his own here as well. Equally critical is the Reynolds Variation, 10 d5 (columns 13–24), named after the man who analyzed the variation in *Chess*, England 1939. Black can make the game more closed with 10 ... e5 (columns 13–15), but probably better chances come from the dynamic continuation 10 ... c4 11 dxe6, when, instead of 11 ... cxd3 (columns 16–18), Black keeps the game in flux with 11 ... fxe6 12 Bc2 Qc7 (columns 19–22) or 12 ... Bb7 (columns 23–24). Less common lines in the Meran are covered in columns 25–30. These are the alternatives to 8 ... a6—8 ... Bb7 (columns 25–26) and 8 ... b4 (columns 27–28)—and the other retreats of White's bishop, 8 Bb3 (column 29) and 8 Be2 (column 30).

(2) SEMI-SLAV VARIOUS (columns 31–36) are the choices to avoid the Meran Variation. In columns 31–32 Black eschews an early ... dxc4, instead developing the kingside. 6 ... Bb4 (column 31) is the Romih Variation used by Larry Evans in the 1950s and 60s. 6 Qc2 (columns 33–36) sidesteps the long variations arising after 6 Bd3, but Black's chances are no worse with accurate response.

(3) The SEMI-SLAV—ANTI-MERAN, 5 Bg5 dxc4 6 e4 b5 7 e5 h6 8 Bh4 g5 (columns 41–48), is a complex, involved, tactical variation with attacks and counterattacks (those wishing to avoid this should look at the sidelines in columns 37–40). It was popularized by Botvinnik's famous game against Denker in the 1945 radio match USSR vs. USA, but remains highly topical today, with brilliant victories from both sides. Current theory gives the edge to White if he is very well prepared and makes no mistakes.

(4) The SLAV (proper) is 3 Nf3 Nf6 4 Nc3 dxc4 (columns 49–50, 61–66), see above diagram. White has an unclear sideline in 5 e3 (column 49) and a risky gambit with 5 e4 b5 (columns 50–51), but the usual response is 5 a4, preventing ... b5. Black shows the point of his second move by developing the queen's bishop. Interesting alternatives are covered in columns 52–54 where the bishop develops to g4.

The newest fashion is for Black to play 4 ... a6 (columns 55–60), for which a whole new set of columns has been included in this edition. Here the theory is new and hence quickly changing. For the moment White has several reasonable plans to try for the advantage.

The main line is 5 ... Bf5 (columns 61–66), preventing e2–e4. White's choice on move six is between the aggressive and tactical 6 Ne5 (columns 61–63) leading to sharp, combinative play, or the simple 6 e3 and 7 Bxc4 trying to make the spatial advantage count. Black's chances are reasonable in either case.

(5) Sundry lines in columns 67–69 are the simple 3 Nf3 Nf6 4 e3 (column 67) and two sharp lines arising from the move order 3 Nc3 e6. The first is the Marshall Gambit 4 e4 dxe4 5 Nxe4 Bb4† 6 Bd2 Qxd4 (column 68), leaving White with activity for the pawn. The second is the positionally complex Abrahams-Noteboom Variation (column 69), in which Black gets two connected passed queenside pawns against White's central pawns.

The SLAV EXCHANGE VARIATION, 3 cxd5 cxd5 4 Nc3 Nf6 (columns 70–72), is known as a safe continuation usually leading to a draw, but Black must play accurately as lack of caution lands him in serious trouble. Players seeking to win with Black at all costs should avoid this variation and use the move order 2 ... e6 with a later ... c6 to arrive at the Semi-Slav variations.

- (a) With this move Black resolves the situation in the center. White has a protected passed d-pawn while Black has a queenside majority. Black will try to mobilize this majority while White is trying to undermine it with a2-a4. 10th-move alternatives for Black are: (A) 10 . . . Bb7 11 0-0 Qc7?!? 12 Bc2 c4 13 Nd4 e5 14 Nf5 g6 15 Ne3 Bc5 16 Qf3 0-0 is roughly equal, Anand–van Wely, Melody Amber 2005. (B) 10 . . . exd5 11 e5 Ng4 12 Bg5 f6 13 exf6 Nxf6 14 h3 Nh6 15 0-0 Bb7 16 Re1† Be7 17 Bxf6 gxf6 18 Qd2 ±. (C) 10 . . . c4 11 dxe6 fxe6 12 Bc2 Qc7 13 0-0 Bb7 14 e5 Nd5 15 Ng5! with a huge advantage, Novkovic–Duer, Austria Team Chp. 2007.
- (b) This pawn sacrifice, gaining the c5 square and denying White c4, is clearly better than the accommodating 13 . . . b4 14 Ne2 Nh5?! (14 . . . c4 15 bxc4 Nc5 is back in the column) 15 Nd2 Nf4 16 Nc4 Nb6 17 Nxf4 Nxc4 18 Ne6! fxe6 19 Bxc4 Qe7 20 dxe6 Bxe6 21 Bg5 Qd7 22 Qd3 Bxc4 23 Qxc4† Qf7 24 Rac1 Qxc4 25 Rxc4 ±, Agzamov–Rajković, Vrsac 1983.
- (c) 16 . . . a5 with (A) 17 h3 Qc7 18 Nh4 g6 19 Bh6 Ne8 20 Re1 (20 Bxf8?! Bxf8 and . . . Nd6 with strong counterplay on the dark squares) 20 . . . Ng7 21 Re3 ±, Boleslavsky–Botvinnik, USSR 1952. (B) 17 Be3 Nxd3? 18 Qxd3 Bg4 19 c5 Bc7 20 d6 Re8 21 Bg5 Bb8 22 h3 is just terrible for Black, Ikarus–Etareta, Turin 2006.
- (d) 18 Bxc5 Bxc5 19 Nd2 g6 20 Nb3 Nd7 21 Qd2 Bd6 22 Ne2 Nc5 23 Nxc5 Bxc5 24 Nc1 f5 25 exf5 Bxf5 26 Bxf5 Rxf5 27 Nb3 Raf8 =, van der Sterren–Bagirov, Baku 1986. Black's activity just compensates for the material deficit.

- (e) (A) Now 13 ... c4 is inappropriate in view of 14 bxc4 b4 15 Na4!. (B) On 13 ... Nb6 White obtains a clear edge with 14 Bf1 Qc7 15 Bg5 Ne8 16 a4! b4 17 Nb1 a5 18 Nbd2 Bb7 19 Rc1, Portisch–E. Kristiansen, Skopje 1972.
- (f) The bishop steps out of the way of ... c4 as the final preparation for a4.
- (g) On 14 ... Ne8 White has 15 a4 Nc7 16 axb5 axb5 17 Bg5 f6 18 Be3 intending Nh4, g3, and f4 with a clear advantage.
- (h) 18 Bb2 Ne8 19 Rc1 f6 20 a5 Na8 21 Nc4 Rc7 22 Nfd2 Bd7 23 f4! ±, Polugaevsky–Biyiasas, Petropolis Int. 1973.
- (i) Here 12 ... bxc4 13 Bc2 Bb4 14 Bd2 transposes back into the column.
- (j) Sharp play results in a clear plus for White—14 ... Qa5 15 Ne2 c3 (15 ... Nxе4 16 Bxe4 c3 17 Nxc3 Bxc3 18 0-0 Bxd2 19 Nxd2 0-0 20 Nc4 Qb4 21 d6! Ra7 22 Bd5 Rd8 23 Re1 ±, Honfi–Kempe, corr. 1978–79) 16 Be3 Ba3 17 0-0 0-0 18 Rb1 Bc5 19 Qd3 Bxe3 20 Qxe3 Ng4 21 Qxc3 Qxc3 22 Nxc3 and White is a clear pawn ahead, Klimov–Rumiantsev, 2003.
- (k) 18 Kh1 Rb8 19 h3 Ne8 20 Qg3 f6 21 f4 Bd6 22 fxe5 Bxe5 23 Qe3 Nd6 24 Nf3 ±, Krasenkow–Moroz, Polish Chp. 1994.
- (l) 11 Bc2 Qc7 12 0-0 Bc5 13 dxе6 would transpose into column 21. Instead, Kharitonov–Ivanchuk, USSR Chp. 1988, saw 13 Qe2?! e5! 14 Nh4 0-0 15 Kh1 Bd4 ±. Black should avoid 11 Bc2 Nc5?! 12 Bg5 b4 13 Na4! exd5 14 e5 h6 15 exf6 hxg5 16 fxg7 Bxg7 17 Nxc5 g4 18 Ba4† Kf8 19 0-0! gxf3 20 Re1 Bg4 21 Re8† Qxe8 22 Bxe8 ±, Levin–Wells, Bad Wörishofen 1995.
- (m) (A) 13 e5 Nd5 14 Qxd3 Nxc3 15 Qxc3 (15 Qxd7† Bxd7 16 bxc3 Rc8 17 Bd2 Ba3 is equal) 15 ... Bb7 16 0-0 Rc8 17 Qb3 Be7 18 Bf4 Qf5! 19 Bg3 h5! 20 e6 fxe6 21 Rfe1 Bd5 22 Qe3 h4 23 Be5 0-0 ±, Scheeren–R. Kuif, Hilversum 1986. (B) 13 Bg5 Be7 14 Bxf6 Bxf6 15 Nd5 Bb7! 16 Nxf6† gxf6 17 0-0 0-0 18 Re1 Re8 19 Nd2 f5 =, Vaganian–D. Cirić, San Feliu de Guixols 1975.
- (n) Black has an easy game after 14 Nxd3, e.g. 14 ... b4 15 Ne2 Qxe4 16 0-0 Be7 17 Ng3 Qb7 18 Bg5 0-0 19 Nh5 Nxh5 20 Bxe7 Qxe7 21 Qxh5 Qe4 =, Gligorić–Torre, Bugojno 1984.
- (o) 18 Qxd3 0-0 19 Nd7 Qxd7 20 Qxd7 Bxd7 21 Rxe7 Be6 Draw, Chekhov–Alexandria, Halle 1981.
- (p) (A) 14 Ne5 Qd4 15 Nf3 (15 Nxd3 0-0-0!) 15 ... Qd7 16 Ne5 Qd4 17 Nf3 is a draw. (B) 14 e5 Nd5 15 Qxd3 (not 15 Ne4? Qg4! 16 Qxd3? Nb4 winning) 15 ... Nxc3 16 Qxc3 is a transposition into note (m).
- (q) Two other options for White are: (A) 15 Ne5 Qd4 16 Nxd3 Rd8 17 Bxf6 Bxf6 18 Nf4 0-0 when Black's bishop pair gives him good compensation for the pawn. (B) 15 Re1 0-0 16 e5 Ng4 17 Bxe7 Qxe7 18 Qxd3 Bxf3 19 Qxf3 Nxe5 20 Qg3 Rae8 21 Rad1 f6 =, Korchnoi–Flear, Wijk aan Zee 1987.
- (r) (A) 17 Re1 Nxc3 18 bxc3 Qg4! 19 h3 Bxf3 20 hxg4 Bxd1 21 Raxd1 Rhd8 22 Re3 d2 ±, Gavrikov–Chernin, USSR Chp. 1987. (B) 17 Qb3 Nxc3 18 Qxc3 Rhc8! 19 e6?! Rxc3 20 exd7 Bxf3 21 bxc3 Be2 ±, Farago–Tukmakov, Dortmund 1987.
- (s) 18 Re1 Qd5 19 Nd2 Bg6 20 Qg4 Rhc8 21 h4 h5 22 Qb4† Qc5 23 Qf4 ±, Anton–Byson, corr. 1992.

- (t) 14 . . . Bb4 15 Ne5 Qe6 16 Nxd3 Bxc3 17 Nf4 Qd7 18 bxc3 Nxe4 19 Qxd7† Kxd7 20 Ba3 with a big plus for White, Karpov–Tal, Bugojno 1980.
- (u) 15 Bg5 0-0 16 e5 transposes into note (q).
- (v) 16 Qxd3 Nxc3 17 Qxc3 0-0 18 Bg5 Rac8 19 Qe3 Bxg5 20 Nxg5 Rc2 21 b3 Qg4 22 Qg3 Qxg3 23 hxg3 h6 24 Ne4 Bxe4 25 Rxe4 Rd8 26 a4 Rdd2 =, Karpov–Lutz, Germany 1994.

CHIGORIN'S DEFENSE

1 d4 d5 2 c4 Nc6

NAMED AFTER THE RUSSIAN MASTER of the late nineteenth century, Chigorin's Defense goes against traditional principles by not maintaining the central outpost at d5 and by blocking the often useful c-pawn. Furthermore, Black must be willing to trade a bishop for a knight in order to maintain a central presence. This leaves most grandmasters with a distrust of the opening, yet its practical results are quite reasonable. Black gains quick development and piece pressure on the center. The addition of surprise value makes the defense respectable, and it has been used by many grandmasters on occasion. The one top player to use the Chigorin regularly is Russia's Morozevich, who will play it even against Kramnik! He continues to find inventive ideas in this less analyzed opening and his results remain good. The prevailing opinion, however, is that a well prepared opponent could present difficult problems. At the club level this is not a major concern.

Columns 1–3 begin 3 Nf3 Bg4 when Black usually captures on f3, ceding the two bishops, but developing quickly and usually doubling White's pawns. Column 1 is quite interesting as Black plays with two knights against two bishops. 3 Nc3 (columns 4–5) attempts to gain a big center by eliminating Black's d5 outpost so that e2-e4 can be played. Column 6 (3 cxd5) leaves White with the bishop pair and Black with a developed, centralized position.

IV

OTHER QUEEN PAWN OPENINGS

DUTCH DEFENSE

1 d4 f5

THE DUTCH DEFENSE ensures an imbalanced pawn structure and a fighting game. There is a definite measure of risk to this—moving the f-pawn on the first move impacts the king's safety. The Dutch has been compared to the Sicilian Defense to the king pawn, as the initial pawn structure is a mirror image, though there is a difference. The issue of king safety has been the main reason the Dutch has remained less fashionable than the more solid Slav or Nimzo-Indian defense. Nonetheless it has been fairing pretty well in the last decade, particularly the Leningrad Variation. Its main adherent internationally is the strong grandmaster Friso Nijboer, who in fact resides in Holland.

The opening was first mentioned by the Dutch analyst Elias Stein in his *Nouvel essai sur le jeu des échecs* (1789). It attained popularity in the “hypermodern” revolution of the 1920s, when Alekhine and Nimzovich were its chief adherents. Ten years later Botvinnik forged the Stonewall Variation into an effective weapon, but still the Dutch was regarded as positionally suspect. 30 years later the adventurous Dane, Bent Larsen, carried the torch with victories from the opening, and in the 1990s the Dutch had a following with use by Short, Kramnik, and Yusupov.

The Leningrad Variation, 1 d4 f5 2 g3 Nf6 3 Bg2 g6, (columns 1–12), is by far the most popular line in recent times. Black fianchettos his dark-squared bishop (which helps with king safety) and keeps his center pawns flexible. Columns 1–6 deal with the main line Leningrad, while columns 7–12 deal with various deviations White has tried in an attempt for the advantage.

The Stonewall Variation (columns 13–16) is characterized by Black setting up a white-squared pawn chain (f5, e6, d5, c6) to block out White's forces. The drawback is that the pawn wall is inflexible.

The Ilyin-Zhenevsky System (columns 17–18) with Black pawns on d6 and e6 is not often played nowadays as Black has trouble in the center. White should play to break with e4 (column 17) as more quiet play (column 18) allows Black reasonable chances.

Less common systems are covered in columns 19–24. Column 19 is a counter-Stonewall by White. Column 20 is the Staunton Gambit (2 e4) which is not in much favor today. 2 Bg5 (columns 21–22) and 2 Nc3 (columns 23–24) are simple but potent systems that have gained favor since the last edition.

- (s) 9 Nf4 b5 10 a3 \pm , L'Ami–Nijboer, Groningen 2004.

BUDAPEST DEFENSE

1 d4 Nf6 2 c4 e5

THE BUDAPEST DEFENSE made its tournament debut in Esser-Breyer, Budapest 1916, and developed into a regional favorite around Hungary. It used to be known as the Budapest (Counter) Gambit in reference to Black's brash second move—advancing his e-pawn up to be killed. White usually does not hold the pawn, though, as simple development is compelling. The argument is that Black's early knight foray neglects the usual necessities of a successful opening—development and control of the center. There is enough truth in the argument to dissuade almost all professional players from using the Budapest regularly. However, its offbeat character and surprise value can leave opponents confused, so it finds occasional use from several grandmasters such as Australia's Ian Rogers. On lower levels the Budapest Defense is seen more often.

3 dxe5 Ng4 4 Bf4 (columns 1–2) is the main continuation, holding the pawn for the moment. In column 1 White responds to 5 . . . Bb4† with the simple 6 Nbd2, pursuing development. 6 Nc3 (column 2) allows White to hold on to the pawn, though Black gains some immediate compensation from the doubled, isolated White c-pawns. Columns 3–5 are continuations in which White plays natural developing moves without attempting to protect e5. Column 6, 3 . . . Ne4, is the Fajarowicz Variation, a tricky line that is suspect if White plays 4 a3!.

QUEEN'S PAWN GAMES AND GAMBITS

1 d4

THIS CHAPTER INCLUDES all the minor openings after 1 d4 and the Blackmar-Diemer and Albin gambits.

Lines involving an early Bg5 are covered in columns 1–6. These openings are similar and may transpose, though the various attacks have acquired specific names. The TROMPOWSKY ATTACK is 2 Bg5 against 1 ... d5 or 1 ... Nf6. VERESOV'S OPENING (or Attack) is 1 ... d5 2 Nc3 Nf6 3 Bg5 and the TORRE ATTACK is 1 ... Nf6 2 Nf3 e6 3 Bg5. White's play takes the game into less-known territory with few forcing variations. This is usual for a minor opening, but the Bg5 attack has more bite than most minor systems. Most grandmasters use these systems as surprise lines or if they are in the mood to avoid theory. In the 1990s there were regular advocates of these lines, but no top player of today calls these systems his/her main weapon with the White pieces. Black is all right theoretically, so if a player studies these columns well he/she should equalize with Black.

The COLLE SYSTEM, 1 ... d5 2 e3 Nf6 3 Nf3 e6 4 Bd3 reached by any move order (columns 7–8), is a simple system to develop the kingside before initiating central play. Black has no particular problems, but with 5 b3 (column 7), incorporating queenside play, White can require Black to play accurate defense.

The REVERSED STONEWALL, 1 ... d5 2 e3 Nf6 3 Bd3 c5 4 c3 Nc6 5 f4 (column 9), is like a reversed Dutch Stonewall. White focuses on his e5 strongpoint, but this rigid system allows Black various defenses.

The POLISH DEFENSE is 1 ... b5 (columns 10–11), taking c4 away from White. The problem with the Polish is 2 e4, simply taking control of the center, much like the opening 1 e4 a6 2 d4 b5. Column 11 may be reached via 1 Nf3 Nf6 2 d4 b5, etc. and this is a much safer version of the Polish Defense.

The QUEEN'S KNIGHT DEFENSE, 1 . . . Nc6 (column 12), is not so bad if one is willing to transpose into Chigorin's Defense (covered in Section III). The speculative ENGLUND GAMBIT, 1 . . . e5, is covered in note (q).

Two entertaining gambits are the subject of columns 13–18. The BLACKMAR-DIEMER GAMBIT is 1 . . . d5 2 e4 (columns 13–15). White immediately opens lines for attack, wiping away any threats that the game will take on a slow, strategic, boring nature. The only problem is that the Blackmar-Diemer is not particularly good, so most players will wish to use it only in blitz games. The ALBIN COUNTER GAMBIT, 1 . . . d5 2 c4 e5!? (columns 16–18), is somewhat more respectable. It is named after the Austrian master Adolf Albin, who practiced the opening successfully in the later nineteenth century. Black gains a central wedge after 3 dxе5 d4, hoping this will lead to an attack. White obtains the upper hand in column 16 by fianchettoing his king's bishop. Other responses in columns 17 and 18 are not so clear.

TROMPOWSKI, VERESOV AND TORRE ATTACKS

(1 d4 and Bg5)

1 d4

1	2	3	4	5	6
1.....d5		Nf6

INDIAN OPENINGS

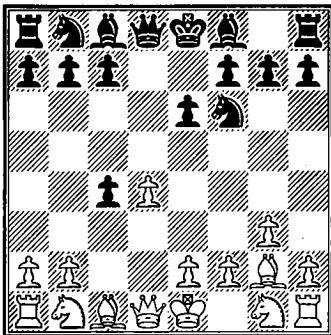

CATALAN OPENING

1 d4 Nf6 2 c4 e6 3 g3

WHEN A CATALAN NOBLEMAN, Count Ermengol of Urgell, bequeathed his chess pieces to the Convent of St. Giles near Nîmes, France, he could little have anticipated that he was also making a bequest to chess itself. The count's will, which can be dated to around A.D. 1008, is the earliest European source to mention chess, and the game thus makes its appearance in Western civilization in Catalonia. Nearly a millennium later, in 1981, the chess players of La Seu d'Urgell, a small town in the Catalan heartland close to the present-day border of Spain and Andorra, commemorated this piece of chess history by erecting a monument in the town recording the words of the bequest.

The nomenclature of chess was also slow, perhaps, to render its homage to Catalonia. It was only in 1929 that the Catalan Opening received its name, when the organizers of that year's Barcelona tournament asked Tartakower to invent a variation and name it after the region. The opening became a success—it has been employed by Alekhine, Botvinnik, Reshevsky, Smyslov, Korchnoi, Karpov, Kasparov and a great number of other ranking masters. It affords White a dynamic alternative to the Queen's Gambit and other queen-pawn openings.

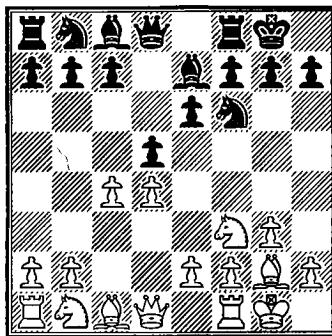

The most popular way to meet the Catalan is the Open Variation, 3 . . . d5 4 Bg2 dx_c4 (columns 1–36). Black opens the long diagonal for the White bishop, but causes White to take time in recapturing the pawn. White usually chooses development with 5 Nf3 (columns 1–30), eschewing the immediate roundup of the pawn with 5 Qa4† (columns 31–32). Classical development follows with 5 . . . Be7 6 0-0 0-0 7 Qc2 a6 in columns 1–12. In columns 1–6 White restrains the Black queenside with 8 a4, while in columns 7–12 he recaptures with 8 Qxc4, allowing queen-side expansion with 8 . . . b5.

Black has other plans on the fifth move. A major alternative is 5 . . . c5 6 0-0 Nc6 (columns 13–18), immediately pressuring d4. White can unmask the fianchettoed bishop with 7 Ne5 (columns 13–15) or pin the Nc6 with 7 Qa4 (columns 16–18).

Attempting to secure the c4 pawn with 5 . . . a6 is seen in columns 19–24. After 6 0-0 Black can carry out his/her “threat” with 6 . . . b5 (columns 19–21) or first develop with 6 . . . Nc6 (columns 22–23). With 6 Ne5 (column 24) White prevents . . . b5.

Less usual fifth moves for Black constitute columns 25–30. 5 . . . Nc6 is covered in columns 25–26, 5 . . . Bd7 is column 27, 5 . . . Nbd7 is column 28, the aggressive 5 . . . b5 is column 29, and 5 . . . Bb4†, trying to disorganize White’s position, is column 30.

Early alternatives are seen in columns 31–36. The immediate recapture of the pawn with 5 Qa4† (columns 31–32) is less promising than 5 Nf3. Black plays . . . c5 and . . . d5 in columns 33–36 which gives the game an “English” flavor. As usual, White’s intention is to apply significant pressure against Black’s queenside.

The Closed Variation, 1 d4 Nf6 2 c4 e6 3 g3 d5 4 Bg2 Be7 5 Nf3 0-0 6 0-0 (columns 37–42), entails less immediate tactics as Black can develop his/her pieces behind the pawns. The most usual follow-up is 6 . . . Nbd7 (columns 37–44) when White gains slightly more space and freedom with 7 Qc2, planning the advance e4 with or without including the positionally desirable b3. Alternative lines in columns 45–48 leave much the same story—White holds a slight advantage. Despite the evaluation, players may choose the Closed Variation as White's advantage does not threaten to become too great and there is room for strategic maneuvering.

CATALAN OPENING

- (a) 6 . . . c5 7 dxc5 Qxd1 8 Rxd1 Bxc5 9 Ne5 ±, Razuvavaev–Geller, USSR 1988.
- (b) 7 . . . c6 8 b3 (8 Nxc6 Qb6 9 Ne5 Bb7 10 a4 Bxg2 11 Kxg2 Qb7† 12 Kg1 Nbd7 =, Cebalo–Sveshnikov, Athens 1983) 8 . . . cxb3 9 Nxc6 Qb6 10 Na5 Ra7 11 Nxb3 Rd7 12 e4 ±, Krasenkov–Kohlweyer, Ostend 1996.
- (c) After 8 Nc3 Bb7 9 Nxd5 exd5 neither 10 e4 nor 10 b3 lead to an edge for White.
- (d) Probably best is the sacrifice 12 . . . b4(!) 13 exd5 Bxd5 14 Bxd5 Qxd5 15 Qd3 Bd6 with roughly even chances, Aaberg–Kaidanov, Gibraltar 2007.
- (e) 14 Nb5 c6 15 d5 cxb5 16 dxe6, Vladimirov–Thórhallsson, Gausdal 1991. After 16 . . . Qxd1 17 exf7† Ke7 18 Rxd1 White has very good compensation (Vladimirov).
- (f) 10 axb5 axb5 11 Rxa8 Bxa8 12 Qxb3 c6 13 Nc3 Nd7 =.
- (g) Gelfand–Riemersma, Arnhem 1987. After 14 Qf3 Ne7 15 Qg4 correct is 15 . . . Ng6 (15 . . . 0-0? 16 e5 ±) 16 d5 ∞.
- (h) 12 . . . b4 is bad because of 13 Qa4† Nbd7 14 Nb5 (Dunnington).
- (i) Instead 13 . . . exd5 14 exd5 Nxd5 15 Qh5 is strong. Also 13 . . . Bd6 14 Ng4 b4 15 Nxf6† gxf6, Romero–Antunes, Havana 1991; now 16 Nb1 would be ±.

After 13 . . . Be7 14 dxe6 fxe6 15 Qe2 0-0 16 Bh3 Qe8 (16 . . . Qc8 17 Nf3 ±, Zilberstein–Novikov, USSR 1988) 17 Bxe6† Kh8 18 Bf5 White has a significant edge, Krasenkow–Kaidanov, Gausdal 1991.

- (j) 10 Nc3 0-0 11 Ne5 Qe8 12 b3 Nd5!? 13 Bxd5 exd5 14 Nxd5 Nxe5 15 dxe5 Ra7 16 bxc4 ±, Aronian–Carlsen, Morelia/Linares 2007. This line is complicated and there may be improvements.
- (k) The position is about even, White having compensation for the pawn, K. Urban–Dautov, Pula 1997.
- (l) 8 . . . Rb8 9 Ne5 Na5, Gulko–Korreev, Mondariz 1997. White's space and central initiative compensate for the pawn.
- (m) 9 Ne5 Bxe5 10 dxe5 Nxe5 11 Bxb7 Rb8 12 Bg2 (12 f4 Nd3 13 Bxa6 Nxb2 ≈, Bouwmeester–Oim, corr. 1993), Tibensky–Haba, Czech Republic 1991; now 12 . . . 0-0 13 Qd4 is slightly better for White.
- (n) 10 a4 Rb8 11 e4 Be7 =, Neishtadt–Oim, corr. 1990.
- (o) 14 Bg5 c6 15 Bxf6 gxf6 16 f4 (not 16 Bh3 Bxh3 ≈, Sterud–Neishtadt, corr. 1990) 16 . . . Bxc3 17 bxc3 Qe7 draw agreed, Razuvaev–A. Petrosian, Tashkent 1994. Black's kingside weaknesses are balanced by the extra pawn.
- (p) After 7 Be3 Nd5 8 dxc5 Nd7 neither 9 Nxc4 nor 9 Bd4 gives White any advantage.
- (q) 7 . . . Qxd4!? 8 Qxd4 cxd4 9 Naxc4 Nfd7 was all right for Black In Ehlvest–Azmaiparashvili, Liepajas 2006.
- (r) 14 Nxe5 Qd5 15 Qc6† Qxc6 16 Nxc6, I. Almasi–Vadasz, Budapest 1997; now Black can equalize with 16 . . . Bc5 17 Rc1 Bb6.

12	Bc3 Qe7(c)	Nc3 Nxd4(f)	axb3 Rb6(h)	Nc3 Nd5(l)	exd5 Bxa1(o)	dxe5(r) Nxe5 =

- (a) (A) 6 ... Qd5 7 0-0 Bd7 8 Nc3 Qh5 9 Qxc4 ±, Bukić–Cvetković, Portorož 1971. (B) 6 ... Bd7 7 Qxc4 Na5 8 Qd3 c5 9 0-0 Rc8 10 Nc3 Bc6 11 Rd1 ±, Dizdarević–Vuković, Yugoslavia 1990.
- (b) 9 Bc3 Nd5 10 Qxc4 Nxc3 11 bxc3 Na5 12 Qd3 c5 13 Nbd2 cxd4 14 cxd4 Bd7 15 Ne4 Be7 =, Carlsen–Ponomariov, Tal Mem. 2006.
- (c) 13 Bxe5 Qxe5 14 Nc3 c6 =, Karpov–Kramnik, Wijk aan Zee 1998.
- (d) Maneuvering with 8 Qb5 Bd7 9 Qb3 allows 9 ... Na5 10 Qd3 c5 11 dxc5 Bxc5 12 Qc3 Rc8! 13 Qxg7 Bf8 14 Qg5 Qxg5 15 Bxg5 Bg7 =, Kramnik–Naiditsch, Dortmund 2006.
- (e) 9 Nxe5 Nb4 10 Qc3 Qxd4 11 0-0 Qxc3 12 Nxc3 Bd6 13 Nf3 c6 14 Nd4 0-0 =, Beliavsky–Adams, Madrid 1998.
- (f) 13 Bxd4 c5 =, Wojtkiewicz–Mikhailchishin, Nova Gorica 1997.
- (g) (A) 8 e3 Nd5 9 0-0 Be7 10 Qe2 Nb6 =, Beliavsky–Portisch, Linares 1988.
 (B) 8 Qa4 Qd7 9 Qxc4 Nxd4 10 0-0 c5 11 Nc3 Rd8, Sosonko–Lukacs, Volmac–Spartacus 1987. After 12 Bg5 b5 13 Qd3 Be7 Lukacs evaluates the position as a slight edge for Black.
- (h) Now White has two continuations: (A) 13 Rd1 a6 14 Nc3 Be7 15 Bb2 Nb4 16 e4 0-0, Petursson–So, Polgar, Århus 1993. White's space advantage fully

compensates for the pawn. (B) 13 Bxc6 Rxc6 14 Rxa7 Bd6 15 Ba3 Bxa3 16 Nxa3 \pm , Stohl–Zsu, Polgar, Rimavská Soboda 1991.

- (i) 6 Qa4 is equally possible: 6 ... Be7 (6 ... a6 is column 31 by transposition) 7 Qxc4 0-0 8 0-0 \pm , Gronn–H. Hunt, Gausdal 1992.
- (j) 6 ... c5 7 Na3 Nb6 8 Bg5, Atalik–Sturua, Chalkia 1996; now Atalik suggests 8 ... c3 =.
- (k) The usual move had been 10 ... c5, but White is just slightly better in that case.
- (l) 13 Rd1 with a small edge to White, Krasenkow–Hübner, Polanica Zdroj 1996.
- (m) 7 Ne5 Nd5 8 0-0 Bb7 9 b3 is another approach. After 9 ... cxb3 10 axb5 cxb5 11 Qxb3 a6 12 e4, Agzamov–Foisor, Sochi 1985, White's play in the center was more than adequate compensation for the pawn.
- (n) (A) 11 ... Bxd4 12 Qxd4 Qb6 13 Nf3 \pm . (B) 11 ... Nf6 12 bxc3 Nbd7 13 Nc6 \pm , Kinsman–Bryson, Edinburgh 1996. (C) 11 ... Ne7 and (D) 11 ... Bb4 also fail to equalize.
- (o) 13 Ba3 a5 14 dxe6 Bxe6 15 Bxa8, Kengis–Meister, Togliatti 1985; now after 15 ... b4 16 Qxa1 0-0 17 Bc1 or 15 ... Qxd4 16 Qxa1 Qxa1 17 Rxa1 b4 18 Bc1 White is slightly better.
- (p) 7 Qc2 Bd7 8 Qxc4 Bc6 9 Nc3 Ne4 =, Beliavsky–Kovacević, Sarajevo 1982.
- (q) 9 Nxc6 Bxc6 10 Bxc6† bxc6 would favor Black.
- (r) 12 Rd1 exd4 13 Be1, Hudeček–Verdikhanov, Pardubice 1997; now Verdikhanov gives 13 ... Qe6 14 Bxc6 Qxc6 15 Rxd4 b5 \mp .

NIMZO-INDIAN DEFENSE

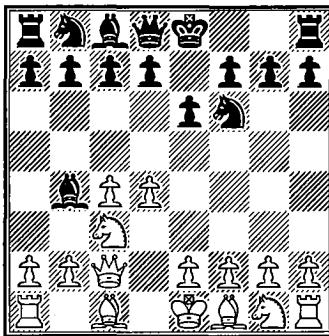

1 d4 Nf6 2 c4 e6 3 Nc3 Bb4

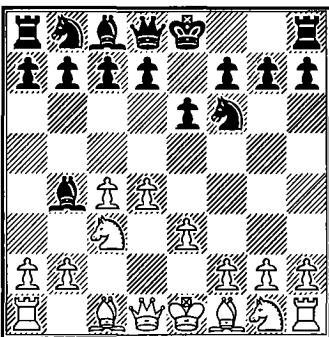

THE NIMZO-INDIAN DEFENSE is a highly respected strategy to constrain the White center while actively posting the Black pieces. The pin of the White knight allows Black several strategic themes which were explored by the great chess theoretician, Aron Nimzovich, in the 1920s and 30s. The themes, such as blockade, restraint, and working against doubled pawns, were part of the “hypermodern” ideas which he and others developed at the time (see his classic work *My System*).

The Nimzo-Indian is labeled as an “Indian” defense without having the characteristic fianchetto. It has, however, the defining trait—Black does not occupy the central squares at first, but his/her pieces control them. The third move pin impacts the e4 and d5 squares, and further moves deter White from advancing in the center until Black is ready to make a stake there. The plan and opening are regarded well. Since its invention, the opening has been employed by all the World Champions and other top players.

White’s chances for advantage are due to his/her pawn center and the frequent occurrence of gaining the bishop pair. The main variations seek to use these possible advantages in different strategic ways.

The Classical Variation, 4 Qc2 (columns 1–18), has remained the most fashionable line for the last decade (see above diagram). This move avoids the doubled pawns, thereby reducing Black's counterchances. A favorite of Capablanca, the Classical Variation was popular in the 1930s and 40s, but afterwards was regarded as a dull and drawish line for many decades. New ideas in the 1980s and 90s from Ivan Sokolov, Kasparov, and others led a revival of the variation and its current status today. 4 ... 0-0 5 a3 Bxc3† 6 Qxc3 (columns 1–6) leaves Black with a choice of responses. Most usual is 6 ... b6 (columns 1–3), but 6 ... Ne4 (column 4) and 6 ... b5 (column 6) are active moves that will make White think. The central thrust 4 ... d5 is covered in columns 7–12. There are sharp, sacrificial lines arising from 5 a3 Bxc3† 6 Qxc3 Ne4 7 Qc2 (columns 7–8). The safer continuation, 5 cxd5 (columns 10–12), has run into a new idea, 5 ... Qxd5 6 Nf3 Qf5! (column 10), which has been very solid for Black in practice. Lines seen less in practice constitute columns 13–18. 4 ... c5 (columns 13–14) is positionally well motivated, but Black has difficulty avoiding a worse endgame after White's continuation in column 13. The Milner-Barry Variation, 4 ... Nc6 (columns 15–16), and 4 ... d6 (columns 17–18) appear to leave White an edge.

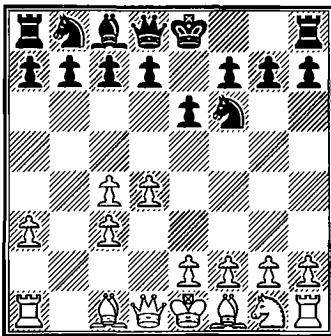

The Rubinstein Variation, 4 e3 (columns 19–48, see previous diagram), has always been a highly regarded response to the Nimzo-Indian. White pursues kingside development and strengthens his/her center. The queen's bishop is temporarily locked behind the pawns, but this is not a worry since there will be ensuing central activity to open lines. With 4 . . . 0-0 5 Bd3 d5 6 Nf3 c5 7 0-0 (columns 19–30) both sides develop and play for control of the center. The main line is 7 . . . Nc6 8 a3 (columns 19–24), leaving Black a choice of continuations. Columns 19–20 are the well-known 8 . . . Bxc3 9 bxc3 dxc4 10 Bxc4 Qc7, a complex position that has been argued about for decades. After 7 0-0, Black develops differently in columns 25–30, usually moving his/her queen's knight to d7 and fianchettoing the queen's bishop. Column 25, 7 . . . dxc4 8 Bxc4 cxd4 9 exd4 b6, has been Karpov's favorite defense for many years.

Deviations for both sides after 4 e3 0-0 are seen in columns 31–36. Black develops with 6 . . . b6 in columns 31–32, playing for light-square control. Column 33 is an earlier a2-a3 by White. Column 34 is the alternate development of the king's knight, 6 Nge2 after 5 Bd3. Reshevsky's Variation 5 Nge2 (columns 35–36) avoids the doubled c-pawns and intends to chase the Black bishop with a2-a3. White's bishop on f1 is blocked for the moment though, and accurate play should enable Black to reach equality.

Fischer's System, 4 . . . b6 (columns 37–42), is a flexible approach in the style of Nimzovich. Black continues to hold back his/her central pawns and plays to control squares with pieces. 5 Ne2 (columns 37–40) is the most difficult move to meet as Black cannot play 5 . . . d5 (6 Qa4†!), the best response to Reshevsky's Variation. Still, Black has a choice of continuations and the variations are less analyzed than those arising from 4 . . . 0-0.

Meeting the Rubinstein Variation with 4 . . . c5 (columns 43–46) has been well respected ever since Hübner invented his blockading system 5 Bd3 Nc6 6 Nf3 Bxc3† 7 bxc3 d6 (columns 45–46). Three decades after its inventing, White has still not found any way to gain the advantage. Thus 5 Ne2 (columns 43–44) has become the main continuation after 4 . . . c5, when Black can exchange on d4, followed by . . . d5 (column 43), or play 5 . . . b6 (column 44).

Two unusual responses to the Rubinstein are 4 . . . d5 (column 47) and 4 . . . Nc6 (column 48). These offbeat lines are positionally risky.

The Sämisch Variation, 4 a3 Bxc3† 5 bxc3 (columns 49–54), see above diagram, is White's sharpest and most direct answer to the Nimzo. White immediately accepts the doubled pawns, being satisfied with the strong center and bishop pair. This is a good line for attacking players, but theoretically Black is all right. The tempo used (a3) to make Black carry out his/her strategy allows time to counter the White buildup. The main continuation is given as 5 . . . d5 6 f3 c5 (columns 49–51) as this position occurs from both the Sämisch Variation and the 4 f3 variation (after 4 . . . d5 5 a3 Bxc3† bxc3 c5).

The recently fashionable 4 f3 is covered in columns 55–56, but these are only Black's secondary responses, the usual reply being to transpose into the Sämisch Variation.

The Leningrad Variation, 4 Bg5 (columns 57–60), is played by Yermolinsky and Bareev. White's pin causes Black to play a different plan than the other Nimzo variations. After 4 . . . h6 5 Bh4 the bishop may be missed on the queenside, however.

White can play flexibly with 4 Nf3 (columns 61–63). This can transpose into other variations; the distinct variation 4 . . . b6 5 Bg5 is seen in columns 61–62.

Spielmann's 4 Qb3 is a reasonable offbeat line. This is covered in column 64 and by transposition (after 4 Nf3 b6 5 Qb3) in column 63.

4 g3 (columns 65–66) was popular in the 1980s, but is little used today.

NIMZO-INDIAN DEFENSE

Classical Variation

- (d) 10 cxd5 exd5 11 e3 (11 Bxf6 Qxf6 12 Qxc7 Ba6 13 Qe5 Qg6 and Black is active) 11 ... Re8 12 Nh3 Qe7 13 Bf2 c5 14 Bb5 Bc6 =, Gulko–Chandler, Hastings 1989/90.

- (e) 11 Nh3 c5 12 cxd5 cxd4! 13 Qxd4 e5 14 Qd1 Bxd5 =, Gagunashvili–Lutz, Turin Ol. 2006.
- (f) Leading to an equal game is 13 Bxc7 Nd5 14 Bd6 Nxe3 15 Kf2 Nc2 16 Rd1 Rfc8 17 Bb5 Nf6 18 Ne2 a6 19 Ba4 B5 20 Bb3 Bd5 21 Bxd5 Nxd5 22 Rd3 Rc6 23 Bc5 e5!, Salov–Karpov, Skellefteå 1989.
- (g) 14 Bf2 c5 15 e4 Ne7 16 Ne2 Rac8 with just a minute edge for White, Kramnik–Leko, Dortmund 2006.
- (h) 8 Nh3 h6 9 Bh4 d5 10 cxd5 exd5 11 e3 c5! 12 dxc5 (safer is 12 Bd3 Nc6 =) 12 . . . d4 13 Qxd4 Qxd4 14 exd4 Re8t 15 Kd2 g5 16 Bg3 Nc6 17 Bb5 Red8 and Black's activity outweighs the pawns, Flear–Hellers, San Bernardino 1990.
- (i) It is important to control e4. The natural 9 Nf3 is ineffective, e.g. 9 . . . Nbd7 10 Be2 c5 11 0-0?!! Ne4 12 Bxd8 Nxc3 ≡, or 10 Qc2 Qe8 11 Nd2 c5 12 dxc5 bxc5 13 b4 e5 =, Reshevsky–Keres, World Championship Tournament 1948.
- (j) After 10 . . . h6 11 Bh4 e5 12 Bf5 White's bishops exert annoying pressure, e.g. 12 . . . exd4 13 Qxd4 Ne5 14 0-0-0 c5 15 Qc3 ±, Goldin–Alterman, Rishon le-Zion 1996.
- (k) 14 cxd5 Bxd5 15 Qa4 cxd4 16 exd4 Bc6!= Bareev–Leko, Russia vs. The World (rapid) 2002.
- (l) 8 g3 d5 9 Bg5 dxc4 10 Qxc4 Nbd7 11 0-0 c5 =.
- (m) On 9 Be2 Ne4 10 Qc2 f5 (10 . . . Ng5!?) 11 0-0 Nbd7 12 b4 Black obtains reasonable play with either 12 . . . Qe7 and 13 . . . c5 or 12 . . . Rf6 eyeing the kingside.
- (n) 14 b5 f5 15 0-0 e5 with a double-edged and roughly equal position, Gudmundsson–Arnason, Grindavik 1984.
- (o) Not 8 f3? Qh4t, but White has other tries against the early knight sortie:
 (A) 8 Nh3 d6 9 f3 Nf6 10 e3 e5 11 dxe5 dxe5 12 Be2 a5 13 b3 c5 14 Nf2 Nc6 =, Vigorito–Sarkar, Las Vegas 2006. (B) 8 e3 b6 9 Ne2? Bb7 10 f3 Nd6 ∞, Beliavsky–Lobron, Dortmund 1995.
- (p) 9 e3 Bb7 10 Be2 d6 transposes into note (m).
- (q) Black gets into trouble on the long diagonal after 10 . . . d6?!! 11 Ng5!. The column is Adianto–de Firmian, Biel 1995.
- (r) 7 Nf3 Nbd7 8 g3 b6 9 Bg2 Bb7 10 0-0 c5 11 Rd1 Qe7 12 b3 ±, Gavrikov–Kosten, Palma de Mallorca 1989. White's kingside fianchetto works better when Black has played . . . d6.
- (s) Probably best for Black is 8 . . . b6 9 Bd3 Bb7 10 f3, transposing into column 2. Column 5 covers Black playing for e6–e5.
- (t) 11 . . . exd4 12 exd4 Nf8 13 Qc2 Bg4 14 f3 Bh5 15 0-0 Bg6 16 Nc3 Bxd3 17 Qxd3 Ng6 18 Bxf6 Qxf6 19 f4! c6 20 f5 Nf8 21 Ne4 ±, I. Sokolov–Wilder, Haninge 1989.
- (u) 14 Bf2 e4 15 fxe4 Nxe4 16 Bxe4 Qxe4 17 Ng3 Qg6 18 e4 ±, Drasko–Bogdanović, Sestola 1991. Black could improve slightly with 12 . . . e4, but White still has some advantage.

(v) Accepting the gambit allows Black compensation due to his lead in development and light-square play: 8 bxc6 Nxc6 9 b4 Ba6 10 Bg5 h6 11 Bxf6 Qxf6 12 Nf3 Rac8 13 Qb2 Rc7! 14 e3 (14 b5? Bxb5 15 Qxb5 Nxd4) 14 ... Bxf1 15 Kxf1 Rfc8 =, Polugaevsky–Dzindzichashvili, Reykjavik 1990.

(w) 14 Bxd8 Rfxd8 15 Rfc1 \pm , Bareev–Anand, Melody Amber 2005.

QUEEN'S INDIAN DEFENSE

1 d4 Nf6 2 c4 e6 3 Nf3 b6

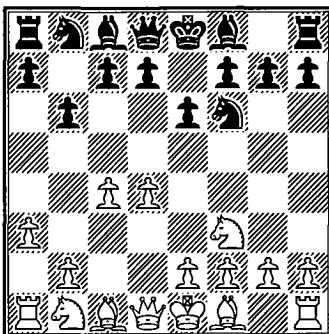

WHITE'S CHOICE OF Nf3 on the third move invites the Queen's Indian Defense. Players use the opening set of the Nimzo-Indian and Queen's Indian to make a complete defense to the queen pawn. This allows the more flexible strategies of the Indian Defenses compared with the double queen pawn openings, although it does not immediately challenge White's staking out the center. Black seeks good posts for his/her pieces before deploying the central pawns.

Of all the Indian Defenses, the most solid and risk free is the Queen's Indian. Black restrains White's center without weakening his/her pawn structure, ceding the bishop pair, or making another significant concession. The only negative factor is that White will have a little more space, but this is not enough to significantly restrict the Black pieces. You must be willing to live with this if you play the Queen's Indian. The opening was in fact once regarded as too solid to gain an advantage against, but (as always) new ideas came forth on the White side, particularly in the 4 a3 lines.

The exchange of one or two minor pieces is usually enough to solve Black's spatial problems, the most common exchange being . . . Ne4 and exchanging for the White knight on c3. The e4 square is important in the scheme of this opening; if White can control it without making serious concessions he/she will have the advantage.

The Queen's Indian was developed by Nimzovich and other "hyper-moderns" in the early twentieth century. While many top players use it today, its most notable exponent has been Karpov, whose style is exactly like this opening—correct and safe, with possibilities for active play.

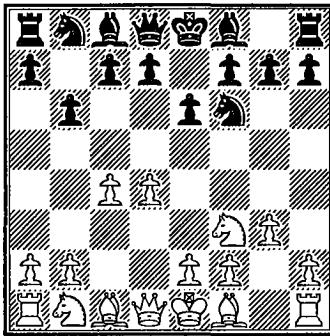

The Petrosian System, 4 a3 (columns 1–18), is the sharpest and most aggressive plan for White, see above diagram. It came to prominence in the 1980s when Kasparov scored victories with it in brilliant attacking games. It was a major reason for renewed interest in the White side of this opening, and has been probably the most popular choice in the last three decades. The point of 4 a3 seems slow—to play 5 Nc3 and avoid the pin . . . Bb4. Yet it influences the central play and Black has no way to exploit the tempo that combines that well with . . . b6.

Black's sharpest and most direct response is 4 . . . Bb7 5 Nc3 d5 6 cxd5 Nxd5 (columns 1–6). White obtains a mobile pawn center that allows for sharp play and kingside attacks. In the last decade Black has discovered satisfactory defenses, but the character of the game is like an aggressive king-pawn opening with decisive results common.

In columns 7–8 Black recaptures 6 . . . exd5, leading to less dynamic play more typical of double queen pawn openings. White has more theoretical chances here. Columns 9–10 cover 6 Bg5, a move that aims for a technical advantage. 6 Qc2 (columns 11–12) is also a respected alternative, but play is sharp and aggressive.

Fourth- and fifth-move variants constitute columns 13–18. These systems are less played but generally no worse than defenses in columns 1–12. Column 13 is 4 . . . Bb7 5 Nc3 Ne4, formerly regarded as bad in theory, yet Black may be all right. Column 14 is Romanishin's 5 . . . g6. Columns 15–17 cover the significant system 4 . . . Ba6 5 Qc2 Bb7 6 Nc3 c5.

The classical response to the Queen's Indian is the fianchetto, 4 g3 (columns 19–36), see above diagram. White contests the h1–a8 diagonal with its central e4 and d5 squares. 4 g3 takes the game into a positional/strategic struggle in which White seeks to consolidate a spatial advantage. Play is quieter than the 4 a3 variation, draws being a more common result.

The main line of the fianchetto variation is 4 . . . Bb7 5 Bg2 Be7 6 0-0 0-0 (columns 19–24), with 7 Nc3 Ne4 (columns 19–22) the usual continuation. The exchange of a minor piece allows Black more freedom of movement, but the cramping effect of a White pawn on d5 is still a worry. Karpov has won some fine games from the White side of this variation. Column 23 is 7 . . . d5, contesting the center with pawns yet allowing White more active pieces. The pawn sacrifice, 7 d5 (column 24), has been worked out to equality.

Delaying castling with 6 Nc3 (columns 25–26) is one of White's most aggressive lines after 4 g3. Play can become very tactical as the struggle for the central squares e4 and d5 begins immediately. Column 27 looks at 5 . . . c5, which leads to a Benoni-like position. Systems with . . . Bb4† are covered in columns 28–30. The plan, as in the Bogo-Indian, is either to exchange the bishop, alleviating spatial problems, or to alter White's natural piece setup.

The exaggerated fianchetto, 4 . . . Ba6 (columns 31–36), is another idea from Nimzovich. White's best and most usual reply is 5 b3, when Black can choose from different continuations of . . . Bb4† and attacking c4 with either the d- or b-pawn. 5 Nbd2 (column 35) and 5 Qc2 (column 36) are not as theoretically critical.

Other systems for White on the fourth move are covered in columns 37–42. 4 e3 (columns 37–39) intends straightforward development and attacking play. Black should contest the center with pawns when he/she is theoretically all right, though play can become tactical. 4 Nc3 (columns 40–41) would transpose into the Nimzo-Indian Defense after 4 . . . Bb4. Lines considered here are strictly Queen's Indian variations. 4 Bf4 (column 42), an old move of Miles', takes play into unusual territory and is not particularly dangerous.

BOGO-INDIAN DEFENSE

1 d4 Nf6 2 c4 e6 3 Nf3 Bb4†

THE BOGO-INDIAN DEFENSE is a simple, straightforward plan to develop the kingside and castle to safety. It is named after Efim Bogoljubow, a world title contender from the 1930s. The check with the bishop either forces White's knight to d2 or exchanges bishops to relieve worries of a cramped position. The plan does not cause any trouble for White—it is not a strategy based on counterplay. It is no wonder that this opening was used for decades by the ultra-safe Swedish champion, Ulf Andersson, whose goal was to avoid losing. Its more recent advocate, Micky Adams of England, has added some dynamic ideas on the Black side, though he, too, uses the defense to avoid losing. The risk of the opening is that White gets a spatial advantage with no cost, and that can be trouble depending on the circumstances.

4 Bd2 (columns 1–6) puts the question to Black: whether to exchange immediately or to protect the bishop. 4 . . . Qe7 (columns 1–2) would allow White the extremely drawish exchanges of 5 Bxb4 Qxb4† 6 Qd2 Qxd2† etc., though he/she usually tries for the advantage. Against White's kingside fianchetto Black counters with a dark-square strategy in the center. The immediate exchange, 4 . . . Bxd2† (column 3), either follows a similar strategy or contests the center with . . . d5 (note h). With 4 . . . a5 (columns 4–5) Black again follows the strategy of placing pawns on dark squares (in anticipation of the dark-squared bishop exchange), but here he/she first directs attention to the queen-side. The odd-looking 4 . . . c5 was popular in the 1980s but has since lost favor.

With 4 Nbd2 (columns 7–12) White plans to gain the bishop pair. In column 7, Black avoids this by retreating the bishop, at the cost of less space. Columns 8–12 offer Black various strategies after exchanging the

bishop for the knight on d2. Columns 8 and 11 are Queen's Indian-type plans with . . . b6. Column 9 is the strategy of placing pawns on the central dark squares. Column 10 is a thrust in the center with . . . c5 and column 12 a thrust with . . . d5.

KING'S INDIAN DEFENSE

1 d4 Nf6 2 c4 g6

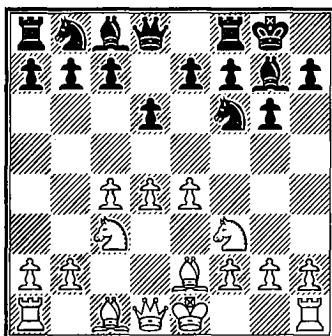

If someone had played the King's Indian Defense in the nineteenth century, he/she would have been classed as an ignorant beginner who didn't know how important the center of the board is. The opening only came into existence during the "hypermodern" era of the 1920s. It came quickly into prominence when in the 1940s Bronstein, Boleslavsky, and Reshevsky scored brilliant victories with it. Thirty years later the King's Indian was the absolute height of fashion when Bobby Fischer became World Champion. It was his main defense to the queen pawn and the opening seemed to be active, sound, and reliable. Later Kasparov would pick up the torch and continue the cause of the Black pieces.

The pendulum has swung back in the last decades as players of the White side have stopped some counterplay and found ways to punish Black's lack of space. Kramnik has particularly caused suffering to the Black-side players from the 1990s to the present. On the White side one also must definitely mention Korchnoi, who has continued to find new strategies at the top level for more than fifty years. Nonetheless, today the King's Indian attracts many aggressive young grandmasters (as eighty years ago) who keep it in the forefront of modern chess opening theory.

Black cedes the center in the first few moves, preparing to attack it once his/her forces are partially mobilized. The most usual break in the center is the pawn thrust . . . e5, although . . . c5 is not infrequent. When White responds to . . . e5 with d5, the locked center may give rise to pawn storms on opposite sides of the board, the winner being the first to successfully break through with an attack. Pawn and even piece sacrifices in the interest of the initiative are commonplace to the point of becoming established theory.

The wild play of blocked centers may encourage White in two other directions. He/she can just maintain the pawn on d4, leaving the choice

with Black to cede the higher center to White with . . . exd4 or further continue the tension. Tactics here can also explode at any moment. White can also exchange on e5, leading to relatively stable play.

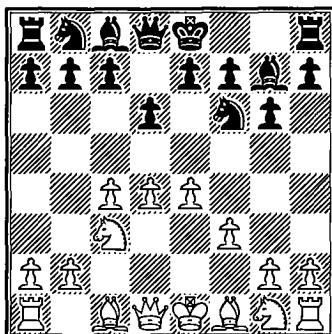

The Classical Variation, 3 Nc3 Bg7 4 e4 d6 5 Nf3 0-0 6 Be2 (cols. 1–42, see above diagram), has managed through the waxing and waning of its viability to accumulate a massive pedigree, culminating in its current feverish popularity. The main line, 6 . . . e5 7 0-0 Nc6 8 d5 Ne7 9 Ne1 (cols. 1–6), still leads combatants to move 25 and beyond before novelties are sprung. The zenith of fashion for the last decade is the Bayonet Attack, 9 b4, when Kramnik's taciturn answer to 9 . . . Nh5, 10 Re1 (cols. 7–9), continues to give Black trouble, while the older 10 g3 (cols. 10–14), 10 c5 (cols. 15–16), and 10 Nd2 (column 17) deserve attention as well. 9 Bd2 (cols. 19–21), a sort of waiting developing move, survived Taimanov's 0-3 score with it against Fischer in 1971 and is still seen, while 9 Nd2 (cols. 22–24), the new main line of the 80s and early 90s, just isn't seen much anymore. 9 Bg5 (cols. 25–26) intends a coherent plan, development while diluting Black's attacking pieces; 9 Kh1 (column 27) was a typical Larsen theory sidestep without much bite.

And finally for the Main Line with 7 . . . Nc6, trying to avoid the blocked center for at least a while with 8 Be3 may have caused Fischer repeated headaches in the 1960s but it just hasn't been a problem of late.

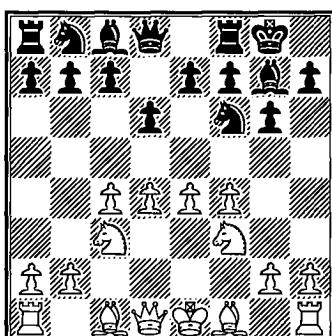

Black may well choose alternatives at move 7; 7 . . . Nbd7 (cols. 31–32) is a solid line, with plenty of sharp variations of its own, but White frequently retains a spatial edge. 7 . . . Na6 (cols. 33–34) tries to put an esoteric spin on the position, perhaps at the cost of total soundness. And 7 . . . exd4, while encouraging some wild skirmishes in the center, risks serious compromise.

White's earlier alternatives to castling are worth attention. 7 d5 (cols. 37–38) is the Petrosian System, which forces Black to maneuver before kingside play can be begun. Kramnik helped its cause with a brilliant win against Kasparov, though the opening was not convincing. 7 dxe5 (cols. 39–41) is the aforementioned quiet exchange line. Even without queens or

pawn tension the play can get exciting, but endgame features are likely. And finally for the Classical, certain players of Black prefer 6 . . . Bg4 (column 42), keeping central options open.

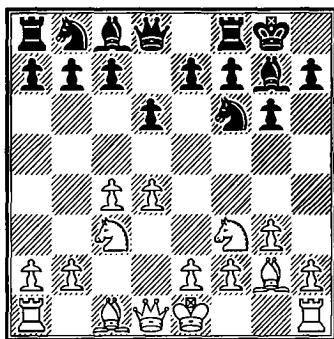

The Sämisch Variation (cols. 43–48, see above diagram), 5 f3, rejects immediate development in favor of securing posts for both queen bishop and king knight without harassment by . . . B/Ng4, plus the possibility of a quick kingside attack with g2-g4. But Black has a wealth of plausible responses that stretch the credibility of White's premise. The most complicated reply is the Panno line 5 . . . 0-0 6 Be3 Nc6 (cols. 43–44), when the thicket of possibilities increases for both sides. Alas, we can only scratch the possibilities here. Black can as usual play 6 . . . e5 (column 45), when recent games seem to prefer 7 Nge2 keeping the tension. And the various moves 6 . . . c5 (column 46), 6 . . . a6 (column 47), 6 . . . Nbd7, and 6 . . . b6 all avoid the usual King's Indian plan . . . e5 in an attempt to embarrass White. 6 . . . c6 (column 48), the Byrne Variation, shows a less common but mostly successful plan, . . . a6 and . . . b5.

The Four Pawns' Attack 5 f4 0-0 6 Nf3 (cols. 49–54, see above diagram) is the grandiose response to the King's Indian's central disregard. Black's traditional reply was for years 6 . . . c5, when White chooses between a Benoni-like 7 d5 (column 49) with sharp play, or more restrained

attempts at a bind with 7 dxc5 (column 50) or 7 Be2 (cols. 51–52). Free thinking produced 7 ... Na6 (column 53) to get ... e5 in after all; this is more in line with the spirit of the King's Indian.

White's other fifth moves are covered in columns 55–60. 5 h3 (cols. 55–56) takes a moment to stop Black from harassing via g4 again, but keeps open Nf3. After 5 ... 0-0 White has various choices (6 Nf3 column 55, 6 Be3 note d, 6 Bg5 column 56), when Black also has the frequent choice between King's Indian and Benoni structures. The Averbakh, 5 Be2 0-0 6 Bg5 (cols. 57–58), is no longer popular with the top players. While it pressures Black for a while in the old 6 ... c5 lines, equality is the eventual result; plus, the recent 6 ... Na6 idea again might let Black play à la King's Indian with ... e5. The lines 5 Bd3 0-0 6 Nge2 (column 59) and 5 Nge2 0-0 6 Ng3 (column 60) both have their adherents among the avoiders of main lines, but solutions for Black have been found.

The Fianchetto System, 3 g3 Bg7 4 Bg2 0-0 5 Nc3 d6 6 Nf3 (cols. 61–78, see above diagram), is a more positional approach to the center. White also postpones central expansion until he has completed his king-side development. Black's classical approach, 6 ... Nbd7 7 0-0 e5 (cols. 61–66), heads for pressure on d4 while sidestepping a knight attack with d5. White typically continues 8 e4 c6 9 h3 to hold the center, when the most usual result is the eventual exchange ... e5xd4 Nxd4. It would seem that the pawn at d6 is then weak, but just as often the e4 pawn comes under fire. White can try to avoid creating a target with 8 Qc2 Re8 9 Rd1, but must be prepared to handle 9 ... e4!? 10 Ng5 e3!? with complications.

Black's main alternative is the complex of variations beginning with 6 ... Nc6. After 7 0-0, the Uhlmann Variation, 7 ... e5 is no longer considered theoretically comfortable. Sharpest and most popular is 7 ... a6, known as the Panno Variation (cols. 69–71). White can force serious imbalances with 8 d5 Na5 9 Nd2 c5 10 Qc2 (column 69) or continue to crouch with 8 h3 Rb8 9 Be3 (column 71). In both cases play is razor-sharp, with positional collapse looming at the first slip. Still occasionally seen is the 6 ... c5, the Yugoslav Variation (cols. 73–74), 8 d5 (column 73) can

lead to a similar line to the Panno after 8 . . . Na5 9 Nd2 e5, but most players of Black find the relatively colorless symmetrical line 8 dxc5 dxc5 (column 74) reason enough to avoid the Yugoslav. 6 . . . c6 7 0-0 Qa5, the Soltis Variation (cols. 75–77), still gets played, though it seems to leave White too many options to get a space advantage.

Finally, Black may have chosen the King's Indian structure against the fairly popular 2 Nf3 g6 (cols. 79–84). Of course White has a wide selection of moves here; the most common are 3 Bg5, the Torre Attack (col. 80) and 3 Bf4, the London Attack (column 81). These lines are a popular subject for "How to Win as White" books, but objectively cannot be as good as the more aggressive lines considered earlier.

16	c5 h5	Nf2 h5	Nd3(j) h5(k)	Nd3 Rh6	Rb1 Qb8	Qe2 Ng6
17	cx d6 cx d6	h3 Kh8	Nb5 Bd7	a4 Qe8	b3 Rf7	Kh1 Bd7
18	Nb5(d)	Nb5 Neg8(g)	a4 Bh6(l)	Kh1 Bd7(o)	Qc1 Qc7(s)	Rg1 fxg4(u)

- (a) 9 . . . Ne8!?! has its pluses and minuses. While it doesn't slow down the c5 push, it defends c7. 10 f4!?! (this is good when Black's Nf6 strays from e5) 10 . . . exf4 11 Bxf4 h6 12 Nf3 g5 13 Be3 f5 14 exf5 Nx f5 15 Bf2 and Black's position is loose. A Korchnoi favorite after 9 . . . Ne8 is 10 Be3, e.g. 10 . . . f5 11 f3 f4 12 Bf2 g5 13 c5 Ng6 14 a4 Rf7 15 Nd3 Bf8 16 a5 Rg7 17 a6 and White was better in Korchnoi–van Wely, Antwerp 1997.
- (b) 10 Nd3 f5 11 Bd2 used to be the mainline but is less played nowadays as Black often gets good attacking chances. Play could continue 11 . . . Kh8 12 Rc1 Nf6 13 f3 c5 14 dxc6!?! Nxc6 15 Be3 Be6 with chances for both sides, Kozul–Kotronias, Turin Ol. 2006.
- (c) Korchnoi's move 13 a4 has become most popular in this position. White immediately begins queenside play.
- (d) White is a little better in this complex, theoretical position, van der Sterren–Nijboer, Rotterdam 2000. Now 18 . . . a6 fails to 19 Bb6! Qe7 20 Nc7 Rb8 21 Ba7! Qxc7 22 Rc1 Qxa5 23 Bxb8.

- (e) (A) 13 . . . Rf6 14 Nb5 a6 15 Na7! forces Black to either exchange the important light-squared bishop or give up the exchange, Summerscale–Black, Birmingham 2001. (B) 13 . . . a6 14 a5 Rf6 15 Na4 Rh6 16 c5 Qe8 17 Kh1 Qh5 18 Bg1 Nf6 19 cxd6! cxd6 20 Nb6 Qh4 21 Nxc8! Rxc8 22 h3 g4 23 Bf2 Qg5 24 fxg4 Nxe4 25 Ra4 favors White in this sharp position, Summerscale–Hebden, Bradford 2002.
- (f) White clears the f2 square so the d3 knight can drop back to defend the kingside.
- (g) 19 b4 Rf7 20 bxa5 bxa5 21 c5 Bf8 22 cxd6 (22 c6?! closes the queenside) 22 . . . cxd6 23 Rc1 Nh6 24 Rc4 Rg7 25 Qc2 g4 26 Bxa5 Qe8! was very unclear in Nielsen–Kotronias, Hastings 2004. White just won a pawn, but his king is not so safe.
- (h) 13 Nd3 Nf6 14 c5 Ng6 15 a4 Kh8 16 a5 Rg8 17 cxd6 cxd6 18 Nb5 g4! 19 fxg4 Nxe4 20 Bxa7 Bd7 21 Bb6 Qe7 22 Nc7 Raf8 with good play for Black, Korchnoi–Lanka, Linz 1997.
- (i) Speed is of the essence so White sacrifices a pawn for quick queenside play. This move was introduced in 1998 by Kozul.
- (j) 16 Nb5!? Bd7 17 Nxa7 (17 a4!?) 17 . . . h5 has been recently played. Here 18 Bxa6 bxa6 19 Qc2 may be good for White.
- (k) 16 . . . Rf7?! 17 Nb5 h5 (17 . . . Bd7 18 a4 Qe8 19 Nb2 \pm) 18 a4 Bh6 19 Nxa7! Bd7 20 b5 Nc5 21 Nc6! gives White great compensation for the piece, Lastin–Reindermann, Istanbul 2003.
- (l) 19 Rc3 (19 Nxa7?! g4! 20 fxg4 f3) 19 . . . Rf7! 20 Nxa7 Rg7 with counterplay, Korchnoi–Cvitan, Pula 1997.
- (m) 13 . . . a6 is worth note. After 14 Nd3 b6 15 b4 Rf6 16 c5 Rh6 the game is unclear, Khalifman–Inarkiev, Russia 2005.
- (n) White employs the Kozul pawn sac idea. An alternative is 14 b4!? Rh6 15 c5.
- (o) Better than 18 . . . Qh5 19 Bg1 Bd7 20 Na2! Rc8 21 Nf2 Qe8 22 Ng4! Rg6 23 b5 \pm , played in a previous encounter of these opponents. Vera–Nataf, Montreal 2003 continued 18 . . . Bd7! (keeping an eye on the a-pawn) 19 Qb3 Kh8 20 Nb2 Qh5 21 Bg1 g4! 22 fxg4 Bxg4 23 Bxg4 Qxg4 24 Nb5 Bf6! \mp .
- (p) The Benko System. White plans to meet Black's kingside expansion in kind, hoping to slow him down.
- (q) 13 Kg2 Kh8 (Black could also try to break White's pawn chain immediately with 13 . . . b5) 14 h3 b5 15 Nb4 bxc4 16 Bxc4 cxd5 17 Nbx5 Be6 18 Bg5 Bxd5 19 Nxd5? (19 exd5 h6 gives Black good play) 19 . . . Nxd5 Resigns, P. Cramling–Reyes, Malaga 1987.
- (r) 14 Kg2 Bd7 15 Bd2 a6 16 a3 b5 17 b3 Qb6 18 h3 Rac8 with a comfortable position for Black, Gavrikov–Kochiev, Leningrad 1984.
- (s) 19 b4 axb4 20 Rxb4 Raf8 21 h3 Neg8 22 Be3 c5 23 Nb5 Qd8 24 Ra4 Ne8 25 Kg2 Ngf6 26 Bg5 draw agreed, Taimanov–Kavalek, Montilla 1977.
- (t) Locking the kingside with . . . f4 now or later helps White. Black has also scored poorly with 11 . . . fxg4 12 fxg4 Rxf1† 13 Kxf1. A. Petrosian–Korenov,

GMA Qualifier 1991, continued 13 . . . a5 14 Be3 h6 15 h4! Nf6 16 Nd3 b6 17 Nf2 Nd7 18 g5 h5 19 b3 Nc5 20 Rb1, when Black's kingside play had been neutralized and White was ready to expand on the other wing.

- (u) 19 fxg4 Nf4 20 Bf3 Be8 21 Be4 Bg6 leaves White somewhat better, Berković–Kariaka, Simferopol 1991.

- (a) 10 ... h6 11 Re1 Nf4 12 Bf1 g5 13 h4 f6 (13 ... g4!? 14 Nh2 h5 15 c5 dxc5 16 Be3 Neg6—16 ... b6 17 b4 cxb4 18 Nb5!—17 Bxc5 Re8 18 g3 a6 19 Qb3 b6 20 Be3 Bf8 21 Nd1 ±, Piket–Gelfand, Dos Hermanas 1995) 14 Nh2 gxh4 15 Bxf4 exf4 16 Qh5 f5 17 c5 fxe4 18 cxd6 cxd6 19 Nxe4 Nf5 20 Ng4 Bd7 21 Bd3 ±, Piket–Nunn, Melody Amber (rapid) 1995. Black has a lot of holes in his position.
- (b) 12 g4? Nd4! 13 gxh5 Nxe2† 14 Qxe2 Bg4 ±.
- (c) 18 Nh2 g4 19 hxg4 Nd4 20 gxh5 Qh4 21 Re1 ∞, Boersma–Peelen, Amsterdam 1987.
- (d) (A) 10 g3 f5 (10 ... h6 11 Rc1 Bh3 12 Re1 f5 13 Nh4 Nf6 14 exf5 gxf5 15 f4 e4 16 Be3 c5 17 dxc6 bxc6 18 b4 Kh7 19 Qd2 Ng4 20 Bd4 ±, Ioseliani–Gurieli, Georgia 1990) 11 Ng5 Nf6 12 f3 c6 13 Qb3 Kh8 14 Rad1 h6 15 Ne6 Bxe6 16 dxe6 Qc8 17 Be1 Qxe6 18 Qxb7 h5 =, Pick–Trapl, Czech Republic 1995.
(B) 10 Ne1 Nf4 11 Nd3 Nxe2† (11 ... Nxd3?! was tried in Beikert–Nevrohr, Germany 1993) 12 Qxe2 f5 13 f4 fxe4 14 Nxe4 exf4 15 Rxf4 h6 16 g4 ±.

- (e) 18 Nh4 ±, Willumsen–Stentebjerg, Denmark 1990.
- (f) (A) 9 . . . c5?! 10 dxc6 bxc6 (10 . . . Nxc6!?) 11 Bg5! Be6 12 c5 Ne8 13 cxd6 Nxd6 14 Qa4 ±, Korchnoi–Byrne, Leiningrad Int. 1973. (B) 9 . . . Nd7?! 10 b4 h6 11 Qb3 Kh8 12 Rac1 f5 13 Ne1 Nf6 14 f3 f4 15 c5 g5 16 Nb5 Ne8 17 Nd3 h5 18 Nf2 ±, Gligorić–Quinteros, Linares 1981.
- (g) 11 Qb3 b6 12 exf5 gxf5 13 Ng5 Nf6 14 f4 h6 15 fxe5 dxe5 16 c5 Nfxd5 17 Nxd5 Nxd5 18 cxb6 axb6 19 Rc6 Kh8 20 Nf3 (20 Qh3 Nf6 =), Taimanov–Fischer, match (G3) 1971. Fischer went on to win this complex position.
- (h) 18 Be2 Rfb8 ≠, Taimanov–Fischer, match (G1) 1971.
- (i) In this line White's queenside counterplay happens very quickly, so Black should slow it down with either 9 . . . c5 or 9 . . . a5. For example, 9 . . . Nd7?! 10 b4 f5 11 a4 Nf6 12 f3 f4 13 c5 g5 14 Nc4 h5 15 Ba3 Ng6 16 b5 Ne8 17 b6 and White breaks through. 9 . . . Ne8 is a little better because it defends d6, but White is still very fast.
- (j) White can try and open up the entire queenside starting with 12 a4. After 12 . . . f5 13 a5 Nf6 14 f3 f4 15 axb6 axb6 16 bxc5 bxc5 17 Nb3 g5 18 Bd2 Ng6 19 Ra1 White has some advantage, although it is difficult for him to invade Black's position. 12 . . . a5?! may be the most solid reply. Fedorowicz–W. Watson, Hastings 1984, concluded 13 bxc5 bxc5 14 Qb3 Nc7! (heading toward b4 via a6) 15 Qb6 Ra6 16 Qb8 Ra8 draw agreed.
- (k) 13 Qa4 Bd7 does not accomplish much for White.
- (l) 14 f3 can be met by 14 . . . Kh8 followed by . . . Ng8 and . . . Bh6.
- (m) 14 . . . Nf6 15 Nxc5! dxc5 16 d6 gives White much the better of it.
- (n) After 15 Bh6 Rf7 16 exf5 gxf5 White must worry about his bishop on h6.
- (o) 16 f3 f4 (Black gained an edge in Kamsky–Yurtaev, Manila Ol. 1992, after 16 . . . Ng8 17 Na4?! Bg5 18 Bxg5 Qxg5 19 Qc1 Qh5! 20 Qe1 Qh6 21 Qc3 Nef6! ≠; better was 17 Qc1) 17 Qc1 g5 18 Nd1 h5 19 Nf2 Ng8 20 Na5 Nh6 21 Nc6 Qd7 22 g4 ±, Lukacs–Thipsay, Kolhapur 1987.
- (p) 16 . . . Ng8 is met by 17 exf5 gxf5 18 Ne2 intending Na5, with an edge for White.
- (q) 17 . . . f4 would be met by 18 Nb5 with strong queenside pressure. After 17 . . . Ng8 White should continue 18 exf5 gxf5 19 Ne2 ±. Instead the immediate 18 Ne2?! f4 19 Na5 g5 was unclear in Eingorn–Hebden, Moscow 1986.
- (r) 11 Rb1 a4 12 b4 axb3 13 Nxb3 b6 14 Ra1 Qe8! with equality.
- (s) The most straightforward way of trying to prevent b4. An alternative method is the tricky and flexible move 11 . . . c6, e.g., 12 Bb2 Qb6!? 13 dxc6 bxc6 14 Na4 Qc7 15 c5 d5 16 Nb6 Rad8 17 Bc3 Nxe4 18 Nxe4 dxe4 19 Bxa5 Nf5! 20 Nc4 Qb8 with good counterplay for the exchange, Malakov–Zvjaginsev, Poikovsky 2004.
- (t) 18 Bd2 f4 19 Nb5 Nc8 20 Ra1 Rxa1 21 Qxa1 g5 22 Qa6 Qe7 23 Na5 g4 ∞, Vaganian–Gelfand, USSR Chp. 1989.

- (u) This was Kasparov's choice for several years.
- (v) 13 f3 f4 14 Na4 (14 Nb3!?) axb4 15 axb4 g5 (15 . . . c6!?) 16 c5 Nf6 17 Nc4 g4 18 cxd6 cxd6 19 Nab6 Rb8 20 Nxc8 Nxc8 21 Bd2 Nb6 22 Na5 g3 23 h3 \pm (though Black's position is solid), Beliavsky–Radjabov, Móscow Rapid 2002.
- (w) 18 c5 Bd7 19 Rb3 fxe4 20 fxe4 Bh3 with play against the White king, Gelfand–Kasparov, Paris (Immopar) 1991.

	c6(e)	Rxf6(k)	e4(n)	b6(s)	Bxe4(w)	Ng7(z)

- (a) 8 Be3 isn't dangerous. The simplest solution is 8 ... Re8 (8 ... Ng4 9 Bg5 f6 is also a good plan) 9 dxe5 dxe5 10 Qxd8 Nxd8 11 Nb5 Ne6 12 Ng5 Re7 =.
- (b) Also possible is 11 ... Nxe2† 12 Qxe2 h6; e.g., 13 Bd2 (13 Be3 f5 14 f3 g5! 15 c5 Ng6 =, Pelletier–Fedorov, Plovdiv 2003) 13 ... g5 14 g4 Ng6 15 f3 Nf4 16 Nxf4 exf4 (Pelletier–Radjabov, Biel 2006), when 17 Nd1 preparing Bc3 is about equal.
- (c) White may also consider 12 Qxd3!?
- (d) 13 Be3 f5 14 f3 c5 15 Rb1 f4 16 Bf2 g5 17 b4 b6 18 bxc5 bxc5 =, Yermolin–Fedorowicz, New York 1993.
- (e) 16 Kh1 f4 17 Be2 h5 18 Be1 Bh6 19 Rc2 cxd5 20 Nxd5 Nc6 ±, Ashley–Fedorowicz, New York 1993.
- (f) (A) 9 ... Ne8 10 Nd2 h6 11 Be3 f5 12 f3 f4 13 Bf2 g5 14 c5 bxc5 15 Bxc5 Rf6 16 Nc4 Rg6 17 d6 =, Ftacnik–Joecks, Germany 1993. (B) 9 ... h6 10 Bxf6 Bxf6 11 b4 (Pelletier–Hjartarsson, Bundesliga 2003), now 11 ... Kg7 12 c5 Ng8 is equal.

- (g) 10 ... a5 11 a3 f5 12 f3 c5 13 dxc6 bxc6 14 b4 Nf6 15 Kh1 Be6 16 Nb3 axb4 17 axb4 Rxa1 18 Qxa1 Qb6 =, Eingorn–Zapata, Moscow (GMA Open) 1989.
- (h) 11 f3 Nf6 12 b4 Nh5 13 c5 Nf4 14 Bh4 h6 15 Rc1 g5 16 Bf2 Neg6 17 cxd6 cxd6 18 Nb5 Nxe2† 19 Qxe2 Nf4 with balanced chances in Lukacs–Schebler, Budapest 1996.
- (i) 12 ... h6 13 Bh4 exf4 14 Nf3?! (14 Qc2 =) 14 ... Nf6 15 Bxf6 Rxrf6 16 Nd4, Pomes–Spraggett, Tarrassa 1990, and now 16 ... c5 leaves Black clearly better.
- (j) 13 Bh5?! e4 14 Nb3 c5 15 dxc6 bxc6 16 Kh1 d5 17 Be2 Kh8 18 Bh4 Ng6 19 Bf2 Nxsf4 20 Bc5 Nxe2 21 Bxf8 Ng3† 22 hxg3 Qxf8 ≈, Gelfand–Grivas, Haifa 1989.
- (k) 16 Bc4 Kh8 and now 17 Qf3 e4 18 Qe3 Rg6 19 Rae1 is equal. Instead, Piza–Campos Lopez, San Fernando 1991, continued 17 Nf3?! Rg6 18 Qe2 e4 19 Nh4, and here 19 ... Bd4† would lead to a clear advantage for Black.
- (l) (A) 9 Nh4?! Ne8 10 g3 Bh3 11 Re1 f5 12 exf5 Nxsf5 13 Nf3 h6 14 Ne4 Bg4 15 Qd3 Nf6 16 Bd2 Qd7 17 Bc3 Nxe4 18 Qxe4 Bh3 19 Nd2?! = (19 Bf1 ±), Hertneck–W. Watson, Germany 1994. (B) 9 a4?! a5! =.
- (m) Interesting is 10 g4 Kh8 11 Rg1 a5 12 Be3 Nc5 with chances for both sides, Carlsen–Radjabov, Biel 2006.
- (n) 16 Be3 h6 17 Nh3 Ne7 18 Qd2 a6 19 Nf2 Bd7 20 Nfd1 Qe8 21 Bd4 Rd8 22 Ne3 Bc8 23 a4 ±, Larsen–P.H. Nielsen, Danish Chp. 1991. Black should try to play more actively.
- (o) The Gligoric–Taimanov System.
- (p) 9 ... g5 10 Bg3 Nh6 11 d5 f5 12 exf5 g4?!? (12 ... Nxsf5 13 Nd2 Nd4 14 0-0 Nxe2† 15 Qxe2 Qe8 16 Nde4 ±, K. Georgiev–Bologan, Gibraltar 2006) 13 Nd2 Bxf5 14 Nf1 Nd7 15 Ne3 e4 16 0-0 Nc5 17 Rc1 (Roiz–Radjabov, Saint Vincent 2005); now 17 ... Qd7! gives sufficient counterplay.
- (q) 11 ... h5?! is premature before White has castled kingside: 12 h3 Nh6 13 g4! ±.
- (r) 13 dxc6 bxc6 14 b4 Kh8 15 Bf2 Nf7 16 0-0 Bh6 17 b5 c5 18 Nd5 Ng5 19 Nb1 Ne6 20 Nbc3 Nd4 =, Onischuk–Ivanchuk, Calvia Ol. 2004.
- (s) 16 a4 Bh6 17 Bf2 Kh8 18 a5 Ng8 19 Qc2 Nf6 20 Rb2 Nh5 21 Ra1 Bd7 22 axb6 axb6 23 Rxa8 Qxa8 24 Ra2 Qd8 25 bxc5 bxc5 26 Ra7 ±, Gelfand–Nataf, Cannes 2002.
- (t) Alternatives against this less common bishop retreat are: (A) 9 ... Nc6?! 10 d5 Nd7 11 h3 Nc6 12 h4! ±; (B) 9 ... exd4 10 Nxd4 f5! 11 h3! (11 0-0 fxe4 = 11 ... Nh6 12 exf5 Nxsf5 13 Nxsf5 Bxf5 14 Be3 Nc6 15 Qd2 Kh8 16 Rd1 Qf6 17 0-0 Rae8 =, Damjanovic–Nijboer, Calvia 2006).
- (u) 10 h3? Nxsf2! was very good for Black in Ivanchuk–Bologan, Edmonton 2005.
- (v) 11 dxe5 Nxe5 12 Nxe5 Bxe5 13 Qd5† Kh8 14 Qxb7 Nd7 15 0-0 Nc5 16 Qd5 c6! with good compensation for the pawn, as 17 Qxc6? loses to 17 ... Bxc3 18 bxc3 Be4 19 Qb5 Rb8 trapping the queen.

- (w) 16 Bf3 (16 f3?! Bc2 17 f4 Nd7! is good for Black) 16 . . . Bxf3 17 Nxf3 Nc6 18 0-0 Nd4!, Onischuk–Smirin, Turin Ol. 2006.
- (x) (A) 7 . . . Na6 8 0-0 transposes to 7 0-0 Na6 8 Be3. (B) 7 . . . h6 8 0-0 Ng4 9 Bc1 Nc6 10 d5 Ne7 11 Ne1 f5 12 Bxg4 fxg4 13 Be3 \pm , Sasikiran–Kasimdzhanov, Hyderabad 2002.
- (y) 10 Qd2 is met by a promising exchange sacrifice: 10 . . . d5 11 exd5 exd5 12 0-0 Nc6 13 c5 Rxe3! 14 Qxe3 Qf8.
- (z) 16 Rfd1 Be6 17 Bb5 Qd7 18 Rac1 \pm , Ivanchuk–Radjabov, Morelia/Linares 2006.

KING'S INDIAN DEFENSE

Classical Variation: Other Black Seventh Moves

1 d4 Nf6 2 c4 g6 3 Nc3 Bg7 4 e4 d6 5 Nf3 0-0 6 Be2 e5 7 0-0

	Be6(g)	Ne5(j)	Nf7(n)	Qxf6(p)	c5(t)	Qe7(x)

- (a) The move order 6 . . . Nbd7 and 7 . . . e5 is also possible.
- (b) 8 . . . exd4 9 Nxd4 Re8 10 Be3 Nc5 11 f3 a5 12 Rad1 Qe7 13 Nb3 ±. In this type of position Black's d6 pawn is a target after . . . c6 is played.
- (c) (A) 9 dxe5 dxe5 gives Black enduring control of the d4 square. (B) 9 Rd1!? Qe7 (9 . . . Qc7 is also playable) 10 Rb1 exd4 11 Nxd4 Re8 12 f3 d5 13 cxd5 cxd5 14 Ncb5!? Nc5 15 e5 ±, Novik–Monin, Russia 1994.
- (d) Also interesting is 11 Bh4!? Qe7 12 b4 Re8 13 d5 Nh6 14 dxc6!? bxc6 15 b5, when White will take control of important squares.
- (e) Black can play more solidly with 11 . . . Nh6 followed by . . . Nf7, first covering key squares and then playing for . . . f5.
- (f) Or 12 Bg5 Bf6 13 Bxf6 Qxf6 14 dxe5 (also promising is 14 Rad1) 14 . . . Ndxe5 15 Nxe5 Nxe5 16 f4 ± White controls more space.
- (g) After 16 Rad1 Qh4 17 g3 Qe7 18 Bf4 Rad8 19 b3 Bf7 the position is approximately equal, Uhlmann–Knaak, Leipzig 1986.
- (h) (A) 8 d5 Nc5 9 Nd2 a5 10 b3 Ne8 (10 . . . Bd7 is worth considering as after 11 Rb1 and an eventual b4 Black will have . . . Na4, while 11 Bb2 can be met

by 11 ... Bh6) 11 Rb1 f5 12 a3 (12 f3? Bh6!) 12 ... fxe4 (12 ... Nf6 may be better) 13 Ndxe4 Nxe4 14 Nxe4 \pm . In this line 9 Bg5 is accurately answered by 9 ... h6! (9 ... a5 10 Nd2! is good for White) 10 Bxf6 Bxf6 11 b4 Na6 12 a3 Bg7, and Black will later obtain play on the dark squares. (B) 8 dxe5?! gives Black long-term control of d4. (C) 8 Be3! Is very popular and may transpose into the previous column, e.g., 8 ... c6 9 Qc2.

- (i) 11 Qxg4 Bxd4 12 Qd1 Qf6 13 Be3 is slightly better for White.
- (j) After 16 f3 Be6 17 b3 b6 18 Qd2 Rad8 19 g5 f6 20 Rc1 fxg5 21 Bxg5 Bf6 22 Bxf6 Qxf6 23 Qh6 White had a small edge in Agzamov–Knaak, Tunja 1984.
- (k) The flexible 7 ... Na6 has become a respectable way to sidestep the main-line theory, and is sharper than 7 ... Nbd7. On 8 Re1 c6 9 Bf1 exd4 (9 ... Bg4 10 d5 c5!?) 11 h3 Bd7 is closed but slightly favors White) 10 Nxd4 Ng4 11 h3 Qb6 12 hxg4 Qxd4 13 g5 Qxd1 14 Rxd1 Nc5 15 f3 Be5 16 Rb1 a5 17 Ne2 Re8 18 Be3 b6 19 b3 is just a small endgame plus for White, Kozul–Smirin, Sibenik 2006.
- (l) White can try 10 Bh4 Nh6 11 d5 g5 12 Bg3 f5 13 exf5 \pm , when White's control of e4 gives him the better game.
- (m) Capturing with the f-pawn allows White an edge after 13 Be3.
- (n) 16 b4 c6 17 Rfd1 \pm , Kramnik–Topalov, Novgorod 1997. Black's knight is not well placed on a6.
- (o) (A) The recent trend and a sharper try is 11 ... f6!? 12 Bd2 Nh6. Here 13 Be3 c6 14 c5 Nf7 is OK. M. Gurevich–Lopez Martinez, Andorra 2004, saw 13 c5!?, Nxc5 14 Qc1 Nf7 15 Nd5 Ne6 16 Nxc7 Nxc7 17 Qxc7 Nd8! 18 Rfc1 Be6 =. (B) 11 ... Nf6 12 Be3 b6 13 a3 Bb7 14 Qc2 Nc5 15 Bxc5 bxc5 16 Nd2 favors White as Black's pawns are weak.
- (p) 16 c5 Nb8 17 b4 \pm , A. Spielman–Gallagher, France 2003.
- (q) 10 Nxc6 bxc6 allows Black open lines. White should postpone this capture.
- (r) Also possible is 11 ... Nf4 12 Rf2 Nxe2+ 13 Rxe2 Ne5 14 b3 a6 15 Bg5 f6 16 Bh4 with just a small edge to White, Pelletier–Glek, Zurich 2001.
- (s) 14 g4? Bxc3! 15 Qxc3 Qe7 16 Kf2 Qh4+ =.
- (t) 16 Bf2 Qb8 17 Rad1 Qb4? (... Qb7 \pm) 18 g4! Be6 19 Nb5 Qxd2 20 Rxd2 Rec8 21 Bd3 \pm , Khuzman–Svidler, Haifa 1996.
- (u) A very provocative try. Black threatens ... Qh4.
- (v) 11 f4 Nf6 12 Bf3 and now 12 ... Bg4 or 12 ... Na6 gives Black counterplay against the e-pawn.
- (w) 14 ... Nd7 15 Be3 f6 16 gxf6 Qxf6 17 Rg1 Ne5 18 Raf1 Bh3 19 Rf2 Rf8 20 Rg3 Qh4 21 f4 Ng4 22 Bxg4 fxg4 23 f5 gxf5 24 Nxf5 Bxf5 25 exf5 \pm , Schneider–Epishin, Uzhgorod 1987.
- (x) White has an advantage in space. Sarkar–Markzon, Philadelphia 2005, continued 16 Rg1 Be5 (16 ... Nf8 17 a3 Bd7 18 Ndb5! d5 19 Nd6 d4 20 Nxe8 \pm) 17 Be3 Bh3 18 f4 Bg7 19 f5! Be5 20 Qe1 Nc5 21 Qh4 Bxd4 22 Bxd4 Nxe4 23 f4 gxf6 24 Qxh3 Nxc3 25 Qxc3! c5 26 Bh8 Nxg5 27 Rg5 Kh7 28 Bd3 Resigns.

- (a) 8 h3 exd4!? (8 . . . c6 9 e4 is back in the column) 9 Nxd4 Nb6!? 10 b3 d5 11 Ba3 Re8 12 c5 Nbd7 13 c6 Ne5 14 cxb7 Bxb7 15 Rc1 Rc8 16 Na4 Ne4 17 Nc5 Nxc5 18 Bxc5 Nd7 =, Akopian–Avrukh, Amsterdam 2005.
- (b) 17 Qc2 Nfd7 18 f4 ±, Wojtkiewicz–Bjarnason, New York Open 1994. As often happens in this variation, White has a space advantage.
- (c) These lines have numerous transpositional possibilities.
- (d) When Black's rook on e8 is not protected, the move f3 can be omitted.
- (e) (A) 17 Kxg3 Bxd4! 18 Bxd4 Qg5† ≠. Black regains the piece with a good game. (B) 17 Bf2!? Qf8 18 Bxg3 Qxd4 19 fxg6 Qd3! and despite his material edge White is worse, Portisch–Großpeter, Hungary 1993. (C) 17 fxg6?! Nh5 18 gxh7† Kh8 19 f4 Qh4 20 Nf3 Qg3† 21 Kg1 Nxh4 was good for Black in Ionov–Z. Almasi, Tilburg 1994.
- (f) This is the sharpest reply against 9 . . . Qb6. Also playable is 10 Re1 Ne8 11 d5 c5 12 Bd2 Qd8 13 Re2 f6 14 Qc2 ±, when White had the more flexible position in Gutman–Benjamin, London 1987.

- (g) Also reasonable is 12 e6 fxe6 13 Ng5 Ne5 14 f4 Nf7 15 Nxf7 Bd4† 16 Kh2 Rxf7 17 e5 Qc7 18 h4 with good compensation for the pawn, Gaprindashvili–Kotronias, Philadelphia 2000.
- (h) 12 ... Qxb2 13 Na4 Qb5 14 Rb1 Qa5 15 Qc2 b6 16 Nd2 Nxe5 17 f4 Nd7 18 e5 ±. White has both development and space.
- (i) 16 ... Nxe5 17 f4 Nd3 18 Nxc4 Nb4 19 Qb3 puts Black in difficulties. After 16 ... Qa6 17 f4 b5 18 Nc3 Bh6 19 Nf3 Ndc5 20 b3 Qa3 21 Rab1 Nd3 22 Bf1! White had the better of a complicated struggle, Mikhalchishin–Kotronias, Yugoslavia 1997.
- (j) 12 ... Be6!? 13 f4 (13 Nxe6 fxe6 14 Kg2 Rad8 15 Bd2 Qc7 16 f4 Nf7 =, Nar-cisco–Damjanovic, Mondarez 2002) 13 ... Nxc4 14 Nxe6 fxe6 15 Kg2 d5 16 e5 Ne8 17 Bxc4 dxc4 18 Qd4 Nd7 19 Qxc4 ±, K. Georgiev–Ivanisevic, Karadjorje 2004.
- (k) 17 Nd4 Nc5 18 Bf2 h5!? 19 Qc2 Bd7 20 Nf3 a3! was fine for Black in Wojtkiewicz–Forster, Geneva 1997.
- (l) 9 ... Ne8 10 d5 c5 11 Bg5 f6 12 Be3 Qe7 13 Qd2 (13 Nh4! is stronger) 13 ... f5 14 Rac1 Nef6 15 Ng5 ±, Kornyushin–Saltaev, Vladivostok 1995. Black's position is loose.
- (m) 17 axb5 axb5 18 Qb3 Rxa1 19 Rxa1 b4 20 Nd5 ±, Milos–Fedorowicz, Buenos Aires 1991. Black's queenside is wide open.
- (n) 17 Qb3 Nh3† 18 Kh1 Nf2† 19 Kg1 Qc8 20 Nd1 Nxd1 21 Qxd1 Be4 and White found himself seriously cramped by Black's e3 pawn in Maiwald–Ketevan, Germany 1994.

KING'S INDIAN DEFENSE

Fianchetto System: Panno Variation

1 d4 Nf6 2 c4 g6 3 g3 Bg7 4 Bg2 0-0 5 Nc3 d6 6 Nf3 Nc6 7 0-0(a)

	67	68	69	70	71	72
7e5.....	Rb8.....a6.....				Bf5
8	d5(b) Ne7	h3(h) a6	d5(k)..... Na5	Bg5..... Rb8	h3(q) Rb8	Ne1(u) Qc8(v)
9	c5!?(c) Ne8(d)	e4 Nd7(i)	Nd2 c5	Rc1 Bd7	Be3(r) b5	e4 Bh3
10	cxd6 cxd6(e)	Be3 Na5(j)	Qc2 Rb8(l)	e4 Bg4	cxb5(s) axb5	Nc2 Bxg2
11	e4(f) f5	b3 b5	b3 b5	h3 Bxf3	Rc1 Na5	Kxg2 e5
12	exf5 gxf5	cxb5 AXB5	Bb2 Bh6(m)	Bxf3 e5	b3 b4	d5 Ne7
13	Qb3 h6	Qd2 b4	f4 bxcc4	dxe5 Nxe5	Na4 Bd7	f3 Nd7
14	Nh4 Nf6	Nd5 c5	bxcc4 e5(n)	Be2 h6	Qc2 Bb5	b4 a5
15	f4 e4	Bh6 e6	dxe6 Bxe6	Be3 b5	Re1 c6	a3 AXB4
16	Rd1 Qa5(g)	Bxg7 Kxg7 ±	Nd5 Rxb2(o)	cxb5 AXB5(p)	Nb2 Nd5(t)	AXB4 Rxa1(w)

- (a) Since White has to castle anyway this is the most flexible. 7 d5 or 7 h3 may transpose.
- (b) 8 dxe5 dxe5 9 Qxd8 Rxd8 10 Bg5 Be6 is equal.
- (c) This is White's most aggressive continuation. (A) The main alternative is 9 e4!?. After 9 ... Ne8 10 Ne1 f5 11 Nd3 Nf6 12 Bg5 h6 13 Bxf6 Rxf6 14 f4 exf4 15 Nxf4 Kh7 16 Qd3 Rf8 17 Rae1 White was better in Kasparov–Ivanchuk, Riga 1995. 9 ... Bg4?! 10 h3 Bd7 11 c5! Ne8 12 cxd6 Nxd6 13 Re1 is pleasant for White. Black usually needs his light-squared bishop to help with the king-side attack. 9 ... Nd7 is inferior to 9 ... Ne8 as it leaves e6 very weak. (B) 9 b4!? Nd7 10 Rb1 a5 11 a3 h6 12 e4 f5 13 exf5 (necessary, otherwise Black's kingside push becomes dangerous after ... f4) 13 ... exf5 14 Nh4 e4 15 Qb3 Ne5 16 f3 was slightly better for White in Karpov–J. Polgar, Dos Hermanas 1993.
- (d) 9 ... dxc5? 10 Nxe5 is very bad for Black.
- (e) 10 ... Nxd6 is possible but is not as reliable as the column move.

- (f) An interesting alternative for White here is 11 a4!?
- (g) 17 Bh3 Bd7 18 Be3 h5 19 a4 \pm , M. Horvath–Valach, Trencin 1995. Black is bottled up.
- (h) 8 d5?! exposes White to rapid queenside play in which Black benefits from having played ... Rb8 rather than ... a6: 8 ... Na5 9 Nd2 Nd7 10 Qc2 Ne5 11 b3 c6 12 Bb2 b5 13 dxc6 bxc4 14 Nxc4 Naxc4 15 bxc4 Bf5 16 Qc1 Rb4 17 c7 Qd7 18 Nd5 Rxb2 19 Resigns, Timman–Nijboer, Dutch Team Chp. 1997.
- (i) 9 ... b5 is a main alternative, e.g., 10 e5 Nd7 11 e6 fxe6 12 d5 exd5 13 cxd5 Na7 14 Nd4 Nf6 15 Re1 b4! 16 Nce2 c5 with counterplay, Partenheimer–Nunn, Bundesliga 2001.
- (j) 10 ... e5 11 d5 Ne7 12 Qd2 Kh8 13 Ne1 is a shade better for White, according to Hübner.
- (k) Nowadays this long variation is considered one of the main lines.
- (l) 10 ... e5 is a playable way of sidestepping the main variation.
- (m) 12 ... h5!? 13 h3 (13 Rae1 bxc4 14 bxc4 h4 is okay) 13 ... bxc4 14 bxc4 e5 =, Rogazenko–Magal, Istanbul 2000.
- (n) 14 ... Ng4!? 15 Nd1 Rxb2 16 Qxb2 Bg7 17 Qc1 e5! 18 dxe6 Bxe6 19 Rb1 Bd4+ 20 Kh1 Re8 with fair compensation for the exchange, Khalifman–Radjabov, Moscow 2002.
- (o) 17 Qxb2 Bg7 18 Qa3 Nxc4 19 Nxc4 Nxd5 20 Rac1 Nb4 21 Rfd1 d5 22 Kh1 dxc4 23 Rxd8 Rxd8 24 Qa5 Rd2 25 Qxc5 Nxa2 26 Rb1 Bb2 27 Qe3! was very good for White in Baburin–Polzin, Gifhorn 1992.
- (p) The position is roughly equal, Ivanchuk–Shirov, Linares 1995.
- (q) 8 e4 Bg4 9 Be3 Nd7 10 Ne2 Na5! (10 ... e5 11 d5 Ne7 12 Ne1 Nb6 13 Rc1 \pm) 11 Rc1 c5 12 b3 Nc6 13 d5 Nb4 14 a3 Bxf3 15 Bxf3 Nd3!=, Avrukh–Bologan, Istanbul 2003.
- (r) 9 a4!? Na5 10 b3 c5 11 Bd2 Qb6 12 dxc5 Qxb3? 13 Nd5 Nxd5 14 Bxa5 Qxc4 15 Rc1 Qa2 16 Ng5 e6 17 e4 b6 18 cxd6 was winning for White in Sturua–Atalik, Athens 1993.
- (s) 10 Nd2 is worth considering. After 10 ... Na5 11 cxb5 axb5 12 b4 Nc4 13 Nxc4 bxc4 14 b5 White's passed a-pawn will cause trouble.
- (t) 17 Bd2 c5 gave Black good play in Voskanian–Zaitsev, Budapest 1995.
- (u) (A) 8 Nh4 (generally speaking this is inferior to 8 Ne1 since from h4 the knight can only return to f3, while from e1 it can relocate to c2) 8 ... Bd7 9 h3!? (9 e4 e5 10 d5 Nd4 11 Be3 c5 12 dxc6 bxc6 13 Bxd4 exd4 14 Qxd4 Nd5 is fine for Black) 9 ... Ne8 10 d5 Na5 11 Qd3 c5 12 Bd2 a6 13 Rb1 b5 14 b3 Rb8 15 Ne4 and White had a slight edge in L Ivanov–Remlinger, Reno 1991. (B) 8 b3 Ne4 9 Bb2 Nxc3 10 Bxc3 Be4 11 Qd2 d5 is fine for Black—8 b3 is a rather insipid approach. (C) 8 d5!? Na5 9 Nd2 c6 10 e4 Bg4 11 f3 Bd7 12 Kh1 cxd5 13 cxd5 b5 14 Nb3 leaves White with more space.
- (v) After 8 ... Na5 9 e4 Bg4 10 f3 Bd7 11 Qd3 c5 12 d5 a6 13 b3 b5 14 Rb1 e6 15 g4 White had a pronounced space advantage in Wojtkiewicz–Rasik, Budapest 1993.
- (w) 17 Nxa1 f5 18 Nb3 b6 19 Bg5 with advantage, Maiwald–Vogt, Germany 1995.

KING'S INDIAN DEFENSE

Fianchetto System: Minor Lines

1 d4 Nf6 2 c4 g6 3 g3 Bg7 4 Bg2 0-0 5 Nc3(a) d6

	73	74	75	76	77	78
6	Nf3				e3	
	c5	c6			Nbd7(u)	
7	0-0	0-0			Nge2	
	Nc6(b)	Qa5			e5	
8	d5	dxc5	h3	e4	0-0	
	Na5	dxc5	Be6(i)	Bg4(r)	Re8	
9	Nd2	Be3(f)	d5	Qd3	h3	
	e5(c)	Nd7(g)	cxd5	Qa6(n)	Bxf3	Nf8
10	a3(d)	Qd2	Nd4	b3	Bxf3	b3
	b6	Nb6	dxc4!?(j)	d5	Nbd7	Ne6
11	e4	b3	Nxe6	Ne5	Qe2	d5
	Ne8	Qxd2	fxe6	Nbd7(o)	Ne8(s)	Nf8
12	b3	Bxd2	Bxb7	cxd5	Rd1	e4
	f5	Bf5	Nbd7	Qxd3	c5	Nh5
13	exf5	Rac1	Bxa8	Nxd3	dxc5	Be3
	gxf5	Rad8	Rxa8(k)	Nxd5(p)	Bxc3	f5
14	Bb2	Be3	Bd2(l)	Bb2	cxd6	exf5
	Nb7(e)	Nd4(h)	d5(m)	Nxc3(q)	Nxd6(t)	gxf5(v)

- (a) White can vary the order of his moves, interchanging g3, Bg2, Nc3, Nf3, and 0-0.
- (b) 7 ... cxd4?! 8 Nxd4 Nbd7 leaves White with the freer game. Instead of 8 ... Nbd7, Black can sacrifice a pawn with 8 ... Nc6 9 Nxc6 bxc6 10 Bxc6 Bh3 11 Bxa8 Qxa8 12 f3 Bxf1 13 Kxf1 but his compensation is dubious.
- (c) 9 ... a6 transposes into the Panno Variation.
- (d) After 10 dxe6 Bxe6 11 Nd5 Rb8 12 a4 Ng4 13 Ra3 Ne5 14 b3 f5 White looks to be better despite the rook on a3, Fernandes–Silva, Portugal 1994.
- (e) 15 Qe2 Nf6 16 Rae1 \pm , Siedif-Zade–Shevelev, Poland 1991. White's pieces are better placed and Black's queenside is always a problem.
- (f) (A) The main alternative is 9 Bf4, when play could continue 9 ... Nd4 10 Be5 (10 e3 Nxf3† 11 Bxf3 Nd7!=) 10 ... Nc6 11 Qxd8 Rxd8 12 Bc7 Rd7 13 Bf4 with just a minor edge to White. (B) 9 Qb3 Qa5 10 Bd2 Nd4 11 Nxd4 cxd4 12 Qb5 Qd8 13 Nd5 Nxd5 14 Bxd5 Rb8 is very equal, Nogueiras–Sorin, St. Martin 1995.

- (g) Most common is (A) 9 . . . Be6 when White has 10 Qa4 Nd4 11 Rac1! Nd7 12 b3 Qc8 13 Rfd1 \pm , Khalifman–Yrjola, Izmir 2004. (B) 9 . . . b6!? 10 Ne5 Nxe5 11 Bxa8 Nxc4 is an interesting exchange sacrifice.
- (h) The position is equal. White cannot realistically expect any advantage after 8 dxc5.
- (i) The system starting 7 . . . Qa5 is the Kavalek System. Here Black could also try 8 . . . Qa6 9 b3 b5 10 Nd2 Bb7 11 Bb2 Nbd7 12 e4 bxc4 13 Nxc4 Nb6 14 Ne3 Rac8 with chances for both sides, Velickovic–Topalovic, Pula 2001.
- (j) 10 . . . Bd7 11 cxd5 gives White an advantage in space.
- (k) For the exchange Black has one pawn, good development, and a massive central phalanx.
- (l) After 14 Qa4!? Qxa4 15 Nxa4 Ne4! 16 Be3 d5 17 Rac1 Nb6 Black stood slightly better in Schone–Muse, Germany 1991.
- (m) 15 Be1 Qa6 16 Rb1 Rc8 17 f3 Qc6 18 g4 Nb6 19 a4 a6 20 a5 Nbd7 21 Na4 Rb8 22 b3 Ne8! left Black with a tremendous position in Portisch–P. Cramling, Prague 1995.
- (n) 9 . . . d5 10 cxd5 cxd5 11 Qb5 Qxb5 12 Nxb5 Rc8 13 Bf4 with activity.
- (o) 11 . . . Rd8 12 Rd1 dxc4 13 Nxc4 Nd5 14 Ne4 Bf5 15 Bb2 Nd7 16 Qd2 b5 17 Na5 with a slight pull.
- (p) 13 . . . exd5? is answered by 14 Nf4! \pm .
- (q) 15 Bxc3 c5 16 d5! Bxd5 17 Bxd5 Bxc3 18 Rac1 Bf6 19 Bxb7 Rab8 20 Bc6 Ne5 21 Nxe5 Bxe5 22 Rxc5 and White was up a clear pawn in Karpov–van der Wiel, Amsterdam 1988.
- (r) (A) 8 . . . e5 9 d5 cxd5 10 cxd5 Nbd7 11 Nd2 and Black's queen is misplaced.
(B) 8 . . . Qh5!? 9 e5 (9 Re1!? Bg4 10 Qd3 tries to take advantage of Black's queen) 9 . . . dxe5 10 Nxe5 Ng4 11 Nf3 Rd8 12 h3 Nh6 13 Ne2! is good for White.
- (s) If 11 . . . e5 12 d5 and Black's lack of active play leaves him worse.
- (t) After 15 bxc3 Ne5 16 Bg2 Nexc4 17 Bf4 e5 18 Bh6 Rfc8 Black had problems in Baburin–L. Kaufman, New York 1997.
- (u) 6 . . . c6 7 Nge2 a5 8 b3 Na6 9 0-0 e5 10 Bb2 Re8 11 a3 Rb8 12 h3 h5 13 Qc2 Be6 was equal in Petrosian–Larsen, Santa Monica 1966.
- (v) 15 Qc2 Ng6 and chances are equal.

OLD INDIAN DEFENSE

1d4 Nf6 2 c4 d6

THE OLD INDIAN DEFENSE has similarities with the King's Indian Defense, but it is more stodgy and less active. The plus side is that it is offbeat and may confuse an opponent. White is allowed to occupy the central squares while Black stakes his/her claim in the center with e7-e5 and develops behind the lines. In the Old Indian Black does not fianchetto his/her king's bishop (the modern method of combating a full pawn center) but simply develops it to e7. The bishop here plays little offensive role and White's pawn center is less challenged. Still this old system is pretty solid and hard to crack as all the pieces get out and defend squares. Black usually comes out of the opening with a disadvantage, so the choice to play the Old Indian should be made on psychological or practical grounds. The defense is easy to learn, and if Black is content to sit back in a somewhat cramped position his/her chances can be good against some opponents. White has more space, but some players are uncomfortable holding more territory and looking to defend against break-outs.

- (r) White hopes to exchange a wing pawn for a center pawn.
- (s) 6 ... Bg6? 7 Bg2 does not make sense.
- (t) 12 h3 Bh5 13 Bd5 Nb4! is good for Black.
- (u) 4 ... Bxf3 5 Qxf3 (5 exf3 Qc8 6 Be3 e6 7 Nc3 Be7 8 Be2 0-0 9 0-0 \pm) 5 ... Nc6 6 d5 Ne5 7 Qb3 Qc8 8 Nc3 g6 9 e4 Bg7 10 Be2 0-0 11 0-0 \pm , Butnorius-Johannessen, Oslo 1992.
- (v) 5 ... Nbd7 6 Bg2 c6 7 h3 Bxf3 8 Bxf3 e5 9 Be3 Be7 10 Nc3 \pm , Smejkal-Andersson, Prague 1970.
- (w) 12 Bxf3 Bd8 13 Bg2 Bb6 14 Rad1 \pm , Hjartarson-Adams, Paris (rapid) 1994. Black's position lacks active prospects.

GRÜNFELD DEFENSE

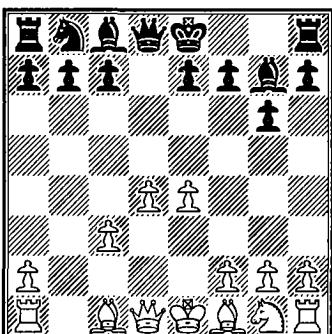

1 d4 Nf6 2 c4 g6 3 Nc3 d5

(Including the Neo-Grünfeld—3 g3 Bg7 4 Bg2 d5)

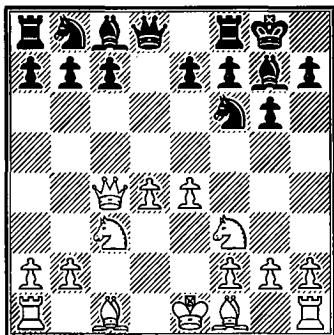

THE GRÜNFELD DEFENSE, invented by the Austrian master Ernst Grünfeld in 1922, leads to the most open game of all the Indian Defenses. The exchange of Black's d-pawn ensures that there are none of the blocked-up positions that occur in other chapters of this section. The play is often wide open and tactical, which appeals to certain players. It has been a regular defense in the careers of Leko, Kasparov, Fischer, Smyslov, and Korchnoi, among others.

Despite the initial impression that the opening presents, the Grünfeld is considered a very respectable and sound defense. White obtains a big pawn center, but Black makes use of the "hypermodern" concept of attacking the center from afar in order to control it. Certainly there is danger that White's big center will lead to a strong attack, but Black aims to sidestep the central steamroller and attack it instead. One positional note is that White sometimes gains a passed d-pawn, which can cause trouble even in the endgame.

The most direct challenge to the Grünfeld is the Exchange Variation, 4 cxd5 Nxd5 5 e4 Nxc3 6 bxc3 Bg7 (columns 1–12, see previous diagram). White immediately obtains the classical center with its attacking prospects. The traditional continuation has been 7 Bc4 0-0 8 Ne2 (columns 1–6), which ensures that White can maintain the pawns on e4 and d4. For many years the most popular approach was the exchange sacrifice 8 ... c5 9 0-0 Nc6 10 Be3 cxd4 11 cxd4 Bg4 12 f3 Na5 13 Bd3 Be6 14 d5 Bxa1 15 Qxa1 (column 3). Black has been finding good defenses against the exchange sacrifice and other lines of the traditional continuation, so focus has shifted to 7 Nf3 (columns 7–12), not fearing the pin of ... Bg4. Most popular after 7 Nf3 is 7 ... c5 8 Rb1 (columns 1–10), when Black boldly takes the a-pawn with ... Qa5 and ... Qxa2 in columns 7–8. Quite different play arises in columns 9 and 11, which results in an early endgame. While the lines after 7 Nf3 are some of the sharpest in the Grünfeld, Black appears to have sufficient play.

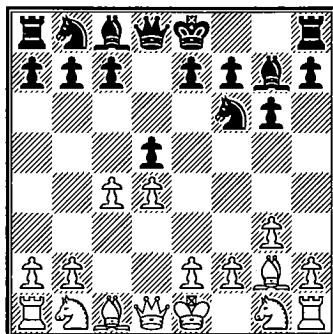

The Classical Variation is 4 Nf3 Bg7 5 Qb3 dxc4 6 Qxc4 0-0 7 e4 (columns 13–24), see above diagram. White takes a less ambitious course than the Exchange Variation, satisfied with his/her central pawn duo and classical development. Attention has shifted somewhat in the last decade from the Exchange Variation toward the Classical Variation as the former is having trouble gaining an edge. After 7 e4, Black can respond with 7 ... Na6 8 Be2 c5 (columns 13–15), leading to unclear situations. Seeking queenside activity with 7 ... a6 and 8 ... b5 (columns 16–18) also leads to sharp positions. Another serious response to the Classical Variation is 7 ... Nc6 (columns 19–21), which may turn out to be Black's soundest reply. The old Smyslov favorite, 7 ... Bg4 (column 22), has seen White choose an aggressive continuation of castling queenside. 7 ... c6 (column 23) and 7 ... b6 (column 24) are experimental defenses.

Lines with Bf4 are covered in columns 25–30. White plays to simply develop his/her pieces and garner a queenside initiative. This safe plan received much attention following the 1990 World Championship match between Karpov and Kasparov. Usually White plays for a slight advantage,

but Black's aggressive counter in column 25 leads to a complex tactical position.

Early alternatives for White are seen in columns 31–36. Column 31 is the strange-looking 4 cxd5 Nxd5 5 Na4!?, White wishing to play e4 with tempo on the Nd5. Queenside play with 5 Qb3 or 5 Bd2 are columns 32 and 33. The game takes a turn to positional play when White plays Bg5 (columns 34–36), though theoretically this system poses little danger.

The Neo-Grünfeld, 3 g3 Bg7 4 Bg2 d5 (columns 37–42, see above diagram), has some similar themes to the Grünfeld, but White's fianchettoed bishop gives the game a Catalan flavor. It was first seen in Alekhine–Mikenas, Kemer 1937, where Black gained an equal position. In columns 37–38 White plays the direct 5 cxd5 Nxd5 6 e4, the most aggressive response. The more restrained 5 cxd5 Nxd5 6 Nf3 (columns 40–41) is considered the main continuation as White plays for the advantage with little risk.

GRÜNFELD DEFENSE

Exchange Variation

**1 d4 Nf6 2 c4 g6 3 Nc3 d5 4 cxd5 Nxd5 5 e4 Nxc3(a)
6 bxc3 Bg7 7 Bc4 0-0 8 Ne2**

	1	2	3	4	5	6
	8.....Nc6(b).....c5					
9	0-0	Be3.....0-0				
	b6	Nc6	Nc6			
10	Bg5	Rc1(d)	Be3			
	Na5	cxd4	cxd4.....		Bg4!?(o)

	c5	Qa5†	Bg4		Na5	
12	Rc1	Kf1?!(e)	f3		Bxf7†(p)	
	cxd4	Qa3!	Na5		Rxf7	
13	cxd4	Qd2	Bd3(g)		fxg4	
	Bb7	Rd8	Be6(h)		Rxf1†	
14	Qa4	d5	d5Rc1(j)Qa4(m)		Kxf1	
	Qd6	Ne5	Bxa1	Bxa2(k)	a6!	Qd6(q)
15	Bd2	Bb5	Qxa1	Qa4	d5	e5
	Rfc8(c)	b6(f)	f6(i)	Bb3(l)	b5(n)	Qd5(r)

- (a) 5 . . . Nb6?! is clearly inferior as Black has problems attacking White's central pawns. After 6 Be3 Bg7 7 h3! 0-0 8 Nf3 White is clearly on top.
- (b) On 8 . . . b6 the sharp 9 h4!? e5 10 h5 exd4 11 hxg6 hxg6 12 cxd4 Qe7 14 Qd3 Re8 15 Bh6 gave White an edge in Cheparinov–A. Petrosian, Dresden 2007.
- (c) 16 Bb4 Qd8 17 d5 e6 18 Bxa5 bxa5 19 Qb3 with somewhat better chances for White, Gligorić–Uhlmann, Sarajevo 1969.
- (d) Now if Black proceeds normally White's rook will not be exposed to the bishop on g7.
- (e) The most difficult move to meet, but not the best. On (A) 12 Qd2? Qxd2+ 13 Kxd2 Rd8 is good for Black. White's safest continuation is (B) 12 Bd2 Qa3! 13 Rc3 Qd6 14 h4 h5 15 Qd2 e5 16 d5 Na5 17 Bd3 b6 and Black's position remains solid, Eisness–Predojevic, Pula 2005.
- (f) Black has a distinct advantage. Ftacnik–I. Gurevich, Biel 1993, continued 16 f4?! Ng4 17 Bd4 e5! 18 Bb2 Qxa2 19 Ra1 Qb3 20 Bc6 Rb8 21 Rxa7 Ne3† 22 Kf2 Nc4 with a winning position for Black.
- (g) 13 Bd5 Bd7 14 Rb1 a6 15 Bxb7 Ra7 16 Bd5 Bb5 17 a4 Bxe2 18 Qxe2 e6 19 Bc4 Bxd4 20 Rfd1 Bxe3† 21 Qxe3 Rd7 =, Beliavsky–Mikhailchishin, Vidmar Mem. 2001.

- (h) Too passive is 13 ... Bd7?! 14 Qd2 Rc8 15 Rac1 Rxc1 16 Rxc1 b5 17 Nc3 ±, Guseva–Zhang, World Junior U20 Chp. 2005.
- (i) 16 Rb1 Bf7 17 Bh6 Qd6 with good play for Black. For many years this exchange sacrifice was the most popular continuation for White, but in recent years Black has found good defensive ideas.
- (j) White tries to press the initiative, gaining space and time for the pawn sacrifice.
- (k) If Black refuses the offer White is clearly on top, e.g. 14 ... b6 15 d5 Bd7 16 Nd4 ±, Dubinka–Löffler, České Budějovice 1995.
- (l) Also 15 ... Be6 16 d5 Bd7 17 Qb4 e6 18 Nc3 exd5 19 Nxd5 Be6 is about equal, Yusupov–Leko, Istanbul Ol. 2000. After 15 ... Bb3 16 Qb4 b6 17 Bg5 f6 18 Bh4 Qd6 19 Qxd6 exd6 20 d5 Rac8 21 Nd4 Bh6 White has an initiative for the pawn, Yusupov–Ruck, EU Chp. 2001.
- (m) White plays a less usual plan to sacrifice the exchange, but Black's position remains solid.
- (n) 16 Qb4 Bxa1 17 Rxa1 Bd7 18 Qd4 Rc8 19 Bh6 f6 20 Bxf8 Kxf8 =, Picket–van Wely, Dutch Chp. 2000.
- (o) In this continuation Black delays the capture cxd4, which gives him/her other options.
- (p) White plays to win a pawn, a line that gained popularity for years following the 1987 World Championship in which Karpov played this several times against Kasparov, scoring well. In later years Black has found satisfactory continuations.
- (q) (A) 14 ... cxd4 15 cxd4 e5 16 Kg1 exd4 17 Bxd4 Rc8 18 Bxg7 Kxg7 19 Nf4 Qxd1† 20 Rxd1 Kf6 =, Onischuk–Carlsen, Wijk aan Zee B 2005. (B) 14 ... Qd7 15 h3!? (15 g5 is about equal) 15 ... Nc4 16 Bf2 cxd4 17 cxd4 e5 18 Qb3 Qf7 19 Kg1 Rf8 20 Kh1 Nd2 favored Black in van Wely–Dreev, Dordrecht 2004.
- (r) 16 g5 Qe4 17 Bf2 Rf8 18 Ng1 Nc4 19 Nf3 Ne3† 20 Bxe3 Qxe3 21 Qb3† Kh8 22 Re1 Qxg5 23 Qxb7 Qd2 with chances for both sides in a sharp position, Onischuk–Grischuk, Poikovsky 2005.

- (v) 14 Bf1 Rac8 with chances for both sides, Georgiev–Areshenko, Coventry Open 2005.

BENONI DEFENSE

(Including Unusual Benoni-type Openings)

1 d4 Nf6 2 c4 c5 3 d5 e6

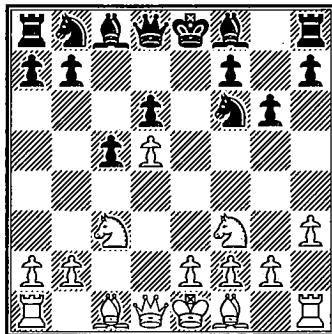

THE BENONI DEFENSE strives for imbalance from the start. Black cedes White more central territory with an advanced pawn on d5 and normally a kingside pawn majority. Black in turn normally gets dark-square play in the center and an extra queenside pawn which can be dangerous if mobilized.

There is definite risk to the Benoni. The lack of space can be very troublesome if Black's minor pieces get in each other's way. White's central pawn majority can threaten to push Black off the board if it is allowed to advance. Many grandmasters consider the defense simply unreliable. Undeniable, though, is that Black gains open lines and activity. The powerful fianchettoed king's bishop and play on the e-file may combine with the advance of the queenside pawn majority.

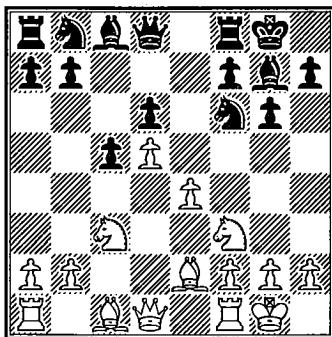

The Benoni was popularized by Tal in the 1950s and 60s when he dazzled the world with fabulous attacks and sacrifices. Fischer and then Kasparov would regularly include the opening in their repertoire. Nowadays it has slightly less of a following, though sharp players regularly risk it and even solid Kramnik gave the Benoni a try.

One should note that there is an important difference if Black chooses to delay . . . c5 by playing 2 . . . e6 and then on 3 Nf3 playing 3 . . . c5 4 d5, etc. Many grandmasters will only play the Benoni this way and will not risk the Taimanov Variation (columns 23–24) where White has mobilized the f-pawn.

The Main Line is 4 Nc3 exd5 5 cxd5 d6 6 Nf3 g6 7 h3 (columns 1–4), see above diagram. This was a minor variation until about ten years ago, but the straightforward strategy has garnered many followers. White limits kingside action by Black and intends classical development to secure a slight advantage. Black can make use of the tempo White spends on h3 by immediate queenside action with . . . b5 (columns 1–2). The tactics may lead to simplifications with little chance for Black to win, so some players will wish to try the little-played continuation of note (b). Other continuations are explored in columns 3–4 and here White probably keeps a small edge.

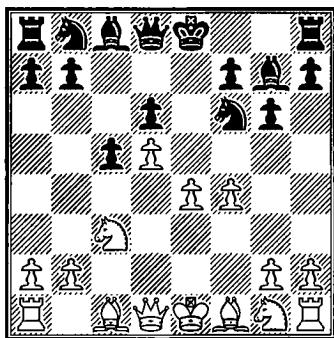

White fianchettos his/her king's bishop in columns 5–6 with 4 Nc3 exd5 5 cxd5 d6 6 Nf3 g6 7 g3. This is a solid and respectable continuation that has not changed much in the last decade. Play is more positional and both sides may move on the kingside, queenside, or center.

The Old Main Line is 4 Nc3 exd5 5 cxd5 d6 6 Nf3 g6 7 e4 Bg7 8 Be2 0-0 9 0-0 (columns 7–12), see above diagram. White classically develops his/her pieces and plans to press forward in the center and kingside after due preparation. Often this involves the knight maneuver Nd2 and Nc4.

Black has three different plans from the diagrammed position. In columns 7–8 he/she plays 9 . . . a6 and 10 . . . Bg4 to exchange the bishop, relieving congestion in the Black position. Columns 9–10 cover 9 . . . Re8 10 Nd2 Nbd7, playing for kingside squares and banking on a strong centralized knight on e5. Here Black must often weaken his kingside pawn structure to maintain control of e5, giving White attacking chances. In column 12 Black develops with . . . Na6 and . . . Nc7, planning to mobilize the queenside majority.

Columns 13–18 cover systems White can initiate on move six or seven after 4 Nc3 exd5 5 cxd5 d6. White pins the Nf6 with Bg5 in columns 13–14. To break the pin Black must weaken the kingside with . . . h6 and . . . g5, but he/she gains the bishop pair and active play. In column 15 White plays an early Bf4, which requires an accurate response. Column 16 is the knight's tour Nd2-Nc4. Columns 17 and 18 are systems in which White avoids Nf3 so that the f-pawn is mobile.

White stakes out a big pawn center with 4 Nc3 exd5 5 cxd5 6 e4 g6 7 f4 Bg7 (columns 19–24), see above diagram. Black must attack or restrain the center or land in great trouble. 8 Nf3 (columns 19–22) is the Four Pawns' Attack, a position that can also arise from the King's Indian Defense. Black should be all right with either 9 . . . Re8 (columns 19–20) or 9 . . . Bg4 (column 21). More difficult to meet is 8 Bb5†, the Taimanov Variation (columns 23–24). Theoretically, Black has no way to truly reach equality, so he/she must take refuge in complications. Many players, such as your author, like to reach the Benoni by the order of moves 1 d4 Nf6 2 c4 e6 3 Nf3 c5 4 d5 exd5 5 cxd5 d6, etc., so that the Taimanov Variation is avoided.

Unusual Benoni Defenses are the subject of columns 25–30. Columns 25–26 cover the Blumenfeld Counter Gambit, which is usually reached by the move order 1 d4 Nf6 2 c4 e6 3 Nf3 c5 4 d5 b5. Black gambits a wing pawn for a strong center. White has chances for the advantage by either accepting the gambit with 5 dxe6 (column 25) or declining it

with 5 Bg5 (column 26). Column 27 is a Benoni where Black delays . . . e6. In the Czech Benoni Black plays with pawns on c5 and e5, which leads to a slower, strategic game. White has the theoretical edge, but surprise value may counterbalance this. Column 30 is 1 d4 c5 2 d5—a position in which White can avoid playing with the pawn on c4.

BENONI DEFENSE

Main Line 7 h3 (and 7 g3)

1 d4 Nf6 2 c4 c5 3 d5 e6 4 Nc3 exd5 5 cxd5 d6 6 Nf3 g6

	1	2	3	4	5	6
7	h3(a)	Bg7(b)			g3 Bg7

- (a) Some players use the move order 7 e4 Bg7 8 h3, which avoids note (b). Against this Black can try 7 ... a6 (planning 8 a4 Bg4 9 Be2 Bxf3 10 Bxf3 Bg7 11 0-0 0-0 12 Bf4 Qe7 transposing into column 1). Here White has 8 Qe2! Qe7 9 e5 dxе5 10 Nxе5 Nbd7 11 Bf4 Nh5 12 Nxd7 Bxd7 13 Bc7! Rc8 14 d6 forcing a better endgame, Onischuk–Pantsulaia, Turin Ol. 2006. If Black wants an early deviation he/she should consider 6 ... a6.
- (b) Black can avoid the column continuation with 7 ... a6 8 a4 Qe7!? 9 Bg5 Nbd7 10 e3 Bg7 11 Be2 0-0 12 0-0 h6 13 Bh4 Ne5 with close to equality, Karpov–de Firmian, Biel 1990.
- (c) 13 ... Qd3 14 N2c4 Qxd1† 15 Kxd1 Ba6 16 Kc2 Nd7 17 Bg5 Rfb8 18 Rad1! Ne5 19 b3 Nxc4 20 Nxc4 Bxc4 21 bxc4 Rb2† 22 Kd3 ±, Atalik–Gdanski, Iraklion 1993.
- (d) 15 0-0 Nb6 16 Nxb6 Qxb6! 17 Nxc8 (17 Nc4 Qa6 =) 17 ... Raxc8 18 Re1 Rfe8 19 Rxe8† Rxe8 20 Rb1 Qd6 21 Bg5 Re4 and Black will win the d-pawn back to achieve a drawn position, Golod–Bromberger, Bad Wiese 2004. Theoretically, this line may be all right, but in practice Black needs to play accurately just to make a draw.
- (e) A good alternative is 10 ... Nxe4 11 Bxe4 Re8 12 Ng5 h6 13 Ne6 Qa5† 14 Nc3 Bxc3† 15 bxc3 Qxc3† 16 Bd2 Qc4 17 Qe2 Qxe2† 18 Kxe2 Na6! and Black stands well in the endgame, Loeffler–Hoffman, Bundesliga 2006.

- (f) (A) 11 Nd2 Nxd5 12 Nc4 Nb4 13 Be2 Ba6 14 Nbx d6 Re6 15 Bf4 Nd7 16 0-0 Ne5 17 Bxe5 Bxe5 18 a3 Rxd6 19 Nxd6 Qxd6 20 axb4 Qxd1 21 Bxd1 Bxf1 22 Kxf1 cxb4 =, Hillarp Persson–Gdanski, Gothenberg 1997. (B) 11 Bg5 c4! 12 Bxc4 Rxe4† 13 Be2 Qa5† 14 Nd2 Ba6 ∞, Krasenkov–Gdanski, Warsaw 1997.
- (g) 12 Qa4 a6!? 13 Bxe4 Bd7 14 Bd3 Qb6 =.
- (h) 15 Nc4 Bb7 16 Bf4 Qc7 17 Nfd2 Nd7 =, Savchenko–Abdeinabbi, Misr 2006.
- (i) 9 . . . Re8 10 0-0 c4 11 Bxc4 (11 Bc2 b5 12 Nxb5 Nxe4 13 Re1 Nxf2! =) 11 . . . Nxe4 12 Nxe4 Rxe4 13 Bg5 Bf6 14 Bd3 Re8 15 Qa4 Nd7 16 Qh4 ±, Khalifman–Masiak, Aeroflot Open 2007.
- (j) 10 0-0 b5 11 Bf4 Re8 12 Re1 Qb6 13 a3 Nbd7 14 Qd2 Bb7 15 b4 Rac8 =, Kallo–de Firmian, Gausdal 2003.
- (k) 15 a5 b5 16 axb6 Nxb6 17 Nd2 Nfd7 18 Ra2 ±, Vescovi–Peptan, Bermuda 1998.
- (l) Black can also include the moves 10 . . . a6 11 a4 and then proceed with 11 . . . Nh5. After 12 Re1 Re8 13 Bg5 Bf6 14 Bd2 Ne5 15 Be2 Nxf3† 16 Bxf3 Ng7 17 Rb1 Be5 18 b4 White has a slight advantage, Sjodahl–Agrest, Swedish League 2005.
- (m) 11 Re1 Re8 12 g4 Nh6 13 Bf4 Ne5 14 Nxe5 dxe5 15 Be3 is also favorable for White, Golod–Krush, Montreal 2005.
- (n) 15 Rx e3 a6 16 a4 Rb8 17 Bf1 ±, Ibragimov–J. Watson, Las Vegas 2002.
- (o) 9 . . . Na6 10 Nd2 Nc7 11 Nc4 Nfe8 12 a4 b6 13 Qc2 f5 14 Bd2 Bd7 15 Rad1 Rb8 16 Rfe1 b5!? 17 axb5 Nxb5 is about equal, Akesson–Wedberg, Swedish Chp. 2004.
- (p) Black has a respectable alternative in 10 . . . Nh5 11 Nde4 Ndf6 12 Bg5 h6 13 Nxf6† Nxf6 14 Bd2 Re8 15 h3 Bf5 =, Djurić–de Firmian, New York 1986.
- (q) 12 h3 Rb8 13 Nc4 Nb6 14 Na3 Bd7 15 e4 Qc7 16 Be3 Nc8 17 Qd3 Na7 18 Nc4 b5 19 axb5 Nxb5! =, Tkachiev–Cebalo, Croatian League 2004.
- (r) 15 Rb1 b5! 16 axb5 axb5 17 b4 c4 18 h3 Bd7 =, Karpov–Adianto, Jakarta 1997.
- (s) (A) 10 Bf4 Qe7 11 h3 (11 e4 Ng4 =, 11 Nb5 Ne8) 11 . . . a6 12 a4 Rb8 13 e4 b5 14 axb5 axb5 15 Re1 Ne8 16 Qe2 Rb6! 17 Nxb5 Ba6 18 Rxa6 Rxa6 19 Nbd4 Nb8 20 Nc6 Rxc6 21 dxc6 Nxc6 =, Razuvayev–Psakhis, Irkutsk 1986. (B) 10 e4 Re8 11 Re1 a6 12 a4 c4 13 Bf1 Nc5 14 Nd2 Qc7 15 Bxc4 Bh3 with activity for the pawn, Alburt–de Firmian, U.S. Chp. 1985.
- (t) 12 a5 b5 13 axb6 Rxb6 14 Bf1 Re8 15 Nd2 Rb4 16 e4 Ne5 =, Kouatly–Lautier, Marseille 1988.
- (u) On 14 . . . b4 15 Nb5 ±. After 14 . . . Ng4 15 Nxb5 Nde5 16 Nxe5 Nxe5 17 Be2 Qb6 18 Nc3 Bh3, Black has good play for the pawn, Scheeren–van der Wiel, Dutch Chp. 1987.

BENKO GAMBIT

1 d4 Nf6 2 c4 c5 3 d5 b5

THE BENKO GAMBIT offers a positional pawn sacrifice to immediately create activity on the far queenside. Named after the American/Hungarian grandmaster Pal Benko, the concept behind Black's third move is to remove the supporting pawn at c4 and open the queen-side files (a- and b-files) for pressure on the flank. Black's development is speeded and he/she obtains the advantage of one pawn island against two for White—a more compact structure. All these are long-term positional factors, and Black will need them as he/she gains little direct activity or tactical chances that most gambits bring. Computers and even some grandmasters have the view that White is a pawn ahead with no immediate problems. That view is simply too complacent, as the pressure Black obtains may last even into the endgame. Black's success in the gambit-accepted variations has spurred White players to investigate lines declining the gambit, which look to be at least as promising.

In the past Fedorowicz, Hodgson, and Vaganian have been the serious practitioners of the opening. There are few grandmasters today that use the Benko with real regularity, but many who use it on occasion.

Columns 1–6 cover White lines directly accepting the gambit with 4 cxb5 a6 5 bxa6. In column 1 White chooses a double fianchetto, which does not work well against a precise move order by Black. In columns 2–4 White gives up the right to castle by allowing the bishop exchange on f1. The extra time Black gains from this helps to equalize chances. White plays with great ambition in columns 5–6, not only accepting the gambit but aiming for a central pawn roller to start a quick attack.

The Fianchetto Variation, 4 cxb5 a6 5 bxa6 g6 6 Nc3 Bxa6 7 g3 d6 (columns 7–12), has become a well established, solid answer to the Benko. White is able to castle and complete development, having no concerns

about his king's safety. Yet Black is able to proceed with his/her queenside initiative and should be able to hold the balance if done accurately.

Declining the gambit (columns 13–18) creates a different game entirely. Avoiding the capture on c4 (columns 13–14) leaves a more traditional Indian defense—like a King's Indian or Benoni structure. Columns 15, 16, and 18 begin with 4 cxb5 but after 4 . . . a6 make no attempt to hold the pawn. Column 15, 5 f3, stakes out the center while Black recaptures the pawn. Column 16, 5 b6, seeks to develop and leave Black congested on the queenside. This can be effective if Black is not very alert. Column 17, 4 cxb5 a6 5 e3, attempts to hold the pawn while retaining the right to castle. Column 18 is a sharp line in which White sacrifices a pawn for attacking chances and tactical opportunities.

BENKO GAMBIT

1d4 Nf6 2 c4 c5 3 d5 b5 4 cxb5 a6 5 bxa6 g6!(a)

	1	2	3	4	5	6
6	b3?!Nc3(e) Bg7	Bxa6(f)				
7	Bb2 0-0	e4(g). Bxf1		f4(p) g6		
8	g3 Nxa6!(b)	Kxf1 d6			Nf3(q) Bg7Qa5!(s)	
9	Bg2 Bb7	Nf3 Bg7	g4(m) Bg7(n)	e4 Bxf1	Bd2(t) 0-0	
10	Nh3(c) e6	g3(h) 0-0	Kg2 0-0	Rxf1 0-0	e4 d6	
11	Nf4 Nxd5	Kg2 Qb6Nbd7	g5 Nh5	Kf2 Qb6	Bxa6 Qxa6!	
12	Bxg7 Kxg7	h3(i) Na6	h3 Ra6(k)	Nge2 e5	Kg1 Na6	Qe2(u) Nbd7
13	Nxd5 Bxd5(d)	Re1 Nd7(j)	Re1 Qa8(l)	h4 f6(o)	Qe2 Rfb8(r)	Qxa6 Rxa6(v)

- (a) This is the most accurate order of moves, as sometimes Black will want to capture the pawn on a6 with the knight. The most usual case of this is against the double fianchetto (column 1). On 5 ... Bxa6 6 g3 d6 7 Bg2 g6 8 b3! Bg7 9 Bb2 0-0 10 Nh3 Nbd7 11 0-0 Qb6 12 Bc3! leaves Black too little counterplay for the pawn, Gheorgiu–Pavlović, Lugano 1983.
- (b) This key move allows Black excellent play against White's setup.
- (c) 10 e4 Qa5!+ 11 Bc3 Nb4! 12 Ne2 (12 a3?! Nxe4 13 Bxe4 Bxc3+ 14 Nxc3 Nxd5 wins) 12 ... Qb5 13 a4 Nd3+ 14 Kf1 Qa6 15 Bf3 e6! ±, Nussbaumer–Claesen, Austria 1993.
- (d) 14 Bxd5 exd5 15 0-0 (15 Qxd5? Qf6 wins) 15 ... d4 16 a3 h5 17 Qd3 h4 18 Nd2 hxg3 19 hxg3 Qg5 with excellent play for Black, Csom–Alburt, New York 1987.
- (e) 6 a7?! Rxa7 only helps Black.
- (f) Black should no longer delay capturing the pawn, as otherwise White plays e4 without losing his castling rights.
- (g) 7 Nf3 is often played, but it has no real independent significance as White will soon play either e4 as in the column or g3 as in the fianchetto variation (columns 7–12).

- (h) 10 h3 Nbd7 11 Kg1 0-0 12 Kh2 Ne8 13 Re1 Qb6 14 Re2 Nc7 15 Bg5 Rfe8 16 Rc1 Qa6 17 Qd2 Bxc3 18 bxc3 f6 19 Bf4 Qc4 =, Krelling–Milov, Dotzheim 2002.
- (i) This move takes some kingside space and stops the Black knight from moving to e5 via g4.
- (j) 14 Re2 Qb7 15 Bf4 c4 16 Qd2 Rfb8 17 e5 dxe5 18 Nxe5 Nxe5 19 Bxe5 Rxe5 20 Nb4 with fair chances for Black, Kaidanov–Bradford, Las Vegas 1995.
- (k) 12 . . . Qa5 13 Qc2 Nb6 14 Rb1 Na4! 15 Nd1 Nb6 16 a3 Rfb8 17 Re1 Nfd7 18 Bd2 Qa4 19 Qxa4 Nxa4 =, Chernikov–Tolstikh, České Budějovice 1995.
- (l) Black combines queenside play with pressure on the a8–h1 diagonal. After 14 Re2 e6 15 Bf4 exd5 16 exd5 Rb8 17 Rc1 Ne8 18 Rcc2 Ndf6 19 Kh2 Nc7 Black had fair play for the pawn in Bernasek–Guidarelli, “Friendship” Tournament 2002.
- (m) White’s plan is not necessarily to drive the knight away from f6, but to take space on the kingside.
- (n) 9 . . . Qc8 10 h3 Bg7 11 Kg2 0-0 12 Nge2 Na6 13 Be3 ±, Seirawan–D. Gurevich, U.S. Chp. 1987.
- (o) 14 Qd3 Ra7 15 Qh3 Raf7 =, Vlasenko–Solozhenkin, Chigorin Mem. 2005.
- (p) This is a very aggressive (some say greedy) continuation. White not only takes the gambit pawn, but plays for a big pawn center.
- (q) Not 8 e4?! Bxf1 9 Kxf1 as White’s king would be more exposed than in column 2.
- (r) 14 Kh1 Ne8 15 e5 Nec7 16 f5 dxe5 17 Nxe5 and White has a dangerous attack, Ellers–Klemper, Dortmund Open, 1993.
- (s) This slows White from the advance e4, allowing Black good chances.
- (t) 9 Qd2 Bg7 10 e4 Bxf1 11 Rxf1 0-0 12 Kf2 Qxc3! 13 bxc3 Ne4† 14 Ke2 Nxd2 15 Kxd2 Nd7 16 Kc2 Nb6 ∓, Gurdez–Wilder, France 1989.
- (u) 12 Kf2 Nbd7 13 Re1 Qb6 14 b3 c4† is good for Black.
- (v) 14 0-0 (14 0-0-0 Ng4!) 14 . . . Rb8 15 b3 Ne8 16 Rfe1 Nc7 17 h3 (Mancini–LeConte, French League 2002), now 17 . . . Nb5 allows good play for Black.

BENKO GAMBIT

Kingside Fianchetto by White

1 d4 Nf6 2 c4 c5 3 d5 b5 4 cxb5 a6 5 bxa6 g6 6 Nc3 Bxa6 7 g3 d6(a)

	7	8	9	10	11	12

VI

FLANK OPENINGS

ENGLISH OPENING

1 c4

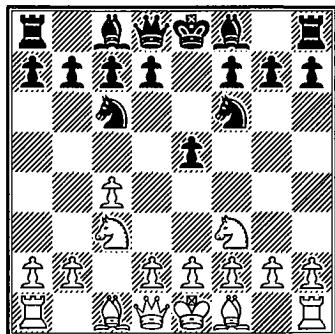

THE ENGLISH OPENING is really a twentieth century invention, though it derives its name from association with the Englishman Howard Staunton. Staunton played it six times against St. Amant in their 1843 match, and also in the historic London tournament of 1851. His example didn't inspire others of the time and the odd opening did not catch on in the rest of the nineteenth century. Morphy and other open-game players simply had disdain for the slower strategy. As the twentieth century began, a few daring explorers such as Tartakower, Rubinstein, and Nimzovich ventured it occasionally. When Botvinnik began playing the English in the 1930s and 40s the once odd opening strategy became quite respectable. By the 1960s and 70s it had become mainstream, used regularly by Petrosian, Korchnoi, and other top players. Fischer's choice of it against Spassky in 1972 was a sensation that ended his hitherto unswerving devotion to the king's pawn. The English remained in fashion to the end of the century and was in regular use by such luminaries as Kasparov and Timman. The twenty-first century, however, has started with the opening suffering a slight decline of interest. The era of computers in chess has seen the fashion shift toward more forcing openings for the White side.

English Opening strategy is characterized by fluid pawn formations and vigorous struggles for central control. Often White will follow his initial queenside thrust with a fianchetto of his king's bishop and an attempt to establish a grip on the light squares. Black may counter this by taking the White side of a Sicilian Defense with colors reversed, or by attempting to transpose to one of several queen pawn openings, such as the Queen's Gambit Declined, the King's Indian, or the Dutch Defense. The independent alternative is the Symmetrical Variation, which is rich in possibilities ranging from countergambits and aggressive isolated queen pawn

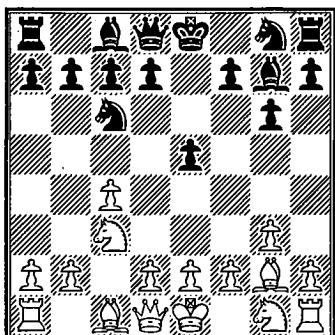

formations to cramped but dynamic hedgehog setups and the quiet, subtle maneuvering of the Ultra-Symmetrical Variation.

It is natural to treat the English as a Sicilian reversed, but the results are often surprising—main lines in the Sicilian Defense correspond to obscure side variations in the English, and vice versa.

The Four Knights' Variation, 1 . . . e5 2 Nc3 Nf6 3 Nf3 Nc6 (columns 1–12), a direct and logical continuation, offers Black reliable defense with some flexibility for counterattack (see diagram above). Black will usually follow a strategy like that of the Nimzo-Indian Defense, conceding his king's bishop for a knight to get free development and an aggressive central posture. Columns 7–8, in which Black departs from this safe strategy to play a genuine Dragon Sicilian with colors reversed, are important. It seems risky to play a sharp variation with a tempo less, but healthy aggression brings Black nearly equal chances.

In Carls' "Bremen" System (or the Accelerated Fianchetto) with 3 g3 (columns 13–18), White tries to steal a march on Four Knights' lines, or at least to transpose to favorable subvariations, but he must contend with the Keres Variation (columns 17–18), a formidable central bulwark.

The Closed Variation, 2 . . . Nc6 3 g3 g6 4 Bg2 Bg7 (columns 19–25), imitates the Closed Sicilian with colors reversed (see diagram above).

White can easily obtain complete domination of the queenside, but turning this to account while neutralizing Black's kingside chances is another matter. For both White and Black, a major decision is how to deploy the king's knight; columns 19–21 illustrate the consequences of different choices.

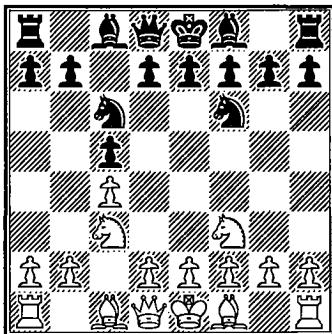

Columns 26–27 and 29–30 show the effects of an early ... f5 by Black. The pawns on e5 and f5 present a strong front, but with careful play White can lure them forward to overextension. Column 28 shows that Black should not try to force transposition to the Closed Variation if White does not fianchetto.

The system 1 ... e5 2 Nc3 d6 includes some interesting offbeat sub-variations, but is now primarily important for columns 32 and 36, in which Black plays an early ... f5, similarly to column 29.

Columns 37–38 are variations that have fallen out of fashion, but this was the usual way to play the English from the mid-nineteenth century until Carls and others reintroduced the kingside fianchetto around the time of the First World War. Columns 39–40 are an unrefuted attempt to accelerate the minor-piece trade that characterizes the Four Knights'. These lines were rarely seen before 1980, but have been intensely fashionable through the 1990s. Columns 41–42 show miscellaneous independent possibilities.

Black may choose to handle the English by playing his/her favorite defense to the queen's pawn against it. White in turn may allow the transposition by playing an early d4, or he may postpone that move or avoid it altogether, leading to uniquely "English" lines. The results of the latter strategy are shown in columns 43–46 (Nimzo-Indian English), 47–49 (Queen's Indian English), 50–54 (a hybrid variation with its own unique character), 55–60 (King's Indian English), and 61–62 (Grünfeld English). Overall, White's loss of direct territorial control in delaying d4 is just balanced by gains in flexibility and tactical subtleties. If White delays development of his queen's knight, Black may safely venture the Double Fianchetto Defense (columns 63–65), or the impudent Romanishin Variation (column 66), favored by Korchnoi.

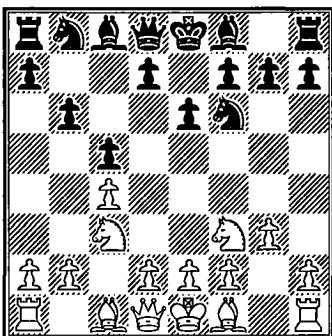

The Symmetrical Variation (1 ... c5) is perhaps the most exciting defense to the English. In the main variations, one or both players will disrupt the center almost immediately by pushing the queen-pawn two squares, and an intense struggle for control of d4 and d5 will develop.

The Symmetrical Four Knights' Variation, 2 Nf3 Nf6 3 Nc3 Nc6 (columns 67–78), epitomizes this type of game (see above diagram). In the modern variations of columns 67–72, it is often a question of whose pawn sacrifice comes first and most effectively, White's on c3 or Black's on d5. In the older fianchetto variation (columns 73–78), Black cedes an advantage in central territory but can challenge the queenside by . . . b5.

In columns 79–80, Black energetically achieves . . . d5 before White has played d4. The main variation (column 80) is wild: White moves his king twice in the first eight moves, but sacrifices a pawn for a strong attack.

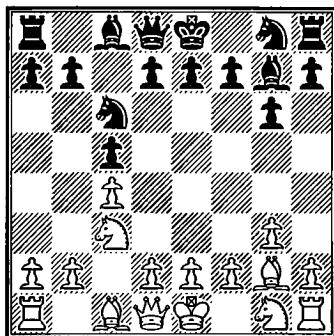

In columns 81–84, Black chooses relief from the tactical melees of the previous columns with the popular 3 . . . e6. The late Paul Keres invented the system with 4 . . . d5 (columns 82–84). Black aims at a setup similar to the Tarrasch Defense to the Queen's Gambit Declined, but with his defense eased by the exchange of a pair of knights.

The Hedgehog Defense with 3 . . . e6 and 4 . . . b6 (columns 85–90) is a development of the 1970s and 80s (see above diagram). Before the 1970s, "hedgehog" was a generic term describing any setup that was cramped, defensive, and difficult to attack. Now it refers to a specific formation in which Black's c-pawn is exchanged for White's d-pawn and Black's minor pieces are developed as in a Queen's Indian. Black allows White a central

bind with pawns on c4 and e4, but Black's chances to achieve . . . d5 or . . . b5 give his/her game dynamic potential.

Columns 91–96 cover the Rubinstein/Botvinnik Variation, 1 c4 c5 2 Nc3 Nf6 3 g3 d5 4 cxd5 Nxd5 5 Bg2 Nc7, a sort of Maróczy Bind Sicilian with colors reversed. If Black can complete development in spite of hair-raising light-square invasions or doubled, isolated c-pawns, he/she can often look forward to good winning chances arising from his or her central spatial advantage.

The Ultra-Symmetrical Variation (columns 97–102) arises when both players adopt the same negative strategy of preventing each other's d-pawn breaks (see above diagram). These lines require great patience, and the player of White must carefully steer away from variations where there is no advantageous way to break symmetry, such as columns 100 and 101. But anyone who plays the Symmetrical English for either White or Black should become familiar with the strategic themes of this section.

Columns 103–108 are odds and ends. These unusual first and second moves will mostly transpose to other variations or other openings, but there are some exceptions that one must watch for.

	Nd8	Be6(d)	h6	Rf7	Ne7	Bf6 =
12	Re1		b5	f3	Ba3	
	c6 =		Ne7(e)	Raf8(j)	0-0(l)	

- (a) On 3 Nf3 Black may reply 3 ... Nf6 transposing to columns 1–12, or 3 ... f5 (column 29), but 3 ... g6?! is inferior: 4 d4! exd4 5 Nxd4 Bg7 6 Nxg6 bxcc6 7 g3 with a lasting advantage in space.
- (b) 6 Rb1 f5 7 b4 Nf6 8 b5 Ne7 9 Qb3 0-0 10 e3 Kh8 11 Nge2 g5 12 f4 gxsf4 13 exf4 Ng6 14 0-0 a6 15 a4 axb5 16 axb5 Qe7, Goldin–Yusupov, Tilburg 1992. Black has excellent counterplay. The column is Chernin–Ehlvest, St. John 1988.
- (c) 7 Ne2 Nf6 8 0-0 0-0 9 b3 (9 Rb1 transposes into the column) 9 ... Be6 10 Nd5 Qd7 11 Bb2 Rab8 12 Qd2 Ne7 =, Todorov–Popchev, Belgrade 2001.
- (d) Topalov–Seirawan, Biel 1993; now 12 Qd2 (instead of 12 h3) would have kept a small edge.
- (e) (A) 13 c5 Be6 14 Bb2 Nd7 15 cxd6 cxd6 =, Aguirre–Berg, Bajada 2005. (B) 13 Ne1 g5 14 Nc2 Rb8 15 Ba3 b6 16 Nb4 Bb7 =, Sarkar–Nakamura, New York 2003.
- (f) 6 f4 leads to nothing after 6 ... Nge7 7 Nf3 h6 8 0-0 Be6 9 Bd2 exf4! 10 Bxf4 d5 (J. Watson).
- (g) Alternatives are less trustworthy: (A) 6 ... f5 7 Nge2 Nf6 8 0-0 0-0 9 exf5! gxf5 (9 ... Bxf5 10 h3 ±) 10 Bg5 Be6 11 Qd2 ± (J. Watson). (B) 6 ... h5 7 h4

Nd4 8 Nce2 Ne6 9 Nf3 Nf6 10 Ng5 0-0 ±, Chernin–Karpov, Tilburg 1992. (C)
6 . . . Ng6!?

- (h) 8 . . . Nd4 is logical but drawish: 9 Nxd4 exd4 10 Nd5 (10 Nce2 a5 11 b3 Rb8
12 a3 b5 =, Delchev–Ulibin, Pula 2000) 10 . . . Nxd5 11 cxd5 c5 12 dxc6 bxc6
13 Qc2 Bb7, Gulko–Kasparov, Horgen 1995.
- (i) 9 . . . Nd4 10 Qd2 c6 unclear.
- (j) 13 Rael Kh8 14 b3 Ng8 15 exf5 Bxf5 16 d4, Smejkal–Yusupov, Germany 1992.
White has an advantage in space, but Black's harmonious development gives
him good chances.
- (k) 5 . . . Nf6 or 5 . . . a5 6 a3 Nf6 may transpose to column 57, e.g. 5 . . . Nf6 6 b4
0-0 7 b5 Ne7 8 Nf3 d6, etc.
- (l) 13 Nf3 h6 14 0-0 Be6 =, Kasparov–Karpov, World Chp. 1987.
- (m) On 6 . . . Nge7, 7 d3 transposes to column 19. White may also try 7 d4, but
Black is well prepared for this: 7 . . . exd4 8 exd4 0-0 9 0-0 Bg4 10 h3 Bxe2
11 Nxe2 Nf5 12 d5 Ne5 13 Qc2 Re8 = (analysis by Botvinnik). The column
is I. Sokolov–Chernin, Debrecen (European Team Chp.) 1992.

- (a) 5 . . . Nxc3 6 bx_c3 Bd6 7 d4 Nd7 8 Be2 0-0 9 0-0 Qe7 10 Bb2 c5 =, Neuman–Ftačník, Czech League 2005.
- (b) 8 e4 0-0 9 0-0 (9 d4 exd4 10 cxd4 Re8 =) 9 . . . f5! ∞ (J. Watson).
- (c) 8 . . . Bd7 9 e4 (simply 9 0-0 is not bad) 9 . . . exd4 10 cxd4 Bb4† 11 Bd2 Bxd2† 12 Qxd2 0-0 13 0-0 ±, Nimzovich–Spielmann, Berlin 1928.
- (d) 10 Bf1 Qg6 ≠, Chajes–Kostić, Carlsbad 1911.
- (e) (A) 3 . . . Nc6 4 a3 (4 Nf3 is columns 9–10) 4 . . . g6 5 Qc2 Bg7 6 b4 0-0 7 Bb2 Re8 =, Miles–Ljubojević, Linares 1985. (B) 3 . . . c6 4 Nf3 e4 5 Nd4 d5 6 cxd5 cxd5 7 d3 Bc5 8 Nb3 Bb4 9 dx_e4 Nxe4 10 Qd4 Bxc3† 11 bx_c3 0-0 12 c4 Nc6 13 Qxd5 Qe7 14 d3 Qb4† with compensation for the pawn, Andersson–Sosonko, Thessaloniki Ol. 1988. (C) 3 . . . d6 4 d4 Nbd7 can lead to an Old Indian or King's Indian Defense.
- (f) 5 . . . Bx_c3 6 Nxc3 d5 7 cxd5 Nxd5 8 Qc2 c5 9 Be2 Nxc3 10 Qxc3 Qd6 =, Taimanov–Brynell, Stockholm 2003.
- (g) Straightforward expansion by 6 d4 leads only to equality: 6 . . . exd4 7 Qxd4 (7 Nxd4 d5 =) 7 . . . Nc6 8 Qd1 Ne5 9 Nd4 c6 =, J. Watson–Browne, Berkeley 1976.
- (h) 7 . . . Re8 8 Be2 c6 9 0-0 d5 10 d4 exd4 11 exd4 Na6 =, Bischoff–Hübner, Munich 1990. The column is Bischoff–Gelfand, Dortmund 1993.

- (i) (A) 3 ... Ba5 4 b4 c6 5 bxa5 cxd5 6 cxd5 leaves Black with a soft spot on d6 after either 6 ... Qxa5? Qb3 d6 8 Ba3, Petursson–I. Sokolov, Manila Ol. 1992, or 6 ... Nf6? 7 Qa4! 0-0 (7 ... Nxd5 8 Nf3 Nc6 9 Nxe5 Nxe5 10 Qe4 ±) 8 Ba3 d6 9 e4 Bd7 10 Qb4 Na6 11 Bxa6, Soffer–Y. Gruenfeld, Tel Aviv 1993.
 (B) 3 ... Bc5 invites White to kick the bishop again, but attempts to refute it have proven unconvincing: (1) 4 b4 Bd4 5 Rb1 c6 6 e3 cxd5 7 exd5 exd4 ∞; (2) 4 Nf3 c6 5 Nc3 Qe7 6 d4 exd4 7 Nxd4 d6 =; (3) 4 e3 Nf6 (or 4 ... c6 5 d4 cxd5 6 dxc5 Qa5† 7 Bd2 Qxc5 8 Qg4 g6 9 cxd5 Qxd5 10 Bc4 Nf6 11 Qh4 Qd6 12 Nf3 Nc6 13 e4 with a dangerous attack) 5 b4 (or 5 d4 Nxd5 6 cxd5 exd4 7 exd4 Bb2† =) 5 ... Nxd5 6 bxc5 Nf6 with chances for both sides.
 (C) 3 ... Bd6, 3 ... a5, and 3 ... Nc6 are also playable, but counterintuitive.
- (j) 5 Nf3 e4 (5 ... Nc6 6 e3 Nf6 7 Be2 0-0 8 0-0 ±) 6 Nd2 c6! 7 Nxe7 Qxe7 8 Qc2 Nf6 9 Nb3 h6 =, Safin–Adianto, Doha 2003.
- (k) 10 Be3 Re8 11 Ne2 Ne5 =, C. Hansen–I. Sokolov, Groningen 1995.
- (l) 4 ... Nc6 5 Bg2 Nge7 6 c5 b6 7 Ba3 Bb7 (Speelman–Timman, Taxco Int. 1985), and now 8 Nf3 (Sosonko) instead of 8 d4 maintains some pressure.
- (m) 10 Bd2 0-0 11 Nf3 Qe7 12 e4 Bg4 with chances for both sides, Uhlmann–Mainka, Hartberg 1991.
- (n) 3 ... Nc6 is ill-timed: 4 Nc3 Bb4 5 Nd5! Nxd5 (5 ... Bc5 6 e3 0-0 7 Ne2 ±) 6 cxd5 Ne7 7 Nf3 Bd6 (7 ... d6 8 Qa4†; 7 ... Nxd5 8 Nxe5 Nf6 9 Qb3) 8 e4 c6 9 d4 with a distinct advantage, Geller–Debarnot, Las Palmas 1976.
- (o) 4 Nf3 e4 5 Nd4 d5 6 cxd5 Qxd5! 7 Nc2 Qh5 8 h3 Qg6 9 Nc3 Bd6 10 Ne3 0-0 11 Qc2 Re8 12 b3 Na6 13 a3 Nc7 14 Bb2 Ncd5, Shamkovich–Baumbach, USSR 1970, and now 15 0-0-0 (Yudovich) would have maintained approximate equality in a complex position.
- (p) 4 ... Bb4† 5 Bd2 Bxd2† 6 Qxd2 d6 7 Nc3 0-0 8 Rd1 Nbd7 9 dxe5 dxe5 10 Nf3 Qe7 with just a minor edge to White, Korchnoi–Lautier, Enghien les Bains 2003.
- (q) 6 Nf3 Be7 (6 ... dxc4 7 Qxc4 is about equal) 7 cxd5 cxd5 8 Nf3 Nc6 9 Qa4 0-0 10 Be3 Ne4 11 Nc3 Nxc3 12 bxc3 with chances for both sides, Serper–Lutz, Dortmund 1993.
- (r) 10 Bg5 h6 11 Bxf6 Qxf6 12 Nc3 Be6 with almost equality, Fossum–Friedel, Heraklio 2004. As in the Tarrasch Variation of the Queen's Gambit Declined, Black has excellent development and centralization, but his isolated d-pawn requires careful tending.
- (s) 2 d3 will usually transpose to other columns of the English Opening.
- (t) (A) 2 ... d6 3 Nc3 transposes to columns 32–34. (B) 2 ... Nc6 3 d4 (3 Nc3 transposes to other columns) 3 ... exd4 4 Nxd4 Bc5 (4 ... Bb4†?! 5 Bd2 Bxd2† 6 Qxd2 ±) 5 Nc2 (5 Nxc6 Qf6 =) 5 ... Nf6 6 Nc9 0-0 7 e3 Nb4?! ∞, Dlugy–Smyslov, New York 1987.
- (u) 4 e3 Nxd4 5 exd4 Qf6! 6 d5 Bc5 7 Qe2 Qg6 8 Nc3 Nf6 9 d3 0-0 10 dxe4 Ng4!, Murei–Udov, Moscow 1966. Black has enough for the pawn.
- (v) 6 d4 exd3 7 Qxd3 Qxd3 8 exd3 Bf5 =, Tartakower–Alekhine, Warsaw 1935.
- (w) 10 Bb2 Nd7 11 Ne2 Qe8 12 0-0-0 Nc5 13 Nf4 h5 unclear, Christiansen–Kaidanov, U.S. Chp. 1996. White is playing with fire, as the pawn on e4 can become strong.

ENGLISH OPENING

Nimzo- or Queen's Indian Type Defenses

1 c4 Nf6 2 Nc3 e6 3 Nf3

	43	44	45	46	47	48
3.....	Bb4.....	(Nimzo-Indian English)			b6 (Queen's Indian)	
4 0-0.....	Qc2.....	c5	g3.....	Qb3	e4 English)	Bb7
5 a3 Bxc3	a3 Ba5	Bg2 Bb7	a3 Ba5(j)	Qe2 Bb4(m)	Bd3 d6(o)	
6 Qxc3 b6	g3(d) Nc6	0-0 0-0	g3 Nc6	e5 Ng8	Bc2 c5	
7 g3(a) Bb7	Bg2 0-0	d3(g) Bxc3(h)	Bg2 0-0	g3(n) Nc6	d4 cxd4	
8 Bg2 c5(b)	0-0 Qe7(e)	bxcc3 d6	0-0 d5	Bg2 Nd4	Nxd4 Be7	
9 b4 d6	e3 Bxc3	e4 Nbd7	d3 h6(k)	Qd3 Bxf3	0-0 0-0	
10 0-0 Nbd7	Qxc3 b6	Nd4 c5	Bf4 Re8	Bxf3 Nxf3†	b3 a6	
11 Bb2 Qe7(c)	b4 Bb7 =	Nc2 d5(i)	Na4 b6(l)	Qxf3 ±	Bb2(p)	

- (a) 7 b4 a5 8 Bb2 axb4 9 axb4 Rxa1† 10 Bxa1 c5 11 e3 Qe7 12 b5, Kramnik–Nikolić, Linares 1997. Black's defense is difficult to crack.
- (b) A good alternative is 8 . . . d5 9 b4 d4 10 Qb2 e5 11 0-0 Re8 12 d3 Nbd7 =, Bacrot–Dautov, Mainz (rapid) 2004.
- (c) 12 d3 ±, Kramnik–Illescas, Dos Hermanas 1997.
- (d) (A) 6 d4?! cxd4 7 Nxd4 d5 ±. (B) 6 e3 0-0 7 d4 is similar to a Nimzo-Indian Defense, for example, 7 . . . d6 8 Be2 Nbd7 9 0-0 Qe7 =, Illescas–Romanishin, Terrassa 1991.
- (e) (A) 8 . . . d5? 9 Na4 b6 10 cxd5 exd5 11 b4 ±. (B) 8 . . . d6 9 d3 h6 10 e3 e5 11 Nd5! Be6 12 Nd2 ±, Vaganian–Dautov, Reggio Emilia 1996. The column is Schlosser–Istratescu, Clermont-Ferrand 2003.
- (f) The principal alternative is 4 . . . 0-0 5 g3 d5 and now: (A) 6 a3 Be7 7 d4 leads to positions resembling the Catalan Opening; for instance, 7 . . . dxc4 8 Ne5 c5 9 dxc5 Qc7 10 Nxc4 Qxc5 11 Qb3 Nc6 12 Be3 Nd4 13 Bxd4 Qxd4 14 0-0 Qc5 15 Rfd1 Bd7! =, Granda Zuniga–Illescas, Barcelona 1990. (B) 6 Qb3 may transpose to column 46: 6 . . . c5 7 0-0 Nc6 8 d3 h6 9 Na4 b6 10 a3 Ba5.

- (g) 7 Qc2 c5 8 a3 Bxc3 9 Qxc3 d5 10 b4 Nbd7 11 d3 Rc8 12 Bb2 Re8 was dynamically equal, Ivanchuk–Adianto, Amsterdam (Donner Memorial) 1996.
- (h) 7 ... d5 8 cxd5 Nxd5 9 Qc2 c5 10 Nxd5 exd5 11 a3 Ba5 12 d4 ±, van Wely–Ivanchuk, Melody Amber (rapid) 2005.
- (i) 12 exd5 exd5 13 Ne3 with pressure on Black's center, Nogueiras–Garcia Ilundain, Cienfuegos (Capablanca Memorial) 1996. The game continued 13 ... Ne5 14 d4 cxd4 15 cxd4 Ng6 16 Ba3 Re8 17 Nf5 Re6 18 c5 Ne4 19 Nd6 Nxd6 20 cxd6 Re8 21 Re1 Rxe1† 22 Qxe1 Qd7 23 Rc1 Re8 24 Qd1 Qb5 25 Bf1 Qa5 26 Qb3 Qd2 27 d7 Resigns.
- (j) The straightforward 5 ... Bxc3 is quite playable, and may transpose to column 43.
- (k) 9 ... d4 tends to overextend Black: 10 Na4 b6!? (10 ... Nd7 11 e3 e5 12 exd4 exd4 13 Ng5 ±, or 12 ... cxd4 13 Qc2 ±) 11 Ne5 Nxe5 12 Bxa8 Qe8 13 Bg2 (Seirawan–Speelman, match 1988), and now if 13 ... Bd7 14 Qa2! Bxa4 15 b4! maintains White's material advantage.
- (l) 12 Ne5 Bd7 13 e3 g5 =, Topalov–Kramnik, Dortmund 2001.
- (m) (A) 5 ... c5 6 e5 Ng8 7 d4 Bxf3?! (7 ... cxd4 8 Nxd4 ±) 8 Qxf3 Nc6 9 d5! Nxe5 10 Qg3 d6 11 Bf4 with powerful pressure on the center, Korchnoi–Petrosian, match 1974. (B) 5 ... d6? 6 d4 Be7 7 Qc2 with an obvious advantage.
- (n) The older 7 d4 is met by Karpov's 7 ... Ne7! and (A) 8 Bd2 0-0 9 0-0 d5 (Korchnoi–Karpov, match (G3) 1974), and if 10 cxd5? Bxc3 11 Bxc3 Ba6! takes control of the light squares (Hartston). (B) 8 Qd3 d5 9 exd6 cxd6 10 Be2 Nd7 11 0-0 Bxc3 12 Qxc3 0-0 13 Bf4 Nf6 14 Qa3 Nf5, Uhlmann–Lerner, Tallinn 1987, with a solid defensive formation for Black. The column is Korchnoi–Portisch, match 1983.
- (o) (A) 5 ... c5 6 e5!? Ng4 7 0-0 (7 h3 Bxf3 8 Qxf3 Nxe5 9 Qxa8 Nxd3† 10 Ke2 Nxc1† 11 Raxc1 Nc6 with an easy defense, Beliavsky–A. Sokolov, Reykjavik 1988) 7 ... Nc6 8 Be4 f5 9 exf6 Nxf6 10 Bxc6 Bxc6 11 d4 Bxf3 12 Qxf3 cxd4 13 Nb5 Rc8 14 Bf4 with a strong attack, Speelman–Short, Barcelona 1989. (B) 5 ... d5 is wild: 6 cxd5 exd5 7 e5 Nfd7 8 Bc2 d4 9 Be4 c6 10 e6! dxc3 11 exf7† Kxf7 12 Qb3† Ke8 13 d4 ∞.
- (p) White has good attacking chances in this Sicilian-like position. 11 ... Nc6 12 Nxc6 Bxc6 13 Qd3 g6 14 a4 Qc7 15 f4 Rad8 16 Qe2 Rfe8 17 Rad1 Bb7 18 Kh1 Qc5? (18 ... Nd7) 19 e5 Nd7? 20 Be4 Bc8 21 exd6 Bf8 (21 ... Bxd6 22 Bg6 hxg6 23 Ne4) 22 Bf3 f5 23 b4! Qxb4 24 Nd5 Qc5 25 Nc7 Nb8 26 Nxe8 Rxe8 27 Qd3 Resigns, Polugaevsky–Petrosian, USSR Team Chp. 1982.

ENGLISH OPENING

1 c4 Nf6 2 Nc3 e6

	49	50	51	52	53	54
3	Nf3e4 b6	c5.....d5				
4	g3 Bb7	e5(e) Ng8		cxd5.....e5 exd5	Ne4.....d4(s)	
5	Bg2 Bb7	Nf3d4 Nc6	d4 cxd4	e5 Ne4(l)	Nf3(o) Be7(p)	exf6 dxc3
6	0-0 0-0	d4 cxd4	Qxd4 Nc6	Nf3(m) Bf5!(n)	d4(q) 0-0	bxc3(t) Qxf6
7	Re1(a) d5(b)	Nxd4 Nxe5	Qe4 d6(i)	Qb3 Nc5	Bd3 Nxc3	d4(u) e5(v)
8	cxd5 Nxd5(c)	Ndb5(f) a6(g)	Nf3 dxe5	Qxd5 Nc6 =	bxc3 dxc4	Nf3(w) exd4
9	e4 Nxc3	Nd6† Bxd6	Nxe5 Bd7(j)		Bxc4 c5	Bg5 Qe6†
10	bx _c 3 c5(d)	Qxd6 f6(h)	Nxd7 Qxd7(k)		0-0 cxd4(r)	Be2 f6(x)

- (a) 7 d4 is a Queen's Indian Defense. 7 b3 can transpose to a Reti Opening, for instance 7 ... d5 8 e3.
- (b) 7 ... c5 8 e4 d6 9 d4 cxd4 10 Nxd4 Qc8 11 b3 a6 12 Bb2 Nbd7 \pm is similar to the Hedgehog Variation, columns 85–90.
- (c) 8 ... exd5 9 d4 is similar to some Queen's Indian Defense variations. After 9 ... Na6 10 Bf4 Qc8 11 Rc1 c5, Black's pawn structure is aggressive but not entirely secure.
- (d) 11 d4 Nd7 12 Bf4 Nf6 13 Ne5 Rc8 14 Qd3 cxd4 15 cxd4 Bb4 16 Red1 Rc3 is about equal chances, Beliavsky–Tiviakov, Belgrade 1993.
- (e) Other moves are less challenging: (A) 4 Nf3 Nc6 5 d4 (5 e5 Ng4) 5 ... cxd4 6 Nxd4 Bb4 is an equal variation of the Sicilian Defense. (B) 4 g3 Nc6 (4 ... d5 5 cxd5 exd5 6 e5 Ne4! 7 Bg2 Nc6! 8 f4 Bf5 is also good for Black) 5 Bg2 d5! is a sound gambit.
- (f) If 8 Bf4 f6! helps Black's cause.
- (g) 9 ... d6? 10 c5! a6 (10 ... dxc5 11 Bf4 \pm) 11 Nxd6† Bxd6 12 cxd6 Nf6 13 Bf4 Ng6 14 Bg3 Bd7 15 h4 with a big advantage, Timman–Najdorf, Haifa 1976.
- (h) 11 Be3 Ne7 12 Bb6 Nf5 13 Qc5 d6 14 Qa5 Qd7! 15 f4 Nc6 16 Qa3 0-0 17 0-0-e5 =, Levin–Seifert, Bad Wörishofen 2003.
- (i) (A) 7 ... f5 still offers scope for creativity: 8 Qe2 d6 (8 ... a6 9 Bd2 Qc7 10 Nf3! Nge7 11 Rc1 Ng6 12 Nd5 \pm , Richardson–Lauber, Budapest 1997) 9 Nf3 dxe5

- 10 Nxe5 Bb4!? 11 Qh5† g6 12 Nxg6 Nf6 13 Qh3 Rg8 14 Nf4 e5 15 Nfd5 f4 with good compensation, Poldauf–Schneider, Budapest 1990. (B) 7 . . . Bb4 8 Bd2 d6 9 Qg4!? dx5 10 Qxg7 Qf6 11 Qg3 Nh6 =, Seirawan–Hort, Bad Kissingen 1981.
- (j) 9 . . . Nf6 10 Nxc6 Qb6 11 Qf3 bxc6 12 Be2 Bb7 13 0-0 c5, Korchnoi–Karpov, World Chp. 1978. Black's divided pawns give White a minimal advantage.
- (k) 11 Bg5 Bb4 12 Rd1 Bxc3† 13 bxc3 Qc7 14 Be2 Nf6 15 Nf3 ±, Miezis–Pogorelov, Reykjavik 2004.
- (l) (A) 5 . . . d4 6 exf6 dxc3 7 Qe2†! Be6 8 dxc3 Qxf6 9 Nf3 ±. (B) 5 . . . Nfd7, see note (s).
- (m) (A) 6 Nxe4 dxe4 7 Qa4† Nc6 8 Qxe4 Qd4 =. (B) 6 d4 Bb4 7 Qa4† Nc6 8 Bb5 Bd7 9 Nge2 0-0! =.
- (n) 6 . . . Nc6 is also strong, and is important because the position can arise by transposition from column 53. 7 Bb5 Nxc3 8 dxc3 Be7 9 0-0 0-0 10 h3 Bf5 =, Arkhipov–Tolnai, Kecskemet 1991.
- (o) 5 Nxe4 dxe4 6 Qg4 Bd7 7 Qxe4 Bc6 8 Qe3 Na6 9 d4 Nb4 10 Kd2 a5 unclear, Seirawan–Timman, Wijk aan Zee 1980.
- (p) 5 . . . Nc6 6 d4 Bb4 7 Qc2 f6 8 exf6 Qxf6 9 a3! Bxc3 10 bxc3 0-0 11 Bd3 ±, Ivanchuk–Aronian, AIG Life Rapid 2003.
- (q) 6 Qc2 Ng5 unclear.
- (r) 11 cxd4 Nc6 12 Be3 b6 13 Rc1 Na5 14 Bd3 Bb7 15 Nd2 Qd7 16 Qg4, Lautier–Christiansen, Biel 1991. White has a strong attack similar to note (p).
- (s) 4 . . . Nfd7 5 d4 c5 6 cxd5 exd5 7 Nf3 Nc6 8 Bb5! a6 (8 . . . cxd4 9 Nxd4 Ndx5 10 Qe2 ±, Quinteros–Nunn, London 1977) 9 Bxc6 bxc6 10 0-0 Be7 11 dxc5 Nxc5 12 Nd4 with a clear plus, Smyslov–Farago, Hastings 1976/77.
- (t) 6 fxg7 cxd2† 7 Bxd2 Bxg7 8 Qc2 Nc6 9 Nf3 Bd7 10 Bd3 Qe7 11 a3 0-0-0 12 0-0-0 Nd4 =, Kholmov–Beilin, USSR 1955.
- (u) 7 Nf3!? e5 8 Bd3 Na6! (8 . . . Bd6 9 0-0 0-0 10 Be4 and 11 d4 with a clear advantage, Korchnoi–Yusupov, Cologne 1990) 9 0-0 Bd6 10 Bc2 Bg4 11 d4 Bxf3 12 Qxf3 Qxf3 13 gxf3 exd4 14 Re1† Kd8 15 Be4 Rb8 16 cxd4 c5 17 Bb2 Kc7 =, van Wely–Rozentalis, Istanbul 2003.
- (v) 7 . . . c5 8 Nf3 and now: (A) 8 . . . cxd4 9 Bg5! Qf5 10 cxd4 Bb4† 11 Bd2 Nc6 12 Bxb4! Nxb4 13 Rb1 Qa5 14 Qd2 Nc6 15 Bd3 Qxd2† 16 Kxd2 with a difficult endgame for Black, Miles–Sosonko, Tilburg 1977. (B) 8 . . . h6 9 Bd3 Nc6 (or 9 . . . cxd4 10 cxd4 Bb4† 11 Kf1!, Seirawan–Korchnoi, Wijk aan Zee 1990) 10 0-0 cxd4 11 cxd4 Nxd4 12 Nxd4 Qxd4 13 Rb1 with dangerous threats, e.g., 13 . . . Qd8 14 Qf3 Be7 15 Rd1 Qc7 16 Rb5 a6 17 Rh5, Dvoretsky–Agzamov, Alma Ata 1976.
- (w) 8 Qe2 Be7 9 dxe5 Qg6 gives Black adequate compensation for the pawn, but not 8 . . . Bd6? (or 8 . . . Nc6) 9 f4 ±.
- (x) (A) 10 . . . dxc3? 11 Qd8 mate. (B) 10 . . . d3? 11 0-0 ±. (C) 10 . . . Be7 11 cxd4 Bxg5 12 Nxg5 Qe7 13 Qd2 leaves White with a minimal advantage. (D) 10 . . . f6 11 Nxd4 Qf7 12 Bf4 Bc5 13 Qa4† c6 14 Nb3 Na6 =, Nogueiras–Timoshenko, Capelle la Grande 2004.

ENGLISH OPENING

King's Indian English

1 c4 Nf6 2 Nc3 g6 3 g3(a) Bg7 4 Bg2 0-0

	55	56	57	58	59	60
5	Nf3	d6			e4(n) d6	
6	0-0 Nc6.....			e5		Nge2 e5
7	d3 Nh5e5				d3 c6(k)	0-0 Nc6(o)
8	d4(b) e5(c)	Rb1 a5(e)			Rb1 Re8	d3 Nh5
9	d5 Ne7	a3 Nd4	h6	Re8	e4(l) a5(m)	Be3 Nd4
10	e4 c5(d)	Bg5(f) Ne6(g)	b4 axb4	Bg5(i) h6	a3 Na6	Qd2 c6
11	Bd2 Bd7 ±	Bd2 c6	axb4 Be6	Bxf6 Bxf6	b4 axb4	f4 Nxе2†
12		b4 axb4 =	b5 Ne7(h)	b4 axb4(j)	axb4 h6 =	Qxe2(p) exf4(q)

- (a) 3 e4 is often played, to transpose to a King's Indian after 3 . . . d6 or 3 . . . Bg7 4 d4 while avoiding the Grünfeld and other defenses to 1 d4. 3 . . . c5 4 Nf3 becomes a Sicilian Defense Maróczy Bind.
- (b) 8 Rb1? f5! 9 Bd2 f4 10 b4 e5 11 Qb3 Bg4 12 Ne4 Kh8 13 b5 Nd4 14 Nxd4 exd4 15 Rbe1 Be5 ─, Andersson–Tal, Sochi 1973.
- (c) 8 . . . f5 9 d5 Ne5 10 Nxе5 dxе5 11 Qb3 ±.
- (d) 10 . . . f5 11 exf5 gxsf5 12 Nxе5! Nxg3 13 hxg3 Bxe5 (13 . . . dxе5!?—Fischer) 14 f4 Bg7 15 Be3 Bd7 16 Bd4 gave White a lasting advantage in Petrosian–Fischer, Portorož 1958. The column is Andersson–Smejkal, Wijk aan Zee 1976.
- (e) 8 . . . Nh5 9 b4 f5 10 b5 Ne7 11 Qb3 Kh8 12 Ba3 Nf6 13 c5 ±, Arencibia–Henry, Canadian Open 2004.
- (f) (A) 10 Nxd4 exd4 11 Nb5 Ng4! 12 h3 c6 13 hxg4 Bxg4! ─. (B) 10 Nd2 c6 11 b4 axb4 12 axb4 d5 =, Smejkal–Smyslov, Biel 1976. (C) 10 Be3!? Ng4 11 Bd2 f5 12 b4, Andersson–Dautov, Ter Apel 1994.
- (g) 10 . . . h6 11 Bxf6 Bxf6 12 b4 axb4 13 axb4 c6 14 b5 Bg4 is also equal, Peyrat–Nijboer, French League 2002. The column is Dzindzichashvili–A. Ivanov, U.S. Chp. 1995.

- (h) 13 Bb2 (13 Nd2 Rb8 leads to similar variations) 13 . . . Qd7 14 Re1 Bh3 15 Bh1 Ng4 16 Qb3 Kh8 with chances for both sides, Olsen–J. Eriksson, Faroe Islands 2005.
- (i) 10 b4 axb4 11 axb4 e4 =.
- (j) 13 axb4 Bg7 14 b5 Ne7 15 Qc2 c6 16 Nd2 unclear, Vaganian–Gallagher, Biel 1994.

- (a) 3 e4 is often played, to transpose to a King's Indian after 3 . . . d6 or 3 . . . Bg7 4 d4 while avoiding the Grünfeld and other defenses to 1 d4. 3 . . . c5 4 Nf3 becomes a Sicilian Defense Maróczy Bind.
- (b) 4 . . . c5 transposes to the Rubinstein-Botvinnik Variation. 4 . . . e5 transposes to columns 15–16.
- (c) The older line is 5 . . . Nxc3 6 bxc3 Bg7, when (A) 7 Nf3 0-0 8 0-0 Nc6 9 Qc2 b6 10 Bb2 Bb7 11 c4 Bxb2 12 Qxb2 Na5 13 c5 ±, Malakov–Ni Hua, Russia vs. China 2006. (B) 7 Rb1 Nd7 8 Nf3 0-0 9 0-0 c5 (9 . . . Nb6 10 Ng5 Rb8 11 Qc2 Bd7 12 d3 Ba4 13 Qd2 Qd7 14 c4 Bc6 is also adequate) 10 c4 Qc7 11 d3 Rb8 12 Bf4 e5 13 Bd2 b6 14 Ng5 Qb7 15 Ne4 Qc6! =, Portisch–Polugaevsky, Hungary 1969.
- (d) (A) 6 d4 is a Neo-Grünfeld. (B) Another plan is 6 Nf3 Bg7 7 0-0 Nc6 8 d3 0-0, and now 9 a4 a5 10 Be3 e5 11 Nb5 Nd5 12 Bc5 Re8 13 Rc1 ± was Dvoretsky–Gulko, USSR Chp. 1974.
- (e) (A) 7 . . . Nc6 8 Bxc6 bxc6 9 Qc1 c5!? 10 Bh6 Bxh6 11 Qxh6 Bb7 12 f3 Qd4 =, Agrest–Zezulkin, Germany 2001. (B) 7 . . . c6 8 Qd2 h6 9 Nf3 N8d7 10 0-0 Nf6 11 h3 Nbd5 gave approximate equality, Bricard–Rogers, Wijk aan Zee 1996.
- (f) 10 h4 c6 11 h5 Nd5 12 hxg6 hxg6 13 Nf3 Nd7 14 Ng5 N7f6 15 Bf3 Bg4, Serper–Ganguly, Calcutta 1995. If Black survives the mating attack on the h-file, his central superiority will become dangerous.

- (g) (A) 5 Qb3 Nb6 6 d4 Bg7 7 Bg65 h6 8 Bh4 Be6 9 Qc2 0-0 =. (B) 5 e4 Nxc3 6 dxc3 (6 bxc3 Bg7 7 d4 is a Grünfeld Defense) 6 . . . Qxd1† 7 Kxd1 f6! 8 Be3 e5 9 Bc4 Nd7 10 Nd2 Bc5 =. (C) 5 g3 may transpose to column 61.
- (h) (A) 6 . . . Bc6 7 Qd4 f6 8 e3 Bg7 9 Be2 e5 10 Qc4 Qd6 (10 . . . Nxc3 11 Qe6† ±) 11 0-0 Nd7 12 d4 f5 13 Qb3 0-0-0 with an awkward defense, Chekhov–Lputian, Kharkov 1985. (B) 6 . . . Nf6 7 e4 Bg4 8 Ne5 Be6 9 f4 Bg7 10 Qf2 ±, Kasparov–Popović, Belgrade 1989.
- (i) 7 Qd4 f6 8 Qxc3 Nc6 9 a3 e5 10 d3 Bg4 11 Nd2 Qe7 =, Hillarp Persson–McShane, Malmö 2003.
- (j) 10 Bc4 h5! 11 Bxe7 (11 0-0-0 f6) Qxe7 12 0-0-0 Qxh4 =, Onischuk–Svidler, Russia 2003.
- (k) 5 . . . e6 6 Nc3 transposes to the Hedgehog Defense.
- (l) 7 Re1 Ne4 8 Nxe4 Bxe4 9 d4!? cxd4 10 Bh6 Bxh6 11 Qxd4 0-0 12 Qxe4 Nc6 unclear, Romanishin–Psakhis, Yurmala 1987.
- (m) 7 . . . Ne4 8 Nxe4 Bxe4 9 d5 leaves the bishop stranded at e4. White may harass it by 10 Qb3, 11 Bh3, and 12 Nd2.
- (n) 8 . . . Nc6 9 Qf4 (9 Qh4 h6!) 9 . . . Rc8 (9 . . . 0-0 10 Qh4!?; 9 . . . Qb8!?) 10 Rd1 0-0 11 Bd2 ±, Kramnik–Benjamin, New York 1994.
- (o) 9 Rd1 Nbd7 10 Be3 0-0 11 Qh4 Rc8 12 Rac1 a6 13 b3 ±. White's queen is active, but safe, and Black's position is dangerously passive.
- (p) 10 e4 Qc7 11 b3 Nxe4 12 Nxe4 Qe5 13 Qf3 Qxd4 14 Rb1 Qe5 15 Bf4 Draw. Karpov–Kasparov, World Chp. 1984.
- (q) (A) 9 Nh4 Nc6 10 f4 a6 11 f5 b5! with attacks on opposite wings, Alburt–Speelman, match 1986. (B) 9 h3 Nc6 10 Be3 a6 11 Qd2 Nd7 12 d4 cxd4 13 Nxd4 Rc8 14 b3 ±.
- (r) 10 h3 Nd7 11 Nh2 Nd4 12 Qd1 a6 13 Be3 b5 14 cxb5 Nxb5 15 Rc1 Qa5 16 Qd2, Korchnoi–Adams, Roquebrune 1992. White's unorthodox ninth move has brought about a tense position in which he has preserved good kingside attacking chances.
- (s) Black's position is satisfactory after 4 Nc3 d5 5 cxd5 exd5 6 d4, a favorable variation of the Queen's Gambit, or 4 Nc3 d5 5 d4 dxc4, a favorable variation of the Catalan.
- (t) (A) 5 Nd4 c6! (5 . . . d5 6 cxb5 axb5 7 Nxb5 c6 also gives compensation) 6 cxb5 axb5 7 Nxb5 cxb5 8 Bxa8 d5 unclear, analysis by Vaganian. (B) 5 Ne5 Ra7 6 cxb5 axb5 7 Qb3 Bb7! 8 0-0 Bxg2 9 Kxg2 c6 =, Vaganian–Korchnoi, London 1984.
- (u) 6 . . . b4 7 Na4 d6! 8 d4 Nbd7 9 0-0 Be7 10 a3 a5 ±, Andersson–Korchnoi, Tilburg 1987.
- (v) White can avoid mass exchanges by 9 e3 or 9 Qc2. After 9 d4 cxd4 10 Qxd4 Qxd4 11 Nxd4 Bxg2 12 Kxg2 bxc4 13 bxc4 d6 14 Na4 Nbd7 (Andersson–Kengis, Yerevan Ol. 1996), White's advantage was minimal.

- (a) 5 e4 Bb7 6 d3 (6 Qe2!? is also interesting) 6 . . . d6 7 Bg2 Be7 8 0-0 0-0 9 Re1 Nc6 10 b3 a6 11 Bb2 Rb8 12 d4 cxd4 13 Nxd4 Nxd4 14 Qxd4, Larsen–Browne, Las Palmas 1983. This position is similar to the column, but White has lost a tempo (moving his d-pawn twice). Black achieved dynamic equality with 14 . . . b5!?.
- (b) 7 d4 Nxd4 8 Nxd4 Bxg2 9 Kxg2 cxd4 10 Qxd4 Be7 11 Rd1 0-0 12 b3 Qc7 13 Bb2 Rfd8, Carlsen–de Firmian, Gausdal 2003.
- (c) An improvement on 12 . . . Qb8 13 Rad1 Rd8 14 Rd2 Bc6 15 Rfd1 a6 16 Qd3 Ne8 17 Qe2 Qb7 18 Nd5!, Lautier–Psakhis, Barcelona 1993. Black's d-pawn is safe, because after 13 Nb5 Qc6! 14 Bxd6 Rfd8 White cannot play 15 e5. The column is Hergott–de Firmian, Linares 1994.
- (d) 7 Re1 d6 8 e4 Nbd7 9 d4 cxd4 10 Nxd4 Qc7 11 Be3 Rc8 12 Rc1 Qb8 13 b3 0-0 =, van Wely–Shipov, Internet 2004.
- (e) 10 Qd2 Na5 11 b3 d5 12 cxd5 Nxd5 13 Nxd5 Qxd5 14 Qe1 Qh5 15 Rd7 Bf6 16 Ba3 Bc6 17 Bxf8 Bxd7 18 Rd1 Rd8 19 Bd6 Be8 20 e4 ±, Karpov–Andersson, Moristico 1989.
- (f) (A) 11 Qxb8 is less precise: 11 . . . Raxb8 12 Bf4 Rac8! 13 Ne5 d6! 14 Nxc6 Bxc6 15 Bxd6 Bxd6 16 Rx d6 Bxg2 17 Kxg2 Rxc4 18 Rad1 g5! with active play, Portisch–Pachman, Amsterdam 1967. (B) 11 b3 Rd8 12 Bb2 a6 (12 . . . d6 13 d4 a6 14 Qe3 Nd7) 13 Na4! b5 14 Nb6 ±, Christiansen–Peters, Los Angeles

1989. (C) 11 Ng5!? Rd8 12 Nge4 Nxe4 13 Bxe4 Na5 14 b3 Bf6 15 Bxb7 Nxb7 16 Qxb8 Raxb8 17 Bd2 Rbc8 18 Rac1 \pm , Aseev–Yudasin, St. Petersburg 1997; Black's pieces are awkwardly posted.

- (g) 11 ... Qxf4 12 Bxf4 Rfd8 13 e5 Ne8 14 Nd4 Na5 15 b3 \pm , Karpov–Petrosian, Milan 1975. The column is Taimanov–Kholmov, USSR Chp. 1967.
- (h) (A) 9 ... a6 10 Ba3! Nc6 (10 ... 0-0 11 Rfd1 Ne8 12 Bb2 \pm) 11 Qf4 Qc7 12 Rfd1 Rd8 13 Rac1 Na7 14 e4 \pm , Novic–Rogozenco, Dubai 2002.
(B) 9 ... Nbd7 10 Nb5!? Nc5 11 Rd1 Nfe4 (11 ... d5 12 cxd5 exd5 \pm , Korchnoi–Johann Hjartarson, St. John 1988; or 12 ... Nxd5? 13 Qxg7! Bf6 14 Nd6† with a winning attack) 12 Qxg7!? Bf6 13 Qh6 Bxa1 14 Ng5 unclear, Korchnoi–Greenfeld, Beersheba 1990.
- (i) 11 ... a6 12 Ba3 Nc5 13 e5 dxe5 14 Qxd8 Rfxd8 15 Nxe5 Bxg2 16 Kxg2 Rdc8 17 Na4! Rab8 18 Bxc5 bxc5 19 Rd3 with strong pressure in the endgame, Vaganian–Nogueiras, Rotterdam 1989.
- (j) 14 Nd4 Qc7 =. This position can be reached by other move orders, such as via column 89, note (o). White has an advantage in space, but Black's position is strongly fortified and pawn breaks via ... b5, ... d5, or even ... e5 must always be watched for.
- (k) 9 Rd1 a6 will transpose to other columns.
- (l) 11 Qd3 Ra7 (not 11 ... 0-0 12 Ng5) 12 Rad1 Be7 13 Nd4 (13 Ne4 0-0!) 13 ... Bxg2 14 Kxg2 Qc8 15 f4 Nc6 =, Sulava–Pelletier, French League 2004.
- (m) 14 Rac1 Nd7 15 Qe3 Be7, Ribli–van der Wiel, Baden-Baden 1992. Black's liberation by ... b5 or ... d5 is nearly impossible, but White's advantage is still small.
- (n) 10 Bg5 Nbd7 11 Nd2 Bxg2 12 Kxg2 Rc8 13 Nde4 Rc6 14 Nxf6† Bxf6 15 Bxf6 Nxf6 16 Ne4 Nxe4 17 Qxe4 Qc7 18 b3 b5 =, Korchnoi–Yermolinsky, Wijk aan Zee 1997.
- (o) 11 e4 Qc8 would transpose to column 87.
- (p) (A) 13 ... 0-0? 14 Ba3 Ne8 15 Nxh7 \pm . (B) 13 ... Rd8 14 Bb2 Nc5 15 Rd2 Qc6 16 Rad1 with a bind, Robatsch–Chernin, Austria 1994.
- (q) 14 Rfd1 Rfd8 15 f3 Ne8 16 Rac1 Rac8 =, Czebe–Kurmann, Lenk 2005.

10	Bg5(b)	Rb1	Qd2	exd4	Nf3	0-0
	f6	d5(g)	Rb8	d5	d5(t)	Bb7
11	Bd2	b4(h)	Rb1	cxd5	d4	Be3
	Be6	cxb4	Bg4	Nxd5	Bf5	Nd4
12	Ne1	AXB4	f3	Nxd5(o)	Rb3	b4
	Kh8(c)	dxc4(i)	Bd7(l)	exd5(p) =	Be4 =	AXB4(x)

- (a) 7 Ne1 Be6! is better than 7 . . . Nge7 8 Nc2 Be6 9 Ne3! 0-0 10 Ned5 ±.
- (b) (A) 10 Bd2 Rb8 11 Ne1 Be6 12 Nc2 (12 Nd5 b5 =) 12 . . . d5 13 cxd5 Nxd5 14 Ne4 b6 15 b4 unclear, W. Schmidt-Wedberg, Haifa 1989. (B) 10 Ne1 Be6 11 Nc2 d5 12 cxd5 Nxd5 13 Ne3 Nde7 unclear.
- (c) 13 Nc2 d5 14 cxd5 Nxd5 with equal chances, van Wely-Leko, Melody Amber 2005.
- (d) (A) 6 d4 cxd4 7 Nb5 d5 8 cxd5 Qa5+ 9 Qd2 Qxb5 10 dx6 Ne7! =, Fishbein-Jansa, Herning 1991. (B) 6 a3 Nge7 7 b4 Nxb4 (7 . . . b6 and 7 . . . cxb4 are also played) 8 axb4 cxb4 9 Ne4 Bxa1 10 Qa4 Bg7 11 Nd6+ Kf8 12 Qxb4, Pavlovic-Fominikh, Novy Smokovec 1990, gives White compensation for the exchange.
- (e) 7 e3 is similar to column 100.
- (f) (A) 8 Bf4 d5 9 cxd5 Nxd5 10 Nxd5 exd5 11 Qd2 Re8 12 Rac1 b6 =. (B) 8 Bg5 h6 9 Bd2 is similar to the column.
- (g) After 10 . . . d6 11 b4 Qd7 White had no useful advantage, Pfleger-Ribli, Germany 1990.
- (h) 11 cxd5 Nxd5 12 Nxd5 Qxd5 13 Bc3 Nd4 =, Wahl-Emms, 4NCL 2000.

- (i) 13 dxc4 Rc8 14 c5 bxc5 15 bxc5 Na5 16 Nb5 (16 Na4 Bc6 17 Qc2 Nb7 \mp , Petrosian–Fischer, USSR vs. Rest of the World 1970) 16... Rxc5 17 Qa4 with just enough compensation for the pawn. White's 16th move was introduced in Larsen–Psakhis, Hastings 1987/88, but with a different move order, similar to note (f)(B), so that it was actually his 17th move.
- (j) (A) 5... e5 is plausible but seldom played. (B) 5... e6 is not bad: 6 Nge2 Nge7 7 0-0 0-0 8 d3 d6 9 Rb1 b6 10 Be3 Nd4 11 b4 Bb7 12 Qd2 Nec6 13 a3 Qe7 with a solid defense, Makarichev–Anastasian, Pavlodar 1987.
- (k) 8 a3 a5 9 Rb1 Ne8 10 d3 Nc7 11 Be3 Nd4 12 b4 axb4 13 axb4 b6 offers White little, Evans–Fischer, New York 1967.
- (l) 13 b4 Nc7 14 f4 b6 15 h3 f5 16 Kh2 Bc6 =, Filip–Gligorić, Moscow 1956. Neither side can easily be budged.
- (m) 5... e5, as in column 97, is playable here: 6 Nge2 Nge7 7 0-0 0-0 8 d3 d6 9 a3 a5 10 Nd5 Rb8 11 Nec3 Nxd5 12 Nxd5 Bd7 13 e4 Ne7 =, Taimanov–Korchnoi, St. Peterburg 2001.
- (n) (A) 7 d4 cxd4 8 Nxd4 d5 (8... Nxd4, attempting to transpose to the column, may be more reliable) 9 cxd5 Nxd5 10 Nxd5 Nxd4 11 Nc3 Nc6 12 Qxd8+ Nxd8 13 Bd2 at least took the game out of symmetrical channels, Andersson–Miles, Tilburg 1981. (B) 7 Nf4 0-0 8 0-0 and now 8... a6, 8... b6, or 8... d6 all lead to a playable game.
- (o) 12 Qb3 is no better: 12... Bxd4 (or 12... Ne7) 13 Nxd5 exd5 14 Bh6 Bg7 15 Bxg7 Kxg7 16 Bxd5 a5! 17 Rac1 a4! 18 Qc3+ Qf6 =, Andersson–Gheorghiu, Moscow 1981.
- (p) 13 Qb3 Be6 14 Be3 Qd7 =.
- (q) (A) 5 d3 has little independent significance, but will usually transpose to columns 97–99. (B) 5 b3 is slow but there are a few traps: 5... e6 6 Bb2 Nge7 7 Qc1!? d6 (7... d5 8 Nxd5; 7... 0-0 8 Ne4) 8 f4 0-0 9 Ne4 e5 10 fxe5 Nxe5 11 Nf3 f5 12 Nf2 N7c6 13 Nxe5 dxe5 unclear, Hort–Gulko, Nikšić 1978.
- (r) 7 Qa4 Nd4 (7... d6!?! 8 Bxc6+?! dxc6 9 Qxc6+ Kf8 with compensation) 8 b4 b5 9 cxb5 Nxb5 10 Nxb5 Rx b5 11 Nf3 Bb7 12 0-0 =, Seirawan–Jansa, Biel 1985.
- (s) 9 c5 a5 10 Ba3 axb4 11 Bxb4 Nxb4 12 Rxb4 Bxc3 13 dxc3 Qc7 14 Qd4 Nf6 15 Nf3 0-0 16 0-0 Bb7 17 Rxb5 Bxf3 =, Tarjan–Gheorghiu, Riga 1979.
- (t) (A) 10... d6 11 d4 Bg4 12 Be3 unclear, Adorjan–Horvath, Hungary 1992. (B) 10... e5 11 d4 exd4 12 Nd5 Nf6 13 Bg5 with pressure. (C) 10... Nf6 11 0-0 0-0 12 d4 d5 13 Bf4 Rb6 14 Qb3 e6 15 Rfc1 \pm , Larsen–Ivkov, Palma de Mallorca 1967. The column is Pirc–Matulović, Maribor 1967.
- (u) (A) 5... a5 at this early stage is a serious weakening; for instance 6 Nf3 e6 7 d4!?! cxd4 8 Nb5 is stronger for White than the analogous gambit in column 98, note (d)(A), because White's knight is secure on b5. (B) 5... d6 6 Rb1 a5 may transpose to column 98 after 7 d3 e5, or to column 100, note (n), after 7 e3 e5.
- (v) 6 b4 Nxb4! (6... cxb4 7 axb4 Nxb4 8 Ba3 with obvious compensation) 7 axb4 cxb4 8 d4 bxc3 9 e3 Ne7 \mp . In this line White can try the interesting sacrifice 8 Nb5!?! Bxa1 9 Qa4 Bf6 10 Nd6+ Kf8 as played in Matemoros–Pogorelov,

Seville 2002. Objectively Black should be better, but White's practical chances are fair.

- (w) 6 . . . Nge7 7 b4 d6 (7 . . . cxb4 8 axb4 d5 9 b5 Ne5 10 cxd5 exd5 11 d4 Nc4 12 e3 \pm) is playable, but Black has no obvious compensation for his concession of space on the queenside.
- (x) 13 axb4 Bc6, Adorjan–Ermenkov, Warsaw 1979. Black has neutralized White's queenside initiative.

RETI OPENING

1 Nf3 d5 2 c4 (Incorporating the Barcza System 1 Nf3 d5 2 g3)

WHEN ALEKHINE LEGITIMIZED the Reti Opening in the 1920s, it included almost any game that began with White's moves Nf3 and c4. Reti popularized this sequence against all defenses, demonstrating the "hypermodern" strategies of flexible restraint of the center pawns and the fianchetto of both bishops. As the opening became accepted, there developed some structure to it and a clearer classification between it and other openings. Nowadays, the Reti Opening refers only to those variations in which Black plays d5; White plays c4 (after Nf3), fianchettos at least one bishop, and does not play an early d4, transposing into the Catalan or Neo-Grünfeld.

White's setup lacks direct aggression and so allows Black the choice of many sensible defensive positions. Compared with the Queen's Gambit, Slav, and Catalan openings, Black appears to have no troubles: he develops his minor pieces without hindrance and can claim his share of the center. White's initiative of the first move does not vanish, however, but takes subtler forms, with pressure and possibilities of expansion in all sectors of the board.

Black boldly responds with 2 ... d4 in columns 1–2. This kind of Reversed Benoni or Benko is underrated. White can achieve an early b4, expanding on the queenside, but Black's control of the center holds the balance if he does not overreach himself. The simple 2 ... dxc4 (column 3) is compliant and allows White an active setup starting with 3 Na3. Solidifying the center with 2 ... c6 3 b3 Nf6 4 g3 Bf5 (columns 4–5) is the London System, championed by Lasker, although White obtains some initiative. More to the point is 4 ... Bg4 (column 6) when Black has only a minor disadvantage. Also 4 ... g6 (column 7) leaves White for choice, so we conclude that 2 ... c6 does not gain complete equality. White avoids the queenside fianchetto in column 8 with 3 g3, allowing Black to capture

and try to hold the pawn on c4. 2 . . . e6 (columns 9–10) is a Neo-Catalan, which would transpose into the Catalan if White plays an early d4.

The Barcza System 2 g3 (columns 11–12) is quite similar to the Reti and may transpose. White first develops his kingside before playing c4. Black does well with 2 . . . Bg4 (column 12), although he could also transpose into a King's Indian Reversed with 2 . . . c5.

KING'S INDIAN ATTACK

1 Nf3, 2 g3, 3 Bg2, 4 0-0 5 d3, 6 Nbd2, 7 e4

THE KING'S INDIAN ATTACK is not, strictly speaking, an opening, but a path for White to follow regardless of Black's opening moves. As the setup is a compact structure on White's side of the board, Black cannot prevent it without unreasonable play. The one exception to this may be 1 . . . f5, when White does better to transpose into a Dutch Defense or English Opening (see column 12, note [o]).

The King's Indian Attack is a creature of modern times. It was popularized in the United States by Evans and Fischer, although now it is seldom used by grandmasters and appeals to players with no time to study involved openings. It can arise from the French Defense (1 e4 e6 2 d3 d5 3 Nbd2 Nf6 4 g3, etc.), the Caro-Kann Defense (1 e4 c6 2 d3 d5 3 Nbd2, etc.), or the Sicilian Defense (1 e4 c5 2 Nf3 e6 3 d3 d5 4 Nbd2 and 5 g3, 6 Bg2, 7 0-0).

Columns 1–6 consider the natural response 1 . . . d5. Column 1 is the main line, if one can speak of a main line in this opening. White obtains kingside chances and Black queenside chances. Attacking players will prefer White's game. In columns 2–3 Black plays 2 . . . c6 and avoids dividing the board into kingside vs. queenside. Columns 4–5 are like a King's Indian Defense Reversed, although Black chooses the restrained 4 . . . e6 in column 4. Black exchanges in the center with . . . dxе4 in column 6, a safe continuation.

Responses other than d5 are covered in columns 7–12. 1 . . . c5 is a good response (columns 7–10), but players with Black must be willing to play the Sicilian Defense after 2 e4, or the Symmetrical English after 2 c4. Against the King's Indian Attack 1 . . . c5 has the advantage over 1 . . . d5 that Black can place his d-pawn on d6 and play systems akin to the Closed Sicilian, where White's knight is passively placed on d2. Black simply copies White's moves in the amusing column 11. Column 12 is a reversed Pirc Defense.

- (g) 4 b3 Nd7 5 Bb2 Ngf6 6 0-0 e6 7 d3 Bc5 8 Nbd2 0-0 9 e4 dxe4 10 dxe4 e5 11 h3 Bxf3 12 Qxf3 Qe7 13 Rad1 b5 is about equal, Ribli–Tal, Montpellier 1985.
- (h) In the first game of his 1997 match with Deep Blue, Kasparov choose the plan 6 b3 Nbd7 7 Bb2 Bd6 8 Nbd2 0-0 9 h3 Bh5 10 e3!? h6. The position is objectively equal, but it is difficult for a computer to form a plan here, so Kasparov was able to win in 45 moves.

- (i) 9 Nbd2 Bc5 10 Nc4 Qe7 11 Ne3 h5!? 12 a3 0-0-0 =, Korchnoi–Flear, Lugano 1986.
- (j) Moves such as 2 ... Nd7 and 2 ... g6 usually transpose into other columns. 2 ... Nc6 allows a Queen's Pawn opening after 3 d4, or transposes into a Pirc reversed after 3 Bg2 e5 4 d3.
- (k) A more active option is 4 d4, making the game a reversed Grünfeld.
- (l) 5 ... Nf6 transposes into column 1.
- (m) 8 Nh4 f5! stops the kingside attack. After 9 f4 b5 10 exf5 exf5 11 Ndf3 b4 12 c4 d4 there are chances for both sides, Meier–Bönsch, Berlin 1992.
- (n) 9 c3 b6 10 Nf1 dxe4 11 dxe4 Qxd1 12 Rxd1 Ba6 =, Torre–Barlov, St. John 1988.
- (o) White can play a reversed Benoni with 5 c4 d4 6 d3 Nf6 (or 6 ... Bd6 and ... Nge7) 7 e3 Be7 8 exd4 and either 8 ... cxd4 or the safe 8 ... exd4 gives Black fully equal chances.
- (p) 9 a4 0-0 10 Bh3!? Qc7 11 Nfd2 Nb6 12 Bxc8 Qxc8 13 f4 exf4 14 gxf4 f5 =, Rizzitano–Dlugy, New York 1983. Various reversed King's Indian positions offer roughly equal chances.
- (q) This position is often reached from a French Defense: 1 e4 e6 2 d3 d5 3 Nd2 Nf6 4 Ngf3. Black can play 4 ... c5, transposing into column 1, but 4 ... Nc6 is a handy alternative.
- (r) 9 c3 a5! 10 Qc2 Be6 11 Ng5 Bd7 =, Csom–Fuchs, Berlin 1968.

KING'S INDIAN ATTACK

1 Nf3

	7	8	9	10	11	12
1c5.....			Nf6	g6(o)	
2	g3 Nc6			g3 g6	g3 Bg7	
3	Bg2 e6.....g6			Bg2 Bg7	Bg2 e5	
4	0-0 Nf6	0-0(d) Bg7		0-0 0-0	d3 d5	
5	d3(a) Be7	d3 d6	Nf6	e6	d3 d6	0-0 Ne7
6	e4 0-0	e4(e) e5	e4 d6(h)	e4 Nge7	e4 e5(l)	c3 Nbc6
7	Nbd2(b) d6	c3 Nge7	Nc3 Bg4	Re1 d5(j)	Nbd2 Nbd7	e4 0-0
8	c3 e5(c)	a3(f) 0-0(g)	h3 Bxf3(i)	Nbd2 b6(k)	Ne1(m) Ne8(n)	Nbd2 b6(p)

- (a) White's most ambitious plan is 5 c4, transposing into the English Opening. He/she must then be ready for 5 . . . d5, when 6 cxd5 exd5 7 d4 becomes a Tarrasch Defense.
- (b) After 7 Nc3 d5! White's queen's knight is misplaced, so 8 exd5 Nxd5 9 Nxd5 Qxd5 = may be best.
- (c) 9 Nc4 h6 10 a4 Be6 =.
- (d) 4 c3 e5 5 d4 cxd4 6 cxd4 e4 7 Ne5 d5 8 Qa4 Bg7 9 Nxc6 Qd7 =, Romanishin–Velimirović, Sarajevo 1984.
- (e) The King's Indian Attack move, but transposing into the English Opening with 6 c4 is more principled.
- (f) 8 Nbd2?! h6 and . . . f5 allows Black an easy initiative on the kingside with little counterplay for White.
- (g) 9 b4 Qd7 10 b5 Nd8 11 a4 a6 12 Na3 axb5 13 axb5 Ne6 with chances for both sides, Dzindzichashvili–Wolff, New York 1992.
- (h) 6 . . . d5 7 Ndb2 0-0 8 exd5 Nxd5 9 Nc4 e5 10 Re1 Re8 11 a4 h6 is another reversed King's Indian Defense. Chances are roughly equal, but Black must beware of tactics.
- (i) 9 Bxf3 Rb8 10 a4 a6 11 Bg2 0-0 12 Bg5 b5 =, Appleberry–Collas, Budapest 1996. White's bishop pair is no advantage in this closed position.

- (j) 7 ... d6 8 c3 0-0?! (8 ... e5!) 9 d4 cxd4 10 cxd4 d5 11 e5 Bd7 12 Nc3 ±, Fischer–Panno, Buenos Aires 1970.
- (k) 9 Nf1 Bb7 10 c3 h6 11 Rb1 dxe4 12 dxe4 Qxd1 with an equal endgame, Kasparov–Bonin (simul), New York 1992.
- (l) Black can transpose into column 9 with 6 ... c5, which gives him fully equal chances. Column 11 considers Black copying White's strategy.
- (m) On 8 Nh4 Black should not continue 8 ... Nh5? 9 Nf5! ±, but 8 ... Ne8, when 9 f4? exf4 would win a pawn.
- (n) 9 f4 exf4 10 gxf4 f5 and White's extra tempo gives him only a tiny initiative, Mironov–Balan, Moscow 1992.
- (o) Players of the Dutch Defense will be happy with 1 ... f5 against the King's Indian Attack, e.g., 1 Nf3 f5 2 g3 Nf6 3 Bg2 d6 4 0-0 g6 5 d3 Bg7 6 Nbd2?! 0-0 7 e4 e5 ±. White should play 6 c4 with a type of English-Dutch if one doesn't wish to play a normal Dutch Defense with 2 d4.
- (p) 9 Re1 Bb7 10 exd5 Nxd5 11 Nc4 Re8 12 Qb3 Qd7 13 Bd2 Rad8 =, Benjamin–Bisguier, Lone Pine 1981. The position is a reversed Pirc Defense.

LARSEN'S OPENING

1 b3

THIS OPENING TAKES ITS NAME from the colorful and charismatic Dane, Bent Larsen, who frequently employed the opening in the second half of the twentieth century. It was also a pet line of Nimzovich's, who began with 1 Nf3 d5 2 b3 (this is covered by transposition in columns 3–4). Its oldest known advocate is the Rev. Owen from the nineteenth century, but today it has no champion, reflecting the offbeat nature of the opening or the practical nature of the times.

Columns 1–2 consider the classic response 1...e5. Black can play to develop quickly with 2...Nc6 in column 1, or to bolster e5 with ...d6 (column 2). 1...d5 2 Nf3 (columns 3–4) is the Nimzovich Attack, though White should consider 2 f4, transposing into Bird's Opening. 2...Bg4 (column 3) is a somewhat odd-looking though decent continuation, while 2...c5 is a reversed Nimzo/Queen's Indian. Column 5 (1...Nf6) and column 6 (1...b6) are less common, but respectable moves.

LARSEN'S OPENING

1 b3

	1	2	3	4	5	6
1e5.....	d5	d5	Nf6	b6(m)	
2	Bb2 Nc6.....	d6(d)	Nf3 Bg4.....	c5	Bb2 g6	Bb2 Bb7

- (o) 5 ... Be7 6 Be2 0-0 7 0-0 a5 8 Nc3 Na6 is also roughly equal, Nurmi–Speelman, Mexico 1978.
- (p) 9 a3 d5 10 Ne2 b5 11 Bxf6!? gxf6 with chances for both sides, Larsen–Wade, Hastings 1972/73.

BIRD'S OPENING

1 f4

THE ENGLISH MASTER H.E. BIRD demonstrated the aggressive potential of this opening in the second half of the nineteenth century. Tartakower revived it, Nimzovich won several beautiful games with it in the 1920s, and later Larsen and Soltis added it to their opening repertoire. It is rarely seen in modern times, but it could be due for a revival soon. While Black experiences no great theoretical difficulties in equalizing, there is nothing wrong with White's unusual strategy of dark-square control, and surprise value should count for something.

1 . . . d5 (columns 1–3) has been the classical response to Bird's Opening. The game becomes a Dutch Defense Reversed. When White obtains strong control of e5 he should have the advantage. Columns 4–5 is the entertaining From's Gambit. White has the option of transposing into the King's Gambit with 2 e4, but the honorable acceptance of the gambit leads to tactical situations. Column 6 is not highlighted by theory, but it is the professional's response to the Bird's Opening, controlling e5 with . . . d6 and minimizing risk.

BIRD'S OPENING

1 f4

	1	2	3	4	5	6
1 d5		e5	(From's Gambit)	c5(q)	
2	Nf3 Nf6			fxe5(j) d6		Nf3 Nf6

- (d) Dutch Defense reversed variations include: (A) 4 d4 Bg7 5 Bd3 0-0 6 Nbd2 c5 7 c3 b6 8 Qe2 Bb7 9 0-0 Ne4 =, Tartakower-Teichmann, Teplice Schonau, 1922. (B) 4 Be2 Bg7 5 0-0 0-0 6 d3 c5 7 Qe1 Nc6 8 c3 Re8 9 Qg3 e5! =.
- (e) Black may do better with 6 . . . b6 7 0-0 Bb7 8 Ne5 Nbd7 9 Bf3 Nxe5 10 fxe5 Nd7 11 d4 f6 ∞.
- (f) 9 Nc3 a6 10 Nxc6 Qxc6 11 Bf3 and White has the more comfortable position, Pirc-Golombek, Bognor Regis 1956.
- (g) The position becomes a Leningrad Dutch reversed. Interesting is 3 . . . e6 4 Bg2 Bc5!? 5 e3 Nbd7 6 b3 b6 7 Bb2 Bb7 8 Qe2 Qe7 =, Kan-Leverett, Hong Kong 1981.

- (h) 7 Nc3 d4 8 Na4 Nd7 9 c4 Qc7 10 b4 Rd8 =, Horvath–Farago, Hungarian Chp. 1976. Other ideas are 7 Qe1 or 7 e3.
- (i) 9 Na3 Nd5 10 Bd2 Bf5 11 Nc4 Re8 12 a4 Qd7 =, Gerzadowicz–Eckert, corr. 1985–87.
- (j) Many players will decline the pawn and gambit one themselves with 2 e4, transposing into the King's Gambit.
- (k) 4 ... Nf6 with: (A) 5 g3 h5?! (5 ... Nc6 6 Bg2 Bg4 7 d3 0-0 8 0-0 ±) 6 d4 h4 7 gxh4! Ne4 8 Qd3 Bf5 9 Bh3! Bg6 10 Rg1 Qe7 11 Rxg6! fxg6 12 Nc3 ±, Tartakower–Prins, Zandvoort 1936. (B) 5 d4 Ng4 6 Qd3 c5 7 Nc3 cxd4 8 Qxd4 0-0 9 Bg5 ±, Heemsooth–Röthgen, corr. 1961–62.
- (l) 6 Ne5 Bxe5 7 dxe5 Qxd1† 8 Kxd1 Nc6 is an equal ending.
- (m) 6 ... Qe7 7 Qd3 f5 8 h3 Nc6 (8 ... g3 9 Nc3! Nf6 10 e4!—Soltis) 9 hxg4 Nf6 10 c3 Ne4 11 Nxe4 fxe4 12 Qe3 Bxg4 13 Nd2 Bf5 14 Nc4 ±, Röthgen–Cording, corr. 1961–62.
- (n) 9 Nh3 gxh3 10 Qh5† Kf8 11 Bc4 Rh7! (11 ... Qe8 12 Qxh3 Qg6 13 0-0 Nc6 14 c3 with good compensation), now 12 Be3 is unclear, but not 12 Qg6? Bb4†! 13 Ke2 (13 c3 Qh4†) 13 ... Rg7 14 Bxh6 Nxh6 15 Qxh6 Qg5 ±. Black can also try 8 ... Bxe5 9 dxe5 Qxd1† 10 Kxd1 hxg5 11 Bxg5 Rh5 (11 ... Be6 12 Nc3) 12 h4 gxh3 13 Bf4 ± (Soltis).
- (o) 8 Ng2 Nc6 9 c3 h5 10 e4 h4 11 e5 Be7 12 Rg1 hxg3 13 hxg3 Rh2 =, Larsen–Zuidema, Beverwijk 1964.
- (p) 9 Qd3 Nc6 10 c3 Bf5 11 e4 Qe7 12 Bg2 0-0-0 13 0-0?! (13 Bf4 ∞) 13 ... Ne5! 14 Qd1 Nf3† 15 Bxf3 gxf3 16 Qxf3 Rxh2! with a strong attack for the material, Antoshin–Panchenko, Leningrad–Moscow 1983.
- (q) Moves such as 1 ... Nf6, 1 ... g6, and 1 ... d6 may transpose into the Closed Sicilian or Pirc Defense. After 1 ... c5 White can play the f4 attack against the Sicilian with 2 e4. In the column White plays the Bird strategy.
- (r) This move, more restrained than 7 ... d5, eliminates Black's problem with the e5 square, ensuring equal chances.

MISCELLANEOUS FLANK OPENINGS

SOMETIMES A PLAYER WILL HAVE a special opening with his or her pet move. This is often a first move on the flank since the more interactive central moves lead quickly to charted territory. Other times a player will start with one of the flank openings, but be willing to transpose into a more mainstream opening when it suits their taste. A third reason to play these openings is to follow one of your main defense strategies with the Black pieces so that you know the strategy. While this may not be the most forcing continuation with White, at least you will not get into trouble. These Miscellaneous Flank Openings are not theoretically critical, but they have practical, surprise, and entertainment value.

Column 1 is a Grünfeld Defense Reversed. Black is all right as long as he doesn't decide to play as if he had an extra tempo. Some players with Black will simply follow White's strategy in the Grünfeld and have troubles. Column 2 is a Queen's Indian Reversed, which allows many possibilities for both sides. Column 3 is theoretically important, as Black plays to prevent c4 with . . . b5. White seems to gain a slight initiative. The King's Fianchetto Opening, 1 g3, is seen in columns 4–6. This can, and usually does, transpose into almost any other opening in which White fianchettos his king's bishop. Columns 4–6 give only variations in which the move order beginning with 1 g3 is the most natural or most common.

Columns 7–12 cover flank openings that are high on entertainment value. Columns 7–8 is the original (perhaps *insane* is a better word) Grob's Attack, 1 g4. This has also been known as the "Spike," which is an apt description of the kingside thrust. The opening gains its name from countless postal games by Henri Grob against readers of his Swiss newspaper column. The Queen's Knight Attack, 1 Nc3 (columns 9–10), could transpose into the Vienna Game after 1 . . . e5 2 e4, but White usually seeks unknown lines. 1 b4 is the most theoretically important of the Flank Openings.

MISCELLANEOUS FLANK OPENINGS

	1	2	3	4	5	6
1	Nf3	d5	Nf6(h)	g3 (King's Fianchetto Opening) e5.....	g6.....	Nf6

Benko–Fischer, Curaçao Candidates 1962. The opening has transposed into a
type of Pirc Defense.

MISCELLANEOUS FLANK OPENINGS

	7	8	9	10	11	12
	(Grob's Attack)		(Queen's Knight Attack)			
1	g4.....	d5(a)	Nc3.....	b4(p)		
2	Bg2.....	h3	e4(i)	Nf3(m)	Bb2	Bb2(t)
	c6(b)	e5	dxe4(j)	Nc6	f6(q)	e6!
3	h3(c)	Bg2	Nxe4	d4	e4!?	b5
	h5	c6(f)	e5	cxd4	Bxb4	b6
4	g5	d4	Nf3	Nxd4	Bc4	e3
	h4(d)	e4	Nf6	g6	Ne7	Bb7
5	e4	c4	Nc3	Be3(n)	Qh5†	Nf3
	dxe4	Bd6(g)	Bg4	Bg7	Ng6	Be7
6	Nc3	Nc3	Be2	Nxc6	f4	Be2
	Qa5	Ne7	Nc6	bxcc6	exf4	0-0
7	Nxe4	Bg5	d3	Bd4	Nf3	0-0
	Bf5(e)	f6(h)	Bb4(k)	Nf6(o)	Qe7(r)	d5!(u)

- (a) 1 ... e5! 2 h3 d5 transposes into column 8, but 2 Bg2?! h5 3 gxh5 Qg5! 4 Bf3 Qh4! 5 Nc3 Nf6 6 e4 Bc5 7 d4 Bxd4 8 Qe2 Bxc3+ 9 bxc3 Rxh5 is very good for Black, Skembriš–Mariotti, Budapest 1983.
- (b) (A) 2 ... Bxg4 3 c4 c6 4 Qb3 Qb6 5 cxd5 Nf6 6 Nc3 Qxb3 7 axb3 cxd5 =, Vlassov–Ponomarov, Yalta 1995. (B) 2 ... e5 3 c4 c6 4 cxd5 cxd5 5 Qb3 Ne7 6 Nc3 Nbc6 7 h3 Nd4 8 Qd1 a6 9 e3 Ndc6 10 d4 ± (Grob).
- (c) (A) 3 c4 dxc4 4 b3 cxb3 5 Qxb3 e6 6 Nc3 Qb6 ≠. (B) 3 g5 (the “Spike”) 3 ... h6! 4 h4 hxg5 5 hxg5 Rxh1 6 Bxh1 Qd6 7 Nf3 Bg4 8 d3 e5 ≠.
- (d) Probably better is 4 ... e5 5 d4 e4 6 Nc3 Ne7 with chances for both sides.
- (e) 8 Nc3 e6 9 Be4 Nd7 10 Qe2 Bb4 11 Bxf5 Qxf5 12 Ne4 0-0-0 13 a3! Bf8 14 d3 Kb8 15 Bd2 Ne7 16 Nf3 Ng6 17 0-0-0 ±, Skembriš–Gheorghiu, Skopje 1984.
- (f) 3 ... Nc6 4 c4 dxc4 5 Qa4 Nge7 6 Nf3 Ng6 7 Nc3 Be6 8 h4 Nf4 is equal according to Harding.
- (g) 5 ... Na6 6 Nc3 Nc7 7 f3 f5 8 cxd5 cxd5 9 Qb3 Bd6 10 Kf1 Ne7 11 g5 Rb8 12 h4 b5 13 Nh3 Bd7 =, Basman–King, British Chp. 1984.
- (h) 8 Bd2 0-0 9 Qb3 Kh8 10 Rc1 Na6 11 e3 f5 ≠, Basman–Kudrin, Manchester 1981.

- (i) (A) 2 d4 Nf6 3 Bg5, see Veresov Attack. (B) 2 e3 e5 becomes a Van't Kruijs.
- (j) 2 ... d4 3 Nce2 e5 4 f4 exf4 5 Nx_f4 Bd6 6 d3 Ne7 7 c3 Ng6 8 Nx_g6 hxg6 9 Qa4+ Nc6 10 Nf3 Bg4 11 Bg5 f6 12 Bd2 Bg3† 13 hxg3 Rxh1 14 Nxd4 Qd7 =, Hector-Hjartarson, Reykjavik 1984.
- (k) 8 Bg5 0-0 9 0-0 Bxc3 10 bxc3 h6 =, Eising-Capelan, Solingen 1968.
- (l) (A) 1 ... e5 2 Nf3 Nc6 3 d4 exd4 4 Nxd4 leaves White chances for the initiative. (B) 1 ... f5? 2 e4 fxe4 3 d3 exd3 4 Bxd3 Nf6 5 g4! is a From's Gambit reversed, combined with an auspicious Grob's Attack.
- (m) 2 d4 cxd4 3 Qxd4 Nc6 4 Qh4 g6 5 Bd2 Bg7 6 e4 d6 7 0-0-0 Be6 8 Nd5 Bxd5 9 exd5 Qb6 is equal (Benjamin).
- (n) 5 Bf4?! d6! is good for Black. 5 e4 transposes into the Accelerated Dragon.
- (o) 8 Ne4 Rb8 9 Nx_f6† Bxf6 10 Bxf6 exf6 11 Qd4 d5 12 0-0-0 Qe7 = (Korn). The Queen's Knight Attack has also been known as the "Dunst Opening."
- (p) Other unusual first moves are: (A) 1 a3, a waiting move employed by Adolf Anderssen in three match games with Morphy. On 1 ... e5 White can play c4 with a reversed Sicilian, or English-type opening. Almost any reply by Black allows equal chances. (B) Saragossa's 1 c3 is well met by 1 ... b6, or 1 ... d5 with a queen's pawn game. (C) 1 e3 (the Van't Kruijs) can be met by 1 ... e5 2 Nc3 d5 3 d4 exd4 = (Blackburne, 1883). Moves such as 1 h3, 1 h4, 1 Na3 (the Durkin), or 1 Nh3 (the Paris Gambit) require no opening analysis.
- (q) (A) 2 ... Bxb4 3 Bxe5 Nf6 allows Black quick development while White has a stronger center due to his extra center pawn. Freimann-Shipman, National Open 2004, continued 4 Nf3 Nc6 5 Bb2 d5 6 e3 0-0 7 Be2 Re8 8 0-0 Bg4 =. (B) 2 ... d6 and 3 ... g6 is another reasonable plan.
- (r) 8 Bb3 Nc6 9 Nc3 Bxc3 10 Bxc3 d6 11 Nh4 Bd7! ≡, Tawbeh-Soloman, Novi Sad Ol. 1990.
- (s) A curious line is 1 ... c6 2 Bb2 Qb6 3 a3 a5 4 c4 axb4 5 c5! Qc7 (5 ... Qxc5? 6 axb4 wins) 6 axb4 Rxa1 7 Bxa1 though this is about equal, Nekrasov-Lyuborsky, USSR 1970.
- (t) 2 Nf3 (or rather 1 Nf3 Nf6 2 b4) constitutes "Santasière's Folly," which he successfully practiced for decades in the mid-twentieth century.
- (u) 8 d3 c5 9 Nbd2 Nbd7 10 c4 Bd6 11 Re1 Qc7 =, Miles-Ribli, London 1984.

MCO-15 The Chess Player's Bible

For almost a century, **MODERN CHESS OPENINGS** has been the most comprehensive one-volume reference about chess openings on the market. This fifteenth edition of MCO has been completely revised and updated to reflect all of the latest changes in the game, including recent tournament matches and important works on theory.

Whether you are a beginner interested in learning the fundamentals, an intermediate player ready to elevate your game, or an International Grandmaster who wants to stay on top of all the recent chess innovations, MCO-15 is the best and most trusted tool for learning chess openings.

* * *

NICK DE FIRMIAN is a world renowned expert on chess openings. He "taught" the supercomputer Deep Blue the opening moves it used to defeat World Champion Garry Kasparov in 1997. Mr. de Firmian is an International Grandmaster and a three-time United States Chess Champion.

Random House
CHESS METER

BEGINNER	INTERMEDIATE	ADVANCED
Beginner: Possibly knows how the pieces move; no knowledge of openings or game strategy.		
Intermediate: Knows some openings and basic endgames; has some knowledge of strategy and tactics; may play in tournaments.		
Advanced: Knows openings and endgames; understands strategy and tactics; probably plays in tournaments.
